

Item 4 (d) "Business register"

Intervention by Cambodia

Thank you Chair,

Cambodia recognise the importance of Statistical Business Register for better and timely economic statistics while enabling respondent's burden manageable.

We appreciate ADB support that is assisting us to start with a basic statistical business register system.

Recognising the important role of the SBR IT system but take time and resource to develop. We shall very much appreciate country that already have a working SBR IT system that would be willing to share the experiences and the system. This would be help mitigate the limited resource.

Thank you Mr. Chair.
