- 5B. Number of departing migrants by country of birth, citizenship and sex
6. Number of incoming migrants by country of last residence and number of departing migrants by country of future residence, and by sex

Explanation to the structure and underlying principles of the tables:

This set of tables is meant to give the overall picture of the movements of people to and from the country, and covers all individuals, irrespective of citizenship, who enter or leave the country in a given period, i.e., year, irrespective of the mode of transportation or the border crossed.

Also, note that the status/reason for admission/purpose of stay/ determined for foreigners and citizens is in reference to the foreign country - for foreigners it refers to this country (that they are entering or leaving), and for citizens it is the country abroad (that they are leaving to or arriving from).

Table 1 captures movements that are generally not considered as international migration, either because of the reason for admission/purpose of stay, or the duration of stay (visit). Table 1A collects information on the inflows of foreigners by reason for admission and outflows of foreigners by status in the country at the time of departure; (where foreigner is a person who is citizen of another country). Table 1B collects information on the inflows of citizens by purpose of stay abroad and outflows of citizens by purpose of stay abroad.

Tables 2 and 3 are to capture movements of migrants (foreigners and citizens) as defined in the United Nations Recommendations. Tables 2A, 2B, 3A and 3B collect information on short and long term movements from one country to another (for a duration of stay --actual or intended).

The status of the foreigner's stay is in reference to the reason of admission into the country. For citizens status is represented in tables 3A and 3B in relation to the purpose of their travel or stay abroad.

Tables 4, 5, and 6 collect demographic characteristics of the long term migrants defined as those who change their country of usual residence of 12 months or more. of one year or more should match with the totals in tables 4A to 6. Where there is no match please explain the reasons.

GENERAL INSTRUCTIONS FOR COMPLETING THE QUESTIONNAIRE

1. Please fill in all the cells to the extent possible, using the following symbols, as appropriate.

- when figure is zero.
- ... when data are not available.
- * when data are provisional.
- .. when category is not applicable.

Please use and provide explanation on additional symbols, if necessary, to ensure that your country's data are accurately presented in the international yearbooks.

2. Data should preferably refer to calendar year, that is from 1 January to 31 December of the reported year. If this is not possible, please specify the twelve-month period of time the data refer to.
3. To be sure that national data are comparable, please indicate the unit of tabulation (either persons or events). Ideally the unit should be persons rather than events.
4. Please provide provisional data if final figures are not yet available and use the symbol '*' as indicated in paragraph 1 (above).
5. If it is not possible to supply figures in conformity with the classifications or definitions requested, please give the available data, making the necessary adjustments in column headings or in the stubs. It is recognised that the data may not be tabulated according to the categories requested in the tables. Where breakdowns are not available please complete the totals for the corresponding variable: if categories differ from what is being requested please make the appropriate changes in the column headings or row stubs as necessary and provide the corresponding figures.
6. Please supply a list of the principal publications of your country in which international migration or travel statistics are published. Attach an extra sheet to this questionnaire listing these publications, if necessary.
7. Dependents in tables 2A, 2B, 3A and 3B refer broadly to persons, irrespective of age whose reason for admission or stay is determined by the reason for admission or stay of others (i.e. the primary visa or permit holder under the respective category).

Questionnaire on International Travel and Migration Statistics

Concepts and definitions as applied in Tables 1A/1B, 2A/2B and 3A/3B

The UN Recommendations on Statistics of International Migration, Rev 1 (sales no E.98.XVII.14, is available on-line, at http://unstats.un.org/unsd/publication/SeriesM/SeriesM_58rev1E.pdf) defines:

Country of usual residence: The country in which a person lives, that is to say, the country in which he or she has a place to live where he or she normally spends the daily period of rest. Temporary travel abroad for purposes of recreation, holiday, visits to friends and relatives, business, medical treatment or religious pilgrimage does not change a person's country of usual residence.

Long-term migrant: A person who moves to a country other than that of his or her usual residence for a period of at least a year (12 months), so that the country of destination effectively becomes his or her new country of usual residence. From the perspective of the country of departure the person will be a long-term emigrant and from that of the country of arrival the person will be a long-term immigrant.

Short-term migrant: A person who moves to a country other than that of his or her usual residence for a period of at least 3 months but less than a year (12 months) except in cases where the movement to that country is for purposes of recreation, holiday, months but visits to friends and relatives, business, medical treatment or religious pilgrimage. For purposes of international migration statistics, the country of usual residence of short-term migrants is considered to be the country of destination during the period they spend in it.

Please provide definitions for the following terms as used in your country for compiling international migration statistics: If the exact concept is not used, please provide parallel concepts with their definitions where appropriate.

ESTIMATION OF THE DURATION OF STAY

In addition to the information on the type of data sources used, we would like to know for tables 2A, 2B, 3A and 3B the methods of estimation used to capture the duration of stay. Please state whether it was intended or actual. We here present a list of options that can be inserted in the table. Please tick as many option as are applicable.
Please feel free to add any further information that describe the methods of estimation used in your country.
