Tourism statistics in Slovenia on the way to support sustainable tourism

Apolonija Oblak Flander, Director-General

Statistical Office of the Republic of Slovenia

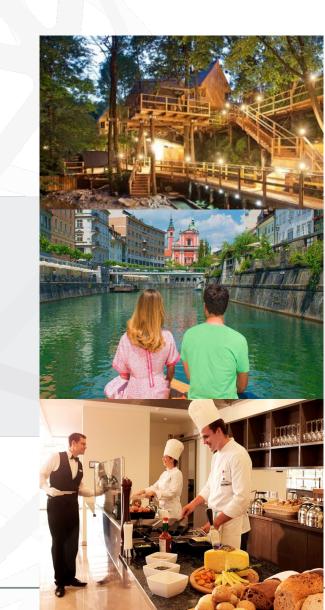

State of play:

- → Already rich data and indicators on tourism
 - →5 targeted tourism surveys:
 - ☐ Tourist arrivals and overnight stays (admin. source)
 - ☐ Travels of domestic population
 - ☐ Foreign tourists
 - ☐ Foreign travellers
 - ☐ Slovenian travel agencies
 - → Tourism Satellite Accounts (since 2012)
 - → Employment in tourism (admin./stat. source)
 - -> Accommodation and food services activities (NACE I)
 - ☐ businesses, turnover, wages ... (SBS)
 - ☐ electricity consumption
 - ☐ GHG emissions ...

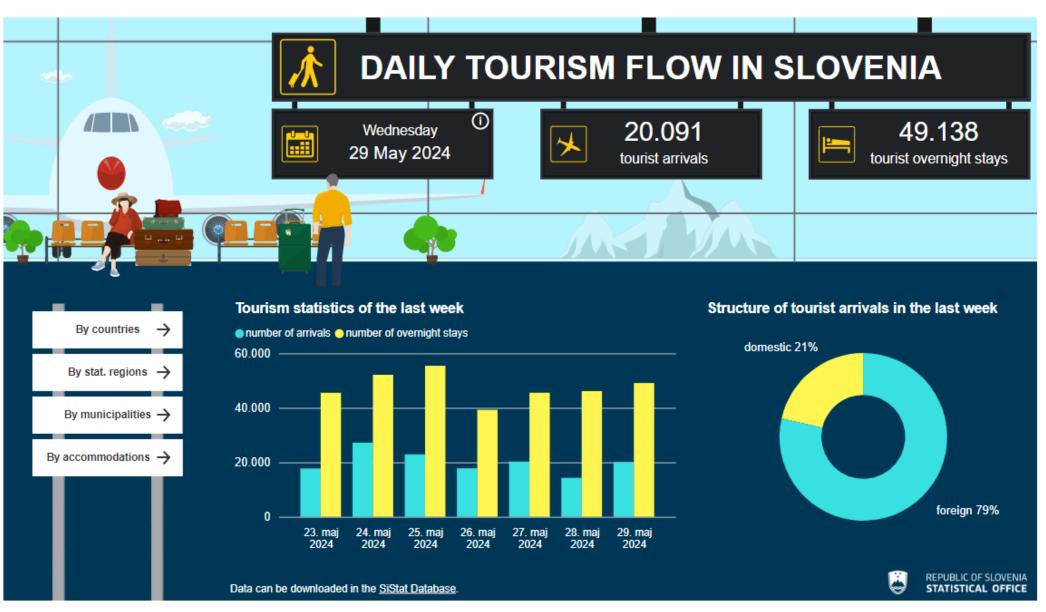

State of play:

- → Great results from our ambition to <u>further exploit various</u> administrative sources
- → Already concrete outcomes based on <u>alternative</u> (big, nonstructured) data sources to address the users' needs regarding
 - > periodicity, granularity, timeliness, new statistics
 - → experimental statistics
- ☐ Tourism Daily interactive tool with near-real time accommodation data
- MNO data (international 'tourism' flows)
- Data from digital platforms on short-term rentals (Eurostat)
- Automated traffic counters

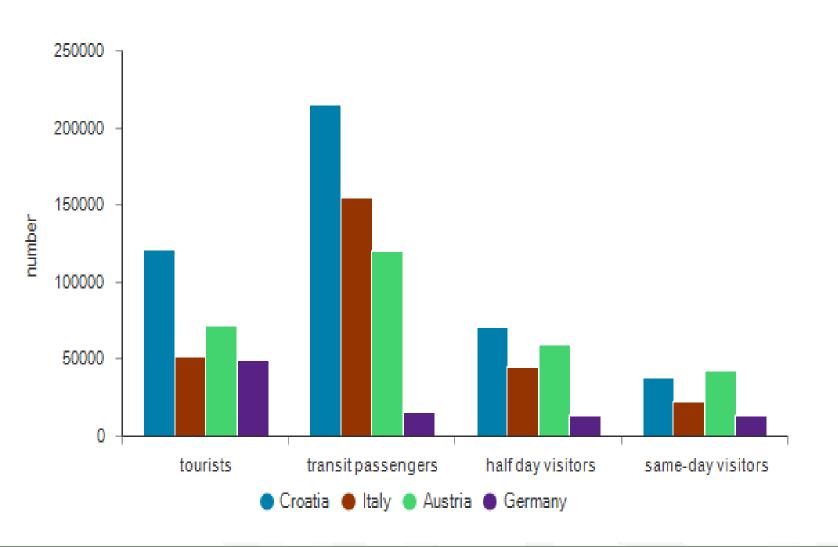

Tourism daily

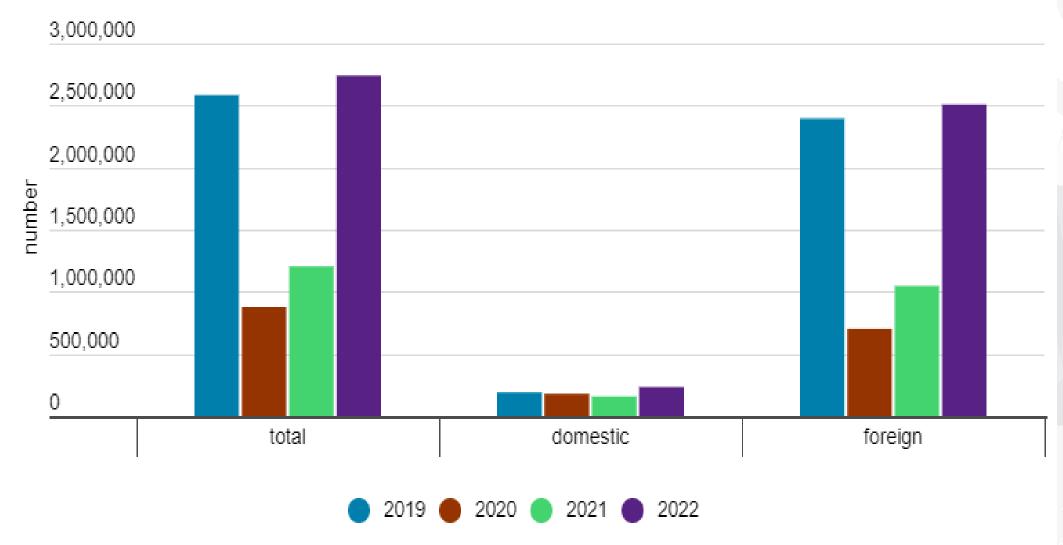

Slovenian users of mobile telephony services by most frequently visited countries and types of users, Slovenia, March 2024

Guest nights at short-stay accommodation offered via online platforms, Slovenia

Source: Eurostat data, licensed under CC BY 4.0

Passenger vehicle traffic on highway sections by traffic counters (million), Slovenia, 4th quarter 2023

Ongoing work, plans:

- Alternative data sources for the compilation of TSA
 - Payment card transactions data + other sources
- Work on new indicators:
 - **Smart electricity meters** aggregated and micro data (linking to accommodation establishments electricity consumption)
 - Water meters micro data (linking to accommodation establishments water consumption)
- Exploring potentials of the model on tourism carbon footprint ...

→ Ultimate goal: comprehensive set of indicators for measuring sustainability of tourism in Slovenia + comparability over time and territories (other countries, regions ...)
