

Conclusions and Way Forward

Place of Usual Residence

- ✓ **Location between 2 AM and 6 AM**
- ✓ **Location pattern**
 - **Night time location**
 - **Over longer period of time**

Usual Environment

- ✓ **Place of Usual Residence**
- +
- ✓ **Work, Shopping, School, Weekend home**

Include – Cross-Border Workers

Exclude – Vacation home

Commuter statistics & Day-Night population

- ✓ **Mobility pattern**
 - **Night time location**
 - **Day time location**
 - **Distinction Work, Shopping, Exercise facility**

Domestic Visitors

✓ Day Trips

- Night time location
- Day time location
 - Not Work, Shopping, Exercise facility

✓ Multi-day Trips

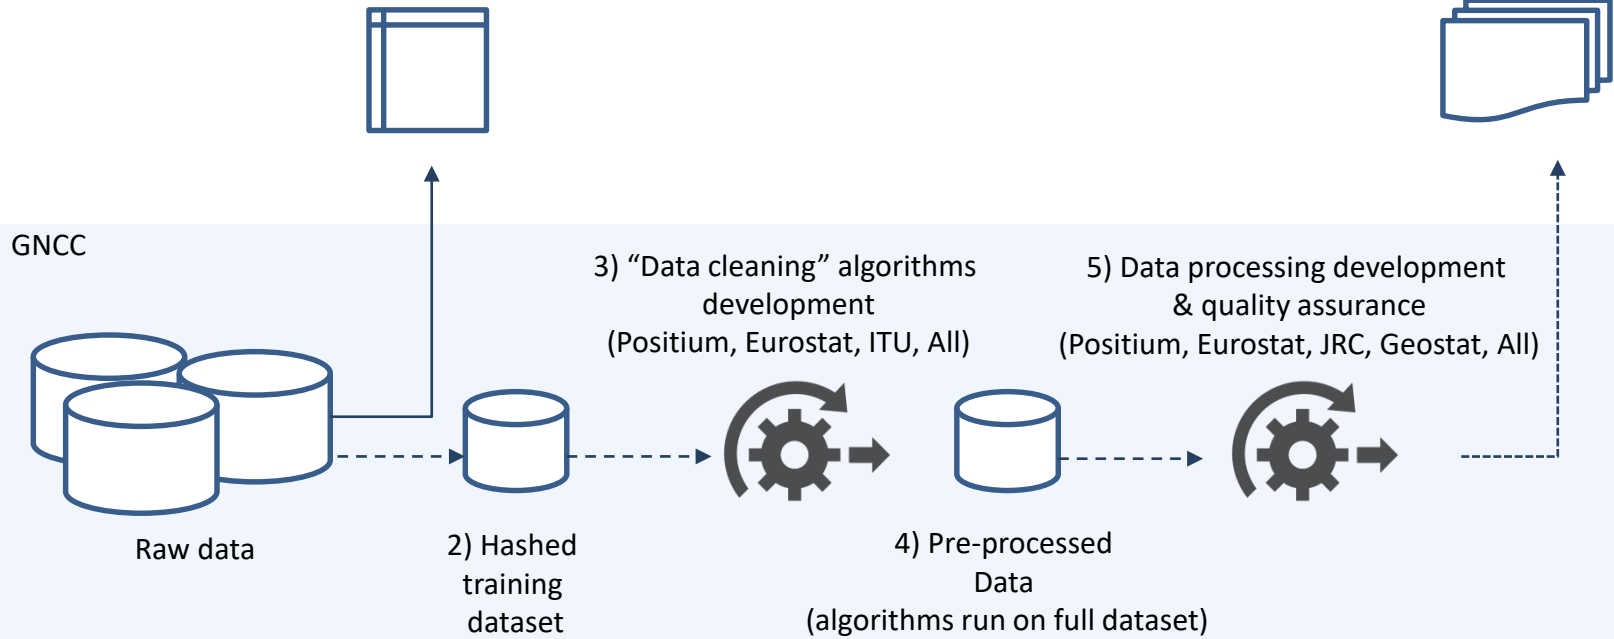

- Night time location
- Day time location
 - Not Work, Shopping, Exercise facility

Inbound Tourism / Migration

- ✓ **Non-resident Tourists**
 - Foreigners
 - Visiting Nationals
- ✓ **Migrants**
 - New entry
 - Stay for more than 12 months
 - National definition – 6 months + 1 day

1) Small data sample to understanding data fields and attributes
(Positium, Eurostat, ITU, JRC, All)

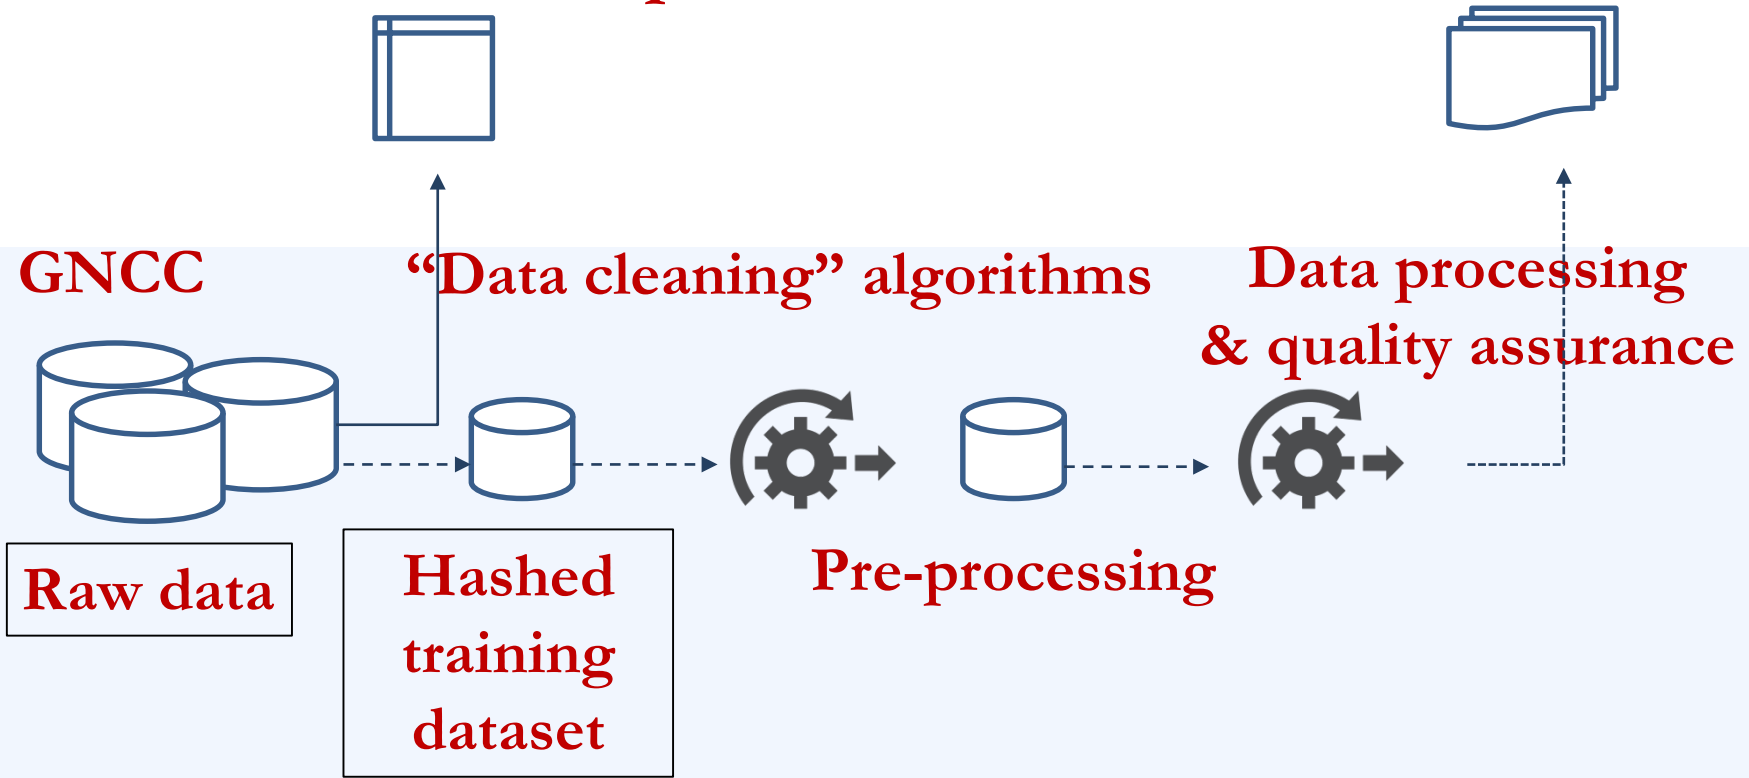

6) Derived products:
- Migration/tourism statistics (Geostat, SCM, All)
- Grid maps (data challenge, JRC, All)

Derived products:

- Migration/tourism statistics
- Grid maps

Small data sample

Create a 2-Year Roadmap

NEEDS	What are the areas where mobile phone data-based statistics are most needed ? Generate a priority list for your country. Is there already potential funding to cover statistical production of these application areas, given a viable solution?
ROLES	Who are the stakeholders? What is the role of all of them in processing mobile phone data?
LEGAL	What are the legal grounds to use mobile phone data, list what is allowed and what is not? What are the technical solutions used to overcome privacy considerations and how are they approved?
HARDWARE	Calculate the hardware needs and assess current hardware
SOFTWARE	What type of software stack is needed, what do we still need to develop? Who develops the methodology, who does the data science, who develops the production-ready software?
HR	What type of skillsets are still needed?

Deliverables

- ✓ **Task Team deliverables**
- ✓ **Project**
 - **Documentation**
 - **Algorithms & Methods**
 - **Scientific paper**
 - **Experimental statistics**
