

**Table 34****Production of heat – by type**

Terajoules

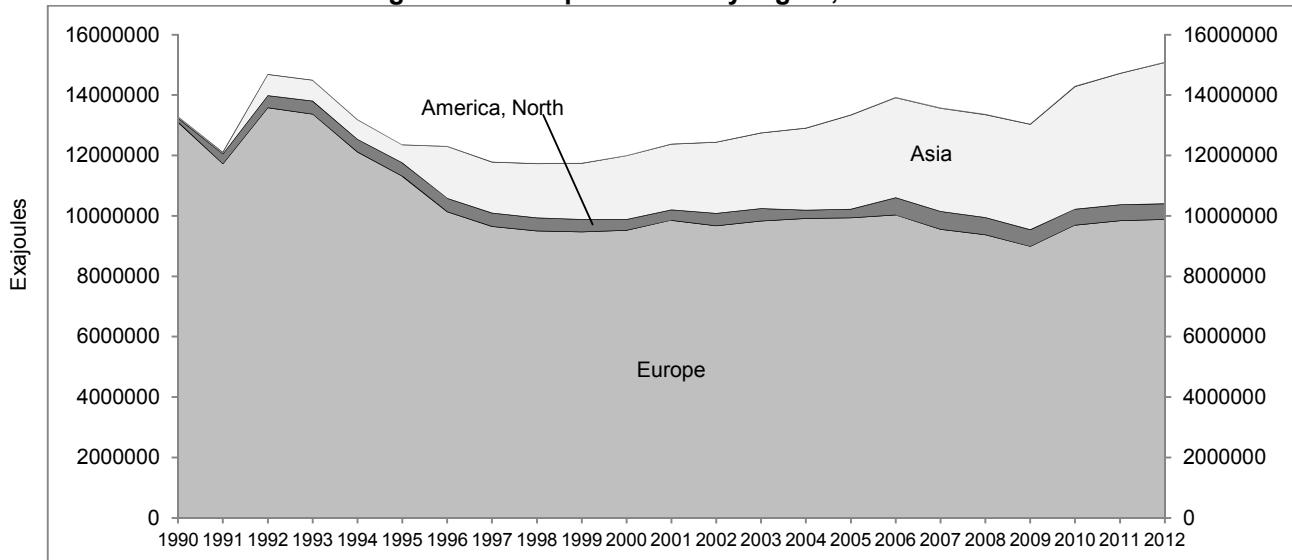

**Table Notes**

Production of heat by type.

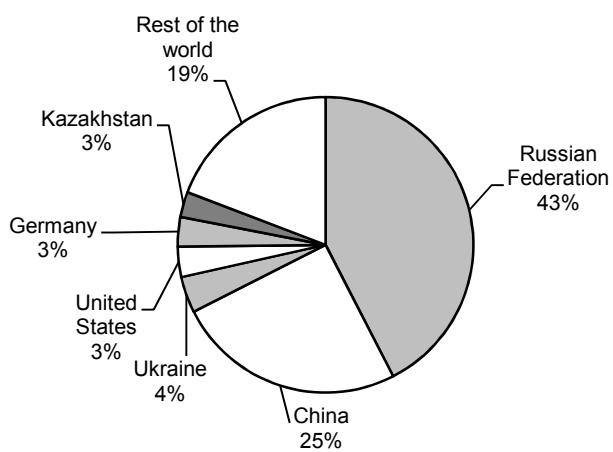

Direct use geothermal represents heat used directly for district heating, agriculture etc. without a commercial transaction taking place.

Direct use solar thermal represents heat used for the production of domestic hot water or for the seasonal heating of swimming pools (e.g. flat plate collectors, mainly of the thermosyphon type) without a commercial transaction taking place.

Please refer to the Definitions Section on pages ix to xv for the appropriate product description /classification.

**Figure 84: Heat production by region, 1990-2012**

**Figure 85: Major heat producing countries, 2012**

**Figure 86: World heat production, by type, in 2012**
