The purpose of this questionnaire is to collect in a uniform manner census data on a variety of topic for inclusion in the Demographic Yearbook and other statistical publications and technical studies of the United Nations.

The tabulations requested are in agreement with the Principles and Recommendations for Population and Housing Censuses (United Nations publications, Sales No. E. 80. XVII. 8).

GENERAL INSTRUCTIONS FOR COMPLETING QUESTIONNAIRE

1. Before starting to complete the tables, please read carefully instructions and notes a, b, c, etc. following each table form.
2. In completing the questionnaire, the following procedures are suggested:
 - a. Give all figures unrounded, i.e. to the last digit rather than rounded to the nearest tens or thousands.
 - b. Use following symbols
 - when figure is 0
 - ... when data are not available
 - * when data are preliminary or provisional
 - c. Compare all tables to be sure that totals agree. If there are differences between tables, please explain in notes.
3. If it is not possible to complete all cells in each table, please give whatever figures are available.
4. If it is not possible to supply figures classified or defined exactly as indicated in the tables, please give the data that are available.
5. Please make liberal use of notes to explain special characteristics or qualifications of the data in order to permit valid international comparisons between population census statistics.
6. All population statistics should agree with the total population shown in table 1. If there are disagreements, please explain fully in the footnotes.
7. If any data are based on a sample of the population, please indicate in the table and explain fully in footnotes.
8. In tables showing distributions by age, the age definition desired is 'age at last birthday' or completed years. If age definition is not age at last birthday but is given in other terms (such as age at nearest birthday, age at next birthday or difference between year of birth and year of census), please explain definition for each table.
