

Data reporting and dissemination in Vietnam

Nguyen Thi Thanh Tam
Social and Environmental Statistics Dept.,
GSO Vietnam

Current status

- ▶ Dissemination: There are 2 main forms to disseminate statistical data in Vietnam:
 - Publications
 - Website of General Statistics Office

Publications

- Yearly book for indicators of NSIS
- Publications on results of statistical surveys.
- For gender statistics:
 - Gender profile from 2010-2015,
 - Gender profile 2016.
- For SDGs indicators: The Prime Minister has approved the VSDGs and action plan in 2016. We are developing SDGs indicators. As planned, the SDGs indicators will be adopted in this month.

GSO's website

- NSIS data: Population and employment, national accounts, investment and construction, education, healthcare,...
 - Results of census and some surveys: Population and Housing Census, Rural, Agricultural and Fishery Census.
 - Thematic data: CPI, industrial production, import – export turnover, investment capital and investment.
 - There is not gender statistics on the GSO's website
- 

Data Dissemination

Besides:

- Press conference on socio economic data every 6 months and annually
- For some surveys, with support from the international organizations, there are videos to introduce about the survey results on mass media: MICS, VDS.

Data Dissemination

Besides:

- ▶ Press conference on socio economic data every 6 months and annually
- ▶ For some surveys, with support from the international organizations, there are short videos to introduce about the survey on mass media: MICS, VDS.

Reporting systems

Reporting systems with the table and metadata.

- Reporting system applied to line Ministries
- Reporting system applied to Provincial Statistics Office

The reports are just to be sent by email. There are not electronic reporting system for Ministries and PSOs entry and updated data to submit to General Statistics.

Shortage

- Not many people know about the data availability
 - Lack of communication between data producer and user
 - Metadata sometimes not very clear
 - Lack of technology application
- 

Further steps

- Strengthen technology application in data reporting and dissemination
- Develop electronic reporting systems for line Ministries and PSOs to report and update data
- Develop more data warehouses on, such as gender statistics, SDGs indicators, that easily to access for data users
- Promote statistical products to most policy makers and data users

Thank you!
