

**United Nations Statistics Division - Demographic Statistics Division
Population Census Questionnaire: General Characteristics
Part 1. Data**

Country: Taka-Tuka-Land

Reporting year: 2008

For assistance with this questionnaire, please contact:

Mr. Jeremiah Banda
Chief
Demographic and Social Statistics Branch
Statistics Division
United Nations

E-mail: dybquest@un.org
Telephone: 1-212-963-8338
Facsimile: 1-212-963-1940

General instructions for completing the questionnaire

Data

1. Give all figures unrounded in units rather than thousands.
2. Use the following symbols in the tables:

0 when figure is zero
leave blank when data are not available or category is not applicable (provide details in the notes box)
3. If figures are unavailable or not yet available for a table please indicate this in the notes box provided after each table. If your data is provisional please also indicate this in the notes box.
4. The figures available in the files of the United Nations Statistics Division are presented for each table for your review. Provisional data or data of uncertain reliability are set in italics. Please verify these data and if necessary provide revised figures.
5. If it is not possible to supply figures classified or defined exactly as indicated in the tables, please give such data as are available and explain the differences in the notes box provided after each table. For some tables, you can provide a different classification by changing the provided categories in the left column following the format provided. Please note that "+" represents an open class. For example: "10 to 14 years" needs to be noted as "10 - 14", "less than 5 years" needs to be noted as "0 - 4" and "15 years and over" needs to be noted as "15+".
6. In tables showing distributions by age, the age definition desired is 'age at last birthday' or completed years. If age definition is not age at last birthday but is given in other terms (such as age at nearest birthday, age at next birthday or difference between year of birth and year of census), please explain definition for each table
7. All population statistics should agree with the total population shown in tables 1a or 1b. If there are disagreements, please explain fully in the footnotes.
8. If any data are based on a sample of the population, please indicate in the table and explain fully in footnotes
9. Please explain any special characteristics of the data in the notes box provided after each table. Please make the explanations as detailed as necessary to enable proper interpretation of the figures and valid international comparison.

FOR UNSD USE ONLY

Desk Officer

Table 3. Population in localities by size of locality and by sex

Size-class of locality	Number of localities	Population		
		Both Sexes	Male	Female

NEW OR REVISED FIGURES (see below for data on our files)

Total				
In localities				
1 - 199				
200 - 499				
500 - 999				
1 000 - 1 999				
2 000 - 4 999				
5 000 - 9 999				
10 000 - 19 999				
20 000 - 49 999				
50 000 - 99 999				
100 000 - 499 999				
500 000 - 999 999				
1 000 000 - 4 999 999				
5 000 000 - 9 999 999				
10 000 000 +				
Not in localities				

Table 3. Population in localities by size of locality and by sex

Size-class of locality	Number of localities	Population		
		Both Sexes	Male	Female

- a. A locality is defined as a distinct population cluster (also designated as inhabited place, populated centre, settlement, and so forth) in which inhabitants live in neighbouring sets of living quarters and that has a name or a locally recognized status.
- b. If total population differs from figures given in table 1a, please explain
