

Trade in services data dissemination

Workshop on Travel and Tourism Statistics for the CARICOM countries
Roseau, Dominica, 14 – 17 May 2013

United Nations Statistics Division
Statistics of International Trade in Services Section

Outline

Outline of the presentation

- **Overview of the dissemination**
- **Objectives for UNSD in statistics of international trade in services data dissemination**
- **Overview of a pilot data dissemination mode using UN ServiceTrade database**

Dissemination means making available to the public, without restrictions and without regard for the way in which the action is carried out.

Publication involves the action of making statistical information public in different physical formats (printed, electronic, media, etc.)

I. Providing users with information on the properties of statistical data

- Where data are to be located, according to subject and time period;
- How the data were defined and compiled;
- What quality is assigned to the data;
- What related data can be used for comparison or to provide context.

II. Dissemination policy

- A release schedule (calendar) where all constituencies are treated equally (made public well in advance);
- A clear policy to identify the information that should be made available to the press and the supporting detail that can be disseminated through statistical bulletins;
- A policy regarding the cost of accessing detailed statistical information

///. Different forms of dissemination

- *Traditional means*
- *Multimedia*
- *Internet*

UNSD mission

UNSD mission:

- to develop and promote global statistical standards in the measurement of economic performance, social progress, environmental changes and political attributes
- to collect, analyse and disseminate social, economic, political and environment statistical data at country, regional and global level
- to assist Member States to establish a functioning statistical system which serves as foundation to an effective international statistical system
- to coordinate and promote global statistical activities and enhance the functioning of the UN Statistical Commission as apex entity
- to support DESA in its multidimensional programme of work on social and economic affairs

Objectives for UNSD in SITS

The principal objectives for UNSD in SITS

- (i) the establishment of a world-wide database on SITS,**
- (ii) the creation of database of country practices in the compilation and dissemination of SITS, and**
- (iii) the further development of the methodology of SITS together with the other members of the Task Force on SITS.**

Graph 5: Main EBOPS components for imports of total services in 2011

Graph 6: Main EBOPS components for exports of total services in 2011

Data source:

- International Trade in Services data is from the UN Service Trade database. The data source is as follows: 2009-2010: Central bank;
- Data on GDP (Graph 1) is from from UNSD's National Accounts Main Aggregates Database. It corresponds to the GDP at current market prices in US Dollars.
- International Merchandise Trade Statistics (Table 1, Graphs 1 and 2) are from UN Comtrade database.

Table 3:

The table presents, by EBOPS components, growth rates and contribution to growth. The first part of the table (left) presents the overall growth as well as the average annual growth rate of exports and imports over the period 2001-2010. The second part of the table presents growth rates and contributions of each EBOPS component to the growth of the total services in 2001. For instance, the contribution of the EBOPS component *i* to the growth of the total exports of services is calculated as:

$$100 \times \frac{X_i^t - X_i^{t-1}}{X_i^{t-1}} \left(\frac{X^t - X^{t-1}}{X^{t-1}} - 1 \right)$$

where X^t and X are respectively exports of EBOPS component *i* and exports of total EBOPS services.

Graph 3 and 6: The graphs present EBOPS components that account for at least 5 percent of exports or imports. All the other components are lumped in the category "Other" (shaded in light gray).

0: figure is less than 0.5 of the unit specified.
