LIST OF TABLES

Coding scheme

Table 1: Population with and without disabilities by age, sex and urban/rural residence

- a) Total
- b) Urban
- c) Rural

Table 2: Population 5 - 29 years of age with and without disabilities by school attendance, single years of age, sex and urban/rural residence

- a) Both Sexes - Total
- b) Male - Total
- c) Female - Total
- d) Both Sexes - Urban
- e) Male - Urban
- f) Female - Urban
- g) Both Sexes - Rural
- h) Male - Rural
- i) Female - Rural

Table 3: Population with and without disabilities by activity status, age, sex and urban/rural residence

- a) Population with disabilities - Both Sexes - Total
- b) Population without disabilities - Both Sexes - Total
- c) Population with disabilities - Male - Total
- d) Population without disabilities - Male - Total
- e) Population with disabilities - Female - Total
- f) Population without disabilities - Female - Total
- g) Population with disabilities - Both Sexes - Urban
- h) Population without disabilities - Both Sexes - Urban
- i) Population with disabilities - Male - Urban
- j) Population without disabilities - Male - Urban
- k) Population with disabilities - Female - Urban
- l) Population without disabilities - Female - Urban
- m) Population with disabilities - Both Sexes - Rural
- n) Population without disabilities - Both Sexes - Rural
- o) Population with disabilities - Male - Rural
- p) Population without disabilities - Male - Rural
- q) Population with disabilities - Female - Rural
- r) Population without disabilities - Female - Rural

General instructions for completing the questionnaire

Data

1. Give all figures unrounded in units rather than thousands.
2. Use the following symbols in the tables:
 - 0 when figure is zero
 - ... when data are not available
 - .. when not applicable
3. Provide the reference date in the appropriate box on top of each table. If a table consists of various subtables please provide the date on the worksheet for subtable (a) only. It will be automatically copied to the remaining subtables.
4. If it is not possible to supply figures classified or defined exactly as indicated in the tables, please give such data as are available and explain the differences in the notes box provided after each table. You can provide a different age structure by changing the boundaries of the provided age classes in the two left columns entitled "From" and "To". Please note that "+" represents an open age class. For example: "15 years and over" needs to be noted as "15" in the "From"-column and "+" in the "To"-column.
5. Please explain special characteristics of the data in the notes box provided after each table. Please make the explanations as detailed as necessary to enable proper interpretation of the figures and valid international comparison.

Metadata

6. Please provide metadata necessary for accurate coding of the data on the worksheet entitled "**Coding scheme**".

7. A metadata questionnaire entitled "**Part 2. Metadata**" is provided as a separate file. Please provide information that best describes the data, e.g. on the inclusion or exclusion of persons living in the institutions and on the disability related questions that were asked.

DEFINITIONS

In all tables, the definitions desired are listed below. If other definitions are used, please explain the differences in the space provided below each table.

Human functioning and disability

The definitions and classifications relating to human functioning and disability follow the *WHO, International Classification of Functioning, Disability and Health (ICF), Geneva, 2001*. The classification is available at:
<http://www3.who.int/icf/icftemplate.cfm>

Human functioning is an umbrella term encompassing all body functions, activities and participation.

Disability describes human functioning that is in some way restricted. It serves as an umbrella term for impairments of body structure and function, activity limitations or participation restrictions.

Human Functioning and Disability	
Functioning	Disability
Body function and structure	<i>Impairments</i> of body function and structure
Activities	<i>Activity limitations</i>
Participation	<i>Participation restrictions</i>

Age

The age definition desired is "age at last birthday" or completed years.

School attendance

School attendance is defined as attendance at any regular accredited educational institution or programme, public or private, for organized learning at any level of education.

Activity status

The definitions and classifications relating to activity status follow the *Resolution concerning statistics of the economically active population, employment, unemployment and underemployment*, adopted by the Thirteenth International Conference of Labour Statisticians (October 1982). The resolution is available at:
<http://www.ilo.org/public/english/bureau/stat/download/res/ecacpop.pdf>
