The road thus far

Data access sprint
session 4

Lianne Ippel
16 March 2022
Observation 1: Many user needs not met

Observation 2: GVC are industry specific

Observation 3: Not enough data
  - Vulnerability of national and international economy
  - Reduced quality of (macro)economic statistics
Expected insights from GVC:

- Generation of employment, income (GDP)
- Fair labour, carbon footprint (sustainability)
- Relationship between goods and support services in GVC
- Network of all firms in GVC and governance structure
Session 2: Relevant experiences with PHD

Angus Rennie, UN Global Compact
Peter Struijs, Eurostat
Torbjörn Fredriksson, UNCTAD

- Observation 1: Make private sector aware of their responsibilities

- Observation 2: National access to PHD only solves part of the puzzle

- Observation 3: Relationships take time
  - Trust is hard to gain but easy to lose
Engagement with Private Sector

- Corporate responsibility requires openness
- International data access principles needed
- Global collaboration on data access needed
Session 3: Private sector observations

Dan Sofio – Panjiva
Wesley van den Berg – Floridata
René Botter - ASML

- Observation 1: Different business models
- Observation 2: Common interest to collaborate
- Observation 3: No free lunch
  - Seek win-win
Private sector collaboration

- Industry specific use cases
  - Find a coalition of the willing
  - Work on data access principles, methods, and capacity
  - Build on common interest
  - Understand different governance structures
Session 4: Towards a Community of Practice

- Session 1, 2, and 3 provided broad overview
- Lots of potential and interest
- Let’s go!
