United Nations

Nations Unies

The **Department of Economic and Social Affairs** of the United Nations Secretariat is a vital interface between global policies in the economic, social and environmental spheres and national action. The Department works in three main interlinked areas: (i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.

Le **Département des affaires économiques et sociales** du Secrétariat de l'Organisation des Nations Unies sert de relais entre les orientations arrêtées au niveau international dans les domaines économiques, sociaux et environnementaux et les politiques exécutées à l'échelon national. Il intervient dans trois grands domaines liés les uns aux autres : i) il compile, produit et analyse une vaste gamme de données et d'éléments d'information sur des questions économiques, sociales et environnementales dont les États Membres de l'Organisation se servent pour examiner des problèmes communs et évaluer les options qui s'offrent à eux; ii) il facilite les négociations entre les États Membres dans de nombreux organes intergouvernementaux sur les orientations à suivre de façon collective afin de faire face aux problèmes mondiaux existants ou en voie d'apparition; iii) il conseille les gouvernements intéressés sur la façon de transposer les orientations politiques arrêtées à l'occasion des conférences et sommets des Nations Unies en programmes exécutables au niveau national et aide à renforcer les capacités nationales au moyen de programmes d'assistance technique.

## Introduction

The objective of this publication is to present current monthly economic and social statistics for most of the countries and territories of the world. In addition, each month a selection of tables shows annual and/or quarterly data on subjects illustrating important socio-economic trends and developments.

All data published in this edition are available in electronic format in the online version of the *Monthly Bulletin of Statistics* (MBS Online, see <http://unstats.un.org/unsd/mbs/>). The MBS Online typically presents longer time series than the print version. Additionally, the following statistical series are included in the online version: Gross domestic product, volume measures; Retail trade indices; and World food situation, FAO food price index.

### Sources

The statistics appearing in the *Bulletin* are obtained by the Statistics Division of the United Nations and the international statistical services from official sources in the countries. International sources for the *Bulletin* include the Food and Agriculture Organization of the United Nations, International Civil Aviation Organization, International Civil Service Commission, International Labour Office and the International Monetary Fund.

To access countries' or areas' national statistical office websites for more information, consult [http://unstats.un.org/unsd/methods/inter-natlinks/sd\\_natstat.asp](http://unstats.un.org/unsd/methods/inter-natlinks/sd_natstat.asp).

### Comparability of the data

Data definitions are provided for the statistical terms in the tables. These present the internationally recommended statistical terms and definitions in current use. Where individual series differ fundamentally from the descriptions in the note, the differences are indicated in footnotes.

Where a significant break in the homogeneity of a particular national series occurs, the point at which the break occurs is indicated by the symbol "#"; the nature of the change is generally described in a footnote.

### Revisions and changes in tables

Each issue contains all the revisions made in the figures up to the date of publication of the *Bulletin*. In general, figures for the latest months are to be regarded as provisional.

Table 4 has been suspended pending implementation of ISIC Rev.4. Table 31 was re-introduced in July 2013 and includes countries or areas whose airlines performed more than 100 million total tonne-kilometres or more than 25 million freight tonne-kilometres in 2012. The coverage in table 48 was modified in June 2013 to include discount rates only, i.e. the interest rate at which the central bank lends to commercial banks to meet their liquidity needs.

### Time period

As far as possible, the figures are given for the calendar years 2006-2015 inclusive and for the most recent 18 months. In general, the annual figures are expressed as monthly averages; exceptions (e.g. most of the tables under the International Merchandise Trade and Finance Sections) are indicated. For the registration of new motor vehicles, annual totals are shown.

### Units of measurement

Metric units are used in all tables in which the data are measured in weight, volume, length or area.

### Rounding of figures

When necessary, figures are rounded off to the nearest final digit. For this reason, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown in some series.

## Symbols employed

The following symbols have been used throughout the *Bulletin*.

- . Not applicable.
- ... Not available.
- Magnitude zero.
- 0 Magnitude not zero, but less than half of unit employed.
- 0.0 Magnitude not zero, but less than one tenth of unit employed.
- C Confidential data
- \* Provisional, preliminary or estimated figure.
- x United Nations estimate.
- ◆ Monthly average, total value or index for quarter.
- # Marked break in series.

Decimal figures are always preceded by a period (.).

## Introduction

Le objectif de cette publication est de présenter mensuellement des statistiques économiques et sociales actuelles pour la plupart des pays et territoires du monde. De plus, on y trouve une série de tableaux qui contiennent des données annuelles et/ou trimestrielles illustrant les principales tendances et développements socio-économiques.

Toutes les données publiées dans ce numéro sont disponibles en format électronique dans la version en ligne du *Bulletin mensuel de statistique* (BMS en ligne, disponible à : <http://unstats.un.org/unsd/mbs/>). En ligne, le BMS permet des séries chronologiques/ temporelles plus longues que dans la version imprimée. De plus, ces séries seront incluses dans la version électronique : le produit intérieur brut, les mesures de volume, les indices du commerce de détail, la situation alimentaire mondiale, et l'indice FAO de prix des produits alimentaires.

### Sources

Les statistiques publiées dans le *Bulletin* ont été obtenues par la Division de statistique des Nations Unies et par les services statistiques internationaux de sources officielles dans les pays. Les sources internationales pour le *Bulletin* incluent la Commission de la fonction publique internationale, l'Organisation des Nations Unies pour l'alimentation et l'agriculture, l'Organisation de l'aviation civile internationale, le Bureau international du travail et le Fonds monétaire international.

Pour accéder aux sites web des offices statistiques nationaux pour plus d'information, consultez [http://unstats.un.org/unsd/methods/inter-natlinks/sd\\_natstat.asp](http://unstats.un.org/unsd/methods/inter-natlinks/sd_natstat.asp).

### Comparabilité des données

Les définitions des données sont fournies pour les termes statistiques dans les tableaux. Elles présentent des termes et définitions recommandés internationalement qui sont d'usage courant. Lorsqu'une série s'écarte de manière fondamentale de la définition donnée dans la remarque, la divergence est signalée en note.

S'il y a discontinuité dans l'homogénéité d'une série statistique d'un certain pays, le point où se produit la coupure est indiqué par le signe "#"; la nature de changement est généralement mentionnée en note.

### Révisions et changements dans les tableaux

Chaque numéro contient toutes les rectifications apportées aux chiffres à la date de la publication du *Bulletin*. En général, les chiffres des derniers mois doivent être considérés comme provisoires.

Le tableau 4 a été suspendu en attendant l'implémentation de CITI Rév. Le tableau 31 a été réintroduit en juillet 2013 et comprend les pays ou régions dont les transporteurs aériens ont réalisé en 2012 un total de plus de 100 millions de tonnes-kilomètres ou de plus de 25 millions de tonnes-kilomètres de fret. Le champ du tableau 48 a été modifié en juin 2013 pour n'inclure que les taux d'escompte, i.e. le taux d'intérêt auquel la banque centrale prête aux banques commerciales afin de répondre à leurs besoins de liquidités.

### Période couverte

Les statistiques sont présentées sous forme de séries chronologiques. Autant que possible, les chiffres donnés sont des chiffres annuels pour 2006-2015 et des chiffres mensuels pour les derniers dix-huit mois. En général, les chiffres annuels sont présentés en moyennes mensuelles; il y a des exceptions qui ont été marquées (ex. la plupart des tableaux dans les sections sur le commerce international et sur la finance). Pour l'immatriculation des véhicules automobiles neufs, les totaux annuels sont présentés.

### Unités de mesure

Le système métrique est utilisé dans tous les tableaux dont les données sont mesurées en poids, volume, longueur ou surface.

### Arrondissement de chiffres

Chaque fois qu'on l'a jugé nécessaire, les nombres ont été arrondis à l'unité. Il peut donc y avoir, pour certaines séries, une légère différence entre la somme des éléments constituants et le total indiqué.

## Signes conventionnels

Les signes ci-après ont été utilisés dans le *Bulletin*.

- . Ne s'applique pas.
- ... Aucune donnée disponible.
- Résultat rigoureusement zéro.
- 0 Résultat inférieur à la moitié de la dernière unité retenue.
- 0.0 Résultat inférieur à la dixième de la dernière unité retenue.
- C Données confidentielles.
- \* Donnée provisoire ou estimation.
- X Estimation des Nations Unies.
- ◆ Moyenne mensuelle, valeur totale ou indice pour le trimestre.
- # Une discontinuité notable dans la série.

Les décimales sont toujours précédées d'un point (.).

Source: United Nations Statistics Division, Index Numbers of Industrial Production and country responses to the Monthly Bulletin of Statistics questionnaires, supplemented by international and national publications.

Note: The national indices in this table are shown for the categories "Mining", "Manufacturing", "Electricity, gas and steam" and "Water; waste management", corresponding to sections B, C, D and E of ISIC Rev.4. Major deviations from ISIC in the scope of the indices for the above categories are indicated in the titles or by footnotes to the table. Therefore, ideally, this would cover the complete scope of industrial statistics, namely ISIC Rev.4 sections B, C, D and E. For the purpose of presentation, the national indices have been rebased to 2010 = 100, where necessary. Unless otherwise stated, industry categories are based on ISIC Rev.4 and the monthly and quarterly indices are not adjusted for differences in the number of working days or for seasonal variation.

† Symbol indicates data are shown in terms of ISIC Rev. 3.

- 1 Annual data are calculated independently and contain revisions that are not reflected in the monthly data.
- 2 Annual figures: average of 12 months ending 30 June of the year stated.
- 3 Country data supplemented with data from the Observatoire Economique et Statistique d'Afrique Subsaharienne (Afristat).
- 4 Monthly indices are adjusted for differences in the number of working days.
- 5 For government controlled areas.
- 6 Includes ISIC Rev. 4 Division 08.
- 7 Excludes the Overseas Departments, namely, French Guiana, Guadeloupe, Martinique, Mayotte and Réunion.
- 8 Annual figures: average of 12 months beginning 1 April of the year stated.
- 9 Annual figures: average of four quarters ending 31 March of the year stated.
- 10 Excludes repair and installation of machinery and equipment.
- 11 Annual figures: average of 12 months beginning 1 July of the year stated.
- 12 The indices have been calculated by the Statistics Division of the United Nations from national indices.

Source : Division de statistique de l'Organisation des Nations Unies, Indices de production industrielle et réponses des pays au questionnaire du Bulletin mensuel de statistique; publications internationales et nationales.

Note : Les indices de pays sont donnés dans ce tableau pour les catégories « Mines », « Industries manufacturières », « Électricité, gaz et vapeur » et « Eau et gestion des déchets », qui correspondent aux sections B, C, D et E de la CITI Rev.4. Tous les cas où le champ des indices de ces catégories s'écarte nettement de celui des catégories correspondantes de la CITI sont indiqués dans les intitulés ou dans les notes du tableau. Les indices de la catégorie « Général » sont la combinaison des indices partiels indiqués et partagent toutes les différences par rapport à la CITI citées en note de bas de page pour les indices partiels. On a donc en principe une couverture complète du champ des statistiques industrielles, à savoir les sections B, C, D et E de la CITI Rev.4. Pour les besoins de la présentation, les indices nationaux sont rebasés à 2010 = 100, si nécessaire. Sauf indication contraire, la classification des industries est fondée

† Le symbole indique les indices sont basés sur la CITI Rev. 3.

1 Les données annuelles sont calculées indépendamment et contiennent donc des révisions qui ne sont pas reflétées dans les données mensuelles.

2 Chiffres annuels: moyenne de 12 mois finissant le 30 juin de l'année indiquée.

3 Les données nationales complétées par des données de l'Observatoire Economique et Statistique d'Afrique Subsaharienne (Afristat).

4 Les indices mensuels sont corrigés des effets des jours ouvrables.

5 Pour les zones contrôlées par le gouvernement.

6 Y compris CITI Rev. 4 Division 08.

7 Non compris les départements d'outre-mer (Guyane française, Guadeloupe, Martinique, Mayotte et Réunion).

8 Chiffres annuels: moyenne de 12 mois commençant le 1<sup>er</sup> avril de l'année indiquée.

9 Chiffres annuels: moyenne de quatre trimestres finissant le 31 mars de l'année indiquée.

10 Non compris la réparation et installation de machines et de matériel.

11 Chiffres annuels: moyenne de 12 mois commençant le 1<sup>er</sup> juillet de l'année indiquée.

12 Les indices ont été calculés par la Division de statistique de l'ONU à partir des indices nationaux.

This table is also published on the ICSC website: <http://icsc.un.org>.

Note:  
Consumption patterns may vary from those of the local population and therefore the indices cannot be considered as reflecting the general cost-of-living in the cities.

- 1 Rates are those relevant to calculation of cost-of living indexes for international officials.
- 2 Housing consists of rent, utilities and domestic service.
- 3 The "total" index was calculated on the basis of the cost of government or subsidized housing which is normally lower than prevailing rents.

Ce tableau est également publié dans le site web de l'ICSC :

Note :  
Consommation peut différer de celle de la population locale, ces indices ne peuvent pas être considérés comme reflétant le coût-de-la-vie général dans les villes considérées.

- 1 Les taux sont ceux employés pour calculer les indices du coût de la vie des fonctionnaires internationaux.
- 2 L'habitation se compose du loyer, de l'électricité, du gaz et de l'eau et des services domestiques.
- 3 L'indice "total" a été calculé sur la base du coût de l'habitation fournie par le gouvernement ou subventionnée normalement moins élevé des loyers courants.

International Civil Aviation Organization (ICAO), Montreal, ICAO Air Transport Reporting Forms A and A-S.

Note:

Data refer to revenue scheduled traffic of airline registered in the country, for which remuneration is received and on flights performed according to a published timetable. This table includes countries or areas whose airlines performed in 2012 more than 100 million totaltonne-kilometres or more than 25 million freight tonne-kilometres. The monthly data presented are those reported to ICAO by its Member States; they may exclude data of individual carriers that do not report data each month. When data are reported to ICAO on an annual or quarterly basis, they are shown in this table equally distributed on a monthly basis for the reporting period. Note:

The volume and unit value/price indices are as compiled by countries. They show the changes in the volume (volume index) and the average price (unit value/price index) of total imports and exports. Using these indices, the United Nations Statistics Division calculates the terms of trade indices (export unit value/price indices divided by the corresponding import unit value/price indices), and the index of the purchasing power of exports (the terms of trade multiplied by the volume index of exports). Country footnotes which appear in Table 35 of this issue also apply to the country indices published in this table.

- 1 Price indices.
- 2 Index numbers exclude ships.
- 3 Excluding military goods.

Division de statistique des Nations Unies, Questionnaire du Bulletin mensuel de statistiques, Fonds monétaire international et publications nationales.

Note :

Les indices du volume et les indices de la valeur unitaire/prix sont comme compilées par les pays. Ils indiquent les variations des quantités (indice du volume) et des prix moyens (indice de la valeur unitaire/prix) des importations ou exportations totales. Utilisant ces indices la Division de Statistique des Nations Unies calcule les indices des termes de l'échange (sont obtenus en divisant les indices de la valeur unitaire à l'exportation par ceux à l'importation), et l'indice du pouvoir d'achat des exportations (sont obtenu en multipliant l'indice des termes de l'échange par l'indice du volume des exportations). Les notes se rapportant aux pays qui apparaissent dans le Tableau 35 de ce numéro s'appliquent aussi aux indices de ce tableau.

- 1 Indices des prix.
- 2 Les indices ne comprennent pas de navires.
- 3 Non compris les importations des produits militaires.

Note:  
Beginning June 2013, this table includes discount rates only, i.e. the interest rate at which the central bank lends to commercial banks to meet their liquidity needs. Prior to the change in coverage in this table, the central bank policy rate (CBPR) had been shown, which in some countries is the discount rate while in others it may be a repurchase agreement rate.

1 Period average.

Note:  
A partir de juin 2013, ce tableau n'inclut que les taux d'escompte i.e. le taux d'intérêt auquel la banque centrale prête aux banques commerciales afin de répondre à leurs besoins de liquidités. Avant la modification de son champ, ce tableau présentait les taux directeur des banques centrales, qui dans certains pays correspond au taux d'escompte alors que dans d'autres, il peut s'agir du taux des opérations de pensions.

## Technical notes

### Population

*Table 1:* Mid-year population estimates refer to 1 July of the reference year unless otherwise stated, and are presented as reported by national statistical authorities to the *United Nations Demographic Yearbook* or the *Monthly Bulletin of Statistics*. The data are presented in thousands, rounded by the Statistics Division. Estimates are coded in the table as either de facto (DF) or de jure (DJ). A de facto population consists of all persons who are physically present in the country or area at the reference date, whether or not they are usual and/or legal residents. The de jure population, by contrast, includes all usual residents of the given country or area, whether or not they were physically present in the area at the reference date. By definition, therefore, de facto and de jure estimates are not entirely comparable.

Furthermore, international comparability of the mid-year population estimates is affected by the lack of strict conformity to either de facto or de jure or concepts with regard to inclusions and exclusions of particular individuals in the population. Significant exceptions with respect to inclusions and exclusions of specific population groups are footnoted when they are known.

*Tables 2 and 3:* Crude birth rates and crude death rates provide simple measures of natality and mortality, respectively, in a population over a given period. Tables 2 and 3 present annualized rates per 1 000 population.

A basic problem that may affect international comparability of crude birth rates and crude death rates relates to deviations from the standard statistical definition of live births. The standard definition of a live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movements of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached; each product of such a birth is considered live-born. Furthermore, death is defined as the permanent disappearance of all evidence of life at any time after live birth has taken place (post-natal cessation of vital functions without capability of resuscitation). International comparability may be affected by the lack of strict conformity to standard statistical definitions by some countries which exclude from their live birth statistics infants who are born alive but die before the registration of the birth or within the first 24 hours of life.

The rates may also be affected by the quality and limitations of the population estimates that are used for their computation and by population age-sex structures to which they relate.

### Index of industrial production

*Table 4:* The indices of industrial production are classified according to sections, divisions and combinations of divisions of the International Standard Industrial Classification of All Economic Activities (ISIC), Rev.4 for mining, manufacturing, electricity, gas and steam, water supply and waste management activities as defined in sections B, C, D and E of the classification. The indices indicate trends in value added in constant prices. The measure of value added is the national accounting concept, which is defined as gross output less intermediate consumption. Each series is compiled by using the Laspeyres formula, that is, the indices are base-weighted arithmetic means, where the weights used in the calculation of the indices for a particular country are the value added contributions to the gross domestic product (GDP) of the given industry during the base year. The current weight base year is 2005 and gross value added at basic prices is used in weighting.

Within each of the ISIC categories (sections, divisions and combinations of divisions) shown in the tables, the indices for the country groupings are calculated directly from the individual provided country data. The indices for the World, however, are calculated from the aggregated indices for the groupings of developed and developing countries.

At present, Table 4 has been suspended from future editions pending implementation of ISIC Rev.4.

*Table 5:* The national indices in this table are shown for the categories “Mining”, “Manufacturing”, “Electricity, gas and steam” and “Water; waste management”, corresponding to sections B, C, D and E of ISIC Rev.4. Major deviations from ISIC in the scope of the indices for the above categories are indicated in the titles or by footnotes to the table.

The indices for the category “General” are the combination of the components shown and share all deviations from ISIC footnoted for the component series. Therefore, ideally, this would cover the complete scope of industrial statistics, namely ISIC Rev.4 sections B, C, D and E. For the purpose of presentation, the national indices have been rebased to 2010 = 100, where necessary.

### Price indices

The original base periods for the national series presented in the Consumer Price Indices and Producer Price Indices tables of the *Monthly Bulletin of Statistics (MBS)* can vary widely. Therefore, for presentation of these data, the *MBS* has adopted a uniform base period, which is currently 2010=100. When a country does not compile or provide its Consumer Price Indices’ and/or Producer Price Indices’ data in the base published in the *MBS* (2010=100), the data in the original base periods are recalculated by the United Nations Statistics Division by dividing the index for each date shown by the index for the year 2010 (or a more recent year for which data are available in the same series) and multiplying the quotient by 100. This operation does not involve any change in the weighting systems used by the countries.

*Table 6:* The consumer price index (CPI) is a current social and economic indicator that is constructed to measure changes over time in the general level of prices of consumer goods and services that households acquire, use or pay for consumption. A consumer price index is usually estimated as a series of summary measures of the period-to-period proportional change in the prices of a fixed set of consumer goods and services of constant quantity and characteristics, acquired, used or paid for by the reference population. Each summary measure is constructed as a weighted average of a large number of elementary aggregate indices. Each of the elementary aggregate indices is estimated using a sample of prices for a defined set of goods and services obtained in, or by residents of, a specific region from a given set of outlets or other sources of consumption goods and services. Unless otherwise specified, the general (all items) and food and non-alcoholic beverages consumer price indices with national coverage are shown in the table for each country.

Detailed explanations of the methods used to compute the consumer price indices may be found on the countries’ or areas’ national statistical office websites (consult [http://unstats.un.org/unsd/methods/inter-natlinks/sd\\_natstat.asp](http://unstats.un.org/unsd/methods/inter-natlinks/sd_natstat.asp)) or the ILO website at: [www.ilo.org/ilostat](http://www.ilo.org/ilostat).

*Table 7:* Producer prices are prices at which producers sell their output on the domestic market. Producer price indices normally cover the prices of the characteristic products of agriculture, forestry, and fishing, mining and quarrying, manufacturing, and electricity, gas and water supply. Prices are normally measured in terms of transaction prices, including non-deductible indirect taxes less subsidies, in the case of domestically produced goods and import duties and other non-deductible indirect taxes less subsidies in the case of imported goods. The Laspeyres index number formula is generally used. The price indices for each country are arranged according to the following scheme:

- a. Components of supply for the domestic market:
  - Domestic supply
    - Domestic production for domestic market
      - Agriculture, forestry and fishing (section A as defined in ISIC Rev. 4)
      - Industrial products (sections B-E as defined in ISIC Rev. 4)
    - Imported goods
- b. Stage of processing (for goods manufactured for domestic markets, irrespective whether they are locally produced or imported):
  - Raw materials
  - Intermediate goods
- c. End-use (for goods sold on domestic markets, irrespective whether they are locally produced or imported):
  - Consumer goods
  - Capital goods.

*Table 8:* The International Civil Service Commission regularly compiles index numbers which measure the relative cost-of-living of United Nations officials working in various cities. The indexes compare the US Dollar costs of a representative basket of goods and services between a duty station and New York City, the base of the UN Common System. These indexes are updated to reflect price changes over time at the duty station and New York, movements in the exchange rate of the local currency vis-à-vis the United States dollar and to adjust for expenditures made by the staff outside the duty station. Detailed explanations of the methods used to compute the indexes may be found on the ICSC Homepage at: <http://icsc.un.org/col-rpi.asp>.

### Employment, unemployment and earnings

*Table 9:* Unless otherwise indicated, the data refer to persons aged 15 years and over. Coverage can refer to employees (wage earners and salaried employees) or total employment (all status groups) working on a specified day or during a specified week in each month or quarter, or sometimes to the average number working during a given period. Non-agricultural activities include: mining and quarrying; manufacturing; electricity, gas and water; construction; wholesale and retail trade, restaurants and hotels; transport, storage and communication; financing, insurance, real estate and business services; community, social and personal services; activities not adequately defined.

*Table 10:* Unless otherwise indicated, the data refer to persons aged 15 years and over. Coverage can refer to employees (wage earners and salaried employees) or total employment (all status groups) working on a specified day or during a specified week in each month or quarter, or sometimes to the average number working during a given period.

*Table 11:* Unemployment generally represents the total number of persons wholly unemployed and temporarily laid-off. The data are derived from (a) labour force sample surveys, (b) employment office statistics, (c) official estimates and (d) insurance records. In using these series, consideration should be given to the source of the data. In general, the figures relating to percentage unemployed are calculated by expressing the number of unemployed in a given period as a percentage of the total number of employed and unemployed persons in the group considered during the same period.

*Tables 12 and 12a:* Earnings in manufacturing and non-agricultural activities generally relate to the average wages per worker from all jobs currently held in manufacturing and non-agricultural activities as a whole. Non-agricultural activities include mining and quarrying; manufacturing; electricity, gas and water, construction; wholesale and retail trade, restaurants and hotels; transport, storage and communication; financing, insurance, real estate and business services; community, social and personal services; activities not adequately defined. Earnings normally include bonuses, cost of living allowances, taxes, social insurance contributions payable by the employed person and, in some cases, payments in kind, and normally exclude social insurance and pension contributions payable by the employers, family allowances, other social security benefits and severance pay. The time of year to which the figures refer is not the same for all countries. The data are derived from (a) labour force sample surveys, (b) labour-related establishment surveys, (c) employment office statistics and (d) insurance records. Unless otherwise noted, the data refer to employees of both sexes, irrespective of age. Some of the series do not conform to the above for one or more of the following reasons: different type of source or coverage, inclusion of non-manufacturing industries, earnings from solely main job and use of wage rates, instead of earnings.

For further details on tables 9 - 12, see the website: <http://www.ilo.org/ilostat>.

### Energy

*Table 13:* The data relate to coals with a gross calorific value (moist, ash-free basis) which is not less than 24 MJ/kg or which is less than 24 MJ/kg provided that the coal has a vitrinite mean random reflectance greater than or equal to 0.6 per cent. Hard coal comprises anthracite and bituminous coals and excludes lignite and sub-bituminous coals.

*Table 14:* Data relate to coals with a gross calorific value (moist, ash-free basis) less than 24 MJ/kg and a vitrinite mean random reflectance less than 0.6 per cent. Brown coal comprises sub-bituminous coal and lignite.

*Table 15:* Data relate to crude oil, which is a mineral oil of fossil origin extracted by conventional means from underground reservoirs, and comprises liquid or near-liquid hydrocarbons and associated impurities such as sulphur and metals. This category excludes natural gas liquids. For some countries, original data expressed in units of volume have been converted to metric tons by use of the average specific gravities shown in the second column..

*Table 16:* Data relate to dry, marketable production (i.e. excluding quantities flared, vented or re-injected at the point of production) of natural gas. Natural gas is a mixture of gaseous hydrocarbons, primarily methane, but generally also including ethane, propane and higher hydrocarbons in much smaller amounts and some non-combustible gases such as nitrogen and carbon dioxide. The majority of natural gas is separated from both "non-associated" gas originating from fields producing hydrocarbons only in gaseous form, and "associated" gas produced in association with crude oil. The separation process produces natural gas by removing or reducing the hydrocarbons other than methane to levels which are acceptable in the marketable gas. The natural gas liquids (NGL) removed in the process are distributed separately. Natural gas also includes methane recovered from coal mines (colliery gas) or from coal seams (coal seam gas) and shale gas.

*Table 17:* Data relate to gross electricity production, which is the sum of the electrical energy production by all the generating units/installations concerned (including pumped storage) measured at the output terminals of the main generators. Both main activity producers (previously known as public producers) and autoproducers (previously known as self-producers or industrial producers) should be included if possible.

*Tables 18 and 19:* Fuels are here defined to comprise all products in section 3 of the SITC. These products are: coal, coke and briquettes, petroleum, petroleum products and related materials, gas and electric current. The unit value indices are obtained from national sources, except those of a few countries which the United Nations Statistics Division compiles using their quantity and value figures. For countries that do not compile indices for fuel imports conforming to the above definition, sub-indices are aggregated to approximate an index of SITC section 3. Unit value indices obtained from national indices are rebased, where necessary, so that 2000=100. Indices in national currency are converted into U.S. dollars using conversion factors obtained by dividing the weighted average exchange rate of a given currency in the current period by the weighted average exchange rate in the base period. All aggregate unit value indices are current period weighted. The volume indices are derived from the value data and the unit value indices. All aggregate volume indices are base period weighted.

The figures in table 19 are calculated from those prepared for tables 18 and 38.

## Manufacturing

*Table 21:* The data refer to sifted (bolted) flours from soft and hard wheat, and from spelt. Bran and offal, wheat groats, meal, and flours obtained by milling cereals other than wheat, are excluded.

*Table 22:* Unless otherwise stated, data relate to total production, in blast and electric furnaces, of pig-iron.

*Table 23:* Unless otherwise stated, data refer to total production of ingots and steel for casting. Wrought (puddled) iron is excluded.

*Table 24:* The data refer to the total weight of cotton yarn, and yarn spun from cotton waste made for sale, on commission, or for further processing. Unless otherwise stated, tire cord yarn is not included.

*Table 25:* The data refer to woven cotton fabrics and mixed cotton fabrics before undergoing finishing processes such as bleaching, dyeing, etc.

*Table 26:* The data refer to the production of bleached, unsized or slack-sized printed paper, without coating, of the type usually used for newspaper, weight from 45 to 60 gr. per square metre, usually with at least 70% of the weight of fibrous material derived from mechanical pulp.

*Table 27:* Unless otherwise stated, data do not cover tires for vehicles operating off the road, motorcycles, bicycles and animal-drawn road vehicles. Data also exclude the production of inner tubes.

*Table 28:* Vehicles built on imported chassis or assembled from imported parts are excluded.

## Transport

*Table 29:* Unless otherwise stated, the figures represent the weight of all goods (including packing) and livestock in external trade loaded on and unloaded from sea-going vessels of all flags at the ports of the country in question. (A vessel is said to be sea-going if part at least of its voyage, while carrying the goods in question, is by sea). The goods excluded are: mail, bullion, specie, passengers' baggage, bunkers, ships' stores, ballast, ships and other floating appliances when delivered as goods without being loaded on other ships, government stores when carried in government vessels, and goods transhipped from an importing vessel to an exporting vessel. Goods unloaded into or loaded from bonded warehouses are included.

*Table 30:* Passenger cars cover road motor vehicles designed for the conveyance of passengers and seating not more than nine persons. Taxis, jeep-type vehicles and station wagons are included. Commercial vehicles cover buses seating more than nine persons and lorries (trucks) having their own motive power. Road tractors and semi-trailer combinations are included. Trailers without motive power and farm tractors are excluded.

*Table 31:* The monthly data presented refer to revenue scheduled traffic of airlines registered in the country, i.e. passenger-kilometres performed or freight tonne-kilometres performed for which remuneration is received and on flights performed according to a published timetable as reported to ICAO by its Member States. When data are reported to ICAO on an annual or quarterly basis, they are shown in this table equally distributed on a monthly basis for the reporting period. Only the data reported by ICAO Member States are included in this table. For additional data, please consult the ICAO's website (<http://stats.icao.int>). Annual data are presented there which may include both ICAO estimates for missing data (for carriers that do not report each month) and reported data.

*Revenue scheduled flights:* Flights scheduled and performed for remuneration according to a published timetable, or so regular or frequent as to constitute a recognizably systematic series, which are open to direct booking by members of the public; and extra section flights occasioned by overflow traffic from scheduled flights.

*Passenger-kilometres performed:* A passenger-kilometre is performed when a passenger is carried one kilometre. Passenger-kilometres equal the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The resultant figure is equal to the number of kilometres travelled by all passengers.

*Freight tonne-kilometres performed:* A freight tonne-kilometre is performed when a metric tonne of freight is carried one kilometre. Freight tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of freight, and express and diplomatic bags carried on each flight stage by the stage distance. For ICAO statistical purposes, freight includes express and diplomatic bags but not passenger baggage.

*Flight stage:* A flight stage is the operation of an aircraft from take-off to its next landing. Furthermore, a flight stage is classified as either international or domestic.

*International flight stage:* A flight stage with one or both terminals in the territory of a State, other than the State in which the air carrier has its principal place of business.

*Domestic flight stage:* A flight stage not classifiable as international, i.e. domestic flight stages include all flight stages flown between points within the domestic boundaries of a State by an air carrier whose principal place of business is in that State. Flight stages between a State and territories belonging to it, as well as any flight stages between two such territories, should be classified as domestic. This applies even though a stage may cross international waters or over the territory of another State.

Additional terms and descriptions used in civil aviation statistics are available at <http://www.icaodata.com/Terms.aspx>.

## International merchandise trade

*Tables 34 and 35:* Appear in each issue of the MBS showing current trade statistics by country, region and area. Other analytical trade data are presented quarterly, semi-annually and annually. These are listed in the table of contents, together with the issues in which each series appears.

*Value of imports and exports:* The descriptions given in the headings and footnotes to table 35 apply, unless otherwise stated, to table 34 as well. The regional totals of table 34 have been adjusted where necessary to approximate imports CIF and exports FOB in special trade, and to include countries not listed separately, and estimates where complete area data were not available. Balance of trade figures represent the difference of imports from exports.

*Price, unit value and volume indices:* Price index is a measure of the change in the value of exports/imports due to changes in prices of individual commodities. Unit value index reflects changes in the average prices of commodity groups. Volume index is a measure of the changes in the value of exports/imports which may be attributed to variations in the quantities of the individual commodities.

*General definitions:* Detailed general definitions conforming to the recommendations of the Economic and Social Council and its Statistical Commission define the series in tables 34 and 35.

*Territory:* The statistics reported by a country generally refer to the customs area; in most cases this coincides with the geographical area of a country.

*Systems of trade. Imports:* under the general trade system, both goods entering directly for domestic consumption and goods entered into customs storage are recorded, at the time of their first arrival, as imports; under the special trade system, goods are recorded as imports when declared for domestic consumption whether at time of entry or on withdrawal from customs storage.

*Exports:* outward moving goods consist of: (a) national goods i.e. those wholly or partly produced in the country; (b) foreign goods, neither transformed nor declared for domestic consumption in the country, which move outward from customs storage; (c) nationalized goods, i.e. foreign goods, declared for domestic consumption, which move outward without having been transformed. General exports comprise all three categories and, in the general trade system, the sum of (b) and (c) may be tabulated as re-exports. Special exports comprise categories (a) and (c). Direct transit trade, consisting of goods entering or leaving for transport purposes only, is excluded from both import and export statistics.

*Coverage of data:* In general, all inward moving goods, in the relevant administrative categories described above, are included if their movement adds to or subtracts from the material resources of the country compiling the statistics. Because their movement generally changes monetary rather than material resources, monetary gold together with currency and titles of ownership after their issue into circulation are excluded. Among the categories included where possible in the data are: ordinary commercial transactions, governmental transactions, foreign aid (governmental and private), trade of concessionaires and silver (except issued silver coin).

*Valuation:* It is usual for a country to base the valuation of its imports and exports on the values specified in contracts between importers and exporters adjusted to include transportation and related costs to its own frontier. This produces a CIF transaction value for imports and an FOB transaction value for exports. Where a country values its imports at the frontier of the exporting country, it is noted in the tables that import values are FOB.

World imports and exports are the sum of imports and exports of Developed economies, Developing economies and Other. The regional totals for exports and imports have been adjusted to exclude the re-exports of countries or areas comprising each region. Estimates for certain countries or areas not shown separately as well as for those shown separately but for which no data are yet available are included in the regional and world totals. Regional totals containing estimated data are printed in bold.

Export and import values are derived by the United Nations Statistics Division (UNSD) from data published in national publications, or provided in the Monthly Bulletin of Statistics Questionnaires for the following countries: Andorra, Bermuda, Cayman Islands, Cuba, Gibraltar, Montenegro (beginning 2006), Niue, Russian Federation, Serbia and Montenegro (before 2006), State of Palestine, Turkmenistan, Turks and Caicos, Tuvalu and Uzbekistan.

Export and import dollar values for all other countries are derived from data published by the International Monetary Fund (IMF) in the *International Financial Statistics*.

*Table 36:* The volume and unit value/price indices are as compiled by countries converted to U.S. dollars and reset to 2000 = 100. Using these indices, the United Nations Statistics Division calculates the terms of trade indices (export unit value/price indices divided by the corresponding import unit value/price indices), and the indices of the purchasing power of exports (the terms of trade multiplied by the volume index of exports). Country footnotes which appear in Table 35 of this issue also apply to the country indices published in this table.

*Table 37:* Trade Conversion Factors are weighted averages of exchange rates, the weights being the corresponding monthly or quarterly values of imports or exports. The exchange rates are the rates provided by the country concerned or compiled by the IMF.

*Table 38:* The purpose of this table is to provide indices of international trade by regions.

*Table 39:* Manufactured goods are here defined to comprise sections 5 through 8 of the Standard International Trade Classification (SITC). These sections are: chemicals and related products, manufactured goods classified chiefly by material, machinery and transport equipment and miscellaneous manufactured articles. The economic and geographic groupings in accordance with those of the international merchandise trade, table 34 in this issue, although table 34 includes more detailed geographic sub-groups which make up the groupings ‘Other developed economies’ and ‘Developing economies’ of this table.

In 2000 the exports of manufactured goods by all ‘Developed’ and ‘Developing economies’ accounted for approximately 97 per cent of world exports of manufactured goods.

The unit value indices are obtained from national sources.

For countries that do not compile indices for manufactured goods export conforming to the above definition, sub-indices are aggregated to approximate an index of SITC sections 5-8.

Unit value indices obtained from national indices are rebased, where necessary, so that 2000=100. Indices in national currency are converted into U.S. dollars using conversion factors obtained by dividing the current weighted average exchange rate by the weighted average exchange rate in the base period. All aggregate unit value indices are current period weighted.

The indices in SDRs are calculated by multiplying the equivalent aggregate indices in U.S. dollars by conversion factors obtained by dividing the SDR/\$US exchange rate in current period by the rate in the base period.

*Table 40:* The purpose of this table is to provide a summary of total exports within and between important economic and geographic areas of the world. The economic and geographic groupings in this table are in accordance with those of Table 34 in this issue.

Export data in this table are largely comparable to that shown in Table 34 except that Table 34 contains revised data for total exports which are not incorporated into this table if the corresponding revised data by country of destination are not available. Also, the regional totals shown in Table 34 have been adjusted to exclude the re-exports of countries comprising each region. This adjustment is not made in this table since re-exports are often not available by destination.

The data approximate total exports of all countries and areas of the world. They are based on official export figures converted, where necessary, to U.S. dollars according to conversion factors published in table 37 each quarter in this Bulletin (March, June, September and December). Where official figures are not available estimates based on the imports reported by partner countries and on other subsidiary data are used. Some official national data have been adjusted to approximate calendar years. The data include special category (confidential) exports, ships' stores and bunkers and exports of minor importance, the destination of which cannot be determined. These data are included in the total exports, but are excluded from all regions of destination.

*Tables 41 and 42:* The purpose of these tables is to provide data on the network of flows of broad groups of commodities within and between important economic and geographic areas of the world. The regional analysis in these tables is in accordance with that of Table 34 in this issue.

Export data in these tables are largely comparable to that shown in Table 34 except that Table 34 contains revised data for total exports which are not incorporated into this table if the corresponding revised data at the commodity/destination level are not available. Also, the regional totals shown in Table 34 have been adjusted to exclude the re-exports of countries comprising each region. This adjustment is not made in this table since re-exports are often not available by commodity and by destination. The commodity classification is in accordance with the United Nations' Standard International Trade Classification (SITC), Revision 3.

The data are based on official export figures converted, where necessary, to U.S. dollars according to conversion factors published quarterly in Table 37 in this Bulletin (March, June, September and December). Where official figures are not available estimates based on the imports reported by partner countries and on other subsidiary data are used. Some official national data have been adjusted to approximate the commodity groupings of the SITC. The data include special category (confidential) exports, ships' stores and bunkers and exports of minor importance, the destination of which cannot be determined. These data are included in the world totals for each commodity group and in total exports, but are excluded from all regions of destination. Major regional aggregates are presented for each commodity category, as well as the four largest exporting countries in the European Union and the two largest exporting countries in the ‘Other developed economies’ group.

## Finance

The data in these tables are furnished by the International Monetary Fund (IMF). Descriptions of each of the national series are contained in *International Financial Statistics (IFS)*, published monthly by the IMF.

*Table 43:* Foreign exchange rates are shown in units of national currency per US dollar. The exchange rates are classified into three broad categories, reflecting both the role of the authorities in the determination of the exchange and/or the multiplicity of exchange rates in a country. The *market rate* is used to describe exchange rates determined largely by market forces; the *official rate* is an exchange rate determined by the authorities, sometimes in a flexible manner. For countries maintaining multiple exchange arrangements, the rates are labeled *principal rate*, *secondary rate*, and *tertiary rate*. Unless otherwise stated, the table refers to end of period and period averages of market exchange rates or official exchange rates. For further information see *IFS*.

*Table 44:* The money supply table shows “Money” and “Reserve money” under the traditional presentation of the *IFS*, and “Broad money liabilities” and “Monetary base” under its new presentation of monetary statistics.

The liabilities of the monetary system in currency and demand deposits to the domestic private sector are reflected under “Money” in the traditional presentation and under “Broad money liabilities” in the new presentation. The liabilities of the monetary authorities in currency and demand deposits to deposit money banks and the domestic private sector are reflected under “Reserve money” in the traditional presentation and under “Monetary base” in the new presentation.

*Table 45:* The table reports the US dollar value of monetary authorities (central banks, currency boards, exchange stabilization funds and treasuries to the extent that they perform similar functions) holdings of Special drawing rights (SDRs), Reserve Position in the Fund, foreign exchange and the sum of these items which is Total Reserves minus gold.

*Foreign exchange* is defined as holdings by monetary authorities (central banks, currency boards, exchange stabilization funds, and Treasuries to the extent that they perform similar functions) of claims on foreigners in the form of bank deposits, Treasury bills, short and long-term government securities, and other claims usable in the event of a balance-of-payments deficit, including non-marketable claims arising from inter-central bank and intergovernmental arrangements without regard to whether the claim is denominated in the currency of the debtor or the creditor.

*Table 46:* The table reports data on official holdings of gold expressed in physical terms (millions of fine troy ounces) for all countries.

*Table 47:* These series measure the trend of long-term interest rates. They usually comprise the yield to maturity (YM) or the current yield (CY) of a single issue of government or quasi-government bonds whose ownership is widely distributed and with a final maturity of not less than 10 years. Current yields based on “irredeemable or perpetual” government bonds (which carry no obligation of repayment at a fixed date but which usually are redeemable at the option of the government) are designated as YP.

*Table 48:* The table includes discount rates only beginning June 2013. The discount rate is the interest at which the central bank lends to commercial banks to meet their liquidity needs. Prior to the change in coverage in this table, the central bank policy rate (CBPR) had been shown, which in some countries is the discount rate while in others it may be a repurchase agreement rate.

*Table 49:* Rates shown represent short-term money market rates—the rate at which short-term borrowings are effected between financial institutions or the rate at which short-term government paper is issued or traded in the market. Typical standardized names for these rates are *Money Market Rate* and *Treasury Bill Rate*, respectively.

*Table 50:* Index numbers of share prices are based primarily on common shares traded on the leading exchange or exchanges of each country and are intended to cover a representative sample of the companies registered. The indexes are intended to show the increase in value accruing to an investor who bought in the base period a list of shares corresponding in selection and amount to those contained in the index, who subsequently made only such changes in holdings as the substitution of new issues for retired issues, and who retained, in the form of shares, the proceeds of all rights, warrants and share dividends made available since the base period.

## Notes techniques

### Population

*Tableau 1* : Sauf indication contraire, les estimations de la population au milieu de l'année se réfèrent au 1er juillet de l'année de référence. Présentées en milliers et arrondies par la Division de statistique de l'ONU, ces données sont fournies par les services nationaux de statistique à l'*Annuaire démographique* ou au *Bulletin mensuel de statistique* des Nations Unies. Les estimations se réfèrent à la population de fait (« DF » dans le tableau) ou à la population de droit (« DJ » dans le tableau). La population de fait comprend toutes les personnes présentes dans le pays ou la zone à la date de référence, tandis que la population de droit comprend toutes celles qui résident habituellement dans le pays ou la zone, qu'elles y aient été ou non présentes à la date de référence. Par définition, la population de fait et la population de droit ne sont donc pas rigoureusement comparables entre elles.

En outre, la comparabilité internationale des estimations de la population au milieu de l'année est affectée par le manque de conformité aux concepts de la population de fait ou de la population de droit en ce qui concerne les inclusions et les exclusions de certaines personnes dans la population. Les exceptions notables en ce qui concerne les inclusions et les exclusions de certains groupes de population sont indiquées dans les notes quand elles sont connues.

*Tableaux 2 et 3* : Les taux bruts de natalité et les taux bruts de mortalité fournissent respectivement des mesures simples de natalité ou de mortalité d'une population pendant une période donnée. Les tableaux 2 et 3 présentent les taux annuels pour 1 000 habitants.

Les variations par rapport aux définitions établies des naissances vivantes sont le principal obstacle à la comparabilité internationale des taux bruts de natalité et les taux bruts de mortalité. La définition standard d'une naissance vivante est l'expulsion ou l'extraction complète du corps de la mère, indépendamment de la durée de la gestation, d'un produit de la conception qui, après cette séparation, respire ou manifeste tout autre signe de vie, tel que battement de coeur, pulsation du cordon ombilical ou contraction effective d'un muscle soumis à l'action de la volonté, que le cordon ombilical ait été coupé ou non et que le placenta soit ou non demeuré attaché; tout produit d'une telle naissance est considéré comme « enfant né vivant ». En outre, le décès est la disparition permanente de tout signe de vie à un moment quelconque postérieur à la naissance vivante (cessation des fonctions vitales après la naissance sans possibilité de réanimation). Cette définition ne comprend donc pas les morts fœtales. La comparabilité internationale peut être affectée par le manque de conformité stricte aux définitions statistiques standards de certains pays qui excluent de leurs statistiques de l'état civil des enfants nés vivants et décédés avant l'enregistrement de leur naissance ou dans les premières 24 heures de vie.

Le calcul des taux bruts de natalité et des taux bruts de mortalité peuvent également être affectés par la qualité ou la fiabilité des estimations et la composition par âge et par sexe de la population.

### Indice de la production industrielle

*Tableau 4* : Les indices de la production industrielle sont classés selon les sections, les divisions ou des combinaisons de divisions de la Classification Internationale type, par industrie, de toutes les branches d'activité économique (CITI), Rév.4 qui concernent les industries extractives, les industries manufacturières, l'électricité, le gaz et la vapeur ainsi que la production et la distribution d'eau et la gestion des déchets telles que définies dans les sections B, C, D, et E de la classification. Ces indices représentent les tendances de la valeur ajoutée en prix constants. La mesure de la valeur ajoutée correspond à celle de la comptabilité nationale, c'est-à-dire égale à la valeur de la production brute moins la consommation intermédiaire. Chaque série a été établie au moyen de la formule de Laspeyres, ce qui signifie que les indices sont des moyennes arithmétiques affectées de coefficients de pondération, les coefficients utilisés pour calculer les indices d'un pays donné correspondant à la contribution de la valeur ajoutée au produit intérieur brut (PIB) du pays pendant l'année de base. L'année de base utilisée actuellement est 2005 et c'est la valeur ajoutée, généralement aux coûts des facteurs, qui sert pour les coefficients de pondération.

À l'intérieur de chacune des subdivisions de la CITI, Rév.4 (sections, divisions et combinaisons de divisions) apparaissant dans les tableaux, les indices relatifs aux groupements de pays sont calculés directement à partir des données fournies par chacun des pays. Mais les indices concernant le monde sont calculés à partir des indices agrégés des groupements de pays développés et de pays en développement.

À présent, tableau 4 a été suspendu des futures parutions en attendant l'implémentation de CITI Rév.4.

*Tableau 5* : Les indices de pays sont donnés dans ce tableau pour les catégories « Mines », « Industries manufacturières », « Électricité, gaz et vapeur », et « Production et distribution d'eau et gestion des déchets », qui correspondent aux sections B, C, D et E de la CITI Rév.4. Tous les cas où le champ des indices de ces catégories s'écarte nettement de celui des catégories correspondantes de la CITI sont indiqués dans les titres ou dans les notes du tableau.

Les indices de la catégorie « Général » sont la combinaison des indices partiels indiqués, et partagent toutes les différences par rapport à la CITI notées dans le cas des indices partiels. On a donc en principe une couverture complète du champ des statistiques industrielles, à savoir les sections B, C, D et E de la CITI Rév.4. Pour les besoins de la présentation, les indices nationaux ont été recalculés en prenant pour année de base 2010 = 100.

### Indices des prix

Les périodes de base de référence des séries nationales concernant les indices des prix à la consommation ou à la production qui figurent dans le *Bulletin mensuel de statistique (BMS)* peuvent varier considérablement. En conséquent, pour la présentation de ces données, le *BMS* a adopté une période de référence uniforme, qui est à présent 2010 = 100. Dans le cas où un pays ne compile pas ou ne fournit pas ses indices des prix dans cette base de référence (2010 = 100), les données seront recalculées par la Division de statistique des Nations Unies en divisant l'indice pour chaque période indiquée par l'indice de l'année 2010 (ou une année plus récente pour laquelle des données sont disponibles dans la même série) et en multipliant le quotient par 100. Cette opération n'implique aucun changement dans les systèmes de pondération utilisés par les pays.

*Tableau 6* : L'indice des prix à la consommation est un indicateur social et économique couramment utilisé pour mesurer les variations au cours du temps du niveau général des prix des biens et services acquis, utilisés ou payés par les ménages pour leur consommation. Un indice des prix à la consommation est généralement estimé à partir d'une suite de mesures synthétiques des variations relatives, d'une période à l'autre, des prix d'un ensemble fixe de biens et de services de consommation constants en quantité et par leurs caractéristiques, acquis, utilisés ou payés par la population de référence. Chaque mesure synthétique est obtenue comme une moyenne pondérée d'un grand nombre d'indices de prix d'agrégats élémentaires. L'indice de chaque agrégat élémentaire est estimé au moyen d'un échantillon de prix pour un ensemble fixe de biens et de services que se procurent les individus de la population de référence dans une région donnée, ou qui habitent cette région, auprès d'un ensemble spécifié de points de vente ou auprès d'autres

fournisseurs de biens et de services de consommation. Les indices des prix à la consommation généraux et de l'alimentation et boissons non alcoolisées sont présentés dans le tableau.

Les détails des explications à propos des méthodes employées pour calculer les indices des prix à la consommation peuvent être trouvés sur les sites web des offices statistiques nationaux ([http://unstats.un.org/unsd/methods/inter-natlinks/sd\\_natstat.asp](http://unstats.un.org/unsd/methods/inter-natlinks/sd_natstat.asp)) ou sur le site Internet du BIT : [www.ilo.org/ilostat](http://www.ilo.org/ilostat).

*Tableau 7* : Le prix à la production est le prix auquel le producteur vend ses produits sur le marché intérieur ou à l'exportation. Les indices de prix à la production comprennent en général le prix des produits provenant de l'agriculture, de la sylviculture et de la pêche, des industries extractives (mines et carrières), de l'industrie manufacturière ainsi que le prix de l'électricité, du gaz et de l'eau. Les prix établis sont d'ordinaire ceux auxquels s'effectue la transaction, y compris les impôts indirects non déductibles mais non compris les subventions dans le cas des produits de l'économie nationale et y compris les taxes à l'importation et autres impôts indirects non déductibles mais non compris les subventions dans le cas des produits importés. On a généralement utilisé la formule de Laspeyres et, pour la présentation, on a recalculé les indices nationaux, le cas échéant, en prenant comme base de référence 2010=100.

Les indices sont présentés pour chaque pays suivant la classification ci-après :

a. Eléments de l'offre pour le marché intérieur :

Offre intérieure

Production nationale pour le marché intérieur

Agriculture, sylviculture et pêche (section A tel que défini dans la CITI Révision 4)

Produits industriels (sections combinées B à E telles que définies dans la CITI Révision 4)

Produits d'importation

b. Stades de la transformation (pour les biens manufacturés pour les marchés nationaux, indépendamment du fait qu'ils sont produits localement ou importés) :

Matières premières

Biens intermédiaires

c. Utilisation finale (pour les produits vendus sur les marchés nationaux, indépendamment du fait qu'ils sont produits localement ou importés) :

Biens de consommation

Biens d'équipement

*Tableau 8* : La Commission de la Fonction Publique Internationale compile régulièrement les indices mesurant le coût de la vie relatif aux fonctionnaires des Nations Unies en poste dans diverses villes du monde. Les indices comparent, en dollars EU, le coût d'un panier représentatif de biens et services entre une ville donnée et New York, base du système commun de l'ONU. Ces indices sont mis à jour pour refléter le changement de prix temporels dans les villes-postes et à New York, les mouvements du taux de change de la monnaie locale vis-à-vis du dollar EU et pour ajuster les dépenses faites par le personnel en dehors de la ville-poste. Les détails des explications à propos des méthodes employées pour calculer les indices peuvent être trouvés sur le site Internet de la CFPI : <http://icsc.un.org/col-rpi.asp>.

### Emploie, chômage et salaires

*Tableau 9* : Sauf indication contraire, les données se réfèrent aux personnes âgées de 15 ans et plus. La couverture peut se référer soit aux salariés (ouvriers et employés) soit à l'emploi total (toutes les catégories de situation dans la profession) travaillant pendant un jour ou une semaine donnés de chaque mois ou trimestre ou parfois au nombre moyen des personnes travaillant durant une période déterminée. Les activités non agricoles comprennent : Industries extractives; industries manufacturières; électricité, gaz et eau; construction; commerce de gros et de détail, restaurants et hôtels; transports, entrepôts et communications; banques, assurances, affaires immobilières et services aux entreprises; services à la collectivité, services sociaux et personnels; activités mal désignées.

*Tableau 10* : Sauf indication contraire, les données se réfèrent aux personnes âgées de 15 ans et plus. La couverture peut se référer soit aux salariés (ouvriers et employés) soit à l'emploi total (toutes les catégories de situation dans la profession) travaillant pendant un jour ou une semaine donnés de chaque mois ou trimestre ou parfois au nombre moyen des personnes travaillant durant une période déterminée.

*Tableau 11* : Le chômage représente, en général, le nombre total des chômeurs et des personnes temporairement débauchées et proviennent (a) des enquêtes par sondage de la main-d'œuvre, (b) des statistiques des bureaux de placement, (c) des estimations officielles et (d) fichiers des assurances. En employant ces séries, il faut tenir compte de la source des données. En général, pour établir les pourcentages de chômage, on calcule le rapport entre le nombre des ouvriers en chômage pour un groupe donné, pendant une certaine période, et l'effectif total des personnes employées et des chômeurs dans ce groupe, pendant la même période.

*Tableaux 12 et 12a* : Ce tableau présente les salaires moyens par travailleur pour l'ensemble des emplois occupés dans les industries manufacturières et dans les activités non-agricoles. Les activités non-agricoles comprennent les industries extractives ; les industries manufacturières ; l'électricité, le gaz et l'eau, le bâtiment ; le commerce de gros et de détail, la restauration et l'hôtellerie ; les transports, l'entreposage et les communications; les finances, les assurances, l'immobilier et les services commerciaux; les services communautaires, sociaux et personnels; les activités qui ne sont pas clairement définies. Les salaires comprennent normalement les primes, les indemnités de coût de la vie, les impôts, les contributions des ouvriers au fonds d'assurance sociale et dans certains cas, les paiements en nature ; ils excluent normalement les contributions des employeurs au fonds d'assurance sociale, les allocations familiales et autres prestations de la sécurité sociale. La période de l'année correspondant aux données varie d'un pays à l'autre. Les données proviennent (a) des enquêtes par sondage sur les forces de travail, (b) des enquêtes sur la main-d'œuvre et les entreprises, (c) des statistiques sur l'emploi et (d) des registres d'assurances sociales. Sauf indication contraire, les données se rapportent aux employés des deux sexes, quel que soit leur âge. Certaines de ces séries s'écartent des normes indiquées ci-dessus pour l'une ou les raisons suivantes : type de source ou de la couverture, l'inclusion d'industries autres que manufacturières et l'emploi, dans les calculs, de taux de rémunération au lieu de salaires.

Pour plus de détails sur les tableaux 9 à 12, voir les sites Internet : <http://www.ilo.org/ilostat>.

## Énergie

*Tableau 13* : Les données se rapportent aux charbons avec un pouvoir supérieur (sur base humide, cendres déduites) plus élevé que 24 MJ/kg ou plus faible que 24 MJ/kg à condition que le charbon ait un indice de réflectance de la vitrinite supérieur ou égal à 0,6 pour cent. La houille comprend les charbons anthraciteux et bitumineux et exclus le lignite et les charbons sous-bitumineux.

*Tableau 14* : Les données se rapportent aux charbons avec un pouvoir calorifique supérieur (sur base humide, cendres déduites) plus faible que 24 MJ/kg et un indice moyen de réflectance de la vitrinite inférieur à 0,6 pour cent. Le charbon brun comprend le charbon sous-bitumineux et le lignite.

*Tableau 15* : Les données se rapportent au pétrole brut, qui est une huile minérale d'origine fossile extraite de réservoirs souterrains avec des moyens conventionnels, et qui comprend les hydrocarbures à l'état liquide ou quasi liquide et les impuretés associées comme du sulfure ou des métaux. Cette catégorie exclut les liquides de gaz naturel. Pour certains pays, les données originales exprimées en unités de volume ont été converties en tonnes métriques à l'aide de la densité indiquée dans la deuxième colonne.

*Tableau 16* : Les données se rapportent à la production de gaz naturel commercialisable sec (c.à.d. excluant les quantités brûlées à la torchère, éventées ou réinjectées au point de production). Le gaz naturel est un mélange d'hydrocarbures gazeux, principalement du méthane, mais inclut généralement aussi en quantité plus faible de l'éthane, du propane et des hydrocarbures supérieurs ainsi que des gaz non combustibles tel que l'azote et le dioxyde de carbone. La majorité du gaz naturel est dérivé à la fois de gaz "non associé" provenant de gisements qui produisent uniquement des hydrocarbures gazeux, et de gaz "associé" produit en même temps que le pétrole brut. Le processus de séparation produit du gaz naturel en enlevant ou en réduisant les hydrocarbures autres que le méthane à des niveaux acceptables pour du gaz commercialisable. Les liquides de gaz naturel (LGN) enlevés durant le processus sont distribués séparément. Le gaz naturel comprend également le méthane récupéré dans les mines de charbon (grisou) ou dans les veines de charbon (méthane de houille) et de gaz de schiste.

*Tableau 17* : Les données se rapportent à la production brute d'électricité, qui est la somme de la production d'énergie électrique mesurées aux bornes de sorties des générateurs de toutes les unités/installations concernées (y compris le stockage par pompage turbinage). Si possible, à la fois les producteurs dont c'est l'activité principale (connus précédemment sous le nom de producteurs publics) et les autoproducteurs doivent être inclus.

*Tableaux 18 et 19* : Les produits énergétiques comprennent tous les produits appartenant à la section 3 de la CTCI. Ces produits sont : huiles, coques et briquettes, pétrole, produits dérivés du pétrole et produits connexes, gaz et énergie électrique. Les indices de la valeur unitaire sont obtenus de sources nationales, à l'exception de quelque pays pour lesquels la Division de Statistique des Nations Unies calcule ces indices en utilisant les chiffres de la valeur et du volume fournis par ces pays. Pour les pays ne calculant pas leurs indices des importations des produits énergétiques selon la définition décrite ci-dessus les sous-indices sont agrégés en un indice qui se rapproche des la section 3 de la CTCI. Les indices en monnaie nationale sont convertis en dollars des E.-U. en les multipliant par un facteur de conversion obtenu en divisant le taux de change courant, moyenne pondérés, d'une monnaie donnée par celui de la période de base. Tous les agrégés des indices de la valeur unitaire, sont à coefficients de pondération correspondant à la période indiquée. Les indices du volume sont calculés à partir de chiffres de la valeur et les indices de la valeur unitaire. Tous les agrégés des indices du volume sont à coefficients de pondération correspondant à la période en base.

Les chiffres dans le tableau 19 sont calculés selon des données préparées pour les tableaux 18 et 38.

## Industries manufacturières

*Tableau 21* : Les données représentent la farine blutée (tamisée) de blé tendre et blé dur et de l'épeautre. Le son et les autres résidus de la mouture, ainsi que le gruau de froment et les semoules, et farines obtenues par la mouture de céréales autres que le blé, ne sont pas compris.

*Tableau 22* : Sauf indication contraire, les données se rapportent à la production de fonte dans les hauts fourneaux et les fours électriques.

*Tableau 23* : Sauf indication contraire, les données se rapportent à la production totale de lingots et moulage bruts. Le fer puddlé n'est pas compris.

*Tableau 24* : Les données représentent le poids total de filés de coton et ceux provenant des déchets de coton, produits pour la vente directe du travail à façon, ou pour une transformation ultérieure. Sauf indication contraire, les filés pour armatures de pneumatiques ne sont pas compris.

*Tableau 25* : Les données se rapportent aux tissus de coton et les tissus de coton mélangés, avant d'être soumis aux opérations de finissage telles que blanchiment, teinture, etc.

*Tableau 26* : Les données se rapportent à la production de papier d'impression, blanchi, non collé ou peu encollé, non couché, du type ordinaire utilisé pour les journaux, poids de 45 à 60 gr. au mètre carré, contenant généralement au moins 70% en poids de matière fibreuse tirée de la pâte mécanique.

*Tableau 27* : Sauf indication contraire, les données ne correspondent pas aux pneus pour véhicules tous terrains ni aux pneus pour motocyclettes, bicyclettes et véhicules routiers à traction animale. Les données ne comprennent pas non plus production de chambres à air.

*Tableau 28* : Les véhicules construits sur châssis importés ou montés à l'aide de pièces importées ne sont pas compris.

## Transports

*Tableau 29* : Sauf indication contraire, les données représentent le poids (emballage compris) de l'ensemble des marchandises (y compris bétail sur pied) embarquées ou débarquées au titre du commerce extérieur par des navires de haute mer sous tous pavillons dans les ports du pays considéré (un navire est dit de haute mer si une partie au moins de son voyage, pendant qu'il assure le transport des marchandises, se fait par mer). Sont exclus : courrier, or et argent en lingots, espèces, bagages des passagers, contenu des soutes, provisions de bord, lest, bateaux et autres engins flottants livrés en tant que marchandises sans être chargés sur navire, approvisionnements du gouvernement lorsqu'ils sont transportés à bord de navires de l'Etat ou gratuitement à bord de navires de la marine marchande, marchandises transbordées d'un navire importateur à un navire exportateur. Les marchandises en provenance ou à destination d'un entrepôt en douane sont comprises.

*Tableau 30* : Voitures de tourisme comprennent les véhicules automobiles destinés au transport des personnes et ayant moins de dix places. Y compris les taxis, les jeeps et autres véhicules analogues et les « station wagons ». Véhicules utilitaires comprennent autobus ayant plus de neuf places pour passagers et les camions équipés d'un moteur. Y compris les ensembles tracteur-remorque et semi-remorque. Les données ne comprennent ni les remorques sans moteur destinées à être attelées à un autobus, à un camion ou à un tracteur ni les tracteurs agricoles.

*Tableau 31* : Les données mensuelles présentées ont trait aux vols payants prévus et réalisés par les transporteurs aériens enregistrés dans le pays déclarant, c'est-à-dire au trafic voyageurs en nombre de passagers-kilomètre réalisés, ou au trafic de fret en nombre de tonnes-kilomètres, réalisés contre rémunération et suivant un horaire publié, tels qu'ils ont été communiqués à l'OACI par les États membres. Lorsque les données communiquées à l'Organisation sont établies chaque année ou chaque trimestre, elles sont également réparties entre les mois de la période considérée, indiquées par mois dans ce tableau. Seules les données communiquées par les États membres de l'OACI sont prises en compte dans ce tableau. Pour des données supplémentaires, consulter le site Web de l'Organisation (<http://stats.icao.int>). Parmi les données annuelles présentées, certaines peuvent recouvrir à la fois des estimations des chiffres manquants établies par l'OACI (pour les transporteurs qui ne communiquent pas de données chaque mois) et des chiffres communiqués.

*Vols payants réguliers* : Vols prévus et réalisés contre rémunération suivant un horaire publié, ou dont la régularité ou la fréquence sont propres à constituer des séries systématiques évidentes, et qui sont ouverts à la réservation directe de la part du public, ainsi que les vols supplémentaires nécessités par un excédent de trafic sur les vols réguliers.

*Passagers-kilomètres réalisés* : Un passager-kilomètre est réalisé lorsqu'un passager est transporté sur un kilomètre. Le nombre de passagers-kilomètres est égal à la somme des produits obtenus en multipliant le nombre des passagers payants transportés sur chaque étape par la longueur de l'étape. Le chiffre obtenu est égal au nombre de kilomètres parcourus par tous les passagers.

*Tonnes-kilomètres de fret réalisées* : Une tonne-kilomètre de fret est réalisée lorsqu'une tonne métrique de fret est transportée sur une distance de 1 kilomètre. Le nombre de tonnes-kilomètre de fret réalisées est égal à la somme des produits obtenus en multipliant le nombre de tonnes de fret, messageries et valise diplomatique comprises, transportées sur chaque étape du vol par la longueur de l'étape. Aux fins des statistiques de l'OACI, le fret comprend les messageries et la valise diplomatique, mais non les bagages des passagers.

*Étape* : Une étape est le parcours d'un aéronef, depuis le décollage jusqu'au premier atterrissage suivant. De plus, une étape est soit internationale, soit intérieure, selon le cas.

*Étape internationale* : C'est une étape ayant une de ses extrémités, ou les deux, sur le territoire d'un État autre que celui où le transporteur aérien a son principal établissement.

*Étape intérieure* : C'est toute étape qui ne peut pas être classée comme internationale. En d'autres termes, les étapes intérieures comprennent toutes les étapes parcourues entre des points situés dans les limites des frontières d'un État, par un transporteur aérien ayant son principal établissement dans cet État. Les étapes parcourues entre un État et les territoires qui lui appartiennent, de même que toute étape parcourue entre deux de ces territoires, doivent être classées comme intérieures, même si elles traversent l'espace situé au-dessus des eaux internationales ou du territoire d'un autre État.

On trouvera encore d'autres termes et désignations employés dans les statistiques de l'aviation civile sur le site Web suivant : <http://www.icaodata.com/Terms.aspx>.

## Commerce international

*Les tableaux 34 et 35* contenant les statistiques de l'état du commerce par pays, par région, et par zone paraissent dans chaque numéro du Bulletin. D'autres statistiques détaillées du commerce sont publiées tous les trimestres, tous les semestres ou une fois par an. Elles sont mentionnées dans la table des matières, avec indication des numéros dans lesquels on trouve chacune de ces séries.

*Valeur des importations et des exportations* : Sauf indication contraire, les précisions données dans les en-têtes de colonne et les renvois du tableau 35 valent aussi pour les statistiques au tableau 34. Les totaux régionaux au tableau 34 ont été, le cas échéant, ajustés de façon à correspondre à peu près au commerce spécial d'importation (valeur CIF) et au commerce spécial d'exportation (valeur FOB); ils tiennent compte également des pays qui ne figurent pas dans la liste et comprennent des estimations dans le cas des régions pour lesquelles les données ne sont pas complètes. Les chiffres de la balance commerciale représentent la différence entre les exportations et les importations.

*Indices des prix, de la valeur unitaire et du volume* : L'indice des prix est une mesure du changement de valeur des exportations/importations attribué aux fluctuations des prix des divers produits. L'indice de la valeur unitaire indique quelles sont les variations des prix moyens des groupes des produits. L'indice du volume est une mesure du changement de valeur des exportations/importations attribué aux fluctuations des quantités des divers produits.

*Définitions générales* : Pour les séries publiées dans les tableaux 34 et 35, il existe des définitions générales, détaillées qui sont conformes aux recommandations du Conseil économique et social et de sa Commission de statistique.

*Territoire* : Les statistiques rapportées par un pays s'appliquent en général au territoire douanier du pays qui coïncide, généralement, avec le territoire géographique.

*Système du commerce* : Importations : dans le système du commerce général à la fois les marchandises entrant directement pour la consommation nationale et les marchandises entrées dans les entrepôts des douanes sont enregistrées comme importations, au moment de leur première arrivée; dans le système du commerce spécial, les marchandises sont enregistrées comme importations lorsqu'elles sont déclarées pour la consommation nationale, soit au moment de leur entrée, soit lorsqu'elles sont retirées des entrepôts des douanes.

*Exportations* : les marchandises sortant consistent (a) en marchandises nationales, c'est à dire entièrement ou partiellement produites dans le pays; (b) en marchandises étrangères, ni transformées, ni déclarées pour la consommation nationale dans le pays, qui sortent des entrepôts des douanes; (c) en marchandises nationalisées, c'est à dire marchandises étrangères, déclarées pour la consommation nationale, qui sont exportées sans avoir été transformées. Les exportations générales comprennent les 3 catégories et, dans le système du commerce général, le total de (b) et (c) peut être enregistré comme réexportations. Les exportations spéciales comprennent les catégories (a) et (c). Le commerce de transit direct, consistant en marchandises entrées ou sorties pour des seuls buts de transport, n'est pas compris dans les statistiques d'importations et d'exportations.

*Portée des données* : En général, toutes les marchandises entrées ou sorties dans les catégories administratives appropriées décrites plus haut, sont comprises si leur mouvement s'ajoute aux ressources matérielles du pays établissant les statistiques ou s'en retranche. Vu que leur mouvement, en général, modifie plutôt les ressources monétaires que les ressources matérielles, l'or monétaire ainsi que les monnaies et titres de propriété après leur mise en circulation sont exclus. Parmi les catégories incluses, si possible, dans les données figurent : transactions commerciales ordinaires, transactions gouvernementales, aide de l'étranger et à l'étranger (gouvernementale et privée), commerce des concessionnaires, argent (excepté pièces de monnaie émises).

*Evaluation* : En général, les pays basent l'évaluation de leurs importations ou de leurs exportations sur les valeurs spécifiées dans les contrats entre importateurs et exportateurs et ajustées pour tenir compte des frais de transport et autres frais connexes jusqu'à leurs propres frontières. Le résultat est une

valeur de transaction CIF pour les importations et une valeur de transaction FOB pour les exportations. Lorsqu'un pays évalue ses importations à la frontière du pays exportateur, les tableaux indiquent que les valeurs des importations sont FOB.

Les importations et les exportations totales pour le monde se composent des importations et exportations des Economies développées, des Economies en voie de développement et des Autres. Les totaux régionaux pour importations et exportations ont été ajustés pour exclure les re-exportations des pays ou zones qui comprennent la région. Les totaux régionaux et mondiaux comprennent des estimations pour certains pays ou zones ne figurant pas séparément mais pour lesquels les données ne sont pas encore disponibles. Les totaux régionaux contenant des données estimées sont imprimés en caractères gras.

Les valeurs des exportations et des importations ont été obtenues par la Division de statistique des Nations Unies (DSNU) à partir des données publiées dans les publications nationales, ou des données publiées dans les questionnaires du Bulletin Mensuel de Statistique pour les pays suivants : Andorre, Bermudes, Îles Caïmanes, Cuba, État de Palestine, la Fédération de Russie, Gibraltar, Monténégro (commençant 2006), Nioué, Serbie et Monténégro (avant 2006), Turkménistan, Îles Turques et Caïques, Tuvalu et Ouzbékistan.

Les valeurs en dollars des É.-U. des exportations et des importations de tous les autres pays ont été obtenues à partir des données publiées par le Fonds Monétaire International dans la publication « *Statistiques Financières Internationales* ».

*Tableau 36* : Les indices du volume et les indices de la valeur unitaire/prix sont comme compilés par les pays mais convertis en dollars des É.-U. et remis à 2000 = 100. Utilisant ces indices la Division de Statistique des Nations Unies calcule les indices des termes de l'échange (sont obtenus en divisant les indices de la valeur unitaire à l'exportation par ceux à l'importation), et les indices du pouvoir d'achat des exportations (sont obtenu en multipliant l'indice des termes de l'échange par l'indice du volume des exportations). Les notes se rapportant aux pays qui apparaissent dans le Tableau 35 de ce numéro s'appliquent aussi aux indices de ce tableau.

*Tableau 37* : Les facteurs de conversion pour le commerce extérieur sont les moyennes pondérées des taux de change. Les coefficients de pondération sont les valeurs mensuelles ou trimestrielles correspondantes des importations ou des exportations. Les taux de change sont les taux fournis par le pays ou calculés par le secrétariat du FMI.

*Tableau 38* : Le but de ce tableau est de fournir les indices du commerce international par régions.

*Tableau 39* : Les produits manufacturés comprennent les sections 5 à 8 de la Classification type pour le commerce international (CTCI). Ces sections sont : produits chimiques et produits connexes, articles manufacturés classés principalement d'après la matière première, machines et matériel de transport et articles manufacturés divers.

Les groupes économiques et géographiques de ce tableau sont conformes aux groupes des pays ou zones qui paraissent dans le tableau 34 de ce numéro, bien que le tableau 34 comprenne plus de détails en ce qui concerne les sous-groupes des 'Autres économies développées' et 'Economies en voie de développement' de ce tableau.

En 2000, les exportations des produits manufacturés par tous les Economies développées et les 'Economies en voie de développement' représentaient approximativement 97 pour cent de l'ensemble des exportations mondiales des produits manufacturés.

Les indices de la valeur unitaire sont obtenus de sources nationales.

Pour les pays ne calculant pas leurs indices des exportations des produits manufacturés selon la définition décrite ci-dessus les sous-indices sont agrégés en un indice qui se rapproche des sections 5 à 8 de la CTCI.

Les indices en monnaie nationale sont convertis en dollars des É.-U. en les multipliant par un facteur de conversion obtenu en divisant le taux de change courant, moyenne pondérés, d'une monnaie donnée par celui de la période de base. Tous les agrégés des indices de la valeur unitaire, sont à coefficients de pondération correspondant à la période indiquée.

Les indices en DTS sont calculés en multipliant les indices totaux équivalents en dollars É.-U. par un facteur de conversion obtenu en divisant le taux de change courant du DTS/\$É-U d'une monnaie donnée par celui de la période de base.

*Tableau 40* : Le but de ce tableau est de fournir un aperçu du courant des marchandises entre les grandes régions importantes économiques et géographiques du monde et de leur commerce intérieur. Les groupes économiques et géographiques de ce tableau sont conformes à ceux du Tableau 34 de ce numéro.

Les données des exportations dans ce tableau sont en générale comparables aux chiffres qui sont inclus dans le Tableau 34, exceptées celles du Tableau 34 qui comportent des révisions aux exportations totales qui ne sont pas inclus dans ce tableau si les révisions des données correspondantes aux pays de destination ne sont pas disponibles. De plus, les totaux régionaux inclus dans le Tableau 34 ont été ajustés pour exclure les réexportations des pays qui comprennent la région. Cet ajustement n'est pas fait dans ce tableau parce que des réexportations ne sont pas disponibles fréquemment par destination.

Les données approchées des exportations totales de tous pays et régions du monde. Elles sont basées sur les chiffres des exportations officielles nationales convertis en dollars É.-U. selon les facteurs de conversion publiés chaque trimestre dans le tableau 37 de ce bulletin (mars, juin, septembre et décembre). Quand les chiffres officiels ne sont pas disponibles on a recours à des estimations basées sur les importations rapportées par les pays partenaires ou sur d'autres données subsidiaires. Quelques données officielles nationales ont été ajustées qu'elles correspondent aux années civiles. Les données comprennent les exportations de catégorie spéciale (confidentielles), les approvisionnements des navires et combustible de soute et autres exportations de moindre importance dont la destination n'a pu être déterminée. Ces données sont comprises dans les exportations totales, mais elles ne sont pas comprises dans les régions de destination.

*Tableaux 41 et 42* : Le but de ces tableaux est de fournir un aperçu du courant des marchandises entre les régions importantes économiques et géographiques du monde et de leur commerce intérieur. L'analyse régionale dans ces tableaux est conforme à celle du Tableau 34 du présent numéro.

Les données des exportations dans ces tableaux sont en générale comparables aux chiffres qui sont inclus dans le Tableau 34, exceptées celles du Tableau 34 qui comportent des révisions aux exportations totales qui ne sont pas inclus dans ce tableau si les révisions des données correspondantes au niveau de marchandise/destination ne sont pas disponibles. De plus, les totaux régionaux inclus dans le Tableau 34 ont été ajustés pour exclure les re-exportations des pays qui comprennent la région. Cet ajustement n'est pas fait dans ce tableau parce que des re-exportations ne sont pas disponibles fréquemment par marchandise et par destination. La classification par marchandise utilisée est la Classification type pour le commerce international (CTCI) Révision 3 des Nations Unies.

Les données sont basées sur les chiffres des exportations officielles nationales convertis en dollars É.-U. selon les facteurs de conversion publiés chaque trimestre dans un tableau spécial dans ce Bulletin (mars, juin, septembre et décembre). Quand les chiffres officiels ne sont pas disponibles on a recours à des estimations basées sur les importations rapportées par les pays partenaires ou sur d'autres données subsidiaires. Quelques données officielles nationales ont été ajustées qu'elles correspondent aux groupes des marchandises de la CTIC. Les données comprennent les exportations de catégorie spéciale (confidentielles), les approvisionnements des navires et combustible de soute et autres exportations de moindre importance dont la destination n'a pu être déterminée. Ces données sont comprises dans les totaux de chaque groupe de marchandise et dans les exportations totales, mais elles ne sont pas comprises dans les régions de destination. Les majeurs agrégats régionaux sont montrés pour chaque catégorie de marchandise, de même que les quatre plus grands pays exportateurs dans la Union Européenne et les deux plus grands pays exportateurs dans le groupe 'Autres économies développées'.

### Finances

Les données ont été communiquées par le Fonds monétaire international (FMI). Des définitions détaillées sont données dans les *Statistiques Financières Internationales*, publiées mensuellement par le FMI.

**Tableau 43 :** Les taux des changes sont exprimés par nombre d'unités de monnaie nationale pour un dollar des Etats-Unis. Les taux de change sont classés en trois catégories, qui dénotent le rôle des autorités dans l'établissement des taux de change et/ou la multiplicité des taux de change dans un pays. Par taux du marché, on entend les taux de change déterminés essentiellement par les forces du marché; le taux officiel est un taux de change établi par les autorités, parfois selon des dispositions souples. Pour les pays qui continuent de mettre en œuvre des régimes de taux de change multiples, les taux sont désignés par les appellations suivantes : « taux principal », « taux secondaire » et « taux tertiaire ». Sauf indication contraire, le tableau indique des taux de fin de période et les moyennes sur la période, des taux de change du marché ou des taux de change officiels. Pour plus de renseignements, voir *Statistiques financières internationales*.

**Tableau 44 :** Le tableau des disponibilités monétaires indique d'une part la « Monnaie » et d'autre part la « Monnaie de réserve », en la présentation traditionnelle de la *Statistiques financières internationales (SIF)*, et « Passif monétaire au sens large » et « Base monétaire » en la nouvelle présentation du *SIF*.

Le passif du système monétaire sous forme de monnaie fiduciaire et en dépôts à vue à l'égard du secteur privé national se retrouve sous la rubrique « Monnaie » dans la présentation traditionnelle et sous la rubrique « Passif monétaire au sens large » dans la nouvelle présentation. Le passif des autorités monétaires en monnaie fiduciaire et en dépôts à vue à l'égard des banques de dépôt et du secteur privé national se retrouvent sous la rubrique « Monnaie de réserve », dans la présentation traditionnelle, et sous la rubrique « Base monétaire », dans la nouvelle présentation.

**Tableau 45 :** Le tableau présente la valeur en dollars EU des avoirs des autorités monétaires (banque centrale, fonds de stabilisation des changes et, dans la mesure où il exerce des fonctions analogues, Trésor public) représentant : droits de tirage spéciaux (DTS), position de réserve au FMI, devises étrangères, plus la somme de ces éléments qui est Réserves total moins l'or.

Les réserves de devises sont les avoirs des autorités monétaires—banques centrales, offices des changes, fonds de stabilisation des changes et Trésors (dans la mesure où ceux ci exercent des fonctions analogues)—en créances sur des étrangers sous forme de dépôts bancaires, bons du Trésor, fonds d'Etats à court et à long terme et autres créances utilisables en cas de déficit de la balance des paiements, y compris les créances non négociables résultant d'arrangements entre banques centrales et entre gouvernements que la créance soit libellée dans la monnaie du débiteur ou dans celle du créancier.

**Tableau 46 :** Le tableau présente les avoirs officiels en or exprimés en unités physiques (millions d'onces troy de fin) pour tous les pays.

**Tableau 47 :** Ces séries représentent l'évolution des taux d'intérêt des obligations à long terme. Elles représentent habituellement le taux de capitalisation (YM) (rendement net jusqu'à l'échéance) ou le rendement courant (CY) d'une seule émission d'obligations de l'Etat ou d'organismes parastataux qui ont été largement diffusées. L'échéance finale de l'émission considérée doit en principe avoir lieu au moins 10 ns après la date d'émission. Les lettres YP désignent une série portant sur le rendement actuel des obligations d'Etat non amortissables ou perpétuelles (c'est à dire de celles dont la date de remboursement n'est pas fixée mais qui sont ordinairement amorties à la suite d'une décision de l'Etat).

**Tableau 48 :** Le tableau ne comprend que les taux d'escompte à partir de juin 2013. Le taux d'escompte est le taux d'intérêt auquel la banque centrale prête aux banques commerciales afin de répondre à leurs besoins de liquidités. Avant la modification de son champ, ce tableau présentait les taux directeur des banques centrales, qui dans certains pays correspond au taux d'escompte alors que dans d'autres, il peut s'agir du taux des opérations de pensions.

**Tableau 49 :** Les taux indiqués représentent le marché monétaire à court terme—le taux auquel les emprunts à court terme sont effectués entre les institutions financières, ou le taux auquel les effets publics à court terme sont émis ou négociés sur le marché. Ces taux sont normalement dénommés taux du marché monétaire et taux des bons du Trésor, respectivement.

**Tableau 50 :** Les indices des cours des actions se rapportent principalement aux actions ordinaires qui font l'objet de transactions à la bourse principale ou aux bourses principales de chaque pays et qui ont été réunies en un échantillon aussi représentatif que possible de sociétés inscrites. Les indices visent à mesurer l'augmentation de la valeur d'un portefeuille identique à l'ensemble des actions comprises dans l'indice, dont la composition n'est changée que par la substitution de nouvelles actions en remplacement de celles qui sont retirées du marché, et qui n'aurait été augmentée que du nombre d'actions additionnelles acquises par conversion des droits, warrants et dividendes distribués à partir de l'année choisie comme base.

## Data definitions

### A

**agricultural production index:** Based on the sum of price-weighted quantities of different agricultural commodities produced after deductions of quantities used as seed and feed weighted in a similar manner. All the indices at the country, regional and world levels are calculated by the Laspeyres formula. Production quantities of each commodity are weighted by average international commodity prices in the base period and summed for each year. To obtain the index, the aggregate for a given year is divided by the average aggregate for the base period. The commodities covered in the computation of indices of agricultural production are all crops and livestock products originating in each country. Practically all products are covered, with the main exception of fodder crops (1\*, 2003, p. xvii).

**agricultural products:** CPC Vers. 1.1 (8), divisions 01 and 02: cereals, vegetables, fruit and nuts, oil seeds and oleaginous fruit, living plants, cut flowers and flower buds, flower seeds and fruit seeds, vegetable seeds, beverages and spice crops, unmanufactured tobacco, sugar beet and sugar cane, raw vegetable materials not elsewhere classified, live animals and animal products.

### B

**base period:** The period of time for which data used as the base of an index number, or other ratio, have been collected. This period is frequently one year but it may be as short as one day or as long as the average of a group of years (6).

**brown coal:** Coals with a gross calorific value (moist, ash-free basis) less than 24 MJ/kg and a vitrinite mean random reflectance less than 0.6 per cent. Brown coal comprises sub-bituminous coal and lignite (15).

### C

**capital goods:** Pure-bred breeding animals, metal containers for storage or transport, hand tools, armoured and reinforced safes and the like of base metal, boilers and auxiliary plant, turbines, engines and motors, agricultural and horticultural or forestry machinery, construction and mining machinery, manufacturing machinery, self-propelled works trucks and other lifting, handling, loading or unloading machinery, weighing machinery and other appliances, office machines, audio and video apparatus and telecommunications equipment, electrical machines and apparatus, transportation installations and floating structures, boilers, devices, appliances and instruments, meters and other measuring instruments and apparatus, cinematographic cameras and projectors, time measurement instruments, amusement equipment, office or desk equipment of base metal, tailors' dummies and displays, motorcars and other motor vehicles, trailers and semi-trailers, containers specially designed and equipped for transport, rail locomotives, tenders, coaches, railway or tramway passenger coaches, freight and maintenance cars, helicopters, space craft (including satellites) and spacecraft launch vehicles, balloons and dirigibles, tankers, fishing vessels, refrigerated vessels, ships, tugs, outboard motors, bicycles, trailers, aeroplanes and other aircraft, gliders, rowing boats and canoes, rafts (9, divisions 4 and 5).

**cement:** CPC Vers. 1.1 (8), group 374: Cement, lime and plaster.

**CIF (Cost, insurance, freight):** The seller must pay the costs and freight necessary to bring the goods to the named port of destination but the risk of loss of or damage to the goods, as well as any additional costs due to events occurring after the time the goods have been delivered on board the vessel, is transferred from the seller to the buyer when the goods pass the ship's rail in the port of shipment. In addition, the seller has to procure marine insurance against the buyer's risk of loss of or damage to the goods during the carriage. The seller contracts for insurance and pays the insurance premium. The buyer should note that under the CIF term the seller is only required to obtain insurance on minimum coverage. The CIF term requires the seller to clear the goods for export. This term can only be used for sea and inland waterway transport (12).

**civil aviation traffic:** Traffic for which remuneration is received, carried on flights performed according to a published timetable and by extra flights occasioned by overflow traffic from scheduled flights (3).

**construction:** Economic activity directed to the creation, renovation, repair or extension of fixed assets in the form of buildings, land improvements of an engineering nature and other such engineering constructions as roads, bridges, dams (14, para. 15). New construction refers to site preparation for, and construction of, entirely new structures and/or significant extensions to existing structures whether or not the site was previously occupied. Within this class of construction, further distinctions may be made by the following categories: residential buildings, so classified when more than half of the floor area of the building is intended for dwelling purposes; non-residential buildings (all buildings not classified as residential) (14, para. 73).

**construction completed, non-residential:** Economic activity directed to the creation or extension of fixed assets in the form of buildings (14, para. 15).

**consumer goods:** Food and non-alcoholic beverages, alcoholic beverages, tobacco and narcotics, clothing and footwear, hosing, water, electricity, gas and other fuels, furnishings, household equipment, health, transport, communication, recreation and culture, education, restaurants and hotels, miscellaneous goods and services (10, p.83).

**consumer prices index, all items:** Measures changes over time in the general level of prices of goods and services that a reference population acquires, uses or pays for consumption. A consumer price index is estimated as a series of summary measures of the period-to-period proportional change in the prices of a fixed set of consumer goods and services of constant quantity and characteristics, acquired, used or paid for by the reference population. Each summary measure is constructed as a weighted average of a large number of elementary aggregate indices. Each of the elementary aggregate indices is estimated using a sample of prices for a defined set of goods and services obtained in, or by residents of, a specific region from a given set of outlets or other sources of consumption goods and services (4, chap.7). See also index numbers, Laspeyres.

**consumer prices index, food:** Measures changes over time in the general level of prices of food goods that a reference population requires, uses or pays for consumption (4, chap. 7). See also index number, Laspeyres.

\* Numbers in parenthesis refer to numbered entries in the list of references which follow the data definitions section.

**cotton fabrics:** CPC Vers. 1.1 (8), group 266: Woven fabrics (except special fabrics) containing cotton.

**cotton yarn:** CPC Vers. 1.1 (8), subclasses 26360 and 26370: Textile yarn containing cotton.

**crude birth rate:** The fraction where the numerator is the total number of births in a population during a given period and the denominator is the total number of person-years lived by the population during that period, generally approximated by the size of the population at the mid-point of the period multiplied by the length of the period in years. Usually stated per 1,000 (21). Live birth is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of the pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached (26, definition 3.1).

**crude death rate:** Generally an annual rate consisting of the ratio of the annual number of deaths occurring during a calendar year to the number exposed to the risk of dying during the same period, equivalent to the mean population or average population for the period (21, para. 401). Death is the permanent disappearance of all evidence of life at any time after live birth has taken place (post-natal cessation of vital functions without capability of resuscitation). This definition therefore excludes foetal deaths (23, para. 46 (2)).

**crude oil:** (strictly *conventional* crude oil) a mineral oil of fossil origin extracted by conventional means from underground reservoirs, and which comprises liquid or near-liquid hydrocarbons and associated impurities such as sulphur and metals. This category should exclude natural gas liquids (15).

## D

**domestic production:** Goods and services created by the productive activity of resident institutional units (25, para. 6.84).

**domestic supply:** See producers/wholesale prices indices.

**dwelling:** A separate and independent place of abode intended for habitation by a single household or one intended for habitation but occupied as living quarters by a household at the time of the census. Construction of a room of suite of rooms and its accessories in a permanent building or structurally separated part thereof which, by the way it has been built, rebuilt or converted, is intended for habitation by one household and is not used wholly for other purposes. It should have a separate access to a street (direct or via a garden or grounds) or to a common space within the building (staircase, passage, gallery and so on) (22, paras. 2.331-2.333).

## E

**earnings (wages and salaries):** Remuneration paid to employees in cash and in kind for time worked or work done together with remuneration for time not worked, such as annual vacation and other paid holidays, and bonuses and gratuities, housing and family allowances (25, para. 7.43). See wages, earnings.

**electricity:** The transfer of energy through the physical phenomena involving electric charges and their effects when at rest and in motion. Electricity can be generated through different processes such as: the conversion of energy contained in falling or streaming water, wind or ayes; the direct conversion of solar radiation through photovoltaic

processes in semiconductor devices (solar cells); or by the combustion of fuels (15).

**employment, paid, employee:** Persons who during the reference period performed some work for wage or salary, in cash or in kind; persons who, having already worked in their present job, were temporarily not at work during the reference period and had a formal attachment to their job as evidenced by, for example, a continued receipt of wage/salary, an assurance of return to work following the end of the contingency, an agreement on the date of return following the short duration of absence from the job, and so on; persons who during the reference period performed some work for profit or family gain, in cash or in kind; persons with an enterprise, which may be a business enterprise, a farm or a service undertaking, who were temporarily not at work during the reference period for some specific reason (4).

**exchange rate:** Price in a given currency at which bills drawn in another currency may be bought (7).

For period average rates, the data are either the monthly average of market rates or of official rates of the reporting country, or, if those are not available, monthly average rates in New York, or, if those are not available, estimates derived on the basis of a simple average of the end-of-month market rates in the markets of the reporting country (5, Introduction, sect. 1).

**exports of goods:** Goods which subtract from the stock of material resources of a country by leaving its economic territory. In the general trade system, the definition of the statistical territory of a country coincides with its economic territory (12, paras. 14-66).

**exports unit value index, all goods:** Value at the level of a single, homogeneous good is equal to the price per unit of quantity multiplied by the number of quantity units. It is independent of the choice of quantity unit. The Laspeyres unit value index is the average transaction price of a unit (25, paras. 15.10 and 15.14). See also exports of goods and index number, Laspeyres.

**exports value, all goods:** Equivalent basis as imports value. See imports value, all goods.

**exports volume index, all goods:** An index based on quantity units of goods such as number or weight (12, chapter V; 25, chapter XV). See also index number, Laspeyres.

**external trade conversion factors:** Exchange rates used to convert trade data expressed in national currencies into a common currency such as United States dollars (24).

## F

**ferro-alloys:** CPC Vers. 1.1 (8), subclasses 41112-41115: ferro-manganese, ferro-chromium, ferro-nickel and other ferro-alloys.

**flight stage:** A flight stage is the operation of an aircraft from take-off to its next landing. Furthermore, a flight stage is classified as either international or domestic (2).

**flight stage, domestic:** A flight stage with both terminals within the domestic boundaries of a State by an air carrier whose principal place of business is in that State. Flight stages between a State and territories belonging to it, as well as any flight stages between two such territories, should be classified as domestic. This applies even though a stage may cross international waters or over the territory of another State (2).

**flight stage, international:** A flight stage with one or both terminals in the territory of a State, other than the State in which the air carrier has its principal place of business (2).

**FOB (Free on board):** The seller's obligation to deliver is fulfilled when the goods have passed over the ship's rail at the named port of shipment. This means that the buyer has to bear all costs and risks of loss of or damage to the goods from that point. This term can only be used for sea and inland waterway transport (12).

**floor area:** Floor area of buildings is the sum of the area of each floor of the building measured to the outer surface of the outer walls including the area of lobbies, cellars, elevator shafts and in multi-dwelling buildings all the communal spaces. Areas of balconies are excluded (24, p. 168).

**food production index:** Food production includes commodities that are considered edible and that contain nutrients. Accordingly, coffee and tea are excluded because they have practically no nutritive value (1, p. ix).

**freight loaded:** The weight of all goods (including packing) and livestock which, at the ports of the country in question, were either loaded into national or foreign sea-going vessels for unloading in another country, or unloaded from national or foreign sea-going vessels after having been load in another country, including goods into or from bonded warehouses (24, pp. 254-255).

**freight unloaded:** The weight of all goods (including packing) and livestock which, at the ports of the country in question, were either loaded into national or foreign sea-going vessels for unloading in another country, or unloaded from national or foreign sea-going vessels after having been load in another country, including goods into or from bonded warehouses (24, pp. 254-255).

**freight tonne-kilometres performed:** A freight tonne-kilometre is performed when a metric tonne of freight is carried one kilometre. Freight tonne-kilometres equal the sum of the products obtained by multiplying the number of tonnes of freight, and express and diplomatic bags carried on each flight stage by the stage distance. For ICAO statistical purposes, freight includes express and diplomatic bags but not passenger baggage (2).

**fuels:** Material for burning as fire or source of heat or power (7). CPC Vers. 1.1 (8), division 33: Coke oven products; refined petroleum products; nuclear fuel.

## H

**hard coal:** Coals with a gross calorific value (moist, ash-free basis) which is not less than 24 MJ/kg or which is less than 24 MJ/kg provided that the coal has a vitrinite mean random reflectance greater than or equal to 0.6 per cent. Hard coal comprises anthracite and bituminous coals and excludes lignite and sub-bituminous coals (15).

## I

**imported goods prices indices:** See imports of goods and producers/wholesale prices indices.

**imports of goods:** Goods which add to the stock of material resources of a country by entering its economic territory. Goods simply being transported through a country (goods in transit) or temporarily admitted (except for goods for inward processing) do not add to the stock of material resources of a country and are not included in the international merchandise trade statistics. In many cases, a country's economic territory largely coincides with its customs territory, which is the territory in which the customs law of a country applies in full (12, paras. 14 and 66).

**imports unit value index, all goods:** Value at the level of a single, homogeneous good or service is equal to the price per unit of quantity multiplied by the number of quantity units. It is independent of the choice of quantity unit. The Laspeyres unit value index is the average transaction price of a unit (25, paras. 15.10 and 15.14). See also imports of goods and index number, Laspeyres.

**imports value, all goods:** "The transaction value, that is the price actually paid or payable for the goods when sold for export to the country of importation . . . , provided: (a) that there are no restrictions as to the disposition or use of the goods by the buyer other than restrictions which: (i) are imposed or required by law or by the public authorities in the country of importation; (ii) limit the geographical area in which the goods may be resold; or (iii) do not substantially affect the value of the goods; (b) that the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued; (c) that no part of the proceeds of any subsequent resale, disposal or use of the goods by the buyer will accrue directly or indirectly to the seller, unless an appropriate adjustment can be made in accordance with the provisions of Article 8; and (d) that the buyer and seller are not related, or where the buyer and seller are related, that the transaction value is acceptable for customs purposes . . ." (12, annex C, based on World Trade Organization Agreement in Valuation).

**index of industrial production:** Laspeyres' s index number of total value-added in all industrial production, where value added is the value of output less the value of intermediate consumption (17).

**index number, Laspeyres:** A form of index number where prices, quantities or other units of measure over time are weighted according to their values in a specified base period (6).

**industrial production:** Output of industrial establishments, covering (a) Mining and quarrying (sect. B of ISIC, Rev.4); (b) Manufacturing (sect. C of ISIC, Rev.4); (c) Electricity, gas, steam and air-conditioning supply (sect. D of ISIC, Rev.4); (d) Water supply; sewerage, waste management and remediation activities (sect. E of ISIC, Rev.4) (16).

**industrial products:** Goods produced by resident institutional units in industries of mining, manufacturing and electricity, gas and water (25).

**infant deaths:** Infant deaths under one year of age (23, ID3). See also deaths rates, crude.

**intermediate goods:** Goods consumed as inputs by a process of production, excluding fixed assets (25, para. 6.213).

**iron ore:** CPC Vers. 1.1 (8), group 141: Iron ores and concentrates, other than roasted iron pyrites.

## L

**livestock:** All domestic animals irrespective of their age and the place or purpose of their breeding.

## M

**manufacturing:** Comprises tabulation category D and divisions 15-37 in the International Standard Industrial Classification of All Economic Activities, Revision 3. It is defined as the physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand, whether it is done in a factory or in the worker's home, and whether the products

are sold at wholesale or retail. Included are assembly of component parts of manufactured products and recycling of waste materials (19).

**mining and quarrying:** Extraction, dressing and beneficiating of minerals occurring naturally: Solids, such as coal and ores; liquids, such as crude petroleum; and gases, such as natural gas. Mining includes underground and surface mines, quarries and wells and all supplemental activities for dressing and beneficiating ores and other crude materials, such as crushing, screening, washing, cleaning, grading, milling, flotation, melting, pelleting, topping and other preparations needed to render the material marketable (20, p.27).

**money, quasi-money:** Money comprises transferable demand deposits of monetary authorities and deposit money banks ("M1"), other than those of the central government, and currency outside banks plus, where applicable, private sector demand deposits with the postal checking system and with the Treasury. Quasi-money comprises time, savings, and foreign currency deposits of resident sectors other than central government. Money plus quasi-money is frequently called "M2" (5, Introduction, sect. 4). See also reserve money.

**motor vehicles:** CPC Vers. 1.1 (8), subclass 49113: Motor cars and other vehicles principally designed for the transport of persons (except public-transport type vehicles specially designed for travelling on snow, and golf cars and similar vehicles).

**motor vehicles, new, registration:** Registrations of new passenger cars and commercial motor vehicles put into circulation for the first time (24, p. 253).

## N

**natural gas:** A mixture of gaseous hydrocarbons, primarily methane, but generally also including ethane, propane and higher hydrocarbons in much smaller amounts and some non-combustible gases such as nitrogen and carbon dioxide. The majority of natural gas is separated from both "non-associated" gas originating from fields producing hydrocarbons only in gaseous form, and "associated" gas produced in association with crude oil. The separation process produces natural gas by removing or reducing the hydrocarbons other than methane to levels which are acceptable in the marketable gas. The natural gas liquids (NGL) removed in the process are distributed separately. Natural gas also includes methane recovered from coal mines (colliery gas) or from coal seams (coal seam gas) and shale gas. When distributed it may also contain methane from anaerobic fermentation or the methanation of biomass. Natural gas may be liquefied (LNG) by reducing its temperature in order to simplify storage and transportation when production sites are remote from centres of consumption and pipeline transportation is not economically practicable. (15).

**newsprint:** Bleached, unsized or slack-sized printing paper, without coating, of the type usually used for newspaper; weight from 45-60 grams per square metre, usually with at least 70 per cent of the weight of fibrous material derived from mechanical pulp (24, p. 140). CPC Vers. 1.1 (8), subclass 32121: Newsprint.

**non-residential building:** A building where half or more of the floor area is intended for other than dwelling purposes (24, p. 168).

## P

**passenger-kilometres performed:** A passenger-kilometre is performed when a passenger is carried one kilometre. Passenger-kilometres equal the sum of the products obtained by multiplying the number of revenue passengers carried on each flight stage by the stage distance. The

resultant figure is equal to the number of kilometres travelled by all passengers (2).

**pig iron including foundry:** Various mineral aggregates from which iron metal is obtained by the conversion of various iron ores by reduction either into pig iron, in blast furnaces or electric furnaces, or into a spongy form (sponge iron) or into lumps by various direct reduction processes. Iron ore is measured by the weight of the ore and may contain varying concentrations of metal. CPC Vers. 1.1 (8), group 411: Basic iron and steel.

**population, estimate of total:** The total population of a country may comprise either all usual residents of the country (de jure population) or all persons present in the country (de facto population) at the time of the census. For purposes of international comparisons, the de facto definition is recommended (21).

**population, official mid-year estimates:** Estimates of the de facto population on 1 July provided by national statistical offices (11, notes to table 3).

**producer price indices:** The amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any value-added tax, or similar deductible tax, invoiced to the purchaser. It includes any transport charges invoiced separately by the producer (25, para. 6.51). In principle, the PPI should include service industries, but in practice it is limited to the domestic agricultural and industrial sectors. The prices should be farm-gate prices for the agricultural sector and ex-factory for the industrial sector. The indices are computed using the Laspeyres formula, unless otherwise indicated in the country notes. Subindices are occasionally included for the PPI (5, p. XVI). See also index number, Laspeyres.

## R

**raw materials:** Unprocessed food and beverages, industrial supplies, fuels and lubricants, mainly for industry (9, p. 2).

**reserve money:** Currency in circulation, deposits of the deposit money banks, and deposits of other residents, apart from the central government, with the monetary authorities. Monetary authorities' data of IMF generally consolidate the accounts of the central bank with the accounts arising from monetary functions undertaken by other institutions (5, Introduction, sect. 4).

**reserve position in IMF:** A member's reserve tranche position and creditor position under the various borrowing arrangements. A member's reserve position in the Fund has the characteristics of a reserve asset. A reserve tranche position in the Fund arises from (a) the payment of part of a member's subscription in reserve assets and (b) the Fund's net use of the member's currency. Normally a member's reserve tranche position is equal to its quota less the adjusted Fund holdings of its currency, less subscriptions receivable, less balances held in the administrative accounts of the Fund to the extent they are not in excess of 0.1 percent of a member's quota, if positive (5).

**reserves, total international:** External assets that are readily available to and controlled by the authorities for direct financing of payments imbalances and for indirect regulation of the magnitude of such imbalances. Includes monetary authorities' holdings of SDRs, reserve position in the Fund, foreign exchange, financial derivatives, and gold valued at market prices (5, Introduction, sect. 3).

**residential building:** A building where more than half of the floor area of the building is intended for dwelling purposes (24).

## S

**scheduled revenue flights:** Flights scheduled and performed for remuneration according to a published timetable, or so regular or frequent as to constitute a recognizably systematic series, which are open to direct booking by members of the public; and extra section flights occasioned by overflow traffic from scheduled flights (2).

**special drawing rights (SDRs):** International reserve assets created by the International Monetary Fund and allocated to its members to supplement existing reserve assets. They represent each holder's assured and unconditional right to obtain other reserve assets, especially foreign exchange (25, para. 11.47). The SDR is the unit of account for the Fund. The value of the SDR is determined daily by IMF on the basis of a basket of currencies with each currency assigned a weight in the determination of that value. In the derivation of the SDR value, the currencies of the basket are valued at their market exchange rates for the US dollar, and the US dollar equivalents of each of the currencies are summed to yield the rate of the SDR in terms of the US dollar. As of January 1, 2001, the SDR valuation basket weights are the sum of the values of the amount of each currency in the following amounts: US dollar, 45 per cent; euro, 29 per cent; Japanese yen, 15 per cent, and pound sterling, 11 percent (5, Introduction, sect. 1).

**steel, crude:** CPC Vers. 1.1 (8), class 4112 (part): ingots and other primary forms of iron or non-alloy steel, and of stainless steel or other alloy steel.

2. Persons absent from work, on leave, or on layoff with weak job attachment who were seeking paid work during the specified recent period, persons seeking apprenticeships, and students seeking full-time paid work during the vacation period or part-time paid work during the school period should be included among persons seeking paid employment on the same basis as other persons seeking paid employment.

Persons seeking self-employment (restricted sense) comprise all persons who were without work during the reference period and who, in a specified recent period such as the previous month, were seeking self-employment or had taken concrete steps to establish their own

enterprise. Persons in unemployment, according to the extended definition, comprise all persons of either sex above a specified age who, during the specified reference period, were "available for paid employment" or "available for self-employment" as defined below.

1. "Persons available for paid employment" (extended sense) comprise all persons in the following categories: (a) all persons seeking paid employment according to the restricted definition; (b) persons without work who were currently available for paid work but who were not seeking paid work during the specified recent period for one or more of the following reasons: belief that suitable paid work was not available, lack of knowledge about where to find paid work, awaiting recall to work, awaiting results of previous applications, awaiting the agriculture season, or other specified reasons.

2. Persons absent from work, on leave or on layoff with weak job attachment who were not seeking paid work during the specified recent period should be included among persons available for paid employment according to the extended definition if currently available for paid work. Persons available for self-employment (extended sense) comprise all persons in the following categories: (a) all persons seeking self-employment according to the restricted definition; (b) persons with their own individual or household enterprise who did not perform any work during the reference period for reasons such as lack of instruments to work with, lack of funds, awaiting the agriculture season, etc. (4).

**unit value index:** Value at the level of a single, homogeneous good or service is equal to the price per unit of quantity multiplied by the number of quantity units. It is independent of the choice of quantity unit. The Laspeyres unit value index is the average transaction price of a unit (25, paras. 15.10 and 15.14).

## W

**wages, earnings:** Wage rates should include basic wages, cost-of-living allowances and other guaranteed and regularly paid allowances, but exclude overtime payments, bonuses and gratuities, family allowances and other social security payments made by employers. Statistics of earnings should relate to employees' gross remuneration, i.e. the total before any deductions are made by the employer in respect of taxes, contributions of employees to social security and pension schemes, life insurance premiums, union dues and other obligations of employees. The different types of wages statistics are per hour, per day, per week, per month. Earnings relates to remuneration in cash and in kind paid to employees, as a rule at regular intervals, for time worked or work done together with remuneration for time not worked, such as for annual vacation, other paid leave or holidays. The current statistics programme to meet short-term needs should cover: (a) statistics of average earnings and hours of work (including, if possible, hours actually worked) and (b) statistics of time rates of wages and normal hours of work. The non-current statistics programme to provide benchmark data as well as other detailed data to meet long-term and continuing needs should include: (a) statistics of wage structure and distribution and (b) statistics of labour cost (4).

1. Les “personnes disponibles pour un emploi salarié” (au sens large) comprennent toutes les personnes entrant dans les catégories suivantes : a) toutes les personnes cherchant un emploi rémunéré selon la définition étroite; b) les personnes sans travail, disponibles pour prendre un travail rémunéré, mais qui n’avaient pas cherché de travail rémunéré au cours de la période récente spécifiée, pour une ou plusieurs raisons : elles pensaient qu’il n’était pas offert de travail rémunéré qui leur convienne, elles ne savaient pas où chercher du travail rémunéré, elles attendaient le résultat des candidatures qu’elles avaient déposées, elles attendaient d’être rappelées au travail, elles attendaient le début de la campagne agricole, ou encore pour d’autres raisons spécifiées.

**coût, assurance et fret (CAF)** : Le vendeur doit payer les frais et le fret nécessaires pour acheminer la marchandise au port de destination désigné, mais le risque de perte ou de dommage que peut courir la marchandise, comme le risque de frais supplémentaires né d’événements intervenant après que la marchandise a été livrée à bord du navire, est transféré du vendeur à l’acheteur quand la marchandise passe le bastingage du navire au port d’embarquement. Le vendeur doit en outre fournir une assurance maritime contre le risque, pour l’acheteur, de perte ou de dommage que peut courir la marchandise au cours du transport. Le vendeur contracte l’assurance et paie la prime d’assurance. L’acheteur notera que selon ce terme, le vendeur n’est tenu de souscrire l’assurance que pour une couverture minimum. Le terme CAF exige du vendeur qu’il dédouane la marchandise à l’exportation. Ce terme ne peut être utilisé que pour le transport par mer et par voies navigables intérieures (12).

## D

**décès d’enfants de moins d’un an** : Mort infantile (23, ID3). Voir également taux brut de mortalité.

**droits de tirage spéciaux (DTS)** : Les DTS sont des avoirs de réserve internationaux créés par le FMI et alloués à ses pays membres pour compléter les réserves dont ils disposent. Ils confèrent à chaque détenteur un droit garanti et inconditionnel d’obtenir d’autres avoirs de réserve, tout particulièrement des devises (25, par. 11.47). Le DTS est

l’unité de compte du FMI. Sa valeur est déterminée chaque jour par le Fonds sur la base d’un panier de monnaies, chacune d’elles étant affectée d’un coefficient pour ce calcul. Lors de l’établissement de la valeur du DTS, les monnaies du panier sont évaluées à leur taux du marché par rapport au dollar É.-U., et les équivalents en dollars É.-U. de chacune des monnaies sont additionnés de manière à obtenir la valeur du DTS en dollars É.-U. Depuis le 1er janvier 2001, les coefficients de pondération affectés aux monnaies du panier servant au calcul de la valeur du DTS sont les suivants : dollar É.-U. 45 %; euro 29 %; yen 15 %; livre sterling 11 % (5, Introduction, sect. 1).

## E

L’électricité peut être générée par des processus différents tel que : la conversion de l’énergie contenue dans les chutes et cours d’eau, le vent ou les vagues ; la conversion directe du rayonnement solaire à travers des processus photovoltaïques dans des dispositifs à semi-conducteurs (cellules) ; ou la combustion de combustibles (15).

**estimation de la population totale** : La population totale d’un pays se compose soit de toutes les personnes résidant habituellement dans le pays (population de droit), soit de l’ensemble des personnes présentes dans le pays au moment du recensement (population de fait). Aux fins de comparaisons internationales, il est recommandé de se servir de la définition correspondant à la population de fait (21).

**étape intérieure** : Les étapes intérieures comprennent toutes les étapes parcourues entre des points situés dans les limites des frontières d’un État, par un transporteur aérien ayant son principal établissement dans cet État. Les étapes parcourues entre un État et les territoires qui lui appartiennent, de même que toute étape parcourue entre deux de ces territoires, doivent être classées comme intérieures, même si elles traversent l’espace situé au-dessus des eaux internationales ou du territoire d’un autre État (2).

Voir Salaires, traitements.

**gaz naturel** : Mélange d'hydrocarbures gazeux, principalement du méthane, mais inclut généralement aussi en quantité plus faible de l'éthane, du propane et des hydrocarbures supérieurs, ainsi que des gaz non combustibles tel que l'azote et le dioxyde de carbone. La majorité du gaz naturel est dérivé à la fois de gaz "non associé" provenant de gisements qui produisent uniquement des hydrocarbures gazeux, et de gaz "associé" produit en même temps que le pétrole brut. Le processus de séparation produit du gaz naturel en enlevant ou en réduisant les hydrocarbures autres que le méthane à des niveaux acceptables pour du gaz commercialisable. Les liquides de gaz naturel (LGN) enlevés durant le processus sont distribués séparément. Le gaz naturel comprend également le méthane récupéré dans les mines de charbon (grisou) ou dans les veines de charbon (méthane de houille) et de gaz de schiste. Une fois distribué, il peut aussi contenir du méthane provenant de fermentation anaérobie ou de la méthanisation de la biomasse. Le gaz naturel peut être liquéfié (LGN) en réduisant sa température dans le but de simplifier le stockage et le transport lorsque les sites de production sont éloignés des centres de consommation et le transport par pipeline n'est économiquement pas viable (15).

La houille comprend les charbons anthraciteux et bitumineux et exclus le lignite et les charbons sous-bitumineux (15).

## I

**immatriculations de véhicules automobiles neufs** : Immatriculations de véhicules automobiles neufs à usage privé et commercial mis en circulation pour la première fois (24, p. 253).

**indice de la production agricole** : L'indice de la production agricole est fondé sur la somme des quantités (pondérées par les prix) des différents produits agricoles, après déduction des quantités utilisées comme semences ou aliments pour animaux (pondérées de la même façon). La formule utilisée pour le calcul de tous les indices, aux niveaux national, régional ou mondial, est celle de Laspeyres. La production de chaque produit est pondérée par la moyenne des cours internationaux du produit pendant la période de base et les quantités produites chaque année sont additionnées. Pour obtenir l'indice, on divise la production

totale pour une année donnée par la production moyenne de la période de base. Les produits pris en compte dans le calcul de l'indice de la production agricole sont l'ensemble des produits de l'agriculture et de l'élevage de chaque pays. La quasi-totalité des produits est prise en compte, la principale exception étant les aliments pour animaux (1, 1995, p. ix).

**indice de la production industrielle** : L'indice de Laspeyres de la valeur ajoutée totale de la production industrielle est calculé en soustrayant la valeur de la consommation intermédiaire de la valeur de la production (17).

**indice de la production vivrière** : Entrent dans la production vivrière tous les produits jugés comestibles, qui contiennent des nutriments. Le café et le thé en sont donc exclus, n'ayant pratiquement pas de valeur nutritive (1, p. ix).

**indice de Laspeyres** : Forme d'indice établi en affectant aux prix, quantités ou autres unités de mesure un coefficient de pondération calculé sur la période de référence (6).

**indice de la valeur unitaire** : La valeur des biens ou services homogènes est égale à leur prix par unité de quantité multiplié par le nombre de ces unités. Elle est indépendante du choix de l'unité de quantité. L'indice de Laspeyres de la valeur unitaire est le prix de transaction moyen d'une unité (25, par. 15.10 et 15.14).

**indice de la valeur unitaire à l'importation (ensemble des marchandises)** : La valeur des biens ou des services homogènes est égale à leur prix par unité de quantité multiplié par le nombre de ces unités. La valeur est indépendante de l'unité de quantité choisie. L'indice de la valeur unitaire de Laspeyres correspond au prix de vente effectif moyen par unité. (25, par. 15.10 et 15.14). Voir également produits d'importation et indice de Laspeyres.

**indice de la valeur unitaire à l'exportation (ensemble des marchandises)** : La valeur des biens homogènes est égale à leur prix par unité de quantité multiplié par le nombre de ces unités. La valeur est indépendante de l'unité de quantité choisie. L'indice de la valeur unitaire de Laspeyres correspond au prix de vente effectif moyen par unité (25, par. 15.10 et 15.14). Voir également produits d'exportation et indice de Laspeyres.

**indice des prix à la consommation (ensemble des marchandises)** : Mesure des variations au cours du temps du niveau général des prix des biens et services acquis, utilisés ou payés par la population de référence pour sa consommation. Cet indice est estimé à partir d'une suite de mesures synthétiques des variations relatives, d'une période à l'autre, des prix d'un ensemble fixe de biens et de services de consommation constants en quantité et par leurs caractéristiques, acquis, utilisés ou payés par la population de référence. Chaque mesure synthétique est obtenue comme une moyenne pondérée d'un grand nombre d'indices de prix d'agrégats élémentaires. L'indice de chaque agrégat élémentaire est estimé au moyen d'un échantillon de prix pour un ensemble fixe de biens et de services que se procurent les individus de la population de référence dans une région donnée, ou qui habitent cette région, auprès d'un ensemble spécifié de points de vente ou auprès d'autres fournisseurs de biens et de services de consommation (4, chap. 7). Voir également indice de Laspeyres.

**indice des prix à la consommation (produits alimentaires)** : Mesure des variations au cours du temps du niveau général des prix des produits alimentaires acquis, utilisés ou payés par la population de référence pour sa consommation (4, chap. 7). Voir également indice de Laspeyres.

**indices des prix à la production** : Montant que le producteur reçoit de l'acheteur pour une unité de bien ou de service produite, diminuée de toute taxe sur la valeur ajoutée, ou de tout impôt déductible similaire, facturée à l'acquéreur. Il exclut tout frais de transport facturés séparément par le producteur (25, par. 6.51). En principe, l'IPP devrait inclure les services, mais en pratique il ne recouvre que l'agriculture et l'industrie. L'indice doit être établi à partir des prix sortis d'exploitation pour le secteur agricole et des prix départ-usine pour le secteur industriel. Les indices sont établis à partir de la formule de Laspeyres, sauf indication contraire dans les notes concernant chaque pays. On fait parfois figurer à cette section des sous-indices se rapportant à l'IPP (5, p. XVI). Voir également indice de Laspeyres.

**indices des prix des biens importés** : Voir produits d'importation, indices des prix à la production et des prix de gros.

**indice du volume des importations (ensemble des marchandises)** : Indice fondé sur des unités de quantité des biens, telles que le nombre ou le poids (12, chap. V; 25, chap. XV). Voir également indice de Laspeyres.

**indice du volume des exportations (ensemble des marchandises)** : Indice fondé sur des unités de quantité des biens, telles que le nombre ou le poids (12, chap. V; 25, chap. XV). Voir également indice de Laspeyres.

**industries extractives** : Extraction, préparation et enrichissement des minéraux que l'on rencontre dans la nature à l'état solide (charbon et minerais par ex.), à l'état liquide (pétrole brut par ex.), ou gazeux (gaz naturel par ex.). On comprend dans les industries extractives les mines souterraines et à ciel ouvert, les carrières et les puits, ainsi que toutes les activités complémentaires nécessaires pour le traitement et l'enrichissement de minerais et autres minéraux bruts, telles que le concassage, le criblage, le débouillage, l'égrappage, le triage, le broyage, la flottation, la fusion, le bouletage, l'étêtage et autres opérations propres à rendre les produits commercialisables (20, p. 27).

**industries manufacturières** : Activités recensées à la catégorie de classement D et aux divisions 15 à 37 de la Classification internationale type, par industrie, de toutes les branches d'activité économique (troisième révision). Les industries manufacturières ont pour objet la transformation physique ou chimique de matériaux et composants en de nouveaux produits, que l'activité de transformation soit effectuée par des machines automatiques ou manuellement, qu'elle ait lieu dans une usine ou au domicile du travailleur, que les produits résultants soient vendus en gros ou au détail. Les activités manufacturières recouvrent également l'assemblage des composants constituant les produits manufacturés et les activités de recyclage (19).

## L

**logement** : Local d'habitation distinct et indépendant qui est destiné à être occupé par un ménage ou qui est occupé par un ménage au moment du recensement sans y avoir été destiné à l'origine. Il faut entendre une pièce ou un ensemble de pièces et leurs annexes dans un immeuble permanent ou une partie distincte du point de vue structural dudit immeuble, qui, étant donné la manière dont il a été construit, reconstruit ou transformé, est destiné à servir d'habitation à un ménage et n'est pas entièrement utilisé à d'autres fins. Un tel logement doit avoir une entrée indépendante d'où l'on ait accès (soit directement, soit par un jardin ou un terrain) à une rue ou un passage commun dans le bâtiment (escalier, couloir, vestibule, etc.) (22, par. 2.331 à 2.333).

## M

**marchandises débarquées** : Poids de l'ensemble des marchandises (y compris l'emballage) et du bétail, qui ont été soit chargés, dans les ports du pays concerné, à bord de navires nationaux ou étrangers aux fins d'être débarqués dans un autre pays, soit débarqués de navires nationaux ou étrangers après avoir été embarqués dans un autre pays. Le fret débarqué comprend aussi les marchandises entrant dans les entrepôts de douane ou en sortant (24, p. 254 et 255).

**marchandises embarquées** : Poids de l'ensemble des marchandises (y compris l'emballage) et du bétail, qui ont été soit chargés, dans les ports du pays concerné, à bord de navires nationaux ou étrangers aux fins d'être débarqués dans un autre pays, soit débarqués de navires nationaux ou étrangers après avoir été embarqués dans un autre pays. Le fret embarqué comprend aussi les marchandises entrant dans les entrepôts de douane ou en sortant (24, p. 254 et 255).

**matières premières** : Produits alimentaires et boissons, approvisionnements industriels, combustibles et lubrifiants n'ayant pas subi de transformation et essentiellement destinés à l'industrie (9, p. 2).

**minerais de fer** : CPC version 1.1 (8), groupe 141 : minerais de fer et leurs concentrés, autres que les pyrites de fer grillées.

**monnaie, quasi-monnaie** : La monnaie au sens étroit comprend les dépôts à vue transférables des autorités monétaires et les dépôts des banques créatrices de monnaie (M1), autres que ceux de l'administration centrale, ainsi que la circulation fiduciaire hors banques créatrices de monnaie, et, le cas échéant, les dépôts à vue du secteur privé auprès du système postal et du Trésor. La quasi-monnaie comprend les dépôts à terme, d'épargne et en devises des secteurs résidents autres que l'administration centrale. La somme monnaie + quasi-monnaie est souvent désignée par l'abréviation M2 (5, Introduction, sect. 4). Voir Base monétaire.

## O

**offre intérieure** : Voir indice des prix à la production et des prix de gros.

## P

**papier journal** : Papier écri non collé ou très légèrement collé, non enduit, du type utilisé pour l'impression des journaux, d'un poids au mètre carré compris entre 45 à 60 grammes et dont 70 % au moins en poids de la composition fibreuse totale sont constitués par des fibres de bois obtenues par un procédé mécanique (24, p. 140). CPC version 1.1 (8), sous-classe : papier journal.

**passagers-kilomètres réalisés** : Un passager-kilomètre est réalisé lorsqu'un passager est transporté sur un kilomètre. Le nombre de passagers-kilomètres est égal à la somme des produits obtenus en multipliant le nombre des passagers payants transportés sur chaque étape par la longueur de l'étape. Le chiffre obtenu est égal au nombre de kilomètres parcourus par tous les passagers (2).

**période de base** : La période de base est la période où ont été collectées les données utilisées comme base pour un indice ou un autre ratio. Elle est souvent d'une année, mais peut être d'une journée, ou à l'inverse la moyenne d'un groupe d'années (6).

**personnes pourvues d'un emploi rémunéré** : Ce sont : les personnes qui durant la période de référence ont effectué un travail moyennant un salaire ou un traitement en espèces ou en nature; les personnes qui, ayant déjà travaillé dans leur emploi actuel, en étaient temporairement absentes durant la période de référence et avaient un lien formel avec leur emploi, tel le service ininterrompu du salaire ou du traitement, une

assurance de retour au travail à la fin de la situation d'exception ou un accord sur la date du retour après la courte période d'absence, etc.; les personnes qui durant la période de référence ont effectué un travail en vue d'un bénéfice ou d'un gain familial, en espèces ou en nature; les personnes qui, durant la période de référence, avaient une entreprise qui peut être une entreprise industrielle, un commerce, une exploitation agricole ou une entreprise de prestation de services, mais n'étaient temporairement pas au travail pour toute raison spécifique (4).

**pétrole brut** : (pétrole brut strictement conventionnel) huile minérale d'origine fossile extraite de réservoirs souterrains avec des moyens conventionnels, qui comprend les hydrocarbures à l'état liquide ou quasi liquide et les impuretés associées comme du sulfure ou des métaux. Cette catégorie exclut les liquides de gaz naturel (15).

**pneumatiques (véhicules à moteur)** : Pneumatiques ou bandages pleins en caoutchouc servant à enrober les roues des véhicules (19, sect. 2511). CPC version 1.1 (8), groupe 361 : pneumatiques et chambres à air.

**population, estimation en milieu d'année** : L'estimation de la population en milieu d'année, qui vise la population de fait au 1<sup>er</sup> juillet, est celle que fournissent les bureaux nationaux de statistique (11, notes du tableau 3).

**position de réserve au FMI** : Position dans la tranche de réserve et position créditrice d'un membre au titre des différents accords d'emprunt. La position de réserve d'un membre au FMI a les caractéristiques d'avoirs de réserve. La position d'un membre dans la tranche de réserve au Fonds est déterminée a) par le paiement d'une partie de sa quote-part en avoirs de réserve, et b) par l'utilisation nette faite par le Fonds de la monnaie de ce membre. La position d'un membre dans la tranche de réserve est normalement égale à sa quote-part moins les avoirs ajustés du Fonds dans sa monnaie, moins les quotes-parts à recevoir, moins les soldes détenus dans les comptes administratifs du Fonds sous réserve qu'ils ne dépassent pas, s'ils sont positifs, 0,1 % de la quote-part de ce membre (5).

**production industrielle** : Production des entreprises qui couvrent (a) les industries extractives (section B de CITI Rév. 4) ; (b) l'industrie manufacturière (section C de CITI Rév. 4) ; (c) la production et de la distribution d'électricité, de gaz, de vapeur et d'air conditionné (section D de CITI Rév. 4) ; (d) production et de distribution d'eau, d'assainissement, de gestion des déchets et de dépollution (section E de CITI Rév. 4) (16).

**production intérieure** : Biens et services créés par l'activité productive des unités institutionnelles résidentes (25, par. 6.84).

**produits agricoles** : CPC version 1.1 (8), divisions 1 et 2 : céréales, légumes, fruits, même à coques, huiles et fruits oléagineux, plantes vivantes, fleurs et boutons de fleurs coupées, graines de plantes cultivées principalement pour leurs fleurs ou leurs fruits, graines de légumes, épices et cultures pour boissons, tabacs bruts ou non fabriqués, betteraves à sucre et cannes à sucre, matières premières végétales non classées ailleurs, animaux vivants et produits du règne animal.

**produits d'exportation** : Biens dont la sortie du territoire économique fait diminuer le stock des ressources matérielles. Dans le système du commerce général, le territoire statistique d'un pays coïncide avec son territoire économique (12, par. 14 à 66).

**produits d'importation** : Biens dont l'entrée sur le territoire économique fait augmenter le stock des ressources matérielles du territoire économique du pays considéré. Les biens simplement transportés à

travers le pays (biens en transit) ou admis ou expédiés temporairement (à l'exception des biens destinés au perfectionnement actif) ne font pas augmenter le stock des ressources matérielles d'un pays et ne sont donc pas à inclure dans les statistiques du commerce international. Dans de nombreux cas, le territoire économique d'un pays coïncide pratiquement avec son territoire douanier, c'est-à-dire le territoire sur lequel la législation douanière s'applique de plein droit (12, par. 14 et 66).

**produits industriels** : Biens produits par les unités institutionnelles résidentes dans les industries extractives, les industries de transformation et dans les secteurs de l'électricité, du gaz et de l'eau (25).

## S

**salaires, traitements** : Les taux de salaires doivent comprendre le salaire de base, les allocations de vie chère et les autres allocations garanties et versées régulièrement, mais ne doivent pas comprendre les heures supplémentaires, les primes et gratifications, les allocations familiales et les autres versements de sécurité sociale effectués par les employeurs. Les statistiques relatives aux salaires doivent porter sur les salaires bruts, c'est-à-dire sur le total avant déduction éventuelle par l'employeur des impôts et des cotisations de sécurité sociale et de retraite à la charge des travailleurs, des cotisations d'assurance-vie, des cotisations syndicales et autres prélèvements à la charge des travailleurs. Les statistiques de salaires peuvent porter sur le salaire horaire, journalier, hebdomadaire ou mensuel. Les salaires correspondent à la rémunération en espèces et en nature versée aux salariés, généralement à intervalles réguliers, pour les heures de travail ou le travail accompli, ainsi que pour les heures non ouvrées (congé annuel, et autres congés ou jours fériés payés). Le programme de statistiques courantes répondant aux besoins à court terme devrait porter sur les éléments suivants : a) statistiques du salaire et des horaires de travail moyens (y compris, si possible, des heures effectivement ouvrées); b) statistiques des taux de salaires au temps et des heures normales de travail. Le programme de statistiques autres que courantes livrant des données de base et d'autres données détaillées répondant aux besoins à plus long terme et aux besoins permanents devrait porter sur les éléments suivants : a) statistiques de la structure et de la distribution des salaires; b) statistiques du coût de la main-d'oeuvre (4).

**surface de plancher** : Somme de la superficie de tous les planchers d'un immeuble délimités par le bord externe des parois externes et comprenant la surface des entrées, des caves, des cages d'ascenseur et, dans les immeubles comportant plusieurs logements, toutes les parties communes. La surface des balcons n'est pas comptée (24, p. 168).

## T

**taux brut de mortalité** : Il s'agit généralement d'un taux annuel, qui est le quotient du nombre annuel des décès observés dans une population au cours d'une année civile, divisé par l'effectif exposé au risque de décès pendant la même période, soit l'effectif moyen de cette population (21, par. 401). Le Décès est la Disparition permanente de tout signe de vie à un moment quelconque postérieur à la naissance vivante (cessation des fonctions vitales après la naissance sans possibilité de réanimation). Cette définition ne comprend donc pas les morts foetales (23, par. 46, (2)).

**taux brut de natalité** : Le taux brut de natalité, généralement exprimé en taux pour mille, est obtenu en divisant le nombre des naissances dans

une population par le nombre d'années-homme vécue par la population au cours de la même période, dont l'approximation généralement utilisée est l'effectif de la population au point médian de la période multiplié par le nombre d'années de la période (21). Naissance vivante est l'expulsion ou extraction complète du corps de la mère, indépendamment de la durée de la gestation, d'un produit de la conception qui, après cette séparation, respire ou manifeste tout autre signe de vie, tel que battement de cœur, pulsation du cordon ombilical ou contraction effective d'un muscle soumis à l'action de la volonté, que le cordon ombilical ait été coupé ou non et que le placenta soit demeuré ou non attaché (26, définition 3.1).

**taux de change** : Le taux de change est le prix, dans une monnaie donnée, auquel peuvent être achetés des billets dans une autre monnaie (7). Pour les taux moyens d'une période, les données sont soit la moyenne mensuelle des taux du marché ou des taux officiels du pays qui communique les données, ou, à défaut, la moyenne mensuelle des taux cotés à New York; à défaut de ces taux, on se sert d'estimations basées sur les moyennes simples des taux de fin de mois cotés par le pays qui communique les données (5, Introduction, sect. 1).

**tissus de coton** : CPC version 1.1 (8), groupe 266 : tissus (à l'exclusion des tissus spéciaux) contenant du coton.

**tonnes-kilomètres de fret réalisées** : Une tonne-kilomètre de fret est réalisée lorsqu'une tonne métrique de fret est transportée sur une distance de 1 kilomètre. Le nombre de tonnes-kilomètre de fret réalisées est égal à la somme des produits obtenus en multipliant le nombre de tonnes de fret, messageries et valise diplomatique comprises, transportées sur chaque étape du vol par la longueur de l'étape. Aux fins des statistiques de l'OACI, le fret comprend les messageries et la valise diplomatique, mais non les bagages des passagers (2).

**total des réserves internationales** : Ensemble des avoirs extérieurs contrôlés par les autorités et dont elles disposent pour financer directement les déséquilibres de paiements et pour réguler indirectement l'ampleur de ces déséquilibres. Elles comprennent les avoirs des autorités monétaires en DTS, leur position de réserve au FMI, les avoirs en devises, les instruments financiers dérivés, et l'or au prix du marché (5, Introduction, sect. 3).

**trafic de l'aviation civile** : Trafic payant sur des vols réguliers, suivant un horaire publié, et sur des vols supplémentaires motivés par la surcharge des vols réguliers (3).

## V

**valeur d'exportation (ensemble des marchandises)** : Base semblable à celle de la valeur d'importation. Voir valeur d'importation.

**valeur d'importation (ensemble des marchandises)** : "Valeur transactionnelle, c'est-à-dire le prix effectivement payé ou à payer pour les marchandises lorsqu'elles sont vendues pour l'exportation à destination du pays d'importation [...], pour autant : (a) Qu'il n'existe pas de restrictions concernant la cession ou l'utilisation des marchandises par l'acheteur, autres que les restrictions qui : (i) Sont imposées ou exigées par la loi ou par les autorités publiques du pays d'importation; (ii) Limitent la zone géographique dans laquelle les marchandises peuvent être revendues; ou (iii) N'affectent pas substantiellement la valeur des marchandises; (b) Que la vente ou le prix n'est pas subordonné à des conditions ou à des prestations dont la valeur n'est pas déterminable pour ce qui se rapporte aux marchandises à évaluer; (c) Qu'aucune partie du produit de toute revente, cession ou

utilisation ultérieure des marchandises par l'acheteur ne revient directement ou indirectement au vendeur, sauf si un ajustement approprié peut être opéré en vertu des dispositions de l'article 8; et (d) Que l'acheteur et le vendeur ne sont pas liés ou, s'ils le sont, que la valeur transactionnelle est acceptable à des fins douanières [...]" (12, annexe C, d'après l'Accord de l'Organisation mondiale du commerce relatif à l'évaluation).

**véhicules automobiles** : CPC version 1.1 (8), sous-classe 49113 : voitures de tourisme et autres véhicules principalement conçus pour le transport des personnes (autres que les véhicules automobiles pour le transport en commun des personnes, les véhicules spécialement conçus pour se déplacer sur la neige et les véhicules spéciaux pour le transport des personnes sur les terrains de golf et véhicules similaires).

**vols payants réguliers** : Vols prévus et réalisés contre rémunération suivant un horaire publié, ou dont la régularité ou la fréquence sont propres à constituer des séries systématiques évidentes, et qui sont ouverts à la réservation directe de la part du public, ainsi que les vols supplémentaires nécessités par un excédent de trafic sur les vols réguliers (2).
