

# UNSD-DFID PROJECT ON SDG MONITORING

Identifying and prioritizing users

**Who is a 'user'?**

**Which users do we  
want to prioritize  
and why?**

## Brainstorming exercise (30-45 minutes):

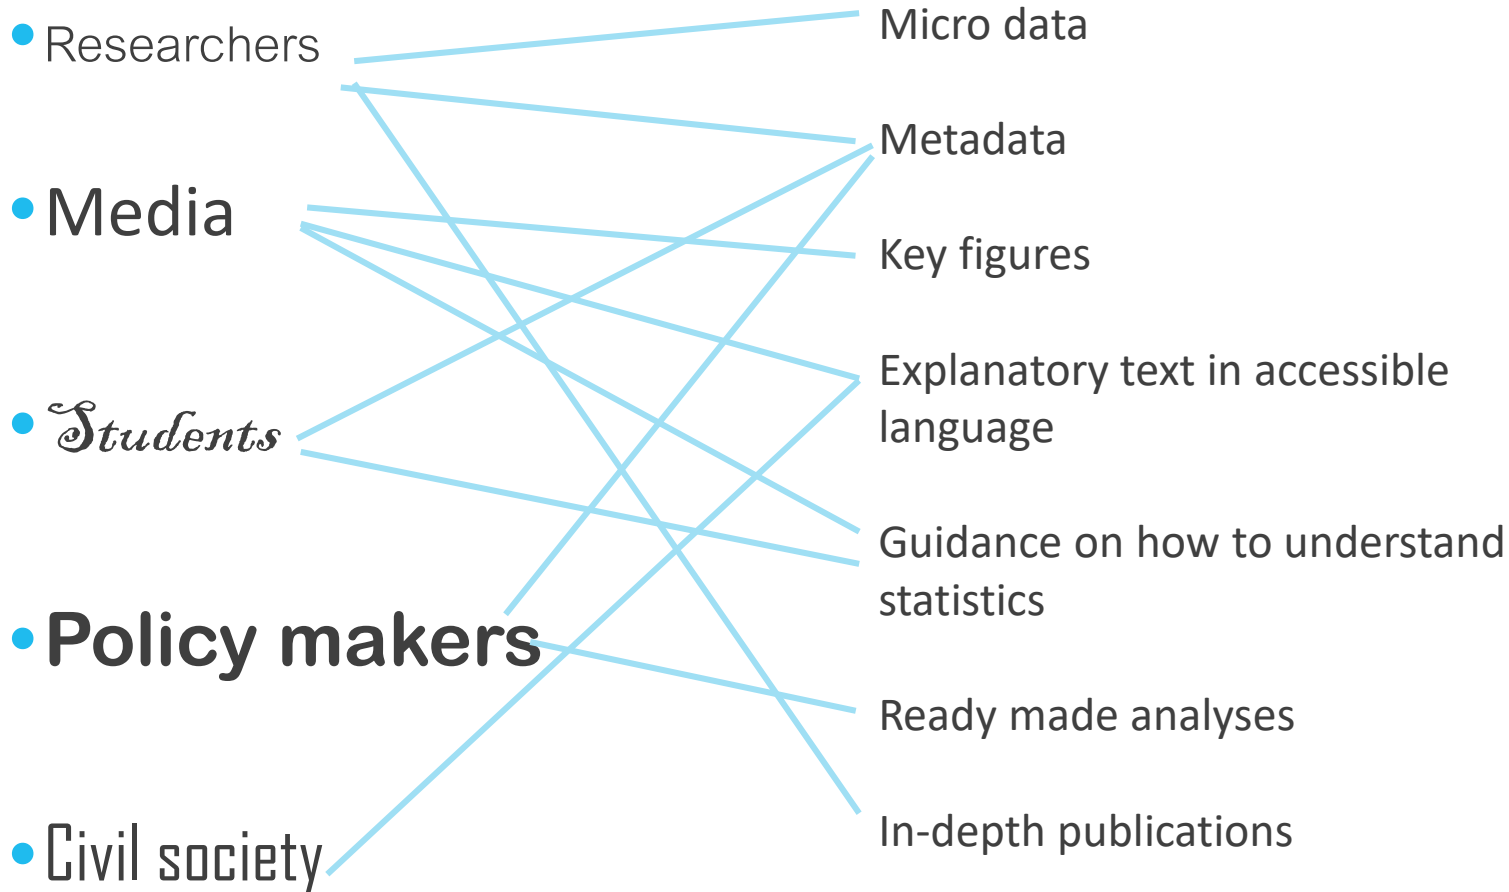

- Each group comes up with a list of users groups.
- How do you think they use the statistics produced?
- How would you prioritize different user groups?

**Report back**

# What are the needs of the different users?

**Thank you for your attention!**
