

Annex 2.1

Non-exhaustive list of areas in which health indicators may be established (according to the Community action on health monitoring¹)

A. Health status

1. Life expectancy
 - life expectancy at certain ages
 - health expectancies
2. Mortality
 - overall
 - causes of death
 - disease-specific survival rates
3. Morbidity²
 - disease-specific morbidity
 - co-morbidity
4. Functioning and quality of life
 - self-perceived health
 - physical disability
 - activity limitations
 - functional status/ability
 - health-related work loss
 - mental health
5. Anthropometric characteristics

B. Life style and health habits

1. Tobacco consumption
2. Alcohol consumption
3. Illegal drug consumption
4. Physical activities
5. Diet
6. Sex life
7. Other

C. Living and working conditions

1. Employment/unemployment
 - occupation
2. Work environment
 - accidents
 - exposure to carcinogenic and other dangerous substances
 - occupational diseases
3. Housing conditions
4. Home and leisure activities
 - accidents at home
 - leisure
5. Transport
 - car accidents
6. External environment
 - air pollution
 - water pollution
 - other types of pollution
 - radiation
 - exposure to carcinogenic and other dangerous substances outside the work environment

D. Health protection

1. Sources of financing
2. Facilities/manpower
 - health-resource utilisation
 - health-care personnel
3. Cost/expenditure
 - in-patient care
 - out-patient care
 - pharmaceutical products
4. Consumption/uses
 - in-patient care
 - out-patient care
 - pharmaceutical products
5. Health promotion and disease prevention

E. Demographic and social factors

1. Gender
2. Age
3. Marital status
4. Region of residence
5. Education
6. Income
7. Population subgroups
8. Health-insurance status

F. Miscellaneous

1. Product safety
2. Others

¹ source: Official Journal of the European Communities, No C 220, p. 42-43 (1996); Decision No. 1400/97/EC

² underlined: areas that might be (partly) measured by means of health interview surveys

Annex 3.3

A description of health interview surveys and other health related surveys in 18 European countries

Austria

The Austrian Central Statistical Office (Österreichisches Statistisches Zentralamt) started a Microcensus in 1967. This multi-purpose survey focuses not only on the labour force, but includes also various areas of all kinds of social statistics. The census is conducted four times a year, and consists of a core questionnaire and a supplementary questionnaire. The first part, which is compulsory, consists of an invariable basic questionnaire, that includes questions on housing conditions and occupational activities. The additional questionnaire is voluntary and focuses on varying areas, including health matters.

Data are collected through face-to-face interviews by about 1,200 interviewers. The sampling ratio is 0.9% of all dwellings and the gross sample size amounts to 30,000 dwellings. Generally all persons living in the selected dwellings are interviewed, and the sample includes approximately 60,000 persons. The response rate is circa 90% for the compulsory questionnaire and at least 70% for the additional questionnaires.

Up till now the whole special questionnaire was dedicated to questions concerning health (*Fragen zur Gesundheit*) in 1973, 1983, and 1991. Moreover, in 1978 health matters took an important place within the Austrian part of the OECD's Comprehensive Survey. In addition, other surveys dealing with special aspects of health statistics were included in the Austrian Microcensus: three surveys on physical disabilities (*Personen mit körperlichen Beeinträchtigungen*; in 1976, 1986, and 1995), three surveys on smoking habits (*Rauchgewohnheiten*; in 1972, 1979, 1986), and three surveys on accidents at home, during leisure time and sport activities (*Sport-, Freizeit- und Häusliche Unfälle*; 1970, 1980, 1989). In general people of all ages are addressed. Only the questionnaire on smoking habits is directed at persons, who are at least 16 years old. In contrast to the other censuses, the census on disabilities includes persons who are institutionalised, as for instance nursing homes, homes for elderly and cloisters are addressed. In 1997 the surveys on smoking habits and on accidents will be repeated (Austrian Central Statistical Office, 1996).

Under the authority of the Ministry of Health and Consumer Protection (Bundesministerium für Gesundheit und Konsumentenschutz) two institutes (Ludwig Boltzmann-Institut für Suchtforschung, and Institut für Markt- und Sozialanalysen IMAS) have conducted a survey on the consumption of alcohol and psychoactive substances in 1993/94 (*Konsum von Alkohol und psychoaktiven Stoffen*). For this survey nationwide quota samples were used, consisting of about 1,000 abstainers and moderate

drinkers and about 1,000 heavy alcohol consumers (persons who consumed alcoholic drinks daily and/or consumed at least 200 g (women) or 280 g (men) pure alcohol per week). Therefore nearly 11,000 people aged 16 years or older were questioned in the screening phase. Of the 1,729 heavy consumers 1,022 individuals completed the main part of the study (the non-response in this stage was 41%), and of a selection of 1,302 light consumers 993 persons participated (24% non-response). People were interviewed on their consumption of alcoholic drinks and medicines, and in addition they were asked to complete a small questionnaire, that included among others a question on the consumption of illegal drugs (Uhl & Springer, 1996).

Belgium

According to the inventory no surveys on health have been conducted in Belgium in the recent past. However, currently (in 1997) the Institute for Hygiene and Epidemiology (Instituut voor Hygiëne en Epidemiologie, Institut d'Hygiène et d'Epidémiologie) and the National Statistical Institute (Nationaal Instituut voor de Statistiek, Institut National de la Statistique) are carrying out a health interview survey (*Gezondheidsenquête, Enquête de Santé*), and they execute a pre-test in 1995. For the pre-test initially households were selected, and secondly at maximum four persons in each household were interviewed (the head of the household, his/her partner, and two other persons depending on their birthday). Information was gathered by means of an interview. In addition respondents were asked to complete a small questionnaire on various subjects like smoking, drinking and eating habits.

From 1997 on this survey will be conducted every two years. It is intended to address about 4,500 households and to interview about 10,000 persons. Also homes for the elderly and nursing homes will be represented in the sample. Interviews and questionnaires will be conducted in three languages: Dutch (Flemish), French (Walloon), and German (Instituut voor Hygiëne en Epidemiologie, Université de Liège, Nationaal Instituut voor de Statistiek, 1996).

Germany

Each year the National Statistical Institute (Statistisches Bundesamt) executes a Microcensus among circa 0,5% of the national population (about 400,000 persons). This census regularly covers a health interview survey (*Fragen zur Gesundheit*): until 1995 every 3 years, and from 1995 onwards every 4 years. In 1995 the non-response of this voluntary survey was about 10%. In 1999 the questionnaire on health will probably cover more areas than before (Hein, 1996).

The Robert Koch Institute (also named 'Bundesinstitut für Infektionskrankheiten und nicht übertragbare Krankheiten') conducted two comparable health surveys in the past:

- the national German Cardiovascular Prevention study (*Deutsche Herz-Kreislauf-Präventionsstudie*) executed in former West Germany in 1984-1986, in 1987-1989, and in 1990/1991, and
- a health survey in former East Germany (*Gesundheitssurvey Ost Deutschland*) in 1991/1992.

Based on these two surveys, the Robert Koch Institute intends to execute a national health survey (*Bundes Gesundheitssurvey*) in 1997 in the entire country. It is intended to gather questionnaires of a representative sample of the German population aged 18-80 years, consisting of 7,500 persons.

The Federal Institute for Population Research (Bundesinstitut für Bevölkerungsforschung) also prepares a health survey, that will be executed in 1997/1998, titled 'Living situation, environment and *Lebenssituation, Umwelt und Gesundheit*).

Finally, two German institutes (the 'Epidemiologische Forschung Berlin' a several surveys in collaboration:

- a survey on health, environment and social situation in Berlin (*Gesundheit, Umwelt und soziale Lage in Berlin*) in 1991/92, which is planned to be repeated in the future,
- a survey on health and social conditions in the former East German part of the country (*Gesundheit und soziale Lage in 5 neuen Bundesländern*) also in 1991/92, and
- a survey on prevention and health promotion (*Umwelt, Gesundheit und Gesundheitsversorgung*) in Germany in 1994. For this survey, that focused on primary and secondary prevention, about 5,000 persons were interviewed (Kirschner & Elkeles, 1996). A similar survey, using the same questionnaire, has also been performed in one Bundesland (Sachsen-Anhalt) in 1995. In this survey 500 persons were interviewed by telephone. As the questionnaire of this survey was identical to the national survey, we did not include this smaller survey in the overview.

Denmark

To be able to monitor the health condition of the Danish population the Danish Institute for Clinical Epidemiology (Dansk Institut for Klinisk Epidemiologi DIKE) performs regular surveys on health and morbidity. The survey programme consists of two components.

First, since 1987 every 6 or 7 years general and broad surveys with more or less identical contents will be performed to obtain comparable time series of health indicators. This general survey (the Danish Health Interview Survey, *Sundhed og sygelighed i Danmark*) is a nationally representative interview survey of Danes, aged 16 years or more. Up till now the survey has been conducted twice, in 1987 and in 1994. Data are gathered by means of interviews and self-administered questionnaires. The results give a broad picture of the distribution of health and morbidity in the adult population, like health status, morbidity, health behaviour, health risks and resources and consequences of disease. Compared to the first survey 3 specific subjects have been added in the survey of 1994, namely allergy and hypersensitivity, mental personal functioning, and prioritisation of health services in the population.

The second component of the survey programme of DIKE covers special health and morbidity surveys, which are initiated to clarify specific themes and problems relevant to health politics, like the study on the prevention of musculo-skeletal diseases (*Muskel- og skeletsygdomme*), executed in 1990-1992. The surveys mentioned above function as data bases from which data can be extracted and used for e.g. planning and evaluation of health promotion activities or as reference material for more specialised surveys (DICE, 1996).

Greece

The Greek institutes that were contacted did not report national or regional health interview surveys. The only information that is available is the national *Population Census*, which covers a question on long term disability. The National Statistical Service of Greece performs this census every ten years. The last census took place in 1991. Interviewers contacted all households, including homes for the elderly, nursing homes and other institutions. In this way, information of the whole population was gathered.

Spain

In Spain a national health survey (*Encuesta Nacional de Salud*) is executed irregularly by the Ministry of Health (Ministerio de Sanidad y Consumo). The most recent survey dates from 1995, when about 8,400 persons were interviewed.

Moreover, within the scope of a national plan regarding drugs, a household survey on drug use (*Encuesta domiciliaria sobre uso de drogas*) was executed by a governmental committee (Delegación del Gobierno para el Plan Nacional sobre Drogas) in collaboration with the Ministry of Health. This national survey was conducted in 1995 and will be repeated every two years. This questionnaire covers inquiries on health, life styles and the use of psycho-active substances, like tobacco, alcohol, medicines and illegal drugs. In 1995 more than 10,000 persons of at least 15 years old responded to the survey. All persons were interviewed, and respondents who reported to use amphetamines or other stimulants, LSD or other hallucinatory substances, and/or XTC or comparable drugs were asked to complete an additional questionnaire.

Within the scope of the same programme, a similar survey has been conducted among schoolgoing adolescents aged between 14 and 18 (*Encuesta sobre uso de drogas a la población escolar*). This survey was executed in 1994 for the first time and will be performed every other year. More than 21,000 adolescents from 837 classes of 395 schools completed a questionnaire on their use of alcohol, tobacco, and other drugs (Ministerio de Justicia e Interior, 1995).

The National Statistical Institute (Instituto Nacional de Estadística INE) has performed a survey on Impairments, Disabilities and Handicaps (*Encuesta sobre Discapacidades, Deficiencias y Minusvalías*) in 1986. A new survey is being planned for 1998, provided that this plan will not be affected by budgetary restrictions. Due to the lack of a priori information on the amount of persons suffering from disabilities, a large sample was approached in 1986, namely 75,000 families encompassing 256,000 persons. First, with help of a questionnaire personal data of each household member was gathered. In addition, the occurrence of 15 disabilities was checked. Secondly, persons who suffered from some disability (about 15%) were interviewed on their disabilities and impairments (Alfonsin & Ferruelo, 1986).

In collaboration with the Department of Epidemiology and Nutrition of the University of Madrid INE conducted a national research on food and nutrition (*Estudio Nacional de Nutrición y Alimentación*) in the period 1990/1991, based on the Household Budget Survey (*Encuesta de Presupuestos Familiares*). Therefore interviews were conducted in about 21,000 households. Also this study might possibly be repeated in the future.

Finland

In Finland the following national institutes execute a large number of health related surveys, often in close collaboration:

- Statistics Finland (Tilastokeskus),
- Social Insurance Institution (Kansaneläkelaitos, abbreviated KELA in Finnish),
- National Public Health Institute (Kansanterveyslaitos KTL), and
- National Research and Development Centre for Welfare and Health (Sosiaali- ja terveystieteiden tutkimus- ja kehittämiskeskus, or in short: Stakes).

The major nationally representative health interview survey in Finland is the Interview survey on Health Care (*Terveydenhuollon väestötutkimus*). This survey has been initiated by the Social Insurance Institution with the introduction of sickness insurance in 1964, and has been repeated in 1968, 1976 and 1987. During these phases it was called Interview on Health Security and the interviews were conducted by local public health nurses. The latest phase of this survey in 1995/1996 was organised jointly by the four institutes mentioned above, and coordinated by KELA and STAKES. More than 4,000 households participated in this survey.

In the 1960s the Social Insurance Institution initiated epidemiological large scale studies concerning major chronic conditions and their causes, like the Finnish Mobile Clinic Health Examination Survey. Another example is the nationally representative Mini-Finland Health Survey in 1978-1980, which covered both health interviews and an health examination. This survey yielded a thorough description of the population's health, like health behaviour, risk factors, major chronic diseases, disabilities, need for care and use of care. These two studies are follow-up studies based on record linkage to various national registers, carried out jointly by the Social Insurance Institution and the National Public Health Institute.

Currently, the National Public Health Institute is planning a new health survey for the year 2000: Health 2000 (*Terveys 2000*). It is intended to combine health interview and health examination methods in an effort to repeat the thorough analysis of the population's health by the Mini-Finland Health Survey.

The National Public Health Institute also carries out a risk factor survey, which is repeated every five years. This survey started in 1972, and has been part of the WHO-Monica project (FinMonica). Since 1992 it has been named *FinRisk* survey. The basic program contains risk factor and health behaviour components and a dietary survey. A complementary study among the elderly (aged 65-74) combines health interview and health examination methods to examine chronic conditions, functional limitations and disabilities. This project is also a pilot project for the Health 2000 survey mentioned above.

Since the early 1970s the National Public Health Institute also carries out a yearly postal survey on health behaviour (*Aikuisväestön terveystapauksien tutkimus*). Its main emphasis is on cardiovascular disease and health behaviour, but it also collects some information on chronic diseases and health care use. Similar surveys are currently also being carried out in Russian Carelia and in the Baltic States. Statistics Finland has carried out household surveys on Living Conditions (*Elinolotutkimus*) at irregular intervals since the 1970s. This study includes a modest part dealing with health, disability and health care utilisation.

In collaboration with the Social Insurance Institution, Stakes performs two surveys:

- a health examination study focusing on rehabilitation (*HES-kuntoutuksen taloudellinen arviointi ja vaikuttavuus*), to be carried out in 1997, and
- a survey on the severity and rehabilitation on asthma (*Astman vaikeusaste, kuntoutuksen tarve ja kuntoutukseen valikoituminen*) in 1996, with a second round in 1998.

In addition, Stakes executes a number of nationwide health related surveys:

- a health survey (*Aikuisväestön terveystapauksien käyttö ja terveydentila*) based on computer assisted telephone interviews in co-operation with Statistics Finland in 1994,
- a postal survey on life quality (RAND 36-item health survey, *terveyteen liittyvän elämänlaadun mittarin valikoitumattomassa suomalaisessa väestössä*) in 1996,
- a survey among women about *Family planning services* (*Perhesuunnittelupalvelut Suomessa*) carried out in collaboration with several universities in 1994, and possibly also in the future,
- a two-yearly postal survey on juvenile health habits (*Nuorten terveystapauksien tutkimus*), and
- an 8-yearly survey on *Finnish drinking habits*.

Finally, Stakes cooperates in the *Nordic survey on alcohol use and attitudes regarding alcohol*.

France

Two health interview surveys are conducted regularly in France: the decennial Health and Medical Care Survey (*Enquête sur la Santé et les Soins médicaux*) and the Health Barometer among the general population (*Baromètre Santé grand public*), which is executed every 3 years. The Health and Medical Care Survey (also named French Health Survey) is executed by the 'Institut National de la Statistique et des Etudes Economiques INSEE' together with the 'Centre de Recherche, d'Etude et de Documentation en Economie de la Santé CREDES'. This prospective survey started in 1960 and was repeated in 1970/71, 1980/81 and in 1991/92. In that year a sample of about 21,000 persons in 8,000 households were questioned about their health status and medical consumption. Each household was followed during 12 weeks, and household members were asked to note their medical consumption during this period in a 'Carnet de Soins' (health care record book). Moreover, they were interviewed 5 times at three-week intervals (Sermet, 1993).

The Health Barometer is performed by the 'Comité Français d'Education pour la Santé CFES'. In 1993/94 about 2,000 adults were questioned about their opinions, attitudes and health behaviour, including smoking and drinking habits, accidents, medication, vaccinations and sexually-transmitted diseases. In addition, a national representative sample of nearly 500 GP's were interviewed on the health problems for which their patients consulted them, the treatments they advised, their attitudes regarding prevention, and their own smoking and drinking habits. The most recent Health Barometer among the general population has been performed in 1995. From that year on the CFES has started to perform three Health Barometers every 3 years: one year among adults, the following year among GP's, and the third year among adolescents (Baudier, Dresssen, Grizeau, Janvrin & Warszawski, 1995).

As reliable statistics relating to disabilities of the general French population is lacking, INSEE has initiated the French National survey of Handicaps, Disabilities and Dependency (*Handicaps, Incapacités, Dépendance*). The principal objectives are: to determine the number of handicapped and dependant persons in France, to estimate transition rates in and out of disability, to describe the nature, quantity and current providers of aid, and to estimate the extent of unmet service needs. The survey will be organised in three phases. First, a screening stage is planned at the end of 1997. Approximately 80,000 households will be addressed to target about 20,000 disabled persons. Secondly, these persons and also 10,000-20,000 institutionalised persons will be questioned about their disability, its origins and consequences, and their servicing needs. Thirdly, two years later, at the end of 1999, the transition and evolution in disability of these individuals will be measured (INSEE, 1995).

INSEE is also responsible for a survey on Living Conditions (*Etude sur les conditions de vie*), which also covers some health related topics. This survey has been conducted in 1978/79, in 1986/87 and the last survey dates from 1993/94. This survey especially focuses on people in deprived situations, and therefore disadvantaged areas are overrepresented in the sample. In 1993 more than 13,000 adults of different households were interviewed.

Since 1988 CREDES executes the annual survey on Health Care and Social Insurance (*Enquête sur la Santé et la Protection Sociale mise à jour*) in order to examine the structure and evolution of medical consumption. In 1995 a sample of nearly 10,000 social insured persons was interviewed on their medical consumption, hospitalisation, morbidity and insurance. One member of each participating household kept a record of their medical consumption (*Carnet de Soins*) during one month. Moreover, persons who could be approached by phone were interviewed four times and those who were not accessible by phone were visited twice by an interviewer.

Besides these surveys among the general population, CREDES also conducts the decennial National in-patient survey (*Enquête Hospitalisation*) in hospitals, and a *National survey on home care* in health care centres.

The 'Centre de Recherche pour l'Etude et l'Observation des Conditions de Vie CREDOC' conducts an annual survey on living conditions and aspirations of the French (*Enquête Conditions de vie et Aspirations des Français*), which also covers a couple of questions on health. For this survey quota samples are used, and therefore response figures are not available.

Another organisation that conducts health surveys in France is 'SESI Service des Statistiques, des Etudes et des Systèmes d'Information'. Together with 3 other organisations (the 'Direction Générale de la Santé DGS', the 'services départementaux de Protection Maternelle et I 'Institut National de la Santé et de la Recherche Médicale INSERM Unité 149') SESI performs a national survey of newborns titled '*Enquête nationale périnatale*'. Every three years each birth during one particular week in any hospital is included in the sample. The mothers are interviewed before they leave the hospital, and in addition information of their medical files is gathered. These data are used to examine the main indicators of children's health status, and medical practices during pregnancy and birth (Wcislo & Blondel, 1996).

In addition, SESI conducts two surveys on vaccinations among 6 year old children (the '*Enquête rougeole, rubéole, oreillons*' and the '*Enquête de couverture vaccinale*'), and a study on the health status of prisoners (*Etat de Santé des Détenus*).

Finally, INSERM Unité 292 and the 'Institut National d'Etudes Démographiques INED' studied sexual behaviour (*Analyse des comportements sexuels en France*) in 1991/92. These institutes performed a similar study among people from the Antilles and Guyana in 1993 and among adolescents in 1994.

Ireland

The Department of Health intends to carry out a *National lifestyle survey*. This survey is currently (in 1997) in the planning stage. The study has been initiated to provide monitoring data for targets set in the National Health Strategy of 1994. A wide range of lifestyles like nutrition, exercise and alcohol will be included in the questionnaire and the survey will probably be repeated every 2 or 3 years. More detailed information is not yet available.

The Economic and Social Research Institute ESRI executed the Irish part of the European Community Household Panel ECHP, named the *Living in Ireland survey*. Besides the questions of the ECHP questionnaire, extra questions were added including a General Health Questionnaire GHQ. Although the ECHP is not included, the added GHQ is covered in the present report.

ESRI conducted a *National survey on women's health needs* among nearly 3,000 women in 1993, a *Survey on drinking, smoking and media-based no smoking interventions* among more than 4,000 young people aged 12-18 years in 1995, and a survey about *Drinking among post primary school students* in 1984 and 1994. For the latter survey about 2,000 school students aged between 13 and 18 years completed a self administered questionnaire.

The Central Statistics Office CSO starts a quarterly multi-purpose household survey, the *Quarterly labour force / social survey*, in 1997. This survey incorporates the contents of the existing annual Labour force survey, and from 1998 on questions on other social topics will be added on a modular basis. The social topics include among others health, leisure, social contacts, housing and work environment. Surveying will be done continuously, and each quarter about 150,000 persons from 46,000 households will be interviewed.

Italy

The National Statistical Institute (Istituto Nazionale di Statistica ISTAT) executes a yearly multi purpose household survey (Indagine statistica multiscopo sulle famiglie). This survey covers each year a questionnaire on aspects of daily life (*Aspetti della vita quotidiana*) and every four years a questionnaire on health conditions and recourse to health services (*Condizioni di salute e ricorso ai servizi sanitari*). The most recent survey on health conditions has been performed in 1994. To cover all seasons the interviews were conducted in the months March, June, September and December. Both in 1994 and in 1995 about 60,000 persons living in approximately 20,000 households participated. In general data are gathered by means of oral interviews. For the survey on aspects of daily life participants are also asked to completed a questionnaire.

Luxembourg

The research institute CEPS/INSTEAD (Centre d'Etudes de Populations, de Pauvreté et de Politiques Socio-Economiques / International Networks for Studies in Technology, Environment, Alternatives, Development) conducts a panel study titled 'Living in Luxembourg' (*Panel socio-économique Liewen zu Letzebuerg*). This study has been initiated in 1984, and the first panel was interviewed twice a year until 1994. In 1995 a new panel has been constituted, covering nearly 3,000 households and more than 8,000 persons. The survey encompasses a household questionnaire, an individual questionnaire for members of the household who are older than 16, and a shorter questionnaire for younger persons. In collaboration with the Department of Health (Direction de la Santé, Division de la Médecine Préventive et Sociale) and the Luxembourg Cancer Foundation, ILRES (Institut Luxembourgeois de Recherches Sociales et d'Etudes de Marche) has conducted a study on the acceptance of a screening programme for breast cancer by mammography (*Le programme mammography, Enquête d'évaluation de la situation au Luxembourg*) in 1995. This screening programme focuses on women aged between 50 and 65, and therefore a sample of 755 women in this age category were interviewed by telephone.

The Department of Health performed a study on the coverage of immunisations and attitudes towards vaccinations (*Couverture vaccinale et attitude vis à vis des vaccinations*) in collaboration with the University of Brussels (Ecole de Santé Publique). Parents of 600 2-year old children were interviewed in 1995. This study may possibly be repeated in the future.

The Netherlands

Since 1981 Statistics Netherlands (Centraal Bureau voor de Statistiek) conducts a continuous health interview survey (*Gezondheidsenquête*) to follow the developments in health, life styles and medical consumption of the Dutch population. For this survey a stratified sample of households is gathered each year. In households, consisting of at most four persons, all persons are asked to co-operate. In larger households four persons are interviewed, including the head of the household, and his/her partner. In addition, respondents who are at least 16 years old are asked to complete a self administered questionnaire. Each year interviewers contact at least 3,600 addresses, and they question about 9,400 persons.

In order to describe different aspects of living conditions Statistics Netherlands also executes a continuous Standard of Living Survey (*Doorlopend Leefsituatie-onderzoek*). This survey encompasses many subjects, including for example housing conditions, environmental issues, satisfaction with the living situation, and job satisfaction. Also health and health related life styles are covered. For this survey adults are sampled based on a file of Dutch addresses. At each address one person aged 18 years or older is randomly selected. In 1995 more than 4,000 persons were interviewed (Centraal Bureau voor de Statistiek, 1996).

From 1997 onwards both surveys will be integrated into one General Social Survey (Permanent Onderzoek Leefsituatie), which will also cover other socio-cultural topics. All health and health related topics of the two surveys described above will be included in the General Social Survey. For this survey each year about 10,000 people of all age groups will be sampled. One of the advantages of this development is the greater possibility to study relations between health and aspects of living conditions on the individual level. Moreover, in the future a health examination module may be fielded in combination with the health module of the general survey. Depending on future financial resources, also a disability module might be incorporated.

In 1987/88 the Dutch National Institute for Health Care Research (NIVEL) also carried out a national health interview survey combined with registration of medical consumption in general practice. Depending on financial means, this survey might be repeated in the near future.

Portugal

The Portuguese Ministry of Health (Ministério da Saúde) is responsible for the national health survey (*Inquérito Nacional de Saúde*). This survey is executed irregularly. The most recent survey has been performed in 1995/96, when about 50,000 persons of 17,400 households were interviewed.

The National Statistical Institute (Instituto Nacional de Estatística INE) performs a survey on disabilities and handicaps (*Inquérito Nacional à Deficiência*). This survey is also executed at irregular intervals, and the latest survey dates from 1994.

Sweden

Each year Statistics Sweden (Statistiska Centralbyrån) performs the Swedish Survey of Living Conditions (*Undersökningen av levnadsförhållanden*). This multi purpose survey also includes health related questions, like the occurrence of illnesses and health behaviour. The surveys conducted in 1988 and in 1996 cover more questions on health than surveys in other years. About 5,000 persons, aged between 16 and 84 years, are questioned. Data are collected primarily through face-to-face interviews. Moreover, as personal interviews and interviews by phone appeared to yield comparable kinds of responses, about 15% of the respondents are questioned by telephone (Statistics Sweden, 1996).

United Kingdom

In the UK a large number of health related surveys are performed. The Office for National Statistics ONS (the former Office of Population Censuses and Surveys OPCS) conducts the continuous *General Household Survey*, which has been running since 1971. This survey is based each year on a sample of the general population resident in private (non-institutional) households. In 1994 interviews were obtained with more than 18,000 persons aged 16 years and over, either in person or occasionally by proxy, in 9,700 households throughout the country. The survey aims to gain insight into the main variables with which social policy is concerned, and in particular into changes in these variables over time. Although the questionnaire varies each year, it regularly includes the following health related topics: chronic and acute sickness, GP consultations, outpatient attendances, health and personal social services, social contacts, sight and hearing, dental health, leisure activities, and drinking and smoking habits (Living in Britain 1994).

The ONS also performs the *Disability Survey*. This survey is a follow-up of the Family Resources Survey, and is executed irregularly on behalf of the Department of Health. In 1996/97 about 7,000 individuals, aged 16 years or older, were interviewed.

On behalf of the Health Education Authority the ONS conducts the *Health Education Monitoring Survey*. This survey intends to monitor trends in health-related knowledge, attitudes and behaviour of adults in England and replaces the previous Health and Lifestyle Survey (see below). The Health Education Monitoring Survey started in 1995, and in that year about 4,700 persons aged between 16 and 74 and living in private households in England participated. The main aim of the 1995 survey was to collect baseline data against which future changes could be measured. A second survey was carried out in 1996, and respondents who were interviewed in 1996 are interviewed for a second time a year after the initial interview in 1997. The aims of the follow-up interview are to examine the relationship between intentions expressed in the initial interview and any reported changes in behaviour. The survey will also be carried out in 1998 (Hansbro, Bridgwood, Morgan and Hickman, 1997).

As mentioned before, the *Health and Lifestyle Survey* preceded the Health Education Monitoring Survey. That survey was carried out by a research team based at the University of Cambridge School of Clinical Medicine in 1984/85 to examine how people's behaviour and the circumstances in which they live affect both their physical and their mental health. Over 9,000 adults living in private houses in England, Scotland and Wales were randomly selected. This sample was interviewed about major aspects of lifestyle, and over 80% of these people were visited by a nurse who carried out a series of physical measurements. In addition, the participants were asked to complete a questionnaire concerned with personality and mental health. This study is ongoing: information of respondents who develop

cancer or die is continually received, as the sample has been registered with the NHS Central Data Base. Moreover, seven years later, in 1991, the survivors of the same sample were re-surveyed to see how their health and way of life had changed. As it was not foreseen to conduct a longitudinal study at the start of the study, there had been no effort made to keep in touch with the respondents. Over 800 of the 9,003 individuals interviewed in the first Health and Lifestyle Survey (HALS1) had died between 1984 and 1991. In total 6,626 persons were traced, and of these 5,352 were interviewed in the second Health and Lifestyle Survey (HALS2). In addition, physical measurements of 4,480 persons were gathered, and 3,817 self-completion booklets were returned. If sufficient funds will be obtained, a further survey will be carried out in 1998/99 on the survivors of the original population (The Health Promotion Research Trust).

The ONS has executed two surveys on behalf of the Department of Health: the *Survey of Psychiatric Morbidity*, and the *Survey of Work-Related Illness*. The Survey of Psychiatric Morbidity is performed at irregular intervals. The last one dates from 1993/94, when about 12,500 people aged between 16 and 64 and living in private households or in psychiatric institutes were interviewed. The Survey of Work-Related Illness has been conducted once: in 1995/96. A sample of the non-institutionalised general population of 1,300 persons was interviewed, either face to face or by telephone.

Furthermore, the Department of Health is responsible for the 5-yearly *Survey of Infant Feeding Practices*, and the *National Diet and Nutrition Survey of 1½/2 year olds* which is carried out every 8-10 years. For the Survey of Infant Feeding Practices about 9,000 mothers of new-born babies were asked to complete a questionnaire, and for the National Diet and Nutrition Survey of 1½/2 year olds about 2,000 parents were interviewed. Moreover, the parents kept a diary of their children's eating habits.

Commissioned by the Department of Health, the Joint Health Surveys Unit of Social and Community Planning Research (SCPR) and the Department of Epidemiology and Public Health of the University College London (UCL) carries out the *Health Survey for England* since 1990. ONS carried this survey out between 1991 and 1993, and SCPR took over in 1994. This annual series of surveys of the population living in private households in England was initiated in order to provide better and more regular information about various aspects of people's health, and to monitor some of the targets in the government's Health of the Nation strategy. In its first four years, from 1990 to 1994, the survey's emphasis has been on cardiovascular disease and related conditions. In the 1995 survey, the focus has moved to asthma and other atopic conditions, accidents and disability, and for the first time, children were included. The survey involved an interview, a self completed questionnaire, and a separate nurse visit (Joint Health Surveys Unit, 1996). In 1995 16,055 persons of 9,084 households participated.

The Joint Health Surveys Unit also conducts a health survey in Scotland, the *Scottish Health Survey*, every 3 years. In 1995 7,932 persons aged between 16 and 64 years from different households were interviewed.

Norway

Every decade Statistics Norway (Statistik Sentralbyrå) conducts a health interview survey (*Helseundersøkelsen*). The most recent one dates from 1995. In that year more than 10,000 persons from 5,200 households were interviewed. Moreover, they were asked to complete a self administered questionnaire. From 1998 onwards this survey will be part of the 4 yearly Standard of living survey (*Levekårundersøkelsen*).

Iceland

No general health interview surveys have been conducted in Iceland, but multi-purpose surveys that include health related questions are available, like a standard of living survey performed in 1988. Moreover, specific surveys on special health topics have been conducted, for instance on smoking habits (twice a year), on nutrition (in 1990), and on risk behaviour of young people (1994). In 1996 an Omnibus survey (*Þjóðmálakönnun*) was conducted by the Social Science Research Institute of the University of Iceland. This survey is conducted several times a year. Within the framework of the Health Promotion Project of the Ministry of Health and Social Security and the Director General of Public Health questions on health promotion were included in this omnibus survey in 1994 and 1996.

Switzerland

The Swiss Federal Office of Statistics (Bundesamt für Statistik) executes a national health survey (*Schweizerische Gesundheitsbefragung / Enquête suisse sur la santé / Indagine sulla salute in Svizzera*) every 5 years. The most recent survey was conducted in 1997 and about 12,500 non-institutionalised persons participated. Information of persons aged between 15 and 74 was gathered by means of telephone interviews and self administered questionnaires. Elderly persons aged 75 or more were interviewed using face to face questionnaires. A complementary survey will probably be conducted in homes for elderly, nursing homes and prisons.

Annex 4.1

Overview of health related topics in each survey

TOPICS	Surveys	A01	A02	A03	A04	A05	B01	D01	D03	D04	D05
A Health status											
3 <i>Morbidity</i>											
• disease-specific morbidity	24	1							1	1	1
• co-morbidity (derived)	0										
• chronic conditions	36	1	1	1		1	1		1	1	
• injuries resulting from accident	8				1						1
4 <i>Functioning and quality of life</i>											
• self-perceived health	37	1				1	1		1	1	1
• physical disability (long-term)	34	1	1		1		1			1	1
• activity limitations/temporary disab.	27	1					1	1	1	1	1
• functional status/ability (derived)	0										
• health-related work loss	11							1			
• long-term incapacity for work	5							1			
• mental health	26	1					1			1	1
* stress, tired, nervous	28	1				1			1	1	1
* anxiety	9					1					
* sleeping disturbance	21	1							1	1	1
* cases of suicide in ones network	0										
* support pers. w. mental problems	0										
* consider suicide	6									1	1
5 <i>Anthropometric characteristics</i>											
• weight (adults)	24	1				1	1			1	
• height (adults)	23	1				1	1			1	
• body mass index (% > 30) (derived)	2										
• birth weight (% > 2500 g, < 1500 g)	5						1				
• height (children)	11	1					1				
• weight (children, accept. age/height)	12	1					1				
<i>Dental health</i>											
• missing teeth (mean, 35-44 years)	5										
• toothless persons (% , 65-74 years)	9						1				
• dental prosthesis (%)	9						1				
<i>Social health and support</i>											
• social network	15					1	1		1	1	1
• participation/integration (disabled p.)	3										
B Life style and health habits											
1 <i>Tobacco consumption</i>											
• present smoking (freq./quantity)	37	1		1			1	1	1	1	1
• former smoking (past 2 years)	28			1			1	1	1		1
• heavy smoking (ref. present smoking)	0										
• assistance/medication to stop smok.	4										
• plans to stop/reduce smoking	11			1							
• reasons for not (able to) stop smok.	0										
• passive smoking	12			1					1	1	1
• smoking during pregnancy (women)	8						1				
2 <i>Alcohol consumption</i>											
• consumption alcohol (freq./quantity)	31					1	1		1	1	1
• heavy drinking	11					1	1				
• freq. of drunkenness, problems etc.	7					1					
• expenditure on alcohol	0

Annex 4.2

Overview of health related topics: survey years for each country

TOPICS	NL	P	S	UK	N	IS	CH
A Health status							
3 <i>Morbidity</i>							
• disease-specific morbidity	94-2000	95		94-2000	95		97
• co-morbidity (derived)							
• chronic conditions	94-2000	94,95	94-2000	94-2000	95		97
• injuries resulting from accident				94-2000	95		97
4 <i>Functioning and quality of life</i>							
• self-perceived health	94-2000	95	94-2000	94-2000	95	96	97
• physical disability (long-term)	94-2000	94,95	94-2000	94-2000	95		97
• activity limitations/temporary disab.	94-2000	95	94-2000	94-2000	95		97
• functional status/ability (derived)							
• health-related work loss	94-2000	94		95,96,98			97
• long-term incapacity for work			94-2000				
	94-2000	94		94-2000	95	96	97
* stress, tired, nervous			94-2000	94-2000	95	96	97
* anxiety				94-2000	95		
* sleeping disturbance			94-2000	95,96,98	95		97
* cases of suicide in ones network							
* support pers. w. mental problems							
* consider suicide				93	95		
5 <i>Anthropometric characteristics</i>							
• weight (adults)	94-2000	95	94-2000	94-2000	95		97
• height (adults)	94-2000	95	94-2000	94-2000	95		97
• body mass index (% > 30) (derived)	94-2000						
• birth weight (% > 2500 g, < 1500 g)	94-2000			94-2000			
• height (children)	94-2000	95		94-2000	95		
• weight (children, accept. age/height)	94-2000	95		94-2000	95		
<i>Dental health</i>							
• missing teeth (mean, 35-44 years)					95		
• toothless persons (% , 65-74 years)	94-2000		94-2000	95,98	95		
• dental prosthesis (%)	94-2000	95	94-2000				
<i>Social health and support</i>							
• social network	94-2000		94-2000	98	95		97
• participation/integration (disabled p.)	94-2000				95		97
B Life style and health habits							
1 <i>Tobacco consumption</i>							
• present smoking (freq./quantity)	94-2000	95	94-2000	94-2000	95	96	97
• former smoking (past 2 years)	94-2000	95	94-2000	94-2000	95		97
• heavy smoking (ref. present smoking)							
• assistance/medication to stop smok.				94-2000			
• plans to stop/reduce smoking				94-2000			97
• reasons for not (able to) stop smok.							
• passive smoking				94-2000			97
• smoking during pregnancy (women)		95		94-2000			
2 <i>Alcohol consumption</i>							
• consumption alcohol (freq./quantity)	94-2000	95	94-2000	94-2000	95	96	97
				95,96,98	95		97
• freq. of drunkenness, problems etc.				98			
• expenditure on alcohol							

Annex 4.2

Overview of health related topics: survey years for each country

TOPICS	NL	P	S	UK	N	IS	CH
3 <i>Illegal drug consumption</i>							
• use of narcotics/psychotropic subst.				94-2000			97
• (ab)use alcohol/pharmaceutical prod.				94-2000			
• (mis)use chemicals for drug depend.				94-2000			
• exposure to drugs				94-2000			
• opinions on care of drug addicts							
4 <i>Physical activities</i>							
• level of daily activities		95		94-2000	95		97
• level of leisure activities		95	94-2000	94-2000	95		97
• walking (frequency and amount)		95		94-2000			
• more vigorous exercise (freq./amount)	94-2000	95		94-2000		96	
• reasons for not walking/vigorous ex.				94-2000			
• exercise one would like to do (more)				94-2000			
5 <i>Diet</i>							
• consumption of fresh fruit		95		94-2000	95		97
• consumption of vegetables		95		94-2000	95		97
• consumption of fish/fish products		95		95,98			97
• consumption of salt				95,98			97
• consumption of (un)saturated fat				94-2000	95	96	
• consumption of (animal) protein							
• consumption of carbohydrate				94-2000			
• consumption of sugar				94-2000			97
• consumption of fibre				94-2000			97
• total energy intake							
• freq. of meals outside the home	94-2000			98	95		
• freq. of manufactured foods							
• opinion own food habits (overeating)				94-2000			
• plans/trying to change certain intakes				94-2000			97
• experience with changing weight				98			97
• behaviour regarding hygiene with food							
• ability to read food labels				94-2000			
• expos. to other food culture (migrants)							
• exposed to mass media (freq./intensity)							
• confused by mass media							
6 <i>Sex life</i>							
• number of sexual partners				94-2000			
• age at first intercourse							
• safe sex				94-2000			
<i>Knowledge on healthy lifestyles</i>							
• (un)healthy food				94-2000			
• drugs				94-2000			
• HIV/AIDS				94-2000			
• pollution related diseases (e.g. allerg.)							
				98			
<i>Attitudes regarding health promotion</i>							
• healthy lifestyle				94-2000			97
• necessity of screening programmes							
				94-2000		96	97
• increase exercise				94-2000			
							97

1

2

3

_____? Oder haben Sie keine derartige Beeinträchtigung? Bitte nennen Sie die schwerste Krankheit an erster Stelle!

(Vorübergehende Beeinträchtigungen sind nicht anzugeben!, max. 4 Krankheiten)

Liste E (Chronische Krankheiten) übergeben

- 1 Herzkrankheiten
- 2 Hoher Blutdruck
- 3 Niedriger Blutdruck
- 4 Gefäß-, Durchblutungsstörungen (in Beinen)
- 5 Schlaganfall (einschließlich sonstiger Hirngefäßkrankungen)
- 6 Atmungsbehinderung (Asthma)
- 7 Wirbelsäulenschäden
- 8 Rheuma, Gicht, Ischias
- 9 Zuckerkrankheit
- 10 Hautkrankheit
- 11 Allergie
- 12 Sprechstörungen (einschließlich Stummheit)
- 13 andere chronische Krankheit
- 14 keine chronische Krankheit

Comments

- > type of disease: physical
- > number of diseases: 12 are included in the list; 4 diseases can be reported
- > it is possible to add diseases, but it is not possible to specify the disease
- > criteria for reporting diseases: diseases that hamper respondent in his/her daily activities
- > reference period: not mentioned

Austria: Rauchgewohnheiten 1986

A03, face to face questionnaire

An alle Personen ab 16 Jahren

B56 Haben Sie gesundheitliche Beschwerden, wie:

- 1 Herzbeschwerden
- 2 chronische Atemwegserkrankungen
- 3 keine davon?

Mehrfachmarkierungen möglich!

Comments

- > type of disease: physical (that may be associated with smoking)
- > number of diseases: 2
- > criteria for reporting diseases: diseases respondent has
- > reference period: not mentioned

Austria: Konsum von Alkohol und psychoaktiven Stoffen 1993

A05, face to face questionnaire

Karten:

- 1 Allergie
- 2 Lungenbeschwerden, Asthma, Bronchitis
- 3 Gefäßerkrankungen (Venenerkrankungen, Krampfadern)
- 4 Nieren-, Blasenbeschwerden
- 5 Leber-, Gallenbeschwerden, erhöhte Leberwerte
- 6 Magen-, Dambeschwerden, Gastritis, Geschwüre
- 7 Verdauungsbeschwerden (Verstopfung, Durchfall)
- 8 Herzbeschwerden
- 9 Übergewicht
- 10 Erhöhten Cholesterinspiegel
- 11 Diabetes (Zuckerkrankheit)
- 12 Gicht (erhöhte Harnsäure)
- 13 Niedrigen Blutdruck
- 14 Bluthochdruck
- 15 Rheuma
- 16 Folgen einer Kopfverletzung
- 17 Kopfschmerzen, Migräne
- 18 Schlafstörungen
- 19 Bandscheibenschaden, Gelenkschmerzen
- 20 Anfälle von Bewußtlosigkeit
- 21 Erschöpfungserscheinungen, starke Ermüdung
- 22 Nervenentzündung
- 23 Nervenkrankheit (Lähmung, Gefühllosigkeit, Körpersensationen, Multiple Sklerose, Folgen eines Schlaganfalls)
- 24 Seelische Erkrankung (Depression, Manie etc.)
- 25 Angstzustände
- 26 Länger anhaltende Schmerzzustände

A10 Hier sind verschiedene chronische Beschwerden bzw. Erkrankungen aufgeschrieben. Wenn Sie die Karten bitte auf das Bildblatt verteilen, je nachdem, was da auf Sie zutrifft. Karten mit Dingen, an denen Sie gar nicht leiden, legen Sie einfach beiseite.

- 1 *deswegen bin Ich in Behandlung*
- 2 *war beim Arzt, bin nicht in Behandlung*
- 3 *leide darunter, war nicht beim Arzt*

Comments

- > type of disease: physical and mental
- > number of diseases: 26
- > criteria for reporting diseases: diseases respondent has
- > reference period: not mentioned

Belgium: Enquête de santé 1997

B01, face to face questionnaire

MA.01 Voici une liste de maladies ou d'affections. Pouvez-vous, pour chacune d'entre elle, m'indiquer si vous en souffrez ou si vous en avez souffert au cours des douze derniers mois?

- | | <i>non</i> | <i>oui</i> |
|--|------------|------------|
| 1 asthme, bronchite chronique, problèmes pulmonaires chroniques non spécifiques | | |
| 2 allergie | | |
| 3 sinusite | | |
| 4 affection cardiaque grave ou infarctus | | |
| 5 tension artérielle élevée | | |
| 6 troubles intestinaux graves, de plus de 3 mois | | |
| 7 hépatite, cirrhose, ou autre maladie de foie | | |
| 8 calculs rénaux | | |
| 9 maladie rénale grave (sauf calculs rénaux) | | |
| 10 inflammation chronique de la vessie (cystite chronique) | | |
| 11 diabète | | |
| 12 troubles de la thyroïde | | |
| 13 glaucome (tension oculaire élevée) | | |
| 14 cataracte | | |
| 15 maladie de Parkinson | | |
| 16 dépression | | |
| 17 épilepsie | | |
| 18 vertiges avec chute | | |
| 19 migraine | | |
| 20 affection cutanée grave ou chronique | | |
| 21 tumeur maligne ou cancer, spécifiez: _____ | | |
| 22 affection persistante au dos (de plus de 3 mois), lumbago, sciatique ou hernie discale | | |
| 23 arthrose du genou, de la hanche ou de la main | | |
| 24 rhumatisme inflammatoire (arthrite chronique, arthrite rhumatoïde) des mains ou des pieds | | |
| 25 autres formes de rhumatisme chronique plus de trois mois | | |
| 26 accident vasculaire cérébral (attaque), hémorragie cérébrale ou complications | | |
| 27 ulcère à l'estomac ou au duodénum | | |
| 28 calculs ou inflammation de la vésicule | | |
| 29 ostéoporose (décalcification des os) | | |
| 30 fracture du poignet | | |
| 31 fracture de la hanche (col du fémur) | | |
| 32 fracture de la colonne vertébrale | | |
| autres maladies: | | |
| 33 _____ | | |
| 34 _____ | | |
| 35 _____ | | |
| 36 (pour les hommes seulement) troubles prostatiques | | |
| 37 (pour les femmes seulement) descente de matrice | | |

Comments

- > type of disease: both physical and mental, and including injuries
- > number of diseases: 34
- > it is possible to add diseases, and to specify these disease
- > criteria for reporting diseases: diseases from which respondent suffers
- > reference period: past 12 months

Germany: Herz-Kreislauf-Präventionsstudie 1990

D03, self administered questionnaire

53A Haben oder hatten Sie jemals eine dieser Krankheiten?

Falls eine Krankheit auf Sie nicht zutrifft, kreuzen Sie bitte 'nein' an!

- 1 *habe jetzt*
- 2 *habe jetzt nicht mehr*
- 3 *weiß nicht, ob immer noch*
- 4 *nein, habe nicht/hatte nie*

53B Falls eine Krankheit auf Sie zutrifft, kreuzen Sie bitte bei der entsprechenden Krankheit zusätzlich an, ob Sie wegen dieser Krankheit gegenwärtig (d.h. im Laufe der letzten 4 Wochen) behandelt wurden.

Ich wurde deswegen in den letzten 4 Wochen behandelt

- *nein*
- *ja, Medikamente*
- *ja, andere Maßnahmen (z.B. Diät, Krankengymnastik)*

- 1 Durchblutungsstörungen am Herzen, Angina pectoris
- 2 Herzinfarkt
- 3 Herzschwäche (Herzinsuffizienz, 'Herzasthma')

....

33 Krebskrankheiten: Bitte angeben an welchem Organ: _____

34 Sonstige Krankheiten oder Behinderungen, die länger als 3 Monate gedauert haben:

1 _____ 2 _____ 3 _____

35 Für Männer: Vergrößerte Vorsteherdrüse, Prostata

36 habe nichts davon

Comments

- > type of disease: physical
- > number of diseases: 34
- > it is possible to add diseases, and to specify these diseases (max. 3)
- > criteria for reporting diseases: diseases respondent ever had
- > additional question: treated in the past 4 weeks

Germany: Gesundheitssurvey Ost Deutschland 1991

D04, self administered questionnaire

60A Welche der folgenden Krankheiten hatten Sie irgendwann?

60B Wenn ja, hatten Sie diese auch im Zeitraum der letzten 12 Monate?

60C Wenn ja, hatten Sie diese auch im letzten Monat?

60D Kreuzen Sie bitte bei der entsprechenden Krankheit zusätzlich an, ob Sie wegen dieser Krankheit gegenwärtig d.h. im Laufe der letzten 4 Wochen mit Medikamenten behandelt wurden.

- 1 Durchblutungsstörungen am Herzen, Angina pectoris
- 2 Herzinfarkt
- 3 Herzschwäche (Herzinsuffizienz, 'Herzasthma')

....

36 Krebskrankheiten: Bitte angeben an welchem Organ: _____

37 Für Männer: Männerleiden, z.B. Prostatavergrößerung (vergrößerte Vorsteherdrüse)

38 habe nichts davon

Comments

F01, face to face questionnaire

14 Morbidité prévalente: troubles existant dès avant le début de l'enquête, sur la base de cette liste des maladies, troubles de santé, handicaps et infirmités.

- 1 maladies de coeur, angine de poitrine, troubles du rythme cardiaque, infarctus du myocarde
- 2 tension artérielle élevée
- 3 artérite (ne pas confondre avec l'arthrite, qui est une maladie des articulations, notée en 6)
- 4 accident vasculaire cérébral avec paralysie ou hémiplégié, ou attaque
- 5 varices, ulcères des jambes
- 6 lumbago, sciaticues, arthrose, arthrite, articulations douloureuses, ostéoporose, rhumatismes
- 7 bronchite chronique, asthme, tuberculose, toux fréquente, emphysème
- 8 sinusite, otite, angines fréquentes
- 9 dents en mauvais état, maladies des gencives
- 10 eczéma, acné, mycoses, psoriasis, autres maladies de la peau
- 11 maux d'estomac, ulcères d'estomac
- 12 hépatite, cirrhose, calculs biliaires
- 13 troubles de l'intestin, diarrhées, colite, constipation
- 14 insuffisance rénale, calculs urinaires, cystite
- 15 troubles des règles et de la ménopause, fibrome donnant des troubles
maladie de la prostate et de l'appareil uro-génital
- 16 syphilis, blennorragie, trichomonase, autres maladies sexuellement transmissibles
- 17 diabète, maladie de la thyroïde, obésité
- 18 tremblements, Parkinson, autres maladies du système nerveux
- 19 migraine, maux de tête fréquents
- 20 myopie, presbytie, cataracte, troubles de la vue
- 21 troubles de l'audition, surdité
- 22 infirmité, handicap de naissance: cécité, surdité, trisomie 21, luxation congénitale de la hanche, ...
- 23 handicaps acquis: amputation, limitation d'un mouvement, incontinence
- 24 troubles du sommeil, états dépressifs fréquents, fatigue importante, anxiété, phobie
- 25 troubles psychiatriques
- 26 tumeurs bénignes, tumeurs malignes, cancers (préciser la location), leucémies
- 27 autres maladies ou troubles de santé non énumérés ci-dessus

Comments

France: Enquête sur la santé et la protection sociale mise à jour 1996

F03, self administered questionnaire

S1 Quelles maladies, troubles de la santé ou infirmités avez-vous actuellement?

Donner le nom précis de la maladie: _____

Depuis quelle année en êtes-vous atteint? _____

Avez-vous traité cette maladie au cours des 12 derniers mois? *oui* *non*

Voici une liste pour vous aider à répondre

- 1 insuffisance cardiaque, troubles du rythme cardiaque, angine de poitrine, infarctus du myocarde
valvulopathie
- 2 tension artérielle élevé (*quels chiffres avant traitement?*) _____
- 3 maladie des artères: artérite (ne pas confondre avec l'arthrite qui est une maladie des articulations à noter en 6)
- 4 antécédent d'accident vasculaire cérébral ayant laissé des séquelles: paralysie ou hémiplégie (ou attaque)
- 5 varices, ulcères de jambes
- 6 lumbago, sciaticues, arthrose, douleurs des articulations, arthrite aiguë, ostéoporose
- 7 bronchite chronique, asthme, emphysème, tuberculose pulmonaire
- 8 sinusites, otites, angines fréquentes
- 9 maladies de la bouche et des dents: gingivite, déchaussement des dents, caries saignement des gencives, etc.
- 10 eczéma, acné, psoriasis, mycose, autres maladies de la peau
- 11 maux d'estomac, ulcère d'estomac
- 12 hépatite, cirrhose, calculs biliaires
- 13 troubles de l'intestin, diarrhées, colite, constipation
- 14 calculs urinaires, cystite, maladie des reins
- 15 troubles des règles ou de la ménopause, fibrome donnant des troubles
maladies de la prostate et de l'appareil génital
- 16 syphilis, blennorragie, trichomonase, autres maladies vénériennes ou sexuellement transmissibles
- 17 diabète, hyper ou hypo thyroïde, goître, obésité
- 18 tremblements, Parkinson, autres maladies du système nerveux
- 19 migraine, maux de tête fréquents (*d'un seul côté ou des 2?*)
- 20 myopie, presbytie, strabisme, glaucome, cataracte
- 21 troubles de l'audition: baisse de l'audition progressive ou perte de l'audition uni ou bilatérale, totale ou partielle?
- 22 infirmité, handicap de naissance: cécité, surdité, luxation congénitale de la hanche, tris
- 23 handicaps acquis: amputation, hernie (*précisez où*), incontinence (urinaire ou fécale), handicap mental
- 24 troubles du sommeil
- 25 dépression, états dépressifs fréquents, autres troubles psychiques
- 26 tumeurs bénignes, malignes, cancers
- 27 autres maladies non relevée ci-dessus dont vous êtes atteint en ce moment: grippe, maladie infantile, bronchite, angine, rhino-pharyngite, fracture, plaies ...

Comments

Chronic conditions: open ended questions

Belgium: Enquête de santé 1997

B01, face to face questionnaire

MB.01 Souffrez-vous d'une ou plusieurs maladies, d'affections de longue durée ou de handicaps?

1 *oui*

2 *non* → passez à MA.01

MB.02 Quels sont vos maladies de longue durée, vos affections, vos handicaps? _____

MB.03 Etes-vous gêné(e) dans vos activités quotidiennes en raison de cette(ces) maladie(s), cette(ces) affection(s) ou ce(s) handicap(s)?

1 *en permanence*

2 *de temps en temps*

3 *pas ou rarement*

Comments

- > type of disease: long-standing or chronic conditions
- > description of the disease: which disease
- > additional question: restricted in daily activities by the illness

Denmark: Danish health interview survey, Sundhed og sygelighed i Danmark 1994

DK01, face to face questionnaire

21 Do you suffer from any long-standing illness, long-standing after-effect from injury, any disability or other long-standing condition?

- *yes*

- *no* → question **22**

21A Which illness or ailment do you suffer from?

- _____

21B Where in your body is it located? Explain in detail what it is.

- _____

21C For how many years have you suffered from this illness/condition?

- _____

21D Has a doctor told you what it is?

- *yes*

- *no*

21E Are you restricted by the illness in your work/usual activities?

- *yes, very much*

- *yes, a little*

- *no*

21F Do you suffer from any other long-standing illnesses etc.?

- _____ → question **21A** (max. 4 illnesses)

Comments

- > type of disease: long-standing or chronic conditions
- > description of the disease: which disease, where is it located
- > additional question: for how many years have you suffered from the disease, has a doctor told you what it was, are you restricted in your daily activities by the illness

Greece: Population census 1991
EL01, face to face questionnaire

5 Y a-t-il chez vous des personnes handicapées (maladie chronique ou invalidité permanente)?

- *oui*
- *non*

S'il y en a, vous pourrez écrire:

a le numéro d'ordre d'enregistrement de la personne

- _____

b la catégorie de la maladie chronique ou de l'invalidité permanente

- _____

Comments

- > type of disease: long-standing or chronic conditions, handicap
- > description of the disease: disease category

Spain: National health survey, Encuesta nacional de salud 1995

E01, face to face questionnaire

2 During the past 12 months, i.e. since the end of August 1994, have you had any pain, illness or disability which has restricted your activity for more than 10 days?

- *yes*
- *no*

2a What type of pain?

- _____

Comments

- > type of disease: long-standing and temporary diseases, which has restricted the respondent's activity for more than 10 days
- > description of the disease: what type of pain
- > reference period: past 12 months

Finland: Living conditions survey, Elinolotutkimus 1994

FIN04, face to face questionnaire

97 Do you suffer from any chronic illnesses, complaints or disabilities?

- *yes*
- *no* → question 99

98 What is this illness or disability?

Questions for specification (ask only if necessary, if respondent cannot name his or her complaint):

a Could you elaborate on this?

b What did the doctor say?

c Where are your complaints located?

- *complaint no. 1:* _____

- *complaint no. 2:* _____

- *complaint no. 3:* _____

- *complaint no. 4:* _____

- *complaint no. 5:* _____

- *complaint no. 6:* _____

99 Do you (in addition) suffer from any (other) chronic illness, even it's a very minor one?

(give card 9) Perhaps one mentioned on this card?

- *yes* → note illnesses on question 97
- *no*

101 Do you regularly take medicine for any other chronic illness that you have not yet mentioned?
- *yes* → note illnesses on question 97
- *no*

104 Is your working capacity reduced by your illness/disability or does it hinder you in carrying out your normal everyday activities (gainful employment, housework, schooling or studying):
- *a great deal*
- *to some extent*
- *not at all?*

Comments

- > type of disease: long-standing or chronic diseases
- > description of the disease: what illness or disability, could you elaborate on this, what did the doctor say, where are the complaints located
- > number of diseases: 6
- > additional questions: another disease, do you take medicine for a disease you have not yet mentioned, are you restricted in your daily activities

Finland: Health care survey, Terveystutkimus 1994
FIN05, face to face questionnaire

2.2 Have you any defect or injury that lowers your general working capacity or functional capacity, or any chronic illness?
- *yes*
- *no* → question 2.6

2.2A Define or describe this illness.

Interviewer: try to find out the name (diagnosis) of every illness. If the diagnosis is unclear, describe the major symptoms. _____

2.2B Has it been diagnosed by a doctor?
- *yes*
- *no*

2.2C Do you have any other illness, defect or injury?
- *yes* → question 2.2A
- *no*

2.5 Does it diminish your working capacity or functional ability much, somewhat, only a little or not at all?
- *much*
- *somewhat*
- *only a little*
- *not at all*

Comments

- > type of disease: chronic diseases or temporary illnesses that reduce the respondent's functional capacity
- > description of the disease: description, diagnosis, symptoms
- > additional questions: diagnosed by a doctor, do you have another illness, are you restricted in your functional ability

Finland: Use of health services and health status, Aikuisväestön terveystutkimus 1993/94

FIN08, telephone interview

13 Are you suffering from any long-term illness, disorder or injury?
(Instruction: include all long-term diseases certified by a doctor and any disorders which have lasted for at least three months which have not been certified by a doctor but nevertheless affect the person's capacity for work or other activities)

- *yes*
- *no*
- *don't know/no answer*

14 - 15 What kind of illness was this?

- *first long-term illness: _____*

16 Has this illness/disorder been certified by a doctor?

- *yes*
- *no*

17 Are you suffering from any other long-term illness, disorder or injury? (second long-term illness)

- *yes*
- *no*

18 - 19 What kind of illness was this?

- *second long-term illness: _____*

20 Has this illness/disorder been certified by a doctor?

- *yes*
- *no*

questions 17 to 20 are repeated four times; up to 6 illnesses can be recorded

Comments

- > type of disease: long-standing or chronic diseases
- > description of the disease: what kind of illness
- > number of diseases: 6
- > additional questions: has the illness been certified by a doctor, another disease

Finland: Finnish drinking habits survey

FIN12, face to face questionnaire

210 Do you currently suffer from a chronic disease?

- *yes*
- *no*

Comments

- > type of disease: chronic diseases
- > description of the disease: no

Italy: Survey on health conditions and recourse to health services, Condizioni di salute e ricorso ai servizi sanitari 1994

I01, face to face questionnaire

22 Over the last four weeks, have you been ill or had any health problems?

When answering, please remember that we are interested in all causes behind any health problems during this period, be these serious (e.g. pneumonia, appendicitis etc.) or less serious (e.g. cold, headache, cough, toothache, intestinal problems, rheumatism etc.). All chronic diseases must be included, in the eventuality, even if these date back to before the four week period, if these have created health problems during the last four weeks)

- *no*
- *yes* → specify with code no. _____ (max. 5)

24 Did the illness or health problems hinder you in your normal activities (at home, at school, during your free time etc.) over the last four weeks?

- *no*
- *yes* → how many days? _____
→ how many days did you spend in bed? _____

Comments

- > type of disease: chronic diseases and temporary disabilities
- > description of the disease: what kind of illness
- > number of diseases: 5
- > reference period: last 4 weeks
- > additional questions: restricted in daily activities

the Netherlands: Health interview survey, Gezondheidsenquête 1995

NL01, face to face questionnaire

B2 Do you suffer from one or more chronic conditions or handicaps?

- *yes*
- *no*

If yes: what condition(s) or handicap(s)? _____ (max. 4)

B3a Are you restricted in your daily activities due to any complaints, disease or disability?

- *continually restricted*
- *restricted at intervals*
- *not or seldom restricted*

Comments

- > type of disease: chronic conditions or handicaps
- > description of the disease: what conditions or handicaps
- > number of diseases: 4
- > additional questions: restricted in daily activities

the Netherlands: Standard of living survey, Doorlopend leefsituatie onderzoek 1996

NL02, face to face questionnaire

13 (page 17) Do you suffer from long-standing diseases, conditions or handicaps?

- *yes*
- *no*

Comments

- > type of disease: chronic conditions or handicaps
- > description of the disease: no

Portugal: National health survey, Inquérito nacional da saúde 1995/96

P01, face to face questionnaire

3.6 Have you felt ill at any time during the past two weeks?

- *yes*
- *no*

3.7 If so, what was wrong with you?

(if the subject was ill more than once, record the occasion which lasted for the most days;

if he/she suffered more than one lesion, describe but do not code them;

if the subject does not know the name of the illness or lesion, record the first four related symptoms)

- *indicate code PAT: _____*

Type:

- *accident occurring in the past two weeks*
- *childbirth* → go to question **3.11**
- *other* → go to question **3.9**

3.8 Can you describe how you felt?

- indicate code ACI: _____

3.9 How long did you feel like this or how long did this illness last?

- less than 1 week
- between 1 week and 1 month
- 1-3 months
- more than 3 months

We should also like to ask some questions about the last time you consulted a doctor, whether at a health centre, at the doctor's surgery, at home or elsewhere.

6.1 How many times have you been seen by a doctor in the past three months?

- never → go to question 6.7
- _____ times

6.5 What was the illness you were suffering from?

(if the subject does not know the name of the illness or lesion, record the first four related symptoms)

- indicate code PAT: _____

Comments

- > type of disease: chronic conditions or temporary disabilities
- > description of the disease: what was wrong, which symptoms, how long did it last
- > reference period: past 2 weeks
- > additional question: chronic conditions or temporary disabilities, for which the respondent consulted a doctor in the past 3 months

Sweden: Survey on living conditions, Undersökningen av levnadsförhållanden 1996

S01, face to face questionnaire

32 Do you suffer from any long-term illness, after-effects from an accident, disability or other ailment?

- 1 yes
- 2 no → question 35

33 What is the nature of your condition?

(Write down each complaint and illness mentioned by the respondent, trying to be as specific as possible)

- complaint no. 1: _____
- complaint no. 2: _____
- complaint no. 3: _____
- complaint no. 4: _____
- complaint no. 5: _____
- complaint no. 6: _____

Follow-up questions:

33a Could you elaborate on this?

33b What did the doctor say it was?

33c Where in the body are your complaints located?

34 Do you, in addition, suffer from any other long-term illness, after-effects from an accident, disability or other ailment?

- yes → question 33
- no

35 Do you regularly take medicine for anything (else)?

- yes → question 33
- no

Comments

- > type of disease: long-term illness, after-effects from an accident, disability
- > description of the disease: what is the nature, could you elaborate on this, what did the doctor say, where in

- > the body
- > number of diseases: 6
- > additional question: another long-term illness, do you take medicines for anything else

United Kingdom: General household survey 1996

UK01, face to face questionnaire

2 (p. 41) Do you have any long-standing illness, disability or infirmity? By long-standing I mean anything that has troubled you over a period of time, or that it is likely to affect you over a period of time.

- *yes*
- *no*

3 What is the matter with you? _____

4 Does this illness or disability (Do any of these illnesses or disabilities) limit your activities in any way?

- *yes*
- *no*

Comments

- > type of disease: chronic conditions
- > description of the disease: what is the matter
- > additional question: does it limit your activities

United Kingdom: Health education monitoring survey 1995

UK02, face to face questionnaire

covers the same questions as UK01

United Kingdom: Health and lifestyle survey 1991

UK03, face to face questionnaire

28a Do you have any long-standing illness, disability or infirmity?

- *yes* → ask question 28b
- *no* → go to question 30

28b What is the matter with you? (record in full)

- _____

28c Does it limit your activities in any way compared with other people of your own age?

- *yes* → ask question 29
- *no* → go to question 30

Comments

- > type of disease: chronic conditions
- > description of the disease: what is the matter
- > additional question: does it limit your activities

United Kingdom: Disability survey 1996

UK04, face to face questionnaire

1 Do you have any long term health problems or complaints which affect your everyday activities?

- *yes*
- *no*

2 What is your health problem or complaint? _____

Interviewer: ask or record, try to obtain a medical term

3 Has your health problem or complaint got better or worse since your FRS interview (former interview) or has it remained the same?

- 1 *got better since FRS interview*
- 2 *got worse since FRS interview*
- 3 *no changes since FRS interview*
- 4 *began since FRS interview*

4 Do you have any other long term health problem or complaint?

Interviewer: ask or record as necessary, up to 4 complaints to be coded

- *yes*
- *no*

Comments

- > type of disease: long term health problems or complaints that affect everyday activities
- > description of the disease: what is it
- > additional question: has it changed since the FRS interview, another long term health problem

United Kingdom: Survey of psychiatric morbidity 1993

UK05, face to face questionnaire

A11 Do you have any long-standing illness, disability or infirmity? By long-standing I mean anything that has troubled you over a period of time, or that it is likely to affect you over a period of time.

- *yes*
- *no*

A11a What is the matter with you? _____

Interviewer: try and obtain a medical diagnosis or establish main symptoms.

Informant has long-standing illness or saw a GP about a mental, nervous or emotional problem.

BA1 Earlier you told me about (complaint(s)). I'd now like to ask you a few more questions about this.

a Name of complaint or describe main symptoms: _____ (up to 8 complaints)

Interviewer: try and obtain a medical diagnosis

b How old were you when your (complaint) started? _____

c For how long has your (complaint) been at its present level? _____

d In the past week, did your (complaint) actually stop you from getting on with the things you usually do or would like to do?

- *yes*
- *no*

Comments

- > type of disease: chronic conditions: physical and mental
- > description of the disease: what is the complaint, diagnosis, main symptoms
- > number of diseases: 8
- > additional questions concerning mental problems: since when, how long at the present level, restrict your activities in the past week

United Kingdom: Survey of work-related illness 1995

UK06, face to face questionnaire

2 May I just check the answers you gave on (the first interview date). You were asked whether in the previous 12 months, that is between ... and ..., you had suffered from some illness, disability or physical problem caused or made worse by your work. You indicated that you had suffered from such an illness. Is that correct?

- *work-related illness*
- *no work-related illness*

4a Enter illness number

4b What is/ was your illness? _____

Interviewer: enter short name for illness

4c In a few words, how would you describe the illness or physical problem that was caused or made worse by your work? _____

4d Ask or record if clear from previous responses: And may I just check, how would you describe this illness? Interviewer: code most applicable

- 1 *bone, joint or muscle problem*
- 2 *breathing or lung problem*
- 3 *hearing problem*
- 4 *skin problem*
- 5 *stress, depression or anxiety*
- 6 *other problem*

4e Did you suffer from any more work-related illnesses during this period? (up to 4 illnesses)

- *yes*
- *no*

Comments

- > type of disease: illness or physical work-related problem (possibly including temporary disabilities)
- > description of the disease: what is your illness, description
- > reference period: 12 months before the first interview
- > number of diseases: 4

United Kingdom: Health survey for England 1996

UK09, face to face questionnaire

page 3 Do you have any long-standing illness, disability or infirmity? By long-standing I mean anything that has troubled you over a period of time, or that it is likely to affect you over a period of time.

- *yes*
- *no*

If yes, what is the matter with you? (record fully, probe for detail)

- _____

Can I check, do you have any other long-standing illness, disability or infirmity?

- *yes*
- *no*

(up to 6 long-standing illnesses)

Does this illness or disability limit your activities in any way?

- *yes*
- *no*

Comments

- > type of disease: chronic conditions
- > description of the disease: what is the matter

- > number of diseases: 6
- > additional question: another long-standing illness, does it limit your activities

United Kingdom: Scottish health survey 1995

UK10, face to face questionnaire

page 3 Do you have any long-standing illness, disability or infirmity? By long-standing I mean anything that has troubled you over a period of time, or that it is likely to affect you over a period of time.

- *yes*
- *no*

If yes, what is the matter with you? (record fully, probe for detail)

- _____

Does this limit your activities in any way?

- *yes*
- *no*

Can I check, do you have any other long-standing illness, disability or infirmity?

- *yes*
- *no*

(maximum of 6 illnesses)

Comments

- > type of disease: chronic conditions
- > description of the disease: what is the matter
- > number of diseases: 6
- > additional question: another long-standing illness, does it limit your activities

Norway: Health interview survey Helseundersøkelsen 1995

N01, face to face questionnaire

11a Do you suffer from any illness or disorder of a more long-term nature, any congenital disease or the effect of an injury? We are referring to difficulties/limitations of a more long-term nature. The term 'long-term' refers to a situation that has lasted or is expected to last for 6 months or more.

- *yes* → go to question 11b
- *no* → go to question 12a

11b What type of illness, injury or disorder do you have? _____

11c When did you incur the illness, injury or disorder?

- 1 *in the past 14 days*
- 2 *earlier in 1995* → which month? _____
- 3 *prior to 1995* → which year? _____
- 4 *congenital*

11d Has a physician ever said you have this diagnosis/illness?

- *yes*
- *no*

11e Is the health problem you mentioned an illness or an injury?

(May be marked by the interviewer if there is any doubt as to whether this is a case of illness or injury)

- 1 *illness*
- 2 *injury*

Repeat question 11 as long as there are more illnesses (max. 10)

Show card 3 if the respondent does not recall any more illnesses (if telephone interview, read card 3)

Card 3
1 Svulster, kreft

...

57 Følger etter andre ulykkestilfelle, skader

12a If no to question **11a**: Have you any of the illnesses listed on this card?
If yes to question **11a**: Have you any of the illnesses listed on this card and is this an illness, injury or disorder you have not yet mentioned?

- *yes* → go to question **12b**
- *no* → go to question **13a**

12b To what type of injury or disorder are you referring? _____

12c When did you get the illness, injury, disorder?

- 1 *in the past 14 days*
- 2 *earlier in 1995* → which month? _____
- 3 *prior to 1995* → which year? _____
- 4 *congenital*

12d Has a physician ever said you have this diagnosis/illness?

- *yes*
- *no*

12e Is the health problem you mentioned an illness or an injury?

(May be marked by the interviewer if there is any doubt as to whether this is a case of illness or injury)

- 1 *illness*
- 2 *injury*

Repeat question 12 as long as there are more illnesses (max. 10)

Have you other illnesses, injuries or disorders than the ones on this card?

- *yes* → go to question **12b**
- *no* → go to question **13a**

13a Have you any disability that you would not call an illness, injury or disorder and which you therefore have not mentioned?

- *yes* → go to question **13b**
- *no* → go to question **14a**

13b What type of disability do you have? _____

13c When did you first get this disability?

- 1 *in the past 14 days*
- 2 *earlier in 1995* → which month? _____
- 3 *prior to 1995* → which year? _____
- 4 *congenital*

13d Has a physician ever said you have this diagnosis/illness?

- *yes*
- *no*

12e Is the health problem you mentioned an illness or an injury?

(May be marked by the interviewer if there is any doubt as to whether this is a case of illness or injury)

- 1 *illness*
- 2 *injury*

Repeat question 13 as long as there are more disabilities (max. 5)

Have you any other disabilities?

- *yes* → go to question **13b**

- *no* → go to question 14a

Pose to people with illnesses or disabilities in questions 11-13

18a We would now like to know how you evaluate the permanent illnesses/disabilities you have mentioned. To what extent do they affect your everyday life? We are referring to all types of consequences: pain, anxiety, insomnia, fatigue, limitations on what you can do. If the effects come and go sporadically, the response will depend on the respondent's assessment of whether they have an effect on his/her everyday life.

- 1 *to a large extent*
- 2 *to some extent*
- 3 *to a small extent*
- 4 *not at all*

Comments

- > type of disease: chronic conditions, lasting more than 6 months
- > description of the disease: what type of illness
- > number of diseases: 10
- > additional question: since when, diagnosed by a doctor, illness or injury, another illness, another illness on card 3, another disability, does it limit your activities

Switzerland: Schweizerische Gesundheitsbefragung 1997

CH01, telephone questionnaire

13 Es gibt heutzutage viele Leute, die ein psychisches oder körperliches Problem haben, wo sie in den alltäglichen Aktivitäten einschränkt. Haben Sie ein solches Problem oder eine solche Krankheit, wo schon länger als ein Jahr dauert?

Interviewer: Psychisches Problem bedeutet das Gleiche wie seelisches Problem

- *ja*
- *nein*

13.1 Ist das Ihrer Meinung nach körperlich oder psychisch bedingt?

- *körperlich bedingt*
- *psychisch bedingt*
- *beides*
- *weder körperlich noch psychisch*

13.2 Können Sie mir sagen, was das genau für ein Problem ist, wo sie einschränkt?

Interviewer: 2 Antworten möglich!

- *Liste Gesundheitsproblemen (gemäss ICD 10)*

Comments

- > type of disease: chronic conditions, physical and mental, that restrict daily activities, lasting more than 1 year
- > description of the disease: what problem, coded as ICD codes

A01, face to face questionnaire

An Personen ab 16 Jahren

B38 Rauchen Sie täglich Zigaretten?

- *ja, bis 10 Zigaretten*
- *ja, 11 bis 20 Zigaretten*
- *ja, mehr als 20 Zigaretten*
- *nein, habe aufgehört*
- *nein, habe nie geraucht*

Comments

- > only cigarettes
- > possible to identify daily smokers, ex-smokers, persons who have never smoked, and heavy smokers
- > not possible to identify occasional smokers
- > daily consumption of cigarettes: precoded
- > no comparison with smoking behaviour in the past

Austria: Rauchgewohnheiten 1986

A03, face to face questionnaire

An alle ab 16 Jahren

B42 Rauchen Sie täglich, regelmäßig, aber nicht täglich, gelegentlich oder nicht?

- *täglich*
- *regelmäßig, aber nicht täglich*
- *gelegentlich*
- *nicht* → weiter bei **B50**

An alle Raucher ab 16 Jahren

Wenn Frage **B42** mit 'täglich', 'regelmäßig, aber nicht täglich' oder 'gelegentlich' beantwortet wurde

B43 Rauchen Sie vorwiegend Zigaretten, Zigarren oder Pfeife?

- *Zigaretten*
- *Zigarren* → weiter bei **B49**
- *Pfeife* → weiter bei **B49**

Wenn Frage **B43** mit 'Zigaretten' beantwortet wurde

B44 In welchem Alter haben Sie regelmäßig zu rauchen begonnen? _____ *Jahren*

B45 Rauchen Sie vorwiegend Zigaretten mit Filter oder ohne Filter?

- *mit Filter*
- *ohne Filter*

Wenn Frage **B42** mit 'täglich' und Frage **B43** mit 'Zigaretten' beantwortet wurde

B46 Wieviele Zigaretten rauchen Sie im Durchschnitt täglich?

- *bis zu 5 Zigaretten*
- *6 bis 10 Zigaretten*
- *11 bis 20 Zigaretten*
- *21 bis 40 Zigaretten*
- *41 und mehr*

B47 Welche Zigarettenmarke rauchen Sie vorwiegend?

Kennzahl der Zigarettenmarke It Liste C eintragen.

B48 Haben Sie innerhalb der letzten 5 Jahre die vorwiegend gerauchte Zigarettenmarke gewechselt?

- *nein*

- *ja, auf leichtere*
- *ja, auf stärkere*

B49 Haben Sie schon ernsthaft versucht, mit dem Rauchen aufzuhören?

- *nein*
- *daran gedacht*
- *einmal*
- *mehrmals*

Weiter bei **B56**

An alle Nichtraucher ab 16 Jahren

Wenn Frage **B42** mit 'nicht' beantwortet wurde

B50 Haben Sie jemals Zigaretten geraucht?

- *ja*
- *nein*

Wenn Frage **B50** mit 'ja' beantwortet wurde

B51 Wie lange ist es her, daß Sie aufgehört haben zu rauchen?

Geben Sie bitte die Zeit in Monaten bzw. Jahren an!

- _____ *Monate, oder*
- _____ *Jahre*

B52 Wieviele Zigaretten haben Sie früher im Durchschnitt täglich geraucht?

- *bis zu 5 Zigaretten*
- *6 bis 10 Zigaretten*
- *11 bis 20 Zigaretten*
- *21 bis 40 Zigaretten*
- *41 und mehr*

B53 Warum haben Sie aufgehört zu rauchen? Nennen Sie den Hauptgrund und bis zu drei andere Gründe!

- 1 *Finanzielle Ersparnis*
- 2 *Sorge vor gesundheitlichen Folgen*
- 3 *Andere gesundheitlichen Gründe*
- 4 *Antiraucherkampagne*
- 5 *Sonstige Berichte oder Artikel über die Schädlichkeit des Rauchens*
- 6 *Aufklärung durch Ihren Arzt*
- 7 *Persönlicher Ratschlag von Verwandten oder Bekannten*
- 8 *Schwangerschaft*
- 9 *Sonstige Gründe*

Comments

- > current consumption of cigarettes, cigars and pipe, and former consumption of cigarettes

Germany: Bundes Gesundheitssurvey 1997

D05, face to face questionnaire

51 Haben Sie früher geraucht oder rauchen Sie zur Zeit?

- habe noch nie geraucht (bis auf ganz seltenes Probieren) → Bitte weiter mit Frage **56**
- habe früher geraucht, rauche seit mindestens einem Jahr nicht mehr → Habe im Alter von _____ Jahren aufgehört
- habe in den letzten 12 Monaten aufgehört zu rauchen
- rauche zur Zeit → - ja, täglich
- ja, gelegentlich

52 In dem folgenden Schema geben Sie unter A bitte zunächst an, wann Sie begonnen haben, regelmäßig (auch in kleinen Mengen) zu rauchen.

Geben Sie unter B bitte an, wie viele Jahre Sie bis zum Alter von 19 Jahren, in den Zwanzigern, Dreißigern etc. insgesamt geraucht haben, und nennen Sie dann unter C die Zahl der täglich gerauchten Zigaretten bzw. der anderen Tabakwaren.

52A Alter beim Beginn des regelmäßigen Rauchens

- habe im Alter von _____ Jahren begonnen

Bitte füllen Sie die Spalten B und C für die gesamte Zeit Ihres Lebens aus, während der Sie geraucht haben

52B Wie viele Jahre haben Sie im Alter von... bis... geraucht?

Bis zum Alter von 19 Jahren insgesamt _____ Jahre

Im Alter von 20-29 Jahren insgesamt _____ Jahre

Im Alter von 30-39 Jahren insgesamt _____ Jahre

Im Alter von 40-49 Jahren insgesamt _____ Jahre

Im Alter von 50-59 Jahren insgesamt _____ Jahre

Im Alter von 60-69 Jahren insgesamt _____ Jahre

52C Wie viele Zigaretten oder sonstige Tabakwaren durchschnittlich pro Tag?

	Zigaretten	Zigarren	Pfeifen
Bis zum Alter von 19 Jahren insgesamt	_____	_____	_____
Im Alter von 20-29 Jahren insgesamt	_____	_____	_____
Im Alter von 30-39 Jahren insgesamt	_____	_____	_____
Im Alter von 40-49 Jahren insgesamt	_____	_____	_____
Im Alter von 50-59 Jahren insgesamt	_____	_____	_____
Im Alter von 60-69 Jahren insgesamt	_____	_____	_____

Nur von Rauchern zu beantworten

53 Haben Sie schon einmal versucht, mit dem Rauchen aufzuhören?

- *nein* → Bitte weiter mit Frage **54**
- *ja*

53a Wenn ja, wie oft haben Sie es geschafft, wenigstens einen Tag lang nicht zu rauchen? _____ *Male*

53b Wie lang war die längste Zeitspanne, in der Sie nicht geraucht haben?

_____ *Tag(e) oder _____ Monate oder _____ Jahre*

54 Wieviel rauchen Sie zur Zeit durchschnittlich am Tag?

Anzahl pro Tag

Zigaretten _____
 Zigarren, Stumpen, Zigarillos _____
 Pfeifen _____

Nur von ehemaligen Rauchern zu beantworten

55 Welches waren Ihre wichtigsten Gründe, mit dem Rauchen aufzuhören?

Bitte geben Sie die drei wichtigsten Gründe an.

- a nicht mehr nach Rauch riechen/schmecken*
- b Schwangerschaft*
- c Partner/Kollege/jemand aus dem Freundeskreis hat aufgehört*
- d Die Abhängigkeit loswerden*
- e Das Geld für Sinnvolleres ausgeben*
- f Besseres Vorbild für die Kinder*
- g Sorge um die eigene Gesundheit*
- h Bessere Luft zu Hause/am Arbeitsplatz*
- i Wieder fit und leistungsfähig werden*
- j Sonstige Gründe → und zwar: _____*

Comments

- > stop smoking: when did you stop, did you ever try to stop, did you succeed, for how long, reasons to stop

Germany: Umwelt, Gesundheit und Gesundheitsversorgung 1995

D06, face to face questionnaire

14 Sind Sie Raucher, Ehemaliger Raucher, oder Nichtraucher?

- *Raucher*
- *Ehemaliger Raucher*
- *Nichtraucher*

Comments

- > smoking in general
- > possible to identify smokers, ex-smokers, and persons who have never smoked
- > not possible to identify daily smokers, occasional smokers, and heavy smokers

Denmark: Danish health interview survey, Sundhed og sygelighed i Danmark 1994

DK01, face to face questionnaire

85 Do you smoke?

1 yes, daily → question **87**

2 *yes, but some days I don't smoke* → question 87
 3 *no*

86 Have you ever been a smoker?

- 1 *yes, I quit within the past 6 months*
- 2 *yes, I quit more than 6 months ago*
- 3 *no* → question 90

87 How much do you/did you smoke a day on average?

- a *number of cigarettes daily:* _____
- b *number of cheroots daily:* _____
- c *number of cigars daily:* _____
- d *number of grams of pipe tobacco (a week) :* _____

88 When did you start to smoke? Which year: _____

If the interviewee is a smoker, i.e. 1 or 2 in question 85, continue with question 89

If the interviewee has quit smoking, i.e. 1 or 2 in question 86, continue with question 89B

89 Within the last year have you tried to quit smoking or limit your tobacco consumption?

- *yes, tried to quit*
- *yes, tried to limit my tobacco consumption*
- *no* → question 90

89A What did you do?

89B What did you do to quit smoking?

- a *used nicotine chewing gum*
- b *used nicotine patch*
- c *took smoking withdrawal course*
- d *sought help from a doctor*
- e *sought help from other health professionals*
- f *sought help from alternative healers (e.g. acupuncturist, hypnotist)*
- g *sought help from family/friends/acquaintances*
- h *went for a walk instead of smoking*
- i *ate/drank instead of smoking*
- j *did not do anything special*
- k *other*
 what: _____

Comments

- > current and former consumption of cigarettes, cheroots, cigars and pipe
- > possible to identify daily smokers, occasional smokers, ex-smokers, persons who have never smoked, and heavy smokers

- > stop smoking: when did you stop, did you try to stop or limit within the last year, what did you do

Spain: National health survey, Encuesta nacional de salud 1995

E01, face to face questionnaire

19 Could you please tell me if you smoke?

- *yes, smokes every day* → go on to question 20
- *yes, but not every day* → go on to question 22
- *no, but used to smoke* → go on to question 21
- *does not smoke and has never smoked habitually* → go on to question 22

Only for those who smoke every day

20 How many cigarettes etc. and what type of tobacco do you smoke on an average day?

- _____ *cigarettes*
- _____ *pipes*
- _____ *cigars*

20a How old were you when you started smoking? _____ *years*20b Would you say that you are now smoking more than, less than or the same amount as two years ago?

- *more*
- *less*
- *same amount*

Only for those who used to smoke but do not now

21 How old were you when you started smoking? _____ *years*21a How long ago did you stop smoking?

- _____ *months ago, or*
- _____ *years ago*

21b What were your two main reasons for this decision? (two replies, show card F)

- *doctor's advice*
- *felt some discomfort from the tobacco*
- *became more concerned than before about the harmful effects of tobacco (risk to health)*
- *felt that mental and/or physical performance was suffering, in general terms*
- *decided voluntarily, of own accord*
- *other reasons (please specify) _____*

21c How much did you smoke on an average day?

- _____ *cigarettes*
- _____ *pipes*
- _____ *cigars*

Comments

- > current and former consumption of cigarettes, cigars and pipe
- > possible to identify daily smokers, occasional smokers, ex-smokers, persons who have never smoked, and heavy smokers

- > stop smoking: when did you start, when did you stop, main reasons

Spain: Household survey on drug use, Encuesta domiciliaria sobre uso de drogas 1995

E02, face to face questionnaire

16Cuál de las siguientes frases definen mejor su consumo de tabaco?

(Which of the following descriptions characterises your tobacco consumption?)

- 1 *En la actualidad fumo diariamente (I smoke daily at the moment)*
- 2 *En la actualidad fumo ocasionalmente (I smoke occasionally at the moment)*

- 3 *En la actualidad no fumo, pero antes sí (I do not smoke now, but I used to)* → go on to question 20
 4 *Nunca he fumado (I have never smoked)* → go on to question 24

Las preguntas 17 a 19 se harán sólo a los que actualmente fuman, items 1 y 2 de la pregunta 16

17 A qué edad fumó Vd. el primer cigarillo? (How old were you when you smoked your first cigarette?)

- _____

18 A qué edad comenzó Vd. a fumar diariamente? (How old were you when you started smoking daily?)

- _____

- *Nunca ha fumado diariamente (I have never smoked daily)*

19 Por término medio que número de cigarrillos, puros o pipas fuma Vd. cada día que fuma?
 (How many cigarettes, cigars or pipes do you smoke each day?)

a *cigarrillos (cigarettes)* _____

b *puros (cigars)* _____

c *pipas (pipes)* _____

Las preguntas 20 a 23 se harán tan sólo a los que ahora no fuman, pero antes sí lo hacían, ítem 3 en pregunta 16

20 A qué edad fumó Vd. el primer cigarillo? (How old were you when you smoked your first cigarette?)

- _____

21 A qué edad comenzó Vd. a fumar diariamente? (How old were you when you started smoking daily?)

- _____

- *Nunca ha fumado diariamente (I have never smoked daily)*

22 Por término medio que número de cigarrillos, puros o pipas fumaba Vd. cada día cuando decidió dejar de fumar? (How many cigarettes, cigars or pipes did you smoke each day when you decided to stop smoking?)

a *cigarrillos (cigarettes)* _____

b *puros (cigars)* _____

c *pipas (pipes)* _____

23 Cuánto tiempo hace que dejó Vd. de fumar? Especificar número y unidad temporal: años, meses o días.
 (How long have you been smoking? Specify number and period: years, months or days.) _____

Comments

- > current and former consumption of cigarettes, cigars and pipe
- > possible to identify daily smokers, occasional smokers, ex-smokers, persons who have never smoked, and heavy smokers
- > present and former daily consumption of cigarettes, cigars and pipe: open ended
- > additional questions: when did you start, how long have you been smoking

Finland: Survey on health behaviour, Finbalt health monitor, Aikuisväestön terveystutkimus 1996
 FIN01, self administered questionnaire

33 Have you ever smoked?

1 *no* → proceed to question 48

2 *yes*

33a Have you ever smoked at least 100 cigarettes, cigars or pipefuls in your lifetime?

1 *no* → proceed to question 48

2 *yes*

34 Have you ever smoked daily (= practically every day for at least one year)? How many years altogether?

1 *I have never smoked daily*

2 *I have smoked daily altogether _____ years*

35 Do you smoke now (cigarettes, cigars, pipe)?

1 *yes, daily*

- 2 *occasionally*
3 *not at all*

36 When did you last smoke? If you smoke regularly, please circle alternative 1.

- 1 *yesterday or today*
2 *2 days - 1 month ago*
3 *1 month - half a year ago*
4 *half a year to one year ago*
5 *one year to five years ago*
6 *five years to ten years ago*
7 *more than ten years ago*

37 How much do you smoke or did you smoke before you stopped, on an average per day? Please give an answer to each item.

- manufactured cigarettes: _____ *cigarettes per day*
- hand-rolled cigarettes: _____ *cigarettes per day*
- pipe _____ *pipefuls a day*
- cigars _____ *cigars a day*

38 Which brand of cigarettes do you smoke mostly, or did you smoke before you stopped?

- _____

39 What is your own opinion of your present smoking habits? Do you smoke:

- 1 *far too much*
2 *a little too much*
3 *moderately*
4 *I don't smoke at present*

Comments

- > current and former consumption of manufactured cigarettes, hand-rolled cigarettes, cigars and pipe
- > possible to identify daily smokers, occasional smokers, ex-smokers, persons who have never smoked, and heavy smokers
- > present or former daily consumption of manufactured cigarettes, hand-rolled cigarettes, cigars and pipe: open ended
- > additional questions: brand of cigarettes, when did you last smoke, how long have you been smoking, opinion of smoking habits

Finland: Health care survey, Terveystutkimus 1995

FIN05, face to face questionnaire

6.3 Have you ever smoked regularly? daily or almost daily at least one year

- *I have smoked regularly*
- *I have never smoked regularly* → question **6.6**

6.3A How many years in total have you been smoking? _____ *years*

6.4 Do you smoke at present? cigarettes, cigars or pipe

- *smokes regularly*
- *smokes occasionally*
- *does not smoke* → question **6.6**

6.5 How much do you smoke daily at present? How many:

- cigarettes: _____
- pipefuls: _____
- cigars: _____

Comments

- > current consumption of cigarettes, cigars and pipe

- > possible to identify daily smokers, occasional smokers, ex-smokers, persons who have never smoked, and heavy smokers
- > present daily consumption of cigarettes, cigars and pipe: open ended
- > additional questions: how long have you been smoking

Finland: Use of health services and health status, Aikuisväestön terveystalvelujen käyttö ja terveydentila 1993/94

FIN08, telephone interview

80 I should now like to ask about tobacco consumption. Which of the following would apply to your current smoking habits? (Instructions: Tobacco consumption includes cigarettes, cigars and pipes)

- *never really smoked*
- *given up*
- *smoke less than once a week*
- *smoke at least once a week*
- *smoke every day or more or less every day?*

81 How many cigarettes, pipefuls or cigars do you smoke a day on average? _____

Comments

- > general tobacco consumption
- > possible to identify daily smokers, occasional smokers ('more than once a week' and 'less than once a week'), ex-smokers, persons who have never smoked, and heavy smokers
- > present daily consumption of cigarettes, cigars and pipe (together): open ended

Finland: Finnish drinking habits survey 1992

FIN12, face to face questionnaire

211 Do you smoke or have you smoked before? Please answer according to the alternatives on this list.

- 1 *I smoke daily, on the average once a day or more frequently*
- 2 *I smoke every now and then, but not daily, and on the average once a week or more frequently*
- 3 *I seldom smoke, less than once a week*
- 4 *I used to smoke, but I have now stopped completely* → question **213**
- 5 *I have never smoked, but at most tried a few times* → question **213**

212 How many cigarettes do you usually smoke a day? number of cigarettes: _____

Comments

- > general tobacco consumption
- > possible to identify daily smokers, occasional smokers ('more than once a week' and 'less than once a week'), ex-smokers, persons who have never smoked, and heavy smokers
- > present daily consumption of cigarettes: open ended

France: Enquête sur la santé et les soins médicaux 1991/92

F01, face to face questionnaire

Personnes de 14 ans et plus

9.4 Actuellement, la personne fume t-elle?

- 1 *oui*
- 2 *non* → question **9.7**

9.5 Combien de cigarettes, cigares, pipes par jour? _____

9.6 Depuis combien d'années? _____ → question **9.9**

9.7 Dans le passé, a-t-elle déjà fumé régulièrement?

- 1 *oui*
- 2 *non* → question **9.9**

9.8 Pendant combien d'années? _____

Comments

- > general tobacco consumption
- > possible to identify daily smokers, occasional smokers (based on quantity), ex-smokers, persons who have never smoked, and heavy smokers
- > present daily consumption of cigarettes, cigars and pipe (together): open ended
- > additional question: how long have you been smoking

France: Enquête sur la santé et la protection sociale mise à jour 1996

F03, self administered questionnaire

11 Fumez-vous de façon habituelle?

1 *oui* → combien fumez-vous par jour de : *cigarettes*: _____ *pipes, cigarillos ou cigares*:

depuis combien d'années? _____

2 *non* → avez-vous déjà fumé? 1 *oui* → pendant combien d'années? _____
2 *non, jamais*

Comments

- > consumption of cigarettes on the one hand and of pipes, cigars and cigarillos on the other
- > possible to identify daily smokers, occasional smokers (based on quantity), ex-smokers, persons who have never smoked, and heavy smokers

- > additional question: how long have you been smoking

France: Baromètre santé grand public 1995

F06, telephone interview

110 Est-ce que vous fumez, ne serait-ce que de temps en temps?

1 *oui*

2 *non*

3 (*oui mais très rarement*)

111 Combien de cigarettes (cigares ou pipes) fumez vous en moyenne ... ?

- *par jour*: _____, *ou*

- *par semaine*: _____

112 Depuis combien de temps fumez-vous?

- *mois*: _____, *ou*

- *années*: _____

113 A quel âge avez-vous commencé à fumer régulièrement? _____

114 Au cours de l'année écoulée y a-t-il eu des changements dans votre consommation de tabac?

1 *oui, vous avez augmenté votre consommation*

2 *oui, vous avez diminué votre consommation*

3 *vous vous êtes mis à fumer des cigarettes plus légères*

4 *vous vous êtes mis à fumer des cigarettes plus fortes*

5 *vous vous êtes mis à fumer le cigare ou la pipe*

6 *non, il n'y a pas eu de changement*

115 Au cours de l'année écoulée avez-vous essayé d'arrêter de fumer?

1 *oui*

2 *non*

116 Dans le passé, avez-vous fumé plus régulièrement?

- 1 *oui*
2 *non*

117 Avez-vous déjà fumé?

- 1 *non, vous n'avez jamais fumé*
2 *oui, vous avez fumé occasionnellement*
3 *oui, vous avez fumé quotidiennement pendant au moins de six mois*

118 Durant combien de temps avez-vous fumé?

- 1 *de 6 mois à 1 an*
2 *de 1 à 2 ans*
3 *de 3 à 4 ans*
4 *de 5 à 7 ans*
5 *de 7 à 10 ans*
6 *plus de 10 ans*

119 Depuis combien de temps avez-vous arrêté de fumer?

- 1 *de 6 mois à 1 an*
2 *de 1 à 2 ans*
3 *de 3 à 4 ans*
4 *de 5 à 7 ans*
5 *de 7 à 10 ans*
6 *plus de 10 ans*

Comments

- > general tobacco consumption

- > stop smoking: would you like to give up

Italy: Survey on health conditions and recourse to health services, Condizioni di salute e ricorso ai servizi sanitari 1994

I01, face to face questionnaire

For persons aged 14 years and older

15.1 Do you normally smoke?

- 1 *no, I have never smoked* → question 16.1
- 2 *no, but I once did*
- 3 *yes*

If respondent smokes or once smoked, code numbers 2 or 3 to question 15.1

15.2 When did you start to smoke (age)? _____

15.3 How many years have you been smoking for (excluding periods in which you may have given up)?

- *number of years:* _____

15.4 What do/did you mainly smoke?

- 1 *cigarettes*
- 2 *cigars*
- 3 *pipe*

If respondent mainly smokes or once smoked cigarettes, code 1 at question 15.4

15.5 Type of cigarette

- 1 *filter-tipped*
- 2 *without filter*

15.6 Average number of cigarettes smoked every day

average number: _____

For respondents who normally smoke

15.7 Have you ever tried to give up smoking?

- 1 *no*
- 2 *yes*

For respondents who have been smokers for at least two years

15.8 Over the last two years, have you cut back on or increased consumption of tobacco, compared to before?

- 1 *reduction*
- 2 *increase*
- 3 *same*
- 4 *I don't know*

For ex-smokers, code 2 at question 15.1

15.9 How many years ago did you give up smoking?

- *years:* _____, *or*
 - *months:* _____

Comments

- > consumption of cigarettes, cigars and pipe
- > possible to identify daily smokers, occasional smokers (based on quantity), ex-smokers, persons who have never smoked, and heavy smokers
- > present daily consumption of cigarettes: open ended
- > distinction between cigarettes with and without filter
- > comparison with smoking behaviour 2 years ago
- > stop smoking: did you ever try to stop, when did you stop
- > additional questions: how many years have you been smoking, when did you start

Italy: Aspects of daily life, Aspetti della vita quotidiana 1994

I02, self administered questionnaire

For persons aged 14 years and older

4.1 Do you normally smoke?

- 1 *yes*
- 2 *no, but I once did* → question 5.1
- 3 *no, I have never smoked* → question 5.1

If yes

4.2 What do you mainly smoke? (only one answer may be given)

- 1 *cigars*
- 2 *pipe*
- 3 *cigarettes*

If you smoke cigarettes

4.3 How many cigarettes do you smoke every day on average? number: _____

Comments

- > consumption of cigarettes, cigars and pipe
- > possible to identify daily smokers, occasional smokers (based on quantity), ex-smokers, persons who have never smoked, and heavy smokers
- > present daily consumption of cigarettes: open ended

the Netherlands: Health interview survey, Gezondheidsenquête 1995

NL01, self administered questionnaire

11 Do you smoke?

- 1 *yes, I smoke every day*
- 2 *yes, I smoke now and then*
- 3 *no, but I used to smoke every day* → go to question 16
- 4 *no, but I used to smoke now and then* → go to question 16
- 5 *no, I have never smoked* → go to question 16

12 Do you ever smoke cigarettes from a pack?

- 1 *yes*
- 2 *no*

If yes: how many cigarettes do you smoke on average?

number: _____ cigarettes a day, or
number: _____ cigarettes a week

13 Do you ever smoke shag or self-rolled cigarettes?

- 1 *yes*
- 2 *no*

If yes: how many self-rolled cigarettes do you smoke on average?

number: _____ self-rolled cigarettes a day, or
number: _____ self-rolled cigarettes a week

14 Do you ever smoke cigars?

- 1 *yes*
- 2 *no*

If yes: how many cigars do you smoke on average?

number: _____ cigars a day, or
number: _____ cigars a week

15 Do you ever smoke a pipe?

- 1 *yes*
- 2 *no*

If yes: how many packets of pipe tobacco (50 grams) do you smoke on average?

number: _____ packets of pipe tobacco a week, or
 number: _____ packets of pipe tobacco a month

Comments

- > consumption of manufactured cigarettes, hand-rolled cigarettes, cigars and pipe

United Kingdom: General household survey 1996

UK01, face to face questionnaire

Those aged 18 and over

2 Have you ever smoked a cigarette, a cigar, or a pipe?

- 1 *yes*
- 2 *no*

If respondent has ever smoked

3 Do you smoke cigarettes at all nowadays?

- 1 *yes*
- 2 *no*

If respondent smokes cigarettes now

4 About how many cigarettes a day do you usually smoke at weekends? _____

5 About how many cigarettes a day do you usually smoke on weekdays? _____

6 Do you mainly smoke filter-tipped cigarettes, or plain or untipped cigarettes, or hand-rolled cigarettes?

- 1 *filter-tipped cigarettes*
- 2 *plain or untipped cigarettes*
- 3 *hand-rolled cigarettes*

If cigarette types include plain or filter cigarettes

7 Which brand of cigarette do you usually smoke?
(Interviewer: enter text of at most 60 characters) _____

- Give
- 1 full brand name
 - 2 size, e.g. King, luxury, regular
 - 3 whether filter-tipped or plain

All who currently smoke cigarettes

10 How easy or difficult would you find it to go without smoking for a whole day? Would you find it very easy, fairly easy, fairly difficult or very difficult?

- 1 *very easy*
- 2 *fairly easy*
- 3 *fairly difficult*
- 4 *very difficult*

11 Would you like to give up smoking altogether?

- 1 *yes*
- 2 *no*

12 How soon after waking do you usually smoke your first cigarette of the day?

- 1 *less than 5 minutes*
- 2 *5-14 minutes*
- 3 *15-29 minutes*
- 4 *30 minutes but less than 1 hour*
- 5 *1 hour but less than 2 hours*
- 6 *2 hours or more*

All who do not smoke cigarettes now, but have smoked a cigarette or cigar or pipe

13 Have you ever smoked cigarettes regularly?

- 1 *yes*
- 2 *no*

If yes

14 About how many cigarettes did you smoke in a day when you smoked them regularly? _____

15 How long ago did you stop smoking cigarettes regularly?

- 1 *less than 6 months ago*
- 2 *6 months but less than a year ago*
- 3 *1 year but less than 2 years ago*
- 4 *2 years but less than 5 years ago*
- 5 *5 years but less than 10 years ago*
- 6 *10 years or more ago*

All who have ever smoked cigarettes

16 How old were you when you started to smoke cigarettes regularly? _____

17 Do you smoke at least one cigar of any kind per month nowadays?

- 1 *yes*
- 2 *no*

18 About how many cigars do you usually smoke in a week? _____

19 Have you ever regularly smoked at least one cigar of any kind per month?

- 1 *yes*
- 2 *no*

Men only

20 Do you smoke a pipe at all nowadays?

- 1 *yes*
- 2 *no*

21 Have you ever smoked a pipe regularly?

- 1 *yes*
- 2 *no*

Comments

- > consumption of cigarettes, cigars and pipe
- > possible to identify daily smokers, occasional smokers (based on quantity), ex-smokers, persons who have

- > never smoked, and heavy smokers
- > present daily consumption of cigarettes at weekends and weekdays, weekly consumption of cigars and former daily consumption of cigarettes: open ended

- > stop smoking: how easy or difficult, would you like to give up smoking, how long ago did you stop
- > additional questions: brand of cigarette, how soon after waking do you start smoking, how old when you started smoking

United Kingdom: Health education monitoring survey 1996

UK02, face to face questionnaire

All respondents aged 18 and over

* Have you ever smoked a cigarette, a cigar or a pipe?

1 *yes*

2 *no*

All who have ever smoked a cigarette, cigar or a pipe

* Do you smoke cigarettes at all nowadays?

1 *yes*

2 *no*

All current cigarette smokers

* About how many cigarettes a day do you usually smoke at weekends? _____

* About how many cigarettes a day do you usually smoke on weekdays? _____

* Do you mainly smoke filter-tipped cigarettes, or plain or untipped cigarettes, or hand-rolled cigarettes?

1 *filter-tipped cigarettes*

2 *plain or untipped cigarettes*

3 *hand-rolled cigarettes*

Those who smoke hand-rolled cigarettes

* How much tobacco do you usually smoke per week?

Would you prefer to give your answer in quarter ounces or in grammes?

1 _____ *quarter ounces, or*

2 _____ *grammes*

All current cigarette smokers

* How easy or difficult do you think you would find it to go without smoking for a whole day? Would you find it very easy, fairly easy, fairly difficult or very difficult?

1 *very easy*

2 *fairly easy*

3 *fairly difficult*

4 *very difficult*

* Have you ever tried to give up smoking?

1 *yes*

2 *no*

All ex-cigarette smokers

* Did you smoke cigarettes...?

1 *regularly, that is at least one cigarette a day*

2 *did you smoke them only occasionally*

3 *(spontaneous) never really smoked cigarettes, just tried them once or twice*

All ex-regular smokers, i.e. those who smoked at least one cigarette a day

* About how many cigarettes did you smoke in a day when you smoked them regularly? _____

* How long ago did you stop smoking cigarettes regularly?

- 1 *less than 6 months ago*
- 2 *6 months but less than a year ago*
- 3 *1 year but less than 2 years ago*
- 4 *2 years but less than 5 years ago*
- 5 *5 years or more ago*

* What was the main reason for giving up smoking?

- 1 *Health reasons*
- 2 *Cost*
- 3 *Family reasons*
- 4 *Pregnant*
- 5 *Advised to by health professional*
- 6 *Did not like it/enjoy it*
- 7 *Other* → please specify: _____

All who have ever smoked a cigarette, cigar or a pipe

* (May I just check) Do you smoke at least one cigar or cigarillo of any kind per month nowadays?

- 1 *yes*
- 2 *no*

Comments

- > consumption of cigarettes, cigars and pipe
- > possible to identify daily smokers, occasional smokers (based on quantity), ex-smokers, persons who have never smoked, and heavy smokers
- > present daily consumption of cigarettes at weekends and weekdays, weekly consumption of tobacco in case of hand-rolled cigarettes, and former daily consumption of cigarettes: open ended
- > distinction between cigarettes with filter, without filter and hand-rolled cigarettes
- > stop smoking: how easy or difficult, ever tried to give up smoking, how long ago did you stop, main reason

United Kingdom: Health and lifestyle survey 1991

UK03, face to face questionnaire

Now I would like to ask you some questions about smoking

70 Have you ever smoked a cigarette or cigar or pipe, more than just a few times as an experiment?

- 1 *yes*
- 2 *no* → go to question 81

All who ever smoked

71a Do you smoke cigarettes at all nowadays?

- 1 *yes*
- 2 *no* → go to question 75

All current smokers

71b How many cigarettes do you generally smoke in a day?

- *less than 1 per day* → go to question 73
- *more than 1 per day* → give number : _____

71c What is the maximum number of cigarettes you have regularly smoked in a day? _____

71d Nowadays, do you mainly smoke filter tipped cigarettes, or plain or untipped cigarettes, or hand rolled cigarettes?

- 1 *filter tipped cigarettes*
- 2 *plain or untipped cigarettes*
- 3 *hand rolled cigarettes* → go to question 74

72 What is the tar level of the cigarettes you usually smoke?

- 1 *high*

- 2 *middle to high*
- 3 *middle*
- 4 *low to middle*
- 5 *low*

All current occasional smokers

73a Were you ever a regular smoker, that is smoking at least one cigarette a day for 6 months or more?

- 1 *yes*
- 2 *no* → go to question **74**

73b How many cigarettes did you generally smoke in a day? _____

73c How long ago did you stop being a regular cigarette smoker?

Interviewer: round up to the nearest month/year.

- *If less than 1 year enter number of months:* _____
- *If 1 year or more enter number of years:* _____

All current smokers

74 Compared with seven years ago, do you nowadays smoke less, smoke more or about the same?

- 1 *smoke less* → go to question **76**
- 2 *smoke more* → go to question **76**
- 3 *about the same* → go to question **76**

All ex-smokers

75a Were you ever a regular cigarette smoker, that is smoking at least one cigarette a day for 6 months or more?

- 1 *yes*
- 2 *no* → go to question **77**

75b How long ago did you completely stop smoking cigarettes?

Interviewer: round up to the nearest month/year.

- *If less than 1 year enter number of months:* _____
- *If 1 year or more enter number of years:* _____

75c So can I just check, how old were you when you stopped smoking cigarettes? *age:* _____

75d Over the period you were a smoker, roughly how many cigarettes did you generally smoke in a day?
number smoked per day: _____

75e What reasons made you decide to give up smoking cigarettes?

- 1 *ill health at time of giving up* → ask **75f**
- 2 *expense* → go to question **76**
- 3 *fear of ill health in future* → go to question **76**
- 4 *social pressure/to please someone else* → go to question **76**
- 5 *pregnancy* → go to question **76**
- 6 *just wanted to give up* → go to question **76**
- 7 *other reasons* → specify: _____ → go to question **76**

75f What was wrong with you when you gave up smoking cigarettes?

Interviewer: probe fully, record verbatim: _____

All current smokers and ex-regular smokers

76 How old were you when you started to smoke cigarettes?

- *age in years:* _____

All who have ever smoked

77a Have you ever smoked cigars regularly, that is at least one cigar a day?

- 1 *yes*

2 no → go to question 78

77b How old were you when you first started to smoke cigars regularly?

- *age in years:* _____

77c Do you smoke cigars at present?

1 *yes* → ask 77e

2 *no* → ask 77d

All who do not currently smoke cigars

77d How long ago did you stop smoking cigars regularly?

- *less than 1 year*

- *number of years:* _____

All who have smoked cigars

77e How many cigars do (did) you regularly smoke in a week?

- *number per week:* _____

77f Compared to seven years ago, do you think that you smoke more or fewer cigars?

Interviewer: code 'the same' if has been an ex-cigar smoker for more than seven years

1 *smokes fewer*

2 *the same*

3 *smokes more*

All who have ever smoked

78a Have you ever smoked a pipe regularly, that is at least one bowl of tobacco a day?

1 *yes*

2 *no* → go to question 79

78b How old were you when you first started to smoke a pipe?

- *age in years:* _____

78c Do you smoke a pipe at present?

1 *yes* → ask 78e

2 *no* → ask 78d

All who do not currently smoke pipe

78d How long ago did you stop smoking a pipe?

- *less than 1 year*

- *number of years:* _____

All who have ever smoked pipe

78e How many ounces of pipe tobacco do (did) you regularly smoke in a week? *ounces per week:* _____

78f Compared to seven years ago, do you think that you are now smoking more or less pipe tobacco?

Interviewer: code 'the same' if has been an ex-smoker for more than seven years

1 *smokes less*

2 *the same*

3 *smokes more*

Comments

- > consumption of cigarettes, cigars and pipe
- > possible to identify daily smokers, occasional smokers (based on quantity), ex-smokers, persons who have never smoked, and heavy smokers
- > present, former and maximum daily consumption of cigarettes, present and former weekly consumption of cigars and pipe tobacco: open ended
- > distinction between cigarettes with filter, without filter and hand-rolled cigarettes
- > comparison with consumption 7 years ago
- > stop smoking: how long ago did you stop, main reason
- > additional questions: tar level of cigarettes, how old when you started to smoke

United Kingdom: Survey of psychiatric morbidity 1993/94

UK05, face to face questionnaire, part B

H1 Have you ever smoked a cigarette, a cigar, or a pipe?

- 1 *yes*
- 2 *no* → go to section I

H2 Do you smoke cigarettes at all nowadays?

- 1 *yes*
- 2 *no* → go to question **H10**

H3 About how many cigarettes a day do you usually smoke at weekends?

- *less than 1*
- *number smoked a day: _____*

H4 And about how many cigarettes a day do you usually smoke on weekdays?

- *less than 1*
- *number smoked a day: _____*

H5 Do you mainly smoke filter-tipped cigarettes, or plain or untipped cigarettes, or hand-rolled cigarettes?

- 1 *filter-tipped cigarettes*
- 2 *plain or untipped cigarettes*
- 3 *hand-rolled cigarettes* → go to question **H7**

H6 Which brand of cigarette do you usually smoke?

- Interviewer: enter details, and code from reference card C: _____
- 1 full brand name
 - 2 size, e.g. King, luxury, regular
 - 3 filter tipped or plain

H7 How easy or difficult would you find it to go without smoking for a whole day?

- 1 *very easy*
- 2 *fairly easy*
- 3 *fairly difficult*
- 4 *very difficult*

H8 Would you like to give up smoking altogether?

- 1 *yes*
- 2 *no*

H9 How soon after waking do you usually smoke your first cigarette of the day?

- 1 *less than 5 minutes*
- 2 *5-14 minutes*
- 3 *15-29 minutes*
- 4 *30 minutes but less than 1 hour*
- 5 *1 hour but less than 2 hours*

6 2 hours or more
→ go to question H11

H10 Have you ever smoked cigarettes regularly?

1 yes

2 no → go to question H12

H10a About how many cigarettes did you smoke in a day when you smoked them regularly?

- less than 1

- number smoked a day: _____

H10b How long ago did you stop smoking cigarettes regularly?

1 less than 6 months ago

2 6 months but less than a year ago

3 1 year but less than 2 years ago

4 2 years but less than 5 years ago

5 5 years but less than 10 years ago

6 10 years or more ago

H11 How old were you when you started to smoke cigarettes regularly?

- enter age: _____

- spontaneous: never smoked cigarettes regularly

H12 Do you smoke at least one cigar of any kind per month nowadays?

1 yes

2 no → ask question H12b

H12a About how many cigars do you usually smoke in a week?

- less than 1 → go to question H13

- number smoked a week: _____ → go to question H13

H12b Have you ever regularly smoked at least one cigar of any kind per month?

1 yes

2 no

To all men who have ever smoked

H13 Do you smoke a pipe at all nowadays?

1 yes → go to section I

2 no

Norway: Health interview survey, Helseundersøkelsen 1995

N01, self administered questionnaire

Your smoking, drinking and exercise habits may have been different during the period in question for some reason, e.g. pregnancy or medications. Nevertheless, we ask that your responses reflect your current levels of consumption, even though you may think they are not "representative" for you.

3 How often do you use snuff or chewing tobacco? (Tic off one response only.)

- *daily*

- *occasionally*

- *rarely*

- *never*

4 Do you smoke cigarettes? (Tic off one response only.)

- *daily* → go to question 5
- *occasionally* → go to question 6
- *no* → go to question 6

5 How many cigarettes do you smoke per day? (Tic off once response in each column.)

factory-rolled cigarettes *home-rolled cigarettes*

30 or more

30 or more

6 Do you smoke cigars/cigarillos every day?

- *yes*
- *no*

7 Do you smoke a pipe every day?

- *yes*
- *no*

8 When you smoke, do you sometimes go outside or into a different room to avoid bothering others with your smoke? (Tic off one response only.)

- *yes, almost always*
- *yes, sometimes*
- *no, never*
- *everyone else smokes/no one else lives in the household*

To be answered by non-smokers:

9 Have you ever smoked on a daily basis?

- *yes*
- *no*

Comments

- > consumption of cigarettes, cigars, cigarillos and pipe
- > possible to identify daily smokers, occasional smokers, ex-smokers, persons who have never smoked, and heavy smokers

- > reference period: past 12 months; date specified (between and yesterday)
- > number of times: open ended question
- > number of days: the last time, open ended question

Finland: Survey on health behaviour, Finbalt health monitor, Aikuisväestön terveystietämisselvitys 1996

FIN01, self administered questionnaire

9 How many days have you been in hospital during the last year (12 months)? _____ *days*

Comments

- > context: only in-patient care; day visits may be included
- > exclusion of child birth: not specified
- > reference period: past 12 months; date not specified
- > number of times: not asked
- > number of days: during the past 12 months, open ended question

Finland: Living conditions survey, Elinolotutkimus 1994

FIN04, face to face questionnaire

121 Have you been treated in hospital during the last 12 months?

- *no*
- *yes* → how many days? _____

Comments

- > context: only in-patient care; day visits may be included
- > exclusion of child birth: not specified
- > reference period: past 12 months; date not specified
- > number of times: not asked
- > number of days: during the past 12 months, open ended question

Finland: Health care survey, Terveystutkimus 1995/96

FIN05, face to face questionnaire

3.29 How many days have you been confined to hospital this year, that is 1996? _____ *days*

Comments

- > context: only in-patient care; day visits may be included
- > exclusion of child birth: not specified
- > reference period: this year; date specified (that is 1996)
- > number of times: not asked
- > number of days: this year, open ended question

Finland: Use of health services and health status, Aikuisväestön terveystutkimus 1993/94

FIN08, telephone interview

40 How many days have you been a hospital inpatient during the last six months (or approximately since ..)?

Instruction: This question concerns hospital admission. Include the admission and discharge dates. Do not include visits to outpatient departments. Hospitals include the inpatient departments of health centres, but not rehabilitation centres, spas or sanatoria.

Comments

- > context: only in-patient care; refers to stays of at least 1 night
- > exclusion of child birth: not specified
- > reference period: last 6 months; date specified (since)
- > number of times: not asked
- > number of days: during the last 6 months, open ended question

France: Enquête sur la santé et les soins médicaux 1991/92

F01, face to face questionnaire

6 Une des personnes du ménage a-t-elle été hospitalisée au cours des six derniers mois ou est-elle actuellement hospitalisée pour une maladie, un accident, des examens, ou une autre cause?

(On considèrera qu'il y a hospitalisation:

- * si la personne a passé au moins une nuit dans un hôpital, une clinique, un centre de convalescence ou de rééducation, etc...
- * ou si elle a subi une hospitalisation d'au moins deux jours avec retour à son domicile chaque jour)
- non
- oui, 1 fois
- oui, 2 fois
- oui, 3 fois ou plus

7 Date de debut de l'hospitalisation? ___ - ___ - ___ jour - mois - année

Date de fin de l'hospitalisation? ___ - ___ - ___ jour - mois - année

(Si pas encore terminé, chiffrer 00 00 00)

Comments

- > context: in-patient care; includes stays of at least 1 night and of at least 1 day with a return home at night
- > exclusion of child birth: not specified
- > reference period: last 6 months; date not specified

France: Etude sur les conditions de vie (situations défavorisées) 1993/94

F07, face to face questionnaire

35.4 Au cours des douze mois précédents, avez-vous été hospitalisé(e) au moins une nuit?

- oui → si oui, combien de nuits au total? _____
- non

Comments

- > context: only in-patient care; refers to stays of at least 1 night
- > exclusion of child birth: not specified
- > reference period: last 12 months; date not specified
- > number of times: not asked
- > number of nights: during the last 12 months, open ended question

Italy: Survey on health conditions and recourse to health services, Condizioni di salute e ricorso ai servizi sanitari 1994

I01, face to face questionnaire

11.1 Over the last three months, have you been hospitalised in a hospital or clinic operating within the national health service or private clinic?

(Do not include hospitalisation for parturition or birth not involving complications)

- *no* → go to question 12.1
- *yes*

11.2 How many times have you been hospitalised during these past three months? _____

11.3 For how many days have you been hospitalised during these past three months? _____

11.5 With reference to the last time respondent was hospitalised, indicate days of stay: _____

Comments

- > context: only in-patient care; day visits may be included
- > exclusion of child birth: specified
- > reference period: last 3 months; date not specified
- > number of times: open ended question
- > number of days: last time and during the last 3 months, open ended questions

Italy: Aspects of daily life, Aspetti della vita quotidiana 1994

I02, face to face questionnaire

8.1 Have you been hospitalised over the last twelve months in a hospital or clinic operating within the national health service or private clinic?

(Do not include hospitalisation for parturition or birth not involving complications)

- *no* → go to question 9.1
- *yes* → how often? _____

8.2 How many days have you been hospitalised for over the last twelve months? _____

Comments

- > context: only in-patient care; day visits may be included
- > exclusion of child birth: specified
- > reference period: last 12 months; date not specified
- > number of times: open ended question
- > number of days: during the last 12 months, open ended question

Luxembourg: Socio-economic panel Living in Luxembourg, Panel socio-économique Liewen zu Letzebuerg 1996

L01, face to face questionnaire

D39 Au cours de l'année 1995, avez-vous été hospitalisé?

- *oui* → si vous avez été hospitalisé, durée totale de l'hospitalisation: _____ *jours*
- *non*

Comments

- > context: only in-patient care; day visits may be included
- > exclusion of child birth: not specified
- > reference period: during one year; date specified (in 1995)
- > number of times: not asked
- > number of days: during one year, open ended question

the Netherlands: Health interview survey, Gezondheidsenquête 1995

NL01, face to face questionnaire

Now some questions about the hospital. (Don't include admissions for childbirth).

22 Have you been admitted to a hospital or clinic during the past year, since ...? If so, how often?

- yes, _____ times → go to question **23a**
- no

22a Can you tell me when you were admitted for the last time?

- 1 1-2 years ago → go to question **34**
- 2 2-3 years ago → go to question **34**
- 3 3-4 years ago → go to question **34**
- 4 4-5 years ago → go to question **34**
- 5 5-8 years ago → go to question **34**
- 6 more than 8 years ago → go to question **34**

23a When were you admitted?

(For admissions during the last year. Don't forget the year date. If necessary estimate the date. If respondent has been admitted more than 6 times, mention only the last 6. The admission date may be longer ago than one year.)

- 1st admission: on _____ (date) or _____ days ago (estimate)
- 2nd admission: on _____ (date) or _____ days ago (estimate)
- ...
- 6th admission: on _____ (date) or _____ days ago (estimate)

23c How many nights did you spend in hospital?

- 1st admission: _____ nights
- 2nd admission: _____ nights
- ...
- 6th admission: _____ nights

Comments

- > context: only in-patient care; refers to hospital admissions
- > exclusion of child birth: specified
- > reference period: past year; date specified (since)
- > number of times: open ended question
- > number of nights: during one year, open ended question for each admission (up to 6 admissions)

Portugal: National health survey, Inquérito nacional da saúde 1995/96

P01, face to face questionnaire

3.1 For how many days in the past two weeks were you in hospital or a clinic? _____ days

Comments

- > context: only in-patient care; day visits may be included
- > exclusion of child birth: not specified
- > reference period: past 2 weeks; date not specified
- > number of times: not asked
- > number of days: during the past 2 weeks, open ended question

Sweden: Survey on living conditions, Undersökningen av levnadsförhållanden 1996

S01, face to face questionnaire

71a Have you during the last 3 months, i.e. during ... (specify which months) been hospitalized or spent some time at a nursing home?

- yes, in hospital
- yes, in a nursing home
- no → go to question **72**

71b Was this on one or several occasions/periods?

- _____ number of occasions/periods comment: _____

71c How many nights did you spend there, all told?

- _____ *number of nights in hospital*
- _____ *number of nights in nursing home*

Comments

- > context: hospitalisation and nursing home; day visits may be included
- > exclusion of child birth: not specified
- > reference period: past 3 months; date specified (i.e. during)
- > number of times: open ended question
- > number of nights: during the past 3 months, open ended question

United Kingdom: General household survey 1996

UK01, face to face questionnaire

29 (p. 47) During the last year, that is, since (date one year ago), have you been in hospital as an inpatient, overnight or longer?

- *yes*
- *no*

If 'yes'

30 How many separate stays in hospital as an inpatient have you had since (date one year ago)? _____

For each stay

31 How many nights altogether were you in hospital during your (first/second/.../sixth) stay? _____

Comments

- > context: only in-patient care; refers to stays of at least 1 night
- > exclusion of child birth: not specified
- > reference period: past year; date specified (since)
- > number of times: open ended question
- > number of nights: during the past year, open ended question for each stay separately (up to 6 stays)

United Kingdom: Health and lifestyle survey 1991

UK03, face to face questionnaire

40b And have you been in hospital, either overnight or as a day patient, in the past month?

- *yes*
- *no*

Comments

- > context: both in-patient and out-patient care; refers to stays of at least 1 night and as a day patient
- > exclusion of child birth: not specified
- > reference period: past month; date not specified
- > number of times: not asked
- > number of nights: not asked

United Kingdom: Survey of psychiatric morbidity 1993/94

UK05, face to face questionnaire, part B

C2 During the past year, that is since (date), have you been in hospital as an in-patient, overnight or longer for treatment or tests?

Interviewer: include sight or hearing problems; exclude giving birth.

- *yes*
- *no* → C5

C3 In the past 12 months, how many separate stays have you had in hospital as an in-patient?

Enter number of stays: _____

Ask C4a for the last 4 in-patient episodes

C4a How many nights altogether were you in hospital on the (first/second/third/fourth) stay? _____

Comments

- > context: only in-patient care; refers to stays of at least 1 night
- > exclusion of child birth: specified
- > reference period: past year; date specified (since)
- > number of times: open ended question
- > number of nights: open ended question for each in-patient episode separately (up to 4 episodes)

United Kingdom: Scottish health survey 1995

UK10, face to face questionnaire

page 17 During the last 12 months, that is since (date 12 months ago), have you been in hospital as an in-patient, overnight or longer?

- *yes*
- *no*

Comments

A01, face to face questionnaire

B30 Wie oft waren Sie im letzten Jahr insgesamt zur Behandlung, wegen Beschwerden oder zur Kontrolle bzw. Vorsorgeuntersuchung bei einem:

	<i>Anzahl der Besuche</i>
- praktischen Arzt?	-----
- einem Facharzt für Frauenheilkunde und Geburtshilfe?	-----
- einem Internisten?	-----
- einem Kinderarzt (auch als Begleitperson!)?	-----
- einem sonstigen Facharzt?	-----
- in einem Ambulatorium (Spitalsambulanz)?	-----
- bei einem Zahnbehandler (Zahnambulatorium)?	-----

Auch Hausbesuche des Arztes sind mitzuzählen!

Es sind nur solche Arztbesuche zu zählen, bei denen der Befragte selbst mit dem Arzt gesprochen hat.

'Rezeptabholen' bei der Ordinationshilfe zählt also nicht.

Im Normalfall ist nur der Arztbesuch wegen einer eigenen Krankheit anzugeben; nur für den Besuch beim Kinderarzt ist auch für die jeweilige Begleitperson die Häufigkeit der Besuche einzutragen.

Wenn überhaupt kein Arztbesuch im letzten Jahr: weiter bei **B32**!

B31 Waren Sie im letzten Jahr zur Behandlung bzw. wegen Beschwerden oder zur Kontrolle bzw. zur Vorsorge bei einem:

	<i>Beschwerden</i>	<i>Kontrolle</i>
- <u>praktischen Arzt?</u>	-----	-----
- einem Facharzt für Frauenheilkunde und Geburtshilfe?	-----	-----
- einem Internisten?	-----	-----
- einem Kinderarzt (auch als Begleitperson!)?	-----	-----
- einem sonstigen Facharzt?	-----	-----
- in einem Ambulatorium (Spitalsambulanz)?	-----	-----
- bei einem Zahnbehandler (Zahnambulatorium)?	-----	-----

Mehrfachmarkierungen pro Zeile möglich.

B32 Haben Sie einen bestimmten praktischen Arzt (Hausarzt), Facharzt, oder keinen Arzt, den Sie bei Erkrankungen und Beschwerden vorzugsweise aufsuchen?

- ja, praktischen Arzt (Hausarzt)
- ja, Facharzt
- nein

Belgium: Enquête de santé 1997

B01, face to face questionnaire

Enq.: Les questions sur la consommation médicale sont destinées à tous. Les réponses par proxys sont

Les questions suivantes concernent les contacts avec un médecin généraliste. Il s'agit ici des visites aux heures de consultation, des visites à domicile du patient mais aussi des consultations par téléphone.

GP.01 Avez-vous un médecin généraliste attitré?

- *oui*
- *non*

GP.02 Au cours des deux derniers mois, c'est à dire depuis le ___/___/19___, avez-vous consulté un médecin généraliste?

- *oui*
- *non* → passez à **GP.04**

GP.03 Combien de fois avez-vous consulté un médecin généraliste au cours des 2 derniers mois?

- _____ fois → passez à **GP.05**

GP.04 Quand avez-vous consulté un médecin pour la dernière fois?

- le ___/___/19___

Si la date exacte n'est pas connue, remplissez les rubriques suivantes

- 1 *il y a _____ mois*
- 2 *il y a _____ années*
- 3 *je n'ai jamais consulté le généraliste*

Enq.: Si le dernier contact a eu lieu dans les deux mois qui précèdent, posez les questions _____, sinon passez à la question **SP.01**.

Les questions suivantes se réfèrent aux contacts avec un médecin généraliste (consultation, visite à domicile, avis au cours des deux derniers mois). Au cas où il y aurait eu plus de six contacts, ne tenez compte que des six derniers. Commencez par le plus récent et remontez dans le temps.

GP.05 Date du contact avec un médecin g

- le ___/___/19___

GP.06 Pourquoi l'avez-vous contacté? Donner la raison la plus importante.

Enq. Montrez la carte 1; seulement une réponse possible.

- 1 *plainte ou maladie*
- 2 *examen/test diagnostic ou préventif*
- 3 *traitement ou une prescription*
- 4 *résultat d'un examen/test*
- 5 *pour une raison administrative*
- 6 *référence ou autre raison*

GP.07 Décrivez brièvement la raison. Mentionnez si possible les plaintes ou les maladies, même en cas de

GP.06. _____

GP.08 Dans quel cadre a eu lieu ce contact?

- 1 *consultation chez le médecin*
- 2 *visite à domicile*
- 3 *avis par téléphone*
- 4 *autre, précisez: _____*

GP.09 Qui a pris l'initiative de prendre contact avec le généraliste?

- 1 *moi-même*
- 2 *c'était un rendez-vous fixé auparavant par le généraliste*
- 3 *référé par un autre généraliste ou un spécialiste*
- 4 *appelé par le généraliste*
- 5 *envoyé par quelqu'un qui n'est pas médecin*

GP.10 Suite à cette consultation d'un médecin généraliste, avez-vous été envoyé chez un spécialiste, à l'hôpital ou une autre institution de soins? Si oui, à qui?

Enq.: Montrez la carte 2. Si la personne a été envoyée chez le spécialiste ou dans une polyclinique: montrez la

- 1 non, je n'ai pas été référé
- 2 envoyé chez le spécialiste ou dans une polyclinique → précisez le type de spécialité, ou le nom du spécialiste et de la polyclinique: _____
- 3 envoyé faire des radiographies
- 4 envoyé au laboratoire pour faire des analyses
- 5 envoyé à l'hôpital pour y être hospitalisé
- 6 envoyé chez le kinésithérapeute
- 7 référé à l'infirmière pour des soins à domicile
- 8 référé au service social
- 9 référé à une autre institution → précisez: _____

Spain: National health survey, Encuesta nacional de salud 1995
E01, face to face questionnaire

9 Have you consulted any doctor for any problem, discomfort or illness on your own behalf during the past two weeks? We are referring, of course, to an actual consultation and not to a request for an appointment or an X-ray or analysis.

- *yes* → go to question **10**
- *no*

9a Can you remember how long ago it was that you last consulted a doctor on your own behalf? (please be as specific as possible)

- _____ *years ago*
 - _____ *months ago*
 - *has never been to the doctor*
- go on to question **11**

10 How many times? _____

10a Where did the last consultation, within the past two weeks, take place? (If there has been more than one consultation within the past fortnight, you should refer to the last one, show card C)

- *Health Centre*
- *Social Security health care centre/outpatient clinic*
- *hospital outpatients' department*
- *outpatient clinic emergency service*
- *hospital emergency service*
- *own doctor's surgery*
- *company doctor's surgery*
- *business or place of work*
- *own home*
- *by telephone*
- *other*

10b What was the reason for this most recent medical consultation?

- *diagnosis and/or treatment*
- *check-up*
- *prescription only*
- *sick note, renewal of note or certificate of fitness for work*
- *other*

10c What was the speciality of the doctor whom you consulted? (show card D)

- *general medicine*
 - *paediatrics*
 - *allergies*
 - *general surgery and surgery of the digestive system*
- [etc.]
- *urology*

Finland: Use of health services and health status, Aikuisväestön terveystalvelujen käyttö ja terveydentila 1993/94

FIN08, telephone interview

45 I should now like to ask you about visits to a doctor. How many times have you seen a doctor about a matter connected with an illness of your own in the last six months or approximately since...? _____ *times*
Instruction: include only visits to a doctor in connection with disorders from which the respondent him/herself was suffering, including visits in connection with pregnancy. Do not include times the respondent was a hospital inpatient, or telephone contacts. Medical check-ups and visits to dentists will be dealt with later.

How many of your visits to a doctor in the last six months were:

- 46 to a municipal health centre? _____
- 47 to a hospital outpatients department? _____
- 48 to an occupational health officer at your place of work (works doctor)? _____
- 49 to a private doctor's surgery? _____
- 50 other? _____

85 I should now like to ask about health care in the municipality in which you live. Do you have your 'own doctor' appointed by the municipal health centre?

Instruction: a person's 'own doctor' is usually a general practitioner who can be consulted on all kinds of disorders

- *yes*
- *no*

86 Is there any other known general practitioner whom you can contact if you need help or advice? Are there several such doctors?

- *yes, one*
- *yes, several*
- *no*

87 Is this doctor:

- *at a health centre*

- *private*
- *at hospital outpatients department*
- *works/company doctor*
- *other?*

88 Have you made use of the services of your 'own doctor'?

Instruction: include locums

- *yes*
- *no*

Comments

- > context: different types of out patient care may be included; separate questions regarding registered nurses or hospital nurses, medical check-ups, dentists, physiotherapy and other physical treatments
- > definition of consultation: consultations regarding pregnancy should be included; consultations by telephone, consultations as a hospital in-patient, medical check-ups, visits to the dentist and consultations on behalf of other persons should be excluded; it is not specified whether home visits of GP and consultations on behalf of others should be in- or excluded
- > reference period: last 6 months; date specified (since....)
- > date of last consultation: not asked
- > number of consultations: during past 6 months, for different institutions separately
- > additional questions: do you have your own GP, and other own doctors

France: Baromètre santé grand public 1995

F06, telephone interview

70 Avez-vous un ou des médecin(s) habituel(s)?

- *oui, un seul*
- *oui, plusieurs*
- *non*

71 S'agit-il de:

- *un ou des généraliste(s)*
- *un ou des spécialiste(s)*

72 Est-ce:

- *un généraliste*
- *un spécialiste*

73 Au cours des douze derniers mois, combien de fois avez-vous consulté un médecin généraliste pour vous-même? _____

74 Au cours des douze derniers mois, combien de fois avez-vous consulté un médecin spécialiste pour vous-même? _____

75 La dernière fois que vous avez consulté un médecin, s'agissait-il de votre médecin habituel?

- *oui*
- *non*

76 La dernière fois que vous avez consulté un médecin, s'agissait-il ...?

- *d'un généraliste*
- *d'un spécialiste*

Comments

- > context: different types doctors may be included; distinction between GPs and specialists; separate questions regarding dentists, and regarding psychiatrists etc.

the Netherlands: Health interview survey, Gezondheidsenquête 1995

NL01, face to face questionnaire

The following questions concern contacts with your GP. They relate to visits during surgery hours and house-calls, but also to telephone-calls for other reasons than to make an appointment.

8 How often have you visited or talked to your GP during the past 2 months, since (date)?

Interviewer: If interviewee consulted a locum instead of his own GP, count this contact.

If necessary, estimate the number of times (also at question 10).

- _____ *times* → go to question **10**
- *not one single time* → go to question **9**

9 Can you tell when you consulted your GP for the last time?

Interviewer: if the consultation took place within the past 2 months, then question **10**; otherwise question **12**.

- _____ *months ago*
- *8 years ago*
- *more than 8 years ago*
- *never*

10a During those 2 months, when did you consult your GP for the first/second/.../sixth time?

Interviewer: If more than 6 consultations, mention the 6 most recent contacts.

- 1st contact: on _____ (*date*) or _____ (*estimate*)
- 2nd contact: on _____ (*date*) or _____ (*estimate*)
- ...
- 6th contact: on _____ (*date*) or _____ (*estimate*)

10b Why did you consult your GP?

Interviewer: give the reason. If possible, mention illness or complaints; as well for check-ups.

- 1st contact: _____
- 2nd contact: _____
- ...
- 6th contact: _____

10c Where or how did the consultation take place?

1 at the GP's practice

2 at home

3 by telephone

4 other → specify: _____

- 1st contact: *1 2 3 4* → _____
- 2nd contact: *1 2 3 4* → _____
- ...
- 6th contact: *1 2 3 4* → _____

10d Were you referred to a specialist, a hospital or some other institution giving assistance? And if so, to whom?

Interviewer: checklist 3. In case of referral to a specialist or out-patients clinic: give checklist 4 and note the kind of specialist.

1 *no, not referred*

2 *referred to a specialist or out-patients clinic (note kind or name of specialist and hospital), viz.*

3 *referred for x-rays*

....

9 *referred to some other institution, viz. _____*

- 1st contact: 1 2 3 4 5 6 7 8 9 → _____

- 2nd contact: 1 2 3 4 5 6 7 8 9 → _____

...

- 6th contact: 1 2 3 4 5 6 7 8 9 → _____

10e Did you consult your GP on your own initiative?

Interviewer: checklist 5.

1 *on own initiative*

2 *it was a follow-up consultation arranged with the GP beforehand*

3 *referred by another physician or by a specialist or summoned by the GP*

4 *referred by someone other than a physician*

- 1st contact: 1 2 3 4

- 2nd contact: 1 2 3 4

...

- 6th contact: 1 2 3 4

Comments

- > context: similar questions for specialists
- > definition of consultation: consultations by telephone, home visits of GP and consultations of a locum should be included; it is not specified whether consultations on behalf of other persons should be in- or excluded
- > reference period: past 2 months; date specified (since)
- > date of last consultation: asked
- > number of consultations: during past 2 months
- > additional questions: reason for the consultation, where or how did the consultation take place, referrals, own initiative

the Netherlands: Standard of living survey, Doorlopend leefsituatie onderzoek 1996

NL02, face to face questionnaire

3 How often have you visited or talked to your GP for yourself during the past 2 months, since (date)?

Interviewer: If interviewee consulted a locum instead of his own GP, count this contact.

If necessary, estimate the number of times.

- _____ times

4 Can you tell whether you consulted your GP more or less than 12 months ago for the last time?

Interviewer: if the consultation took place within the past 2 months, then question **10**; otherwise question **12**.

- *less than 12 months ago*

- *more than 12 months ago*

Comments

- > context: similar questions for specialists
- > definition of consultation: consultations of a locum should be included; consultations on behalf of other persons should be excluded; it is not specified whether consultations by telephone and home visits of GP should be in- or excluded
- > reference period: past 2 months; date specified (since)
- > date of last consultation: asked, precoded question: more than or less than 12 months ago
- > number of consultations: during past 2 months

Portugal: National health survey, Inquérito nacional da saúde 1995/96
 P01, face to face questionnaire

We should also like to ask some questions about the last times you consulted a doctor, whether at a health centre, at the doctor's surgery, at home or elsewhere.

6.1 How many times have you been seen by a doctor in the past three months?

- *never* → go to question 6.7
- _____ *times*

On the last occasion you were seen by the doctor:

6.2 What doctor was it? Where did the consultation take place? *indicate code CUID:* _____

6.3 Was the doctor a general practitioner or a specialist? *indicate code ESP:* _____

6.4 What was the main reason why you consulted the doctor?

- *I was depressed* → go to question 6.5
- *I felt ill* → go to question 6.5
- *to ask for a prescription or tests*
- *for another reason*

Please specify:

- *routine examination (no illness)* → go to question 6.7
- *occupational medicine* → go to question 6.7
- *additional diagnostic tests*
- *treatment*
- *blood pressure measurement*
- *medical certificate*
- *test results*
- *routine examination (because of illness)* → go to question 6.5
- *other reason, please specify:* _____

Were you ill?

- *yes*
- *no* → go to question 6.7

Comments

- > context: different types of out patient care: GP and specialists
- > definition of consultation: home visits of GP should be included; it is not specified whether consultations by telephone and consultations on behalf of other persons should be in- or excluded
- > reference period: past 3 months; date not specified
- > date of last consultation: not asked
- > number of consultations: during past 3 months
- > additional questions: main reason

Sweden: Survey on living conditions, Undersökningen av levnadsförhållanden 1996

S01, face to face questionnaire

74 Have you during the last 3 months, i.e. during ... (specify which months):

74a talked to a doctor on the telephone?

- *yes, on several occasions*
- *yes, once*
- *no*

74b had a housecall by a doctor?

- *yes, on several occasions*
- *yes, once*
- *no*

74c visited a doctor on duty or an emergency ward?

- *yes, number of occasions:* _____

- *no*
- *comment:* _____

74d made any other visits to a doctor's surgery or hospital out-patient department (to see the doctor about yourself)?

- *yes, number of occasions:* _____
- *no*
- *comment:* _____

Comments

- > context: different types of out patient care: GP and specialists
- > definition of consultation: separate questions for consultations by telephone and for home visits of doctors; consultations on behalf of other persons should be excluded
- > reference period: past 3 months; date specified (during)
- > date of last consultation: not asked
- > number of consultations during past 3 months asked for two types of contacts, but not for the other two types
- > additional questions: similar questions for district nurse, physiotherapist and chiropractor and homeopaths

United Kingdom: General household survey 1996

UK01, face to face questionnaire

8 (p. 42) During the 2 weeks ending yesterday, apart from any visit to a hospital, did you talk to a doctor for any reason at all, either in person or by telephone?

Exclude consultations made on behalf of children under 16 and persons outside the household.

- *yes*
- *no*

If 'yes'

9 How many times did you talk to a doctor in these 2 weeks? _____

For each consultation

10 On whose behalf was this consultation made?

- *informant*
- *other member of household 16 or over* → **11** Give person number: _____

12 Was this consultation under the National Health Service or paid for privately?

- *under the National Health Service*
- *paid for privately*

13 Was the doctor a GP (i.e. a family doctor), or a specialist or some other kind of doctor?

- *GP*
- *specialist*
- *some other kind of doctor* → **14** Specify type of doctor: _____

15 Did you talk to the doctor by telephone, at your home, in the doctor's surgery, at a health centre or elsewhere?

- *by telephone*
- *at your home*
- *in the doctor's surgery*
- *at a health centre*
- *elsewhere*

Comments

- > context: different types of out patient care: GP, specialists and other kinds of doctor
- > definition of consultation: consultations by telephone and home visits should be included; consultations on behalf of children under 16 and persons outside the household should be excluded
- > reference period: past 2 weeks; date specified (ending yesterday)
- > date of last consultation: not asked

- > number of consultations: during past 2 weeks
- > additional questions: on whose behalf, under the National Health Service, kind of doctor, where did the consultation take place; similar questions for visits to casualty or out-patient department of a hospital

United Kingdom: Health education monitoring survey 1996

UK02, face to face questionnaire

page 3 During the past year, that is since ..(today's date).. 1995, apart from any visit to a hospital, have you talked to a GP either in person or by telephone, about your health?

Interviewer: code first that applies

- *yes, at surgery*
- *yes, in person at home*
- *yes, by telephone*
- *no*

Comments

- > context: GP
- > definition of consultation: consultations by telephone and home visits should be included; it is not specified whether consultations on behalf of other persons should be in- or excluded
- > reference period: past year; date specified (since)
- > date of last consultation: not asked
- > number of consultations: not asked
- > additional questions: similar question for contacts with other health professionals, e.g. nurse or health visitor

United Kingdom: Health and lifestyle survey 1991

UK03, face to face questionnaire

39a Have you visited or been seen by your Doctor (GP) in the past month because of illness or a possible health problem?

- *yes*
- *no* → go to question 40

39b How many times in the past month have you been seen? *number of times:* _____

Comments

- > context: GP
- > definition of consultation: it is not specified whether consultations by telephone, home visits and consultations on behalf of other persons should be in- or excluded
- > reference period: past month; date not specified
- > date of last consultation: not asked
- > number of consultations: during past month

United Kingdom: Survey of psychiatric morbidity 1993/94

UK05, face to face questionnaire, part A

15 During the 2 weeks ending yesterday, apart from any visit to a hospital, did you talk to a doctor for any reason at all, either in person or by telephone?

Exclude consultations made on behalf of children under 16 and persons outside the household.

- *yes*
- *no*

If 'yes'

15a How many times did you talk to a doctor in these 2 weeks? _____

16 In the past 12 months have you spoken to a GP or family doctor on your own behalf, either in person or by telephone about a physical illness or complaint?

- *yes*
- *no*

17 In the past 12 months have you spoken to a GP or family doctor on your own behalf, either in person or by telephone about being anxious or depressed or a mental, nervous or emotional problem?

- *yes*
- *no*

Comments

- > context: question 15: different types of out patient care: GP, specialists and other kinds of doctor; question 16 and 17: GP
- > definition of consultation: consultations by telephone should be included; consultations on behalf of children under 16 and persons outside the household should be excluded; it is not specified whether home visits should be included
- > reference period: past 2 weeks; date specified (ending yesterday)
- > date of last consultation: not asked
- > number of consultations: during past 2 weeks
- > additional questions: different questions with regard to physical and mental problems

United Kingdom: Survey of work-related illness 1995/96

UK06, face to face questionnaire / telephone interview

176 During the 2 weeks ending yesterday, how many times have you talked to a doctor or other therapist for any reason? Include telephone consultations. _____ *times*

Comments

- > context: different types of out patient care: GP, specialists and other kinds of doctor
- > definition of consultation: consultations by telephone should be included; it is not specified whether home visits and consultations on behalf of other persons should be in- or excluded
- > reference period: past 2 weeks; date specified (ending yesterday)
- > date of last consultation: not asked
- > number of consultations: during past 2 weeks

United Kingdom: Scottish health survey 1995

UK10, face to face questionnaire

page 17 During the 2 weeks ending yesterday, apart from any visit to a hospital, have you talked to a doctor on your own behalf, either in person or by telephone?

Exclude consultations made on behalf of others

- *yes*
- *no*

If 'yes'

page 17 How many times have you talked to a doctor in these 2 weeks? _____

If not 'yes'

page 17 Apart from any visit to a hospital, when was the last time you talked to a doctor on your own behalf?

Interviewer: prompt if necessary.

- *less than 2 weeks ago*
- *2 weeks ago but less than a month ago*
- *1 month ago but less than 3 months ago*
- *3 months ago but less than 6 months ago*
- *6 months ago but less than 1 year ago*
- *1 year ago or more*
- *never consulted a doctor*

Comments

- > context: different types of out patient care: GP, specialists and other kinds of doctor
- > definition of consultation: consultations by telephone should be included; consultations on behalf of others should be excluded; it is not specified whether home visits should be included

- > reference period: past 2 weeks; date specified (ending yesterday)
- > date of last consultation: asked; precoded question
- > number of consultations during past 2 weeks

Norway: Health interview survey, Helseundersøkelsen 1995

N01, face to face questionnaire

39 Have you a regular doctor or medical centre that you use whenever you need medical attention?

- *yes, regular doctor*
- *yes, regular medical centre*
- *yes, company doctor*
- *no*

40a Have you been in contact with a general practitioner, medical centre, municipal medical officer, emergency medical service or a company doctor in the past 12 months? Count any kind of contact.

- *yes*
- *no* → go to question **41**

40b When were you last in contact?

- 1 *the past 14 days*
- 2 *more than 14 days, less than a month* → go to question **41**
- 3 *one to six months* → go to question **41**
- 4 *from six months to a year* → go to question **41**

40c What sort of contact have you had with a doctor in the past 14 days?

- 1 *first visit due to own injury, disorder or disability*
- 2 *repeat visit due to own injury, disorder or disability*
- 3 *telephone consultation (not appointment) due to own injury/disorder/disability*
- 4 *to eliminate/prevent an illness/health problem*
- 5 *to get a medical certificate/driving licence/examination prior to conscription/for educational entrance requirements*
- 6 *check-up in connection with work*
- 7 *advice, etc. with no connection to illness*
- 8 *other* → please specify: _____

40d Approximately how many contacts with a general practitioner, medical centre, municipal medical officer, emergency medical service or company doctor have you had during the preceding 12 months due to your own illness? _____

Comments

- > context: different types of out patient care: GP, medical centre, municipal medical officer, emergency medical service or a company doctor
- > definition of consultation: not specified
- > reference period: past 12 months; date not specified
- > date of last consultation: asked; precoded question
- > number of consultations: during past 12 months
- > additional questions: visits to specialists, and to hospital/out-patient clinics

Switzerland: Schweizerische Gesundheitsbefragung 1997

CH01, telephone interview

27.00 Haben Sie einen persönlichen Hausarzt, eine persönliche Hausärztin? Also einen Arzt, wo Sie mit den meisten Gesundheitsproblemen hingehen können?

- *ja*
- *nein* → Männer weiter 28.01, Frauen weiter 28.30

28.00 Sind Sie in den letzten 12 Monaten bei einem Arzt gewesen, den Zahnarzt nicht mitgerechnet?

Interviewer: Alle Besuche in der Arztpraxis mit Untersuchungen, Beratungen und Therapien. Keine Zahnarztbesuche! Hausbesuche vom Arzt zählen auch.

- *ja*
- *nein* → weiter 28.50

28.01 Wie häufig sind Sie in den letzten 12 Monaten beim Arzt gewesen?

- _____ *mal*
- *nie*

→ weiter zu Frage 28.50

28.10 Wie häufig sind Sie in den letzten 12 Monaten beim persönlichen Hausarzt gewesen?

- _____ *mal*
- *nie*

Nur Männer, Frauen weiter zu 28.30

28.20 Wie häufig sind Sie in den letzten 12 Monaten bei einem anderen Arzt, z.B. einem Spezialisten gewesen?

Interviewer: Alle Besuche in der Arztpraxis mit Untersuchungen, Beratungen und Therapien. Keine Zahnarztbesuche! Falls nötig vorlesen: Hausbesuche vom Arzt zählen auch.

- _____ *mal*
- *nie*

Nur Frauen, Männer weiter zu 28.50

28.30 Wie häufig sind Sie in den letzten 12 Monaten beim Frauenarzt gewesen?

- _____ *mal*
- *nie*

28.40 Wie häufig sind Sie in den letzten 12 Monaten bei einem anderen Spezialisten gewesen?

Interviewer: Alle Besuche in der Arztpraxis mit Untersuchungen, Beratungen und Therapien. Keine Zahnarztbesuche! Hausbesuche vom Arzt zählen auch.

- _____ *mal*
- *nie*

29.00 Wann haben Sie zum letzten Mal einen Arzt besucht?

Interviewer: Alle Besuche in der Arztpraxis mit Untersuchungen, Beratungen und Therapien. Keine Zahnarztbesuche! Hausbesuche vom Arzt zählen auch.

- ____ *Monat (2-stellig)*
- ____ *Jahr (2-stellig)*

Weniger als 1 Jahr (12 Monate) weiter zu Frage 29.10; andere weiter zu Frage 30.00

29.10 Was ist der Grund von Ihrem letzten Arztbesuch gewesen? Sind das ...

Interviewer: Vorlesen!

- *Beschwerden, Krankheit, Unfall inkl. Nachkontrollen*
- *Schwangerschaft, Geburt, Wochenbett (nur Frauen)* → weiter zu Frage 30.00
- *Sie sind gesund gewesen, haben aber eine Beratung, ein Zeugnis gebraucht* → weiter zu Frage 30.00
- *Sie sind gesund gewesen, haben aber eine Impfung gebraucht* → weiter zu Frage 30.00
- *Sie sind gesund gewesen, haben aber eine Vorsorgeuntersuchung, einen Check-up gebraucht* → Frage 30.00

29.11 Und was genau ist das gesundheitliche Problem gewesen von diesem letzten Arztbesuch?

Bitte sagen Sie mir möglichst genau die Diagnose oder die Beschwerde!
Interviewer: 2 Antworten möglich.

- *Liste Gesundheitsproblemen (ICD 10)*

Comments

- > context: question 28.01 on different types of out patient care precedes question 28.10 on GP and questions 28.20-28.40 on specialists
- > definition of consultation: home visits should be included; it is not specified whether consultations by telephone and consultations on behalf of others should be in- or excluded
- > reference period: past 12 months; date not specified
- > date of last consultation: asked
- > number of consultations: during past 12 months
- > additional questions: do you have your own GP, reason for visit
