1 Languages

1.1 General remarks

In Austria German is the only nation-wide official language. Minority languages play a very subordinate role and are of regional and local importance only.

1.2 National language

1.2.1 General remarks

The national language is German in its standard form written in the Roman script. The so-called "German script", historically a graphic variant of the Roman script, is seldom used now. It never occurs in modern maps and official gazetteers so that it can be disregarded here.

1.2.2 The German alphabet

<i>A</i>	<i>a</i>	<i>H</i>	<i>h</i>	<i>O</i>	<i>o</i>	<i>V</i>	<i>v</i>
<i>B</i>	<i>b</i>	<i>I</i>	<i>i</i>	<i>P</i>	<i>p</i>	<i>W</i>	<i>w</i>
<i>C</i>	<i>c</i>	<i>J</i>	<i>j</i>	<i>Q</i>	<i>q</i>	<i>X</i>	<i>x</i>
<i>D</i>	<i>d</i>	<i>K</i>	<i>k</i>	<i>R</i>	<i>r</i>	<i>Y</i>	<i>y</i>
<i>E</i>	<i>e</i>	<i>L</i>	<i>l</i>	<i>S</i>	<i>s</i>	<i>Z</i>	<i>z</i>
<i>F</i>	<i>f</i>	<i>M</i>	<i>m</i>	<i>T</i>	<i>t</i>		
<i>G</i>	<i>g</i>	<i>N</i>	<i>n</i>	<i>U</i>	<i>u</i>		

In addition to the normal alphabetical sequence there exist the so-called "umlaut letters" *ä Ä*, *ö Ö*, *ü Ü*, and *ß* ("scharfes s") without a corresponding upper case letter. In capitalized words *ß* is substituted, as a rule, by *SS*. In alphabetical indexes and gazetteers the umlaut letters mostly are treated like the corresponding simple letters *A a*, *O o*, *U u*, and *ß* is treated like *ss*. But different procedures may also be found, especially in older publications, e.g., *Ä ä*, *Ö ö*, *Ü ü* may be treated like *Ae ae*, *Oe oe*, *Ue ue*.

1.2.3 Spelling rules for German geographical names

The rules given below have been officially used by the Federal Survey of Austria (Landesaufnahme) since 1969 (Annex to the Technical Instruction No. 2, Department L2, February 1969) and are generally in concordance with those in current use in the other German-speaking countries:

Geographical names are normally not subject to the general spelling rules. They are, rather, spelled in the officially approved or customary form. However, in the following respects the German geographical names comply with the general spelling rules except for individual cases where another officially approved version exists.

1. Capitalization

a) Adjectives and participles forming part of geographical names are capitalized. This also holds true for the *-isch* derivatives.

Examples: *Großer Priel; Hohe Tauern; Großes Walsertal; Mährische Thaya; Steirische Kalkspitze.*

b) Word forms with final *-er* which are derived from geographical names are capitalized:

Examples: *Gurktaler Alpen; Wiener Becken; Millstätter See.*

2. Use of one word, two words or hyphen

a) Geographical and other names as determinative elements:

aa) In general compounds consisting of a single or compound geographical name or a personal name plus a primary word are written as one word.

Examples: *Karwendelgebirge; Glocknergruppe; Eberhardsbach; Leopoldsberg.*

bb) A hyphen is often used – either in order to improve legibility or to emphasize the name – when the geographical name is followed by a compound primary word which forms the determinative element.

Example: *Großglockner-Hochalpenstraße.*

Where legibility is not impaired, writing in one word is preferred.

Example: *Alpenvorland.*

cc) Hyphens are used when the determinative element consists of several geographical names.

Example: *Donau-Oder-Kanal.*

Hyphens are, moreover, used when the determinative element consists of several words including abbreviations.

Example: *Otto-Ludwig-Haus; Dr.-Karl-Lueger-Ring.*

b) Derivatives with final *-er*:

aa) Two words are retained when the derivatives with final *-er* of geographical names designate the location.

Examples: *Zillertaler Alpen; Neumarkter Sattel; Tuxer Joch; Ziersdorfer Bach; Lunzer See.*

bb) There are geographical names with final *-er* which are not derivatives in the above sense. These names are written solid in accordance with 2a.

Examples: *Glocknergruppe; Brennerpass.*

When the derivatives with final *-er* of geographical names designate persons writing in one word is preferred.

Example: *Jägerkapelle; Lunzerkreuz* (after a peasant by the name *Lunzer*); *Steinerscharte* (after a mountaineer by the name *Steiner*).

cc) If the syllable *-er* is attached to a geographical name ending in *-ee*, only two *e*'s are written.

Examples: *Altausseer See; Egelseer Bach.*

c) Adjectives as determinative elements:

aa) Spelling in one word is generally used for compounds with a non-inflected adjective such as *groß, klein, alt, neu* or points of the compass plus geographical names.

Examples: *Mitteleuropa; Osttirol; Obersteiermark; Niederösterreich; Großglockner; Hochkar; Großnondorf.*

On the other hand official usage prescribes:

Klein-Ulrichschlag; Alt-Urfahr; Alt-Nagelberg.

bb) The hyphen is used with compounds consisting of uninflected adjectives ending in *-isch* which are derived from the names of places, countries and peoples plus geographical names.

Example: *Steirisch-Tauchen; Steirisch-Laßnitz.*

On the other hand official usage prescribes: *Kroatisch Minihof; Windisch Bleiberg.*

d) Compounds consisting of geographical names:

The hyphen is used when a geographical name is composed of two geographical names.

Examples: *Rudolfshelm-Fünfhaus; Wünschendorf-Pirching.*

d) New rules for the German orthography

On 1st July, 1996, all of the German speaking countries adopted "new rules for German orthography". The implementation began, at the latest, in the academic year 1998/1999 (that is on 1st August in Germany, and on 1st September in Austria) and was brought to an end in 2005. The new spelling rules are binding for institutions under federal control with respect to orthography, namely schools at all levels and administrative bodies.

With respect to toponomastics and considering the principle mentioned above, the following categories of names for which there are no legally binding rules are to be considered: names of mountains, fields, rivers and lakes, glaciers, Alpine pastures, mountain huts, paths, ruins, passes.

With respect to geographical names the following aspects of the new orthography affect the spelling:

ss/ß-spelling: *ß* only occurs after a long vowel or diphthong. Examples: simple and compound names with *Fass-*, *Fluss-*/*-fluss*, *Nuss-*, *Pass-/pass*, *Nass-*, *Ross-*, *Schloss* etc.

There are exceptions in cases where non-settlement names are used as elements of place names: Example:

Schoberpass; but: *Wald am Schoberpaß.*

Accumulation of consonants or vowels: in compounds with three successive identical letters all three of them are retained. Examples: *Schiffahrt-*; *Irrriegel.*

A hyphen is, however, recommended in some cases, e.g. in compound words with three successive identical vowels. Example: *See-Eck.*

Reference to root word: certain words are to be spelled according to their root words. Example: *Gämsalpe.*

Variants are allowed in special cases. Example: *Waldschenke* or *Waldschänke.*

On the other hand official usage prescribes: *Gemstel-* (*Gemstelpaß, Gemstelboden*).

Final silent *h*: The adjective *rau* drops the silent *h* to conform to other words. Example: *Raukopf.*

1.2.4 Pronunciation of German geographical names

German spelling is not always clearly indicative of pronunciation. In many cases it does not say anything about stress or vowel length; with some letters or groups of letters it is not always certain which sound they represent (e.g., the letter *v*). All this is true of geographical names to an even higher degree than of the general vocabulary, since

most of these names are naturally less well known and since names often show conventional spellings and sometimes dialectal spellings, both deviating from the present norm.

It is, therefore, not possible to give a simple pronunciation key covering the pronunciation of all geographical names. Who wants to know how a given name is pronounced may consult the *Gazetteer of Austria*, ed. by Josef Breu (co-editor for phonetics: Otto Back), Vienna 1975¹, which shows the standard pronunciation by means of the International Phonetic Association (IPA) alphabet and contains a detailed treatise of this matter (pp. 38-45, in English).

But in spite of the difficulties mentioned above a basic table of the correspondence between spelling and pronunciation may be useful as general information, though it must be stressed that the following list is far from being exhaustive. An indication of the conditions under which the positional variants occur is not given, as only part of the cases can be covered by rules which in themselves mostly are too complicated to be included in a pronunciation key for cartographic purposes. Also, the following key does not cover some cases of spellings which deviate from the orthographic system of standard German. Furthermore, it does not include the pronunciation of foreign words not occurring in geographical names of Austria. Dialectal and colloquial pronunciations have been disregarded.

1.2.5 Linguistic substrata recognizable in German place-names of Austria

Whereas a thorough research may bring to light pre-Celtic, Celtic and (in Burgenland) Hungarian origins of German place names, two linguistic substrata are recognizable, even by the layman, i.e. a Romance substratum, especially in Vorarlberg, the Tyrol and in Salzburg, and a Slavic substratum in the south-eastern part of the country. An elementary knowledge of these two substrata is advantageous for a better understanding of the geographical names of the respective areas.

1.2.6 German dialects

Two main German dialects are spoken in Austria, (1) the Alemannic dialect in Vorarlberg and in small parts of the Tyrol; (2) the Bavarian dialect in the rest of the Tyrol and the other seven provinces. There is a great deal of regional and local variation within these two main dialects (see map I).

The geographical names reflect to a certain degree the regional and local dialects, especially in those provinces where the social status of the dialect is comparatively high, which is the case especially in Vorarlberg and the Tyrol, although even in these provinces purely dialectal spellings are rather rare.

Since, as a rule, dialectal pronunciation is reflected only to a small degree in written geographical names it is not necessary to give a detailed description in guidelines for cartography.

Some general remarks may suffice: Both, Alemannic and Bavarian belong to the High German dialects, that is to say that they have taken part to a full extent in the High German consonant shift, the result of which is also characteristic of modern standard German.

Some elements of the vowel changes, which took place from Middle High German to the New High German literary language (modern standard German) are found in Bavarian, but missing in most of the Alemannic sub-dialects of Austria, which have conserved the Middle High German vowel system. Thus, the change from Middle High German *i, ū, iu* into literary New High German *ei, au, eu* is to be found also (with some phonetic modifications) in Bavarian. The monophthongizing of the Middle High German diphthongs *ie, uo, üe* to the monophthongs *ie, u, ü* in the New High German literary language has no parallels in the Alemannic and Bavarian dialects of Austria.

A conspicuous feature of Bavarian and Alemannic dialects is the diminutive suffix with *l* (*-l, -le, -li*).

The main distinction between Middle and South Bavarian can be seen in the very strong weakening of consonants in the former. In this respect the South Bavarian dialects are nearer to standard German.

In maps the difference between the Bavarian and Alemannic dialect areas of Austria can be observed especially in the field of vocabulary. Examples: Glacier – Alemannic: *Gletscher*; Bavarian: *Ferner, Kees, Eisfeld*. Alpine pasture – Alemannic: *Alp, Alpe*; Bavarian: mostly *Alm*, in the western parts of the Tyrol also *Alp, Alpe*.

1.3 Minority languages of cartographic relevance

(see also map II)

General remarks:

Art. 7 of the State Treaty ("Staatsvertrag") that re-established Austria as a sovereign, independent, and democratic republic in 1955 contains important clauses for the protection of the Slovene and Croat minorities. Art. 7 (2) states that – in addition to German – the Slovene and Croat language shall be accepted as official languages in certain administrative and judicial districts of Carinthia, Styria and Burgenland with Slovene, Croat or mixed population. The same provision further states that topographical terminology and inscriptions in those districts shall be in the Slovene or Croat language as well as in German. 1976 the Federal Statute on the Legal Status of National Minority Groups in Austria ("Volksgruppengesetz" [VGG], BGBl.² 1976/396) was enacted. This statute applies to all recognized national minorities. It is – in contrast to the State Treaty mentioned above – not confined to Slovenes and Croats. Para. 2 Section (1) 2. VGG prescribes that dual naming shall appear on topographical signs in areas with a considerable portion (i. e. a quarter) of people belonging to a national minority.

The Austrian Constitutional Court had to review the VGG in 2001 and repealed parts of para. 2 section (1) 2. as unconstitutional (cf. VfGH³ 13 December 2001, G 213/01). It ruled that the phrase "considerable portion (a quarter)" did not comply with the obligations under Art. 7 State Treaty (see para. 5. supra). As a consequence of this judgement more bilingual topographic signs need to be erected in the future.

1.3.1 Slovenian

1.3.1.1 General remarks

Slovenian, the official language of Slovenia, has in Austria the status of a minority language. It is spoken beside German in the southern border districts of Carinthia. Slovenian is used in school and church service and is an alternative official language used by all authorities located in Carinthia competent for the bilingual area. It is written in the Roman script.

1.3.1.4 Geographical names

Slovenian names of inhabited places are in official use since 1976. Inhabited places ("Ortschaften") with on principle 25% and more Slovenian-speaking population are designated by official road-signs showing the place-names in German and in Slovenian. Both name forms have been entered into the official Gazetteer of Austria 1991 (Gazetteer of Inhabited Places = "Ortsverzeichnis") and are partly shown on the official Austrian Map 1:50 000.

Examples: *Rechberg (Reberca)*; *Zauchen (Suha)*.

Names of geographical-topographical objects, other than inhabited places, generally are entered by the survey of Austria on the official maps in a form corresponding to German spelling rules, although translations from Slovenian into German are forbidden. The names must be written as they are spoken by the local population, but the sounds are represented in writing in accordance with German, not Slovenian, writing and reading conventions.

Examples: *Gorelza*; *Hrewelnik*

An exception is made in the comparatively rare cases where a geographical name consists of more than one separately spoken Slovenian word. Such syntactical units (mostly noun plus adjective) are written according to Slovenian spelling rules, using the diacritical marks of this language.

Examples: *Tolsti vrh*; *Velika ravna*

1.3.2 Burgenland Croatian

1.3.2.1 General remarks

Burgenland Croatian has the status of a minority language. It is spoken in 6 (of 7) administrative districts of Burgenland province and is closely related to Croatian, the national language of Croatia. But there are differences in phonetics, grammatical structure and semantics which give Burgenland Croatian the character of a separate literary language.

The language is used in school and church service and has an official standing in communes and local courts. Burgenland Croatian is written in the Roman script.

1.3.2.4 Geographical names

The Croatian names of inhabited places are in official use since June 2000. A regulation enacted by the Federal Government in consultation with the Main Committee (Hauptausschuss) of the National Council (Nationalrat) was passed in June 2000 ("Topographieverordnung", BGBl. II/170/2000, 21 June 2000): It singles out the municipalities and incorporated villages where topographical terminology and signs have to be either in the German and Croat language or in the German and Hungarian language. The name forms have been entered in the official Gazetteer of Austria 2001 (Gazetteer of Inhabited Places = "Ortsverzeichnis") and will be shown on the official Austrian Map 1:50 000. The Austrian Map 1:50 000 represents a limited number of Croatian names other than populated place names, but mostly in a Germanized spelling, whereas the cadastral maps of Croatian-speaking or bilingual villages make ample use of Croatian field names in their original spelling.

1.3.3 Hungarian

1.3.3.1 General remarks

Hungarian, the national language of Hungary, has in Austria the status of a minority language. It is spoken in four settlements in central and southern Burgenland and used in school and church service. Hungarian uses the Roman script.

1.3.3.3 Pronunciation

See Toponymic Guidelines for Map and Other Editors – Hungary.¹²

1.3.3.4 Geographical names

The Hungarian name forms of inhabited places are official since June 2000 (see under item 1.3.2.4), they are shown in the new edition 2001 of the official gazetteer and will be entered into the official maps 1:50 000. Geographical names other than populated place names do not occur on the Austrian Map 1:50 000 because of the small area of this minority language. But the cadastral maps of Hungarian-speaking or bilingual villages contain Hungarian field names in Hungarian spelling mostly together with the corresponding German names.

2 Names authorities and names standardization

In consequence of the federal structure of Austria the legal situation is rather complicated. For the purposes of international cartography the following statements will suffice:

The names of inhabited places of all categories are standardized. They are published by the federal authority:

¹² <http://unstats.un.org/unsd/geoinfo/INF.09.pdf> [11.01.2006].

Statistik Austria
Guglgasse 13, A – 1110 Wien (Vienna).
<http://www.statistik.gv.at> [11.01.2006]

Geographical names other than inhabited place names, i.e. the names of mountains, hills, valleys, rivers, lakes, glaciers, woods etc. are officially collected and published in maps by the federal authority:

Bundesamt für Eich- und Vermessungswesen, Gruppe Landesaufnahme
(Federal Office of Metrology and Surveying)
Krotenthallergasse 3, A – 1080 Wien (Vienna)
<http://www.bev.gv.at> [11.01.2006]

All names of the official Austrian Map 1:50 000 are standardized and are to be regarded as official names in so far as they form part of an official publication.¹³

The above-mentioned official agencies concerned with the publication of geographical names are assisted in their work by boards on geographical names:

1. For Austria as a whole:

Arbeitsgemeinschaft für Kartographische Ortsnamenkunde (AKO) der Österreichischen Kartographischen Kommission in der Österreichischen Geographischen Gesellschaft (Austrian Geographical Society) und "In Verbindung mit der Österreichischen Akademie der Wissenschaften" (www.oeaw.ac.at/dinamlex/AKO/AKO.html [11.01.2006]).

Although this board legally has no official standing its decisions are of great practical importance as it functions as a clearinghouse of all federal and provincial authorities and institutions of science and research as well as private publishers concerned with geographical names.

2. For the provinces of Austria:

- Lower Austria: The standardization of geographical names is under the care of the Niederösterreichisches Landesarchiv beim Amt der Niederösterreichischen Landesregierung, Abt. III/3, Landhausplatz 1 (Haus Franz-Schubert-Platz 4) , A – 3109 Sankt Pölten.

Breu, Josef: *Geographisches Namenbuch Österreichs* [Gazetteer of Austria]. Wien 1975 (= Österreichische Akademie der Wissenschaften. Veröffentlichungen des Instituts für Kartographie. Forschungen zur theoretischen Kartographie 3).¹⁴ This gazetteer, edited in accordance with the recommendations of the United Nations, gives a selection of the official geographical names of Austria, especially for international use. The introduction contains, in German and English, a detailed description of the fundamentals of the standardization of geographical names in Austria, explanatory remarks on pronunciation, source material, German spelling rules etc. The pronunciation is given with each headword by means of the symbols of the International Phonetic Association alphabet. A glossary of geographical appellatives is annexed.
