#### QUESTIONNAIRE ON DISTRIBUTIVE TRADE STATISTICS

#### Important note

This questionnaire represents an excerpt of a pilot questionnaire UNSD intends to use for collecting data on distributive trade statistics. It does not seek real numbers. Please, indicate only with tick (X) whether the required data items/breakdowns are available in your country. 2005 is taken as a reference year for this stocktaking exercise. However, if data are not available for 2005 in your country, please indicate the most recent year for which you have data.

International Recommendations for Distributive Trade Statistics 2008 (IRDTS 2008) recommends that the kind of activity of statistical units is determined in terms of ISIC, Rev.4. Please indicate also if a different scheme of national classification of activities or a different version of ISIC is followed by your country. When data are required by activity please tick all relevant levels. By ticking only on the higher level of activity breakdown (for example 2-digit level of ISIC, Rev.4 for annual data) we will assume that more detailed breakdown is not available.

#### **Notes**

#### Table I.a)

Codes in red are the equivalent ISIC used in Mozambique. In the same table, the codes 466 and 469 corresponde to the same code in the Mozambican ISIC. The same for codes 474 and 475.

In our understanding there is no difference between the  $n^{\rm o}$  of person employed and the total number of employees.

MZM is the Mozambican currency

#### **Notes**

# Table II. a)

Data are collected monthly. We used the average of the four quarterts to calculet the values presented in this table. In each quarter the no of employees (monthly average), Salaries and turnover (sum of tree months in the quarter)

# Table III. a)

The index is calculated monthly and the one used in this table is the annual average calculated for 2005 using the average of 2004 us the base.
