General comments on the

GUIDELINES ON INTEGRATED ECONOMIC STATISTICS

Dear Sir/Madam,

Thank you for sending us the above mentioned document, and we would like to share the following comments:

- Par 50. In practice, source data collection generally follows the International Merchandise Trade Statistics24, page 146, the footnote no.24, we suggest to be related to the IMTS 2010 edition.
- Page 179: National Summary data pages and advance release calendars, the document shows that 21 indicators are published in the NSDP, since Palestine preparing for subscribing the SDDS, the NSDP template contains 22 main indicators.
- Page 99: par 44 **statistical units attributes**, the document shows that the statistical unit should be the establishment in order to prepare the industrial statistics, but in our practice in Palestine we found that the statistical unit should be the enterprise because it involve establishment within it, and we found that many establishments were just branches and do not have records so you must go to enterprise again and get your data.
