

- 1) From the Registra of Births, Deaths and Marriages (BDM) we use the administrative data for demographic purposes.

The Fiji Islands Revenue and Customs Authority (FIRCA) provide the Fiji Islands Bureau of Statistics (FIBOS) customs data to produce International Trade Statistics as well as to cross check a few economic surveys data.

The Fiji National Provident Fund (FNPF) administrative data is used to cross check our annual employment survey data. Air Terminal Services provide data for our air traffic statistics.

The Immigration Department (ID) provides data (through the Information Technology Centre) that are used to compile tourism and visitors statistics.

The Land and Transport Authority (LTA) provide data for Transport Statistics.

The Reserve Bank of Fiji (RBF) and the Ministry of Finance data are used for the Balance of Payment and National Accounts Statistics and other Finance Statistics.

Our local government provide data for the building and construction statistics. Other miscellaneous statistics from their respective sources.

- 2)
 - a) In most cases the concepts and definitions confirm to international standards.
 - b) Incomplete and inaccurate records are not a serious problem.
- 3) In most cases, we treat the data as they are. Only when it is obvious that discrepancies occur then we check for quality and accuracy.
- 4)
 - a) There exists training available in Fiji and this training is done by FIBOS.
 - b) There is no formal agreement with the administrative departments.
- 5) The Ministry of Health administrative boundaries differ from FIBOS's.
- 6) There are cross checks available from survey data.
