OWG issue briefs - session 6 (3 of 5).zip

UNSD org chart with mngt names_2013 Sept.pdf

Dear all,

The FOC Group has decided to provide the OWG with some statistical background in preparation of its meeting, starting next November.

We are now able to clarify the process to produce these statistical notes. You will find enclosed some pieces of information and guidelines concerning the production of statistical notes for the OWG meetings.

The package is composed of:

(i) the work plan for the statistical notes,
(ii) a template for the drafting of the statistical notes,
(iii) the draft statistical note for 'Education and culture', plus the respective issue brief as an example
(iv) issue briefs for sessions 1 to 4, session 5 and session 6 (3 out of 5)
(v) UNSD organization chart

As you can see it in the work plan, **we still need additional volunteers on issues where no country has volunteered to contribute so far**. Your participation would be appreciated; it is a mean to be actively involved in the process of the formulation of targets and indicators.

UNSD will be coordinating the drafting of the statistical notes. As shown in the work plan, for each statistical note one branch at UNSD has been designated as the 'Responsible branch' which will organise the drafting process and be responsible for the timely delivery. Lead authors can be countries, the responsible branch or an organization. At UNSD additional units/branches might be contributing to a specific statistical note. Also, UNSD will consult with international/ regional organizations responsible for specific statistical areas, as applicable.

Countries that volunteered for the statistical notes for the November OWG session can expect to be contacted shortly.

Many thanks for your cooperation, we are looking forward to reading you.

Best Regards,

Philippe Cuneo, Co Chair of the FOC Group

Claire Plateau, Sustainable development coordinator
