It is a system For disseminate Economic and Social Indicators 2014

Note: This system just in Arabic language.

The base of economic and social indicators is one of the indicators available in the Department of Statistics because it contains a large number of indicators, with a total of two hundred and eighty-four indicators covering many sectors in the economic and social sectors, which amounted to thirteen sectors. The periodicity of the indicators varies in the base, with daily, weekly, monthly, quarterly, semi-annual and annual indicators, and indicators are produced at longer intervals.

استرجاع البيانات

When you finish entering the indicators and clicking this button, the data is stored only and is not published and used by the user, so it is possible to retrieve the data later and verify and modify it as shown in figure (3) below.

When the indicators are entered and put a check in the checkbox and clicked on it, the data is stored and published and the user can see it. There is an e-mail sent directly to the person in charge of the ministry concerned as well as the person at DoS to document this processing.

Therefore, data can not be retrieved and modified as shown in Figure 4 below, only through official correspondence because DoS has become responsible on data.

These is all the Indicators are following to this sector and period time.

اسم المؤشر	قيمة المؤشر	طباعة
- (الحساب الجاري (مليون دينار		
- (مقبوضات السفر (مليون دينار		
- (صافي حوالات العاملين (مليون دينار		
- (ميزان الخدمات (صافي) (مليون دينار		
- (حساب الدخل والتحويلات الجارية (مليون دينار

THE HASHEMITE KINGDOM OF JORDAN

❑ National Strategy for Statistics NSDS 2018- 2022 (evaluated by Paris 21)

- Administrative restructuring and establish a separate unit for SDGS at the DOS.

- Standardization of the mechanism of producing statistical number .

- Launch of the project for the production of SDGS in cooperation with the Government of Jordan and support of external entities to develop a special platform for SDGS , DOS introduce 109 indicators for this project .

-use anew and recommended solutions and technologies for dissemination SDGS such as SDMX

THE HASHEMITE KINGDOM OF JORDAN

Challenges and needs:-

- Some indicators need to be collected from the field through special surveys which requires financial and human resources.
- Strengthening the cooperation between the producers of data.
- Capacity building in the concepts of SDGS, Meta Data, Open Data, Micro data and dissemination technologies.
- - limitation in option that exist in free source tools such as pxweb
- - lack of knowledge of how to make the information meaningful for user
