

Data Science Campus

ONS Mentoring

Dr Louisa Nolan

Chief Data Scientist

Ceri Regan

Senior International Programme Manager

26 January 2022

Session overview

- ONS Mentoring
 - Background and purpose
- ONS FCDO Data Science Hub Mentoring
 - Background & Mentoring case studies
- ONS International Data Science Accelerator Programme
 - Background
 - Presentation from Department of Statistics, Jordan – case study
- Q & A

ONS Mentoring

ONS Mentoring Programmes - Background

- ONS FCDO Hub Mentoring
 - Official Development Assisted (ODA) countries
 - Mentoring is provided by Data Scientists at the FCDO Hub
 - Longer term engagements (3 – 6 months)

- ONS International Data Science Accelerator Programme
 - Not just ODA countries, aimed at every NSO
 - Mentors come from a wider pool
 - Is time bound – start and finish dates – smaller project

ONS Mentoring - Purpose

- Training courses are great, but if learning is not applied it is lost
- Need project work for immediate application of new skills
- Some may need support and guidance to embed new skills into real life work
- ✓ Builds sustainable impact

ONS FCDO Data Science Hub

Mentoring for sustainable data science capacity building

ONS FCDO Hub Mentoring - Background

- Offer data science mentoring for 3 – 6 month projects - flexible
- Aimed at developing *sustainable* data science in ODA countries
- Select a specific project that supports the NSO's Data Strategy
- An holistic approach is taken to:
 - Work on a project that the supported partner country wants to work on, and
 - Ensure the partner country has the required skills, capacity and infrastructure to maintain the project

ONS FCDO Hub Mentoring - Background

- Dedicated mentors provide:
 - Coaching, training, guidance to a selected group of mentees from the NSO
 - Learning that is directed to individual and project needs
- Requires commitment
 - From the analyst(s) involved
 - From the organisation (senior level) – time commitment
- Mentee drives the process forward – enthusiastic with right foundational skills

Vanuatu National Statistics Office

Building a reproducible analytical pipeline

- Build a monthly report for trade statistics
- Takes single analyst 6 weeks to complete
- Involves manual quality checking 1000s of records
- Manual statistics fed into 14 formatted excel tables
- Is a repeating process

Planning a Reproducible Analytical Pipeline

- Document existing manual excel based processes
- Map existing process to equivalent automated steps using R
- Provide preparatory training for collaborative work
- Provide regular mentoring to meet mentee needs

Project Expectations

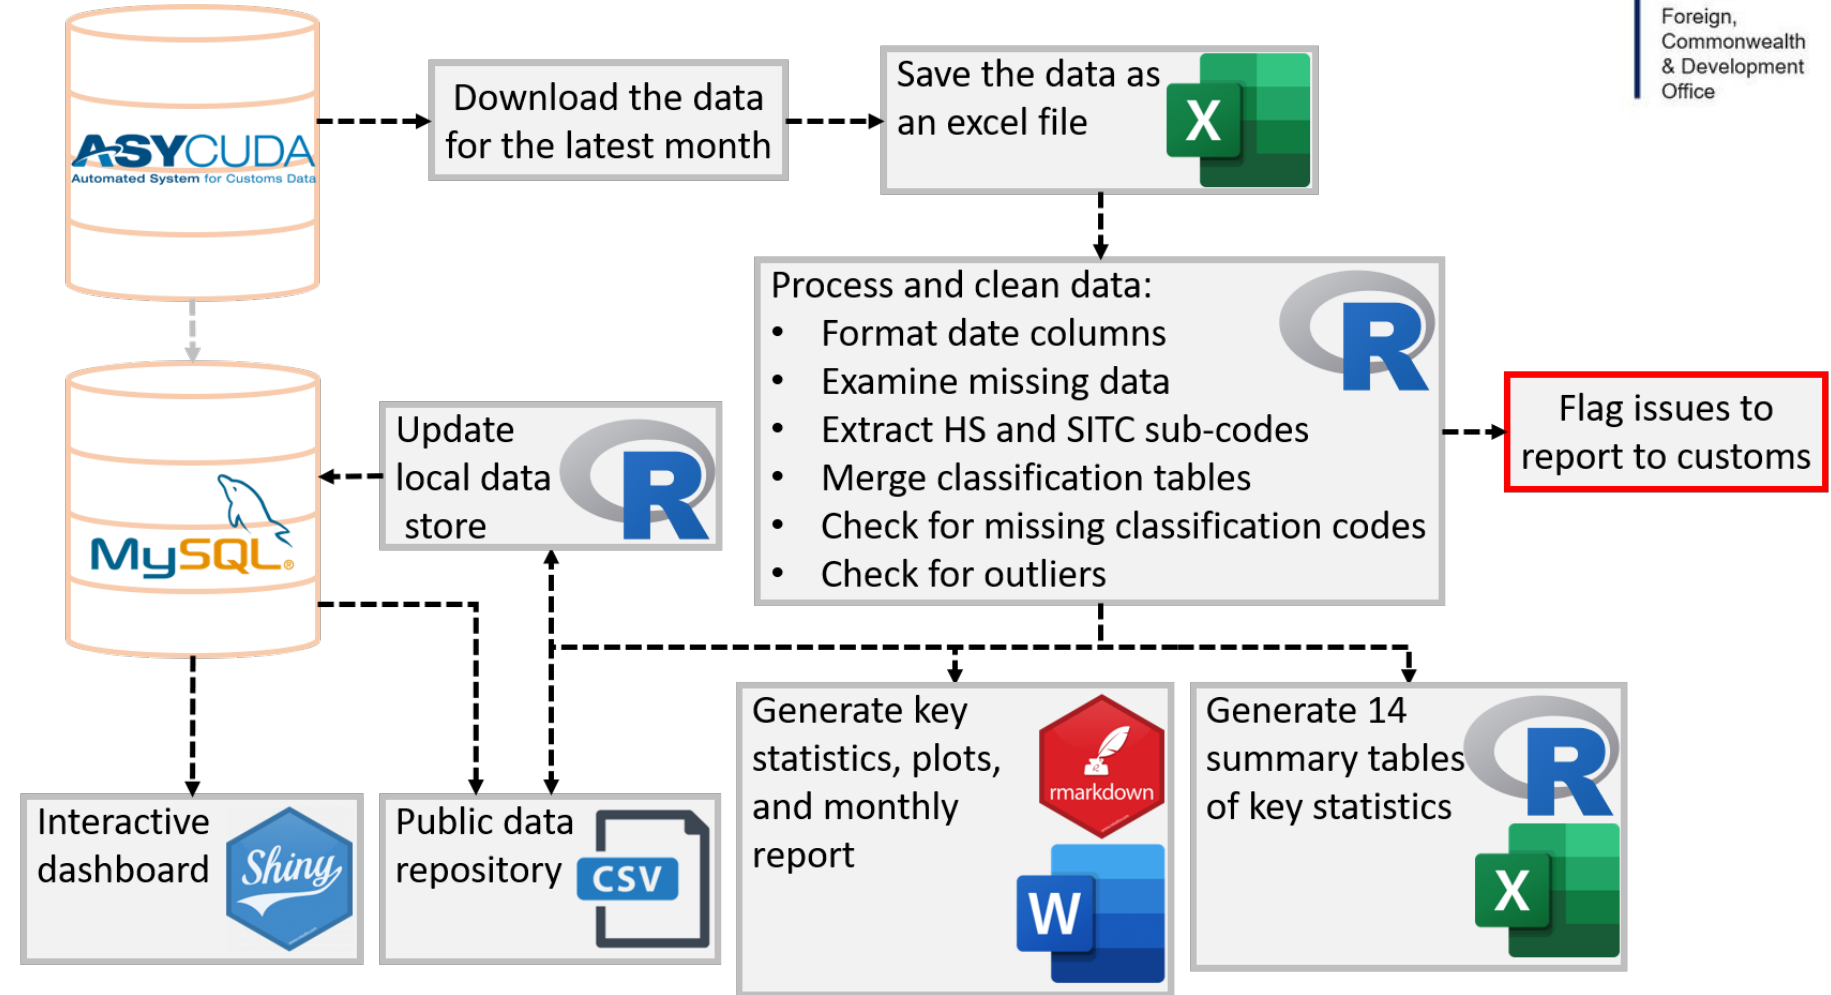

- Automate and speed up the data analysis & reporting process
- Build foundational coding skills in open-source programming tools (R)
- Save Analyst's time
- Free up Analyst to do something more innovative at NSO

Mentoring impact

Impact:

- 1.5 years of mentoring
- 2 mentees grew to 12 mentees
- What originally took an Analyst 6 weeks to achieve, now takes <1 week
- Recognition of value of data science across VNSO

Mentoring impact

...that will financially support their respective schools.

...Before independence in 1980, Presbyterian,...

...Minister Samsen said the

2020 Census Report

10 VNSO staff trained on Reproducible Analytical Pipeline

By Josephine Tarianga

THE BASIC REPORTS FROM the 2020 National Housing and Population Census puts Vanuatu's official population at 300,019.

This was disclosed when Vanuatu National Statistics Office (VNSO) launched the basic tables report yesterday, a year after the official start of the data collection of the largest census ever to happen in the country.

Government Statistician, Benuel Lenge, explained that when the census started, Vanuatu was going through its first lockdown due to the pandemic. This did not stop VNSO's work.

VNSO acknowledges that the possibility of this launching is largely due to the survey solutions software for data collection and the R statistical software for data processing and tabulations.

Around 30 staff of the VNSO have shown capacity in using the R software, which has proven useful in producing the table published in the reports launched.

Additionally, 10 VNSO staff received certificates during the launching for having completed learning, building and managing

Reproducible Analytical Pipeline (RAP) over an 18-month period. The RAP mentoring programme is developed by the United Kingdom's Office of National Statistics (ONS). Mentoring was provided to the VNSO officers by Joseph Crispell and Tom Wilkinson of ONS.

In a demo of RAP 2 VNSO officers illustrated how RAP cuts down data processing time from what used to be 6 weeks to a few seconds.

British High Commissioner, Karen Bell, attended the launch and was pleased to present the 10 VNSO officers with their certificates.

"The ONS expressed that the partnership it shares with the VNSO is an exemplary partnership," she said.

Finance Minister Johnny Koanapo thanked the British High Commissioner for aiding the VNSO in the RAP mentoring.

Mr. Koanapo said the VNSO shows Vanuatu's resilience, as despite the lockdown last year the officers collected data because more people were home and made the data collection easier.

"With this report we can now track our progress and our population growth," he said. "We can see where we need to develop. We cannot

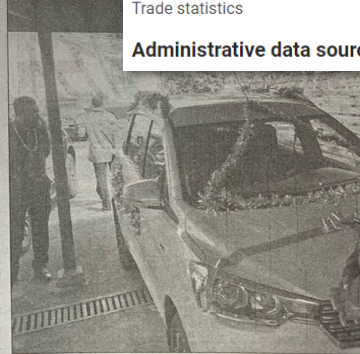

Remove nameleaves from the places that we still need to develop and grow. Minister responsible for VNSO, Johnny Koanapo

keep pushing to expand the agriculture sector and not our population. I will refer to the namele metaphor once more in saying, remove the namele leaf from the places we still need to grow and develop."

The Minister officially launched the report and presented the VNSO with a new vehicle provided by the Government, in appreciation of their work.

The VNSO has a few vehicles and is retiring a vehicle that has served for 10 years yesterday. The office prides itself of never having any of its vehicles involved in traffic accidents or major incidents. The new vehicle was handed just in time for the retirement of the older vehicle.

Minister Koanapo handing over the new vehicle the Government has gifted

Reproducible Analytical Pipelines for the Vanuatu National Statistics Office

Vanuatu

A small NSO, the Vanuatu National Statistics Office (VNSO) has limited resources, and cut production time for the VNSO trade statistics. The VNSO RAP mentoring programme provides mentorship to mentees in other topics such as new analyses and data processing. The VNSO provides statistics on the Tourism, Consumer...

Coverage

Trade statistics

Administrative data sources

Foreign, Commonwealth & Development Office

Other Mentoring examples

- R Training and RAP project for Caribbean Countries – 5 months
 - 21 analysts, 12 countries
 - R training, hands-on workshops, applied learning to a project, mentoring
- Rwanda ongoing mentoring:
 - Moving statistical processes from Stata across to open source R (saved \$)
 - Developing dashboards for monitoring Census data
 - Future: web-scraping to use job vacancy data for Labour Market statistics
- Namibia ongoing mentoring:
 - looking to support the automation of CPI

International Data Science Accelerator Programme

Campus International, Data Science Campus

Office for National Statistics

International DS Accelerator Programme - Background

- Aimed at building DS skills in analysts at NSO - mentee
 - Individual analyst, or a team of 2 or 3
 - Propose / submit a small project -> application process
- Mentors: NSOs, UN, other respected orgs -> application process
- Campus International - review, sift & select projects & mentors
- Match mentees with mentor

Virtual

International DS Accelerator Programme - Background

- Paired mentor & mentee:
 - Work on the project for 1 day a week, for 12 weeks (so just 12 days)
 - Arrange a day that mentee will work on project each week
 - Mentor available (2 – 3 hours) to steer and guide
- The mentee does the work, guided by the mentor

International DS Accelerator Programme - Background

- Campus International organises (virtually):
 - Mentor workshop – bring together to discuss role and expectations
 - Official launch event - for mentors and mentees
 - Monthly check-in meetings – for mentors and mentees
 - Graduation ceremony with high level speakers and presentations from all mentee / mentor pairs

- Certificate of Completion for mentees

Pilot (Sep – Dec 2021)

- Mentors:
 - Ghana Statistical Services, UNSIAP, Federal Competitiveness and Statistics Centre, Statistics Poland
- Mentees:
 - Zimbabwe Nat Stat Agency, General Statistics Office of Vietnam, Department of Statistics Jordan
- Projects:
 - Web-scraping job vacancies, web-scraping gold prices, Natural Language Processing in Arabic, data linkage of large datasets for analysis

First official cohort application stage start 31st January 2022

- Application period - 4 weeks - closing date 28th February
- Data Science project submitted by mentee
- Mentors put themselves forward, noting their knowledge and skills
- Programme starts 28th March
- For more details contact - geanina.sopron@ons.gov.uk or data.science.mentoring@ons.gov.uk

Project Example

- Mentor: Hatem Elsherif - Data Analytics Advisor, Federal Competitiveness and Statistics Centre, UAE
- Mentee Team:
 - Ahlam Alrousan - IT Director, Department of Statistics, Jordan
 - Fatima ALTaharwah - Programmer & Data Scientist, Department of Statistics, Jordan

Summary

- ONS FCDO Hub mentoring
 - 3 – 6 months, larger project, ODA countries
 - tim.harris@fcdo.gov.uk

- ONS International Data Science Accelerator
 - 12 days, smaller project, open to all NSO analysts
 - geanina.sopron@ons.gov.uk or
 - data.science.mentoring@ons.gov.uk
