# 4. ISSUE & CHALLENGES

- i. Various institution involved. Data collected and produced for specific objectives. Data integration process is needed by using standard codes and classifications as well as measurement unit.
- ii. Engagement and collaborative efforts with related energy agencies/authorities to improve data coordination mechanism.
- iii. Needs for capacity building in developing Malaysia SEEA PSUT– Energy
- iv. The availability of the data in compiling SEEA PSUT- Energy:
  - No detailed breakdown for NEB data on petroleum products
  - Decentralised data from various sources -scattered data and needs coordination
  - Quality of administrative data
  - Territory principle
  - Other residuals - excessive amount in other residuals
