\*\* Prepared by Helen Kerfoot, Vice-Chair, United Nations Group of Experts on Geographical Names, Natural Resources Canada.

**Documents from United Nations Conferences on the Standardization of  
Geographical Names and UNGEGN Sessions**

Since the first meeting of the ad hoc experts group and the first United Nations Conference on the Standardization of Geographical Names in the 1960s, nearly 2000 documents<sup>1</sup> have been presented for information and discussion.

Unfortunately, changing locations and personnel of the UNGEGN Secretariat over the intervening decades have led to a minimal collection of important archival records in the possession of the Secretariat.

Recognizing the deficiency in this particular function of the UNGEGN Secretariat, and as a measure to correct this, Resolution 14 of the Seventh Conference was passed as follows:

VII/14 Access to and archiving of technical papers

The Conference,

Recalling resolutions 1 and 5 of the First United Nations Conference on the Standardization of Geographical Names in which it was recommended that the UNGEGN secretariat serve as a documentation centre and clearing house,

Recognizing the amount of information that has been presented at past Conferences and meetings of UNGEGN and its working groups,

Recognizing further that the collection of technical papers held by the UNGEGN secretariat is incomplete and that accessing and making available the information in them efficiently and effectively is therefore difficult,

1. Urges countries to ensure that the UNGEGN secretariat is supplied with the material necessary to fulfil its functions in this regard;
2. Recommends seeking the support and assistance of countries to catalogue and index the information in the technical papers they hold, in coordination with the UNGEGN secretariat;
3. Recommends further that assistance and support be sought from a country or countries to reproduce the documentation in a form that makes it more accessible to all;
4. Recommends also that, from now on, the secretariat collect and maintain all technical materials and papers.

---

<sup>1</sup> Conference documents (up to and including the Seventh Conference) totalled around 1100; UNGEGN documents (up to and including the 20<sup>th</sup> session) over 900.

### **Establishing a complete inventory**

To start the process to follow up the resolution, the Vice-Chair worked on Phase 1 with Hans Stabe (former UNGEGN Secretary), Jenny Javier of the Secretariat, and Brenda Brookes of the UN Map Library to create a compendium of all documents presented at the seven Conferences and twenty sessions of UNGEGN (plus two earlier meetings of the experts group). At the request of the Secretariat, the data was compiled using Microsoft Excel software.

### **Locating copies of documents**

Phase 2 involved searching for copies of these documents within the United Nations in New York: in the UNGEGN secretariat offices, the UN Map Library, the UN Dag Hammarskjöld Library and the Optical Disk System (ODS) files.

These two phases of the work were reported in W.P. 8 of the 20th session of UNGEGN and in addition, experts from Finland (20th UNGEGN, W.P. 23) and Austria have identified their document holdings. Some other experts, without providing detailed accounts, have indicated fairly extensive collections of documents. With the gaps in the UN holdings now clarified, UNGEGN experts are asked to help identify locations of copies of these documents.

### **Availability of the inventory**

From the Excel files, summaries of the lists of documents are now provided here for UN Conference participants (*Annex 1: Documents submitted to UN Conferences on the Standardization of Geographical Names; Annex 2: Documents submitted to UNGEGN*). The last column indicates whether or not a copy of the paper is held at the UN (in one of the locations mentioned above).

These files have also been made available on the UNGEGN web site (<http://unstats.un.org/unsd/geoinfo>). Files can be searched by title, author, country, etc. Unfortunately, one of the shortcomings of the list is that the titles may not clearly indicate the main content of the document, so search results (e.g. for gazetteers) are to be comprehensive.

### **Availability of copies of past documents**

A large number of the documents themselves are now available on individual request from the UNGEGN Secretariat, but where copies are not indicated as available from the UN, countries with good historical collections may still be asked for their assistance.

The possibility of putting all past documents on the UNGEGN web site has been addressed, but the storage space and labour required to have all past texts on the web site appears beyond reach. It would be possible to make a selection from the texts, but this in itself poses a number of questions, and needs considerable study to be of maximum use.

A CD-ROM of all past texts, with search capability, could be a great asset and would allow all papers to be made available to UNGEGN experts. To date this has not been actively pursued with any country or countries. Offers of assistance in this regard should be addressed to the UNGEGN Secretariat.

The question of access to full texts of all past documents remains but partially answered.\*

### **Future documentation**

In future, for reference purposes copies of all documents will be deposited in the UN Map Library, in addition to the master copies (digital and/or paper) being held by the Secretariat. ODS copies (currently not accessible for consultation outside the UN and permanent missions) will be created for all Conference (but likely not UNGEGN) documents received by the specified deadline.

Documents on ODS can then be made publicly accessible through the UNGEGN web site.

The UNGEGN Secretariat still has to evaluate whether or not it is feasible to put all future texts on to the UNGEGN web site.

### **Conclusion**

Progress has been made to address resolution VII/14, but it is recommended that the Secretariat:

- look further into how some or all of past documents could be made more readily available; and
- be fully aware of the need to keep track of, and to make available on a continuing basis, all future Conference and UNGEGN session documents.

---

\* As this document was being submitted, the author received news that the UN Map Library was starting to scan UNGEGN documents, commencing with the 20th session of UNGEGN and working back in time. When the project is completed, the texts will be available through the web.
