from MOBILE POSITIONING DATA to OFFICIAL STATISTICS

November, 2022

The Legal Basis

- 1. Laws that authorize BPS to collect data: UU No 16 Tahun 1997 The Indonesian Statistical Law No. 16 of 1997 legally protects the confidentiality of individual data and information, which states that the conductor of statistical activities must ensure the confidentiality of the information obtained from respondents.
- **1**. Personal data protection:
 - Customer data used for BPS purposes can be accessed by BPS in the condition that MSISDN is masked, and geolocation is masked in the regulations still in the same sub-district (3rd level Local Administrative Unit);
 - For in-depth research purposes, BPS can access raw data with MSISDN without masking it, if BPS manages to get approval from the customer to collect the data;
 - Disseminated data is aggregated to a certain regional level.

Initiation of the use of MPD by the Ministry of Tourism

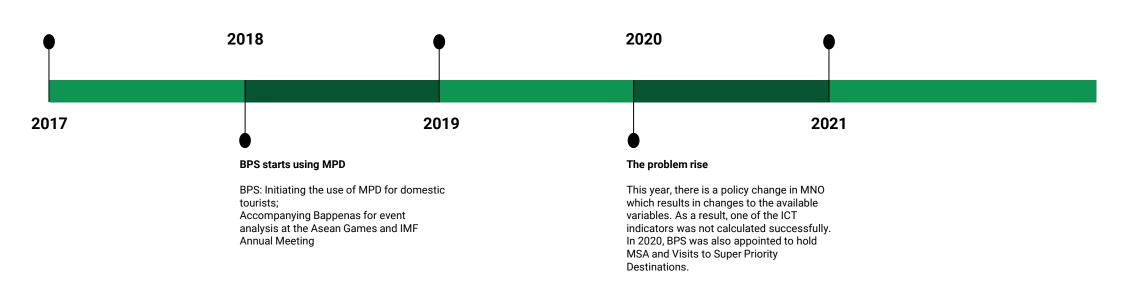

The Ministry of tourism has started using Mobile Positioning Data in the border areas of Indonesia, and is considered successful, in 2018 BPS was asked to do it for domestic tourists.

Added MPD use case

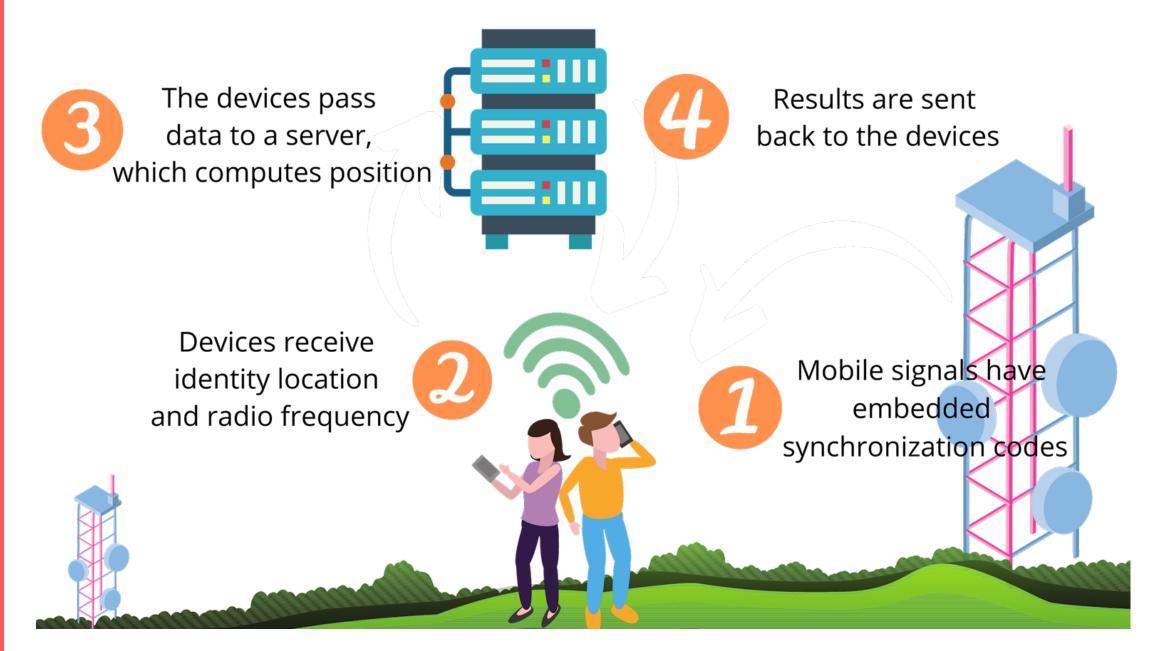

BPS: commuting and non-permanent mobility statistics; Bappenas: Metropolitan Statistical Area (MSA); Ministry of Transportation: Origin Destination Matrix; BNPB: use of MPD for disaster dashboard.

Start working with 3 operators.

In 2021, BPS initiates cooperation with all operators for outbound tourism.

The Data

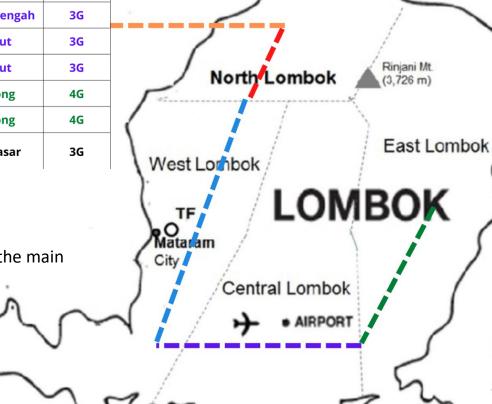

The transaction leaves a log, log creates data

time	longitude	latitude	province	city	district	signal

A trip is defined as a journey from one usual environment to another, in each trip, there can be visits to several places, but it is necessary to determine the main destination of the trip.

Please note that there are anomalies in the data, such as fast movers, that could affect your analysis. For that, data cleansing needs to be done.

comparison between mpd and	
Ο	
C	

	No	MPD Approach	Household Approach (Conventional)	
conventional survey	1	Estimates for smaller areas: districts/cities	Estimates up to the provincial level	
	2	Monthly data period	Yearly data period	
	3	No surveyors needed	The number of surveyors needed depends on the number of samples	
	4	With a more detailed level of estimation, the required budget is only around IDR 15 billion	To conduct a conventional domestic tourist survey, a budget of around IDR 30-40 billion is needed (based on the 2018 and 2019 conventional domestic tourists survey budget).	
	5	It has the potential to be able to generate statistics for domestic tourists monthly	Can only generate statistics for domestic tourists on annually	
	6	The solution for collecting data for domestic tourists during the covid-19 pandemic, no door-to-door interviews needed	The Covid-19 pandemic condition limits conventional data collection activities	
	7	MPD can be used for other statistical calculations	One activity is only used for one type of statistical calculation	

O DEPENDENCY

O2 PROCUREMENT

O3 OTHER MNO's

There is a dependency on MNO, this is also experienced by several countries in the world. Data confidentiality issues make MNO unable to provide raw data to NSO.

Complicated procurement, for each case to be analyzed, MNO establishes new cooperation, with the consequence of additional costs.

BPS only cooperates with one MNO, communication to be able to work with Telkomsel as a research partner takes ± 2 years.

THANKYOU

HILD
