

Global Civil Registration and Vital Statistics Group

Work plan: July 2016 –June 2018

Scope of work

Successive two-year work programs will be developed and implemented through 2030. The Group will focus on combining efforts and work to contribute to support the following:

Specific tasks that will be undertaken July 2016 –June 2018 are:

- Update the list of initiatives and projects on CRVS including those led by members where contributions will be sought from the Group, with the expected dates/timelines
- Contribute to developing the following international tools and standards – legal framework for CRVS and identity management systems
- Convene and organize seminars or side-events on CRVS
- Contribute to developing operational guidelines for the evaluation of geographic coverage of civil registration and the completeness of the registration of vital events
- Develop a CRVS eLearning course
- Contribute to ensuring CRVS standards, tools and lessons learned are available on CRVS websites
- Assist the regional networks to collaborate and share best practices
- Contribute to the efforts of the Health Data Collaborative to implement advocacy efforts in support of CRVS
