

NAMIBIA SPATIAL DATA INFRASTRUCTURE (NSDI) IN SUPPORT OF NATIONAL DEVELOPMENT PLANNING

Africa Thematic Conference:
Managing a statistical organization in times of change

08 October 2019

Pretoria

OUTLINE

1. NAMIBIA STATISTICS AGENCY
2. NATIONAL SPATIAL DATA INFRASTRUCTURE (NSDI)
3. NAMIBIA USE CASES OF SPATIAL INFORMATION
4. CENSUS MAPPING
5. IMPLEMENTATION CHALLENGES

Namibia in context

NSDI

when fully developed will provide standardised and accurate spatial planning data and basic land statistics for the country

1. Communal Land (35%)

2. Freehold Land (42%)

3. State Land (23%)

4. Plus Oceanography & Marine 513 015 km²

• The sea consists of both the territorial waters (23 541 km²) and Exclusive Economic Zone (48 247 km²).

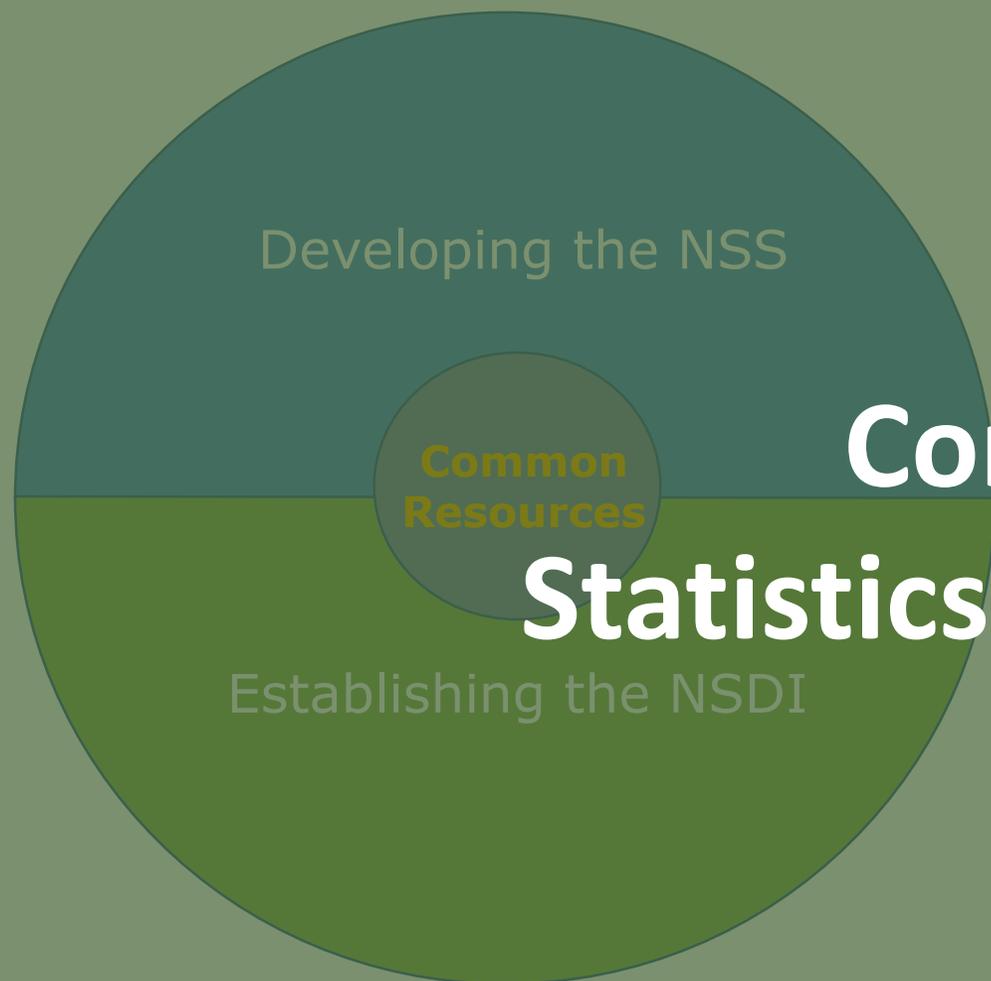

5. Population + 2.4 Million

NAMIBIA STATISTICS AGENCY

Statistics Act, No. 9 of 2011

*NSA one organisation
two responsibilities*

NSDI developed in
consultation with the
Ministry of Land Reform

Combining Statistics with Location

NATIONAL SPATIAL DATA INFRASTRUCTURE (NSDI)

GENERAL NOTICE

No. 103 Namibia Statistics Agency: National Spatial Data Infrastructure (NSDI) Policy 1

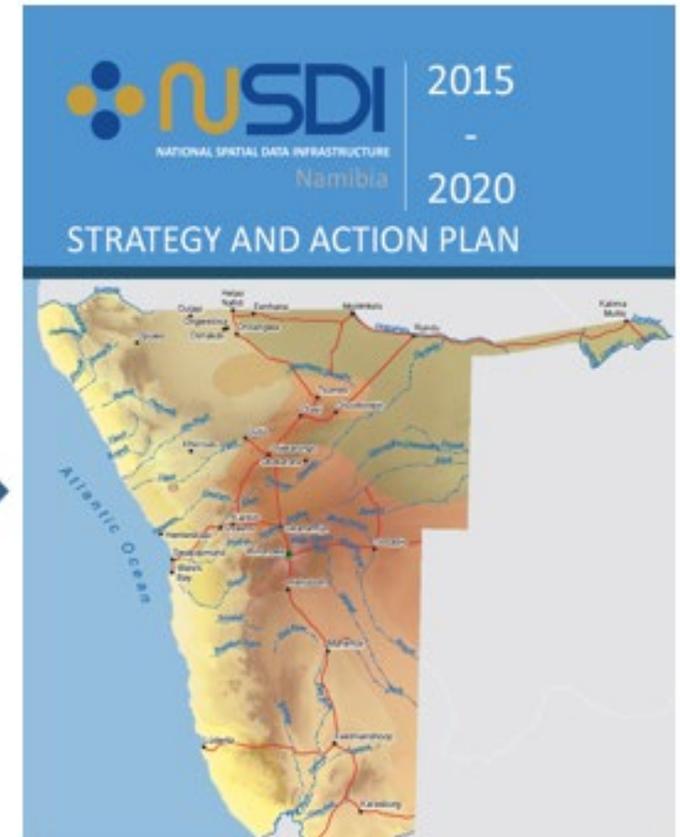

General Notice

NAMIBIA STATISTICS AGENCY

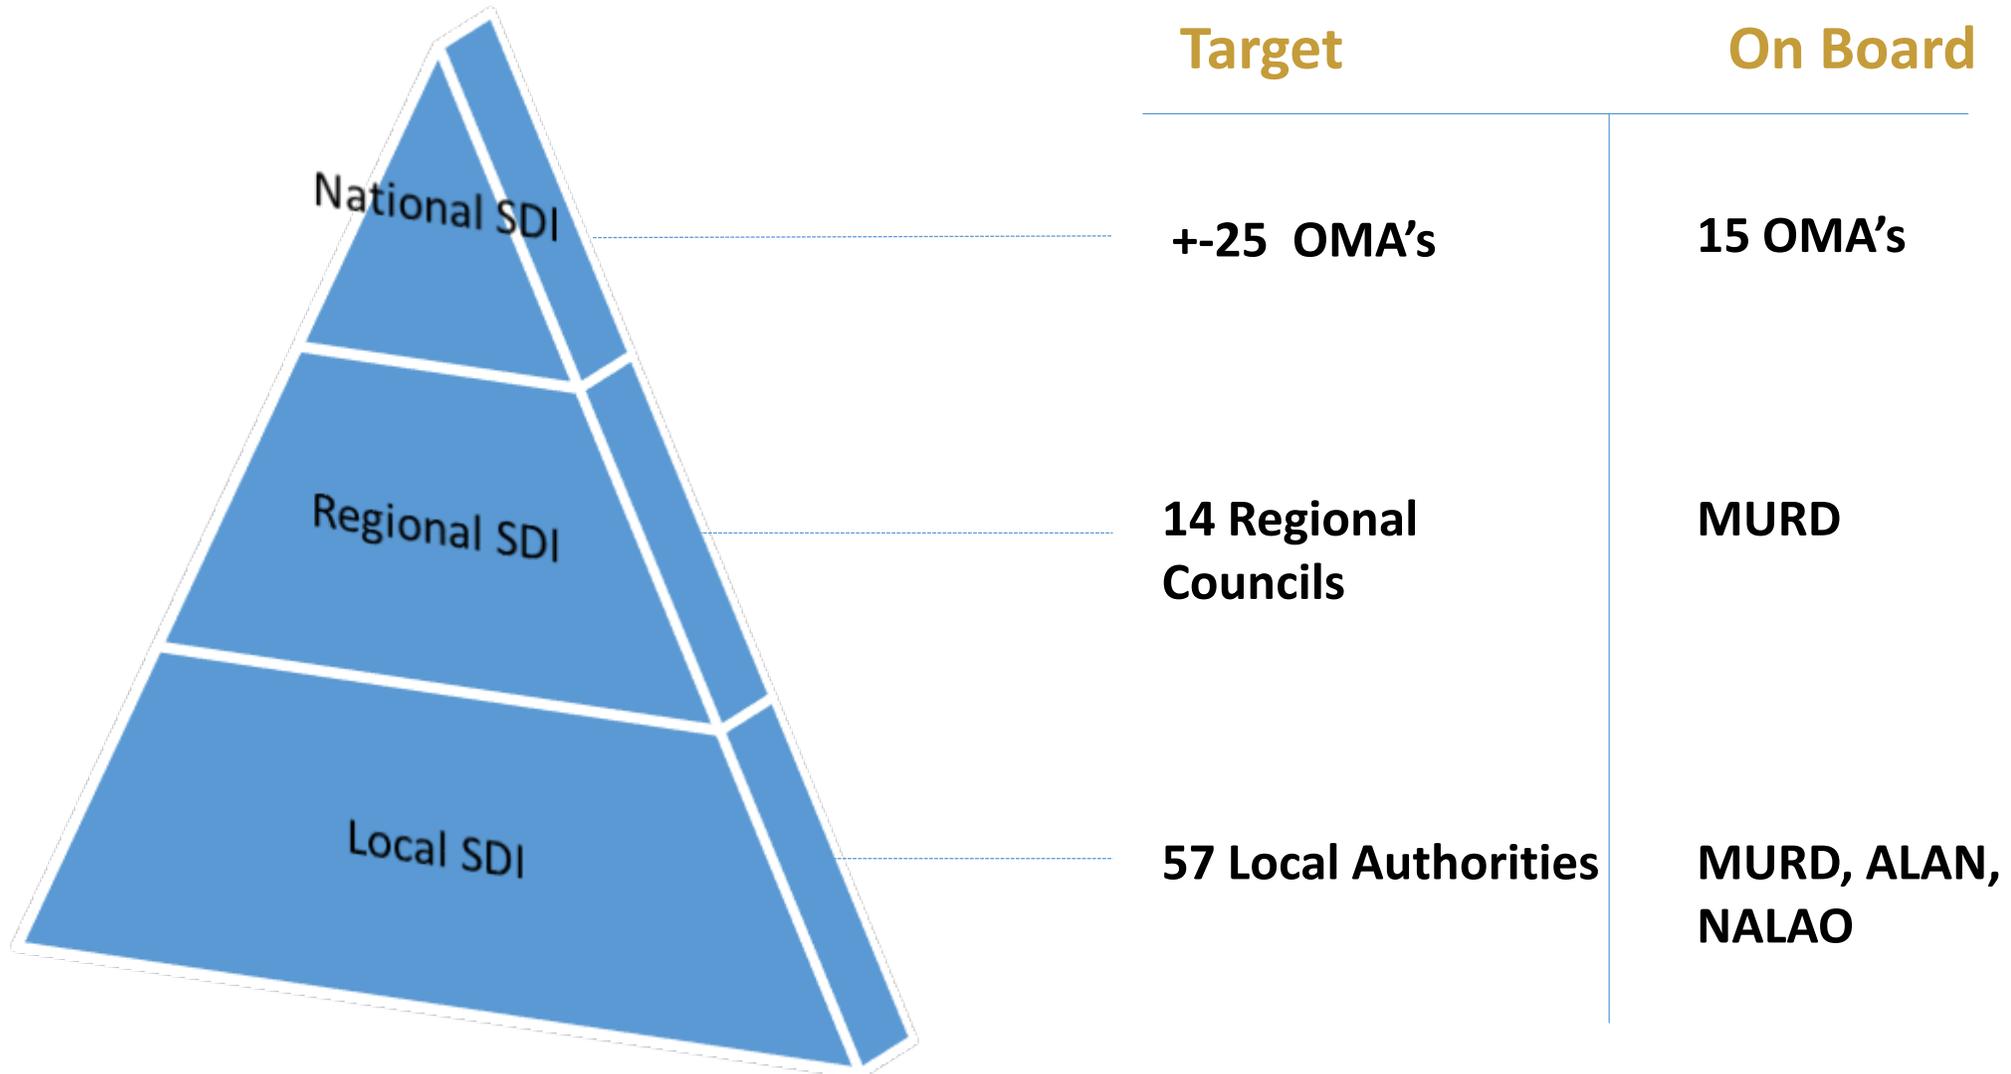

No. 103 2015

NATIONAL SPATIAL DATA INFRASTRUCTURE (NSDI) POLICY

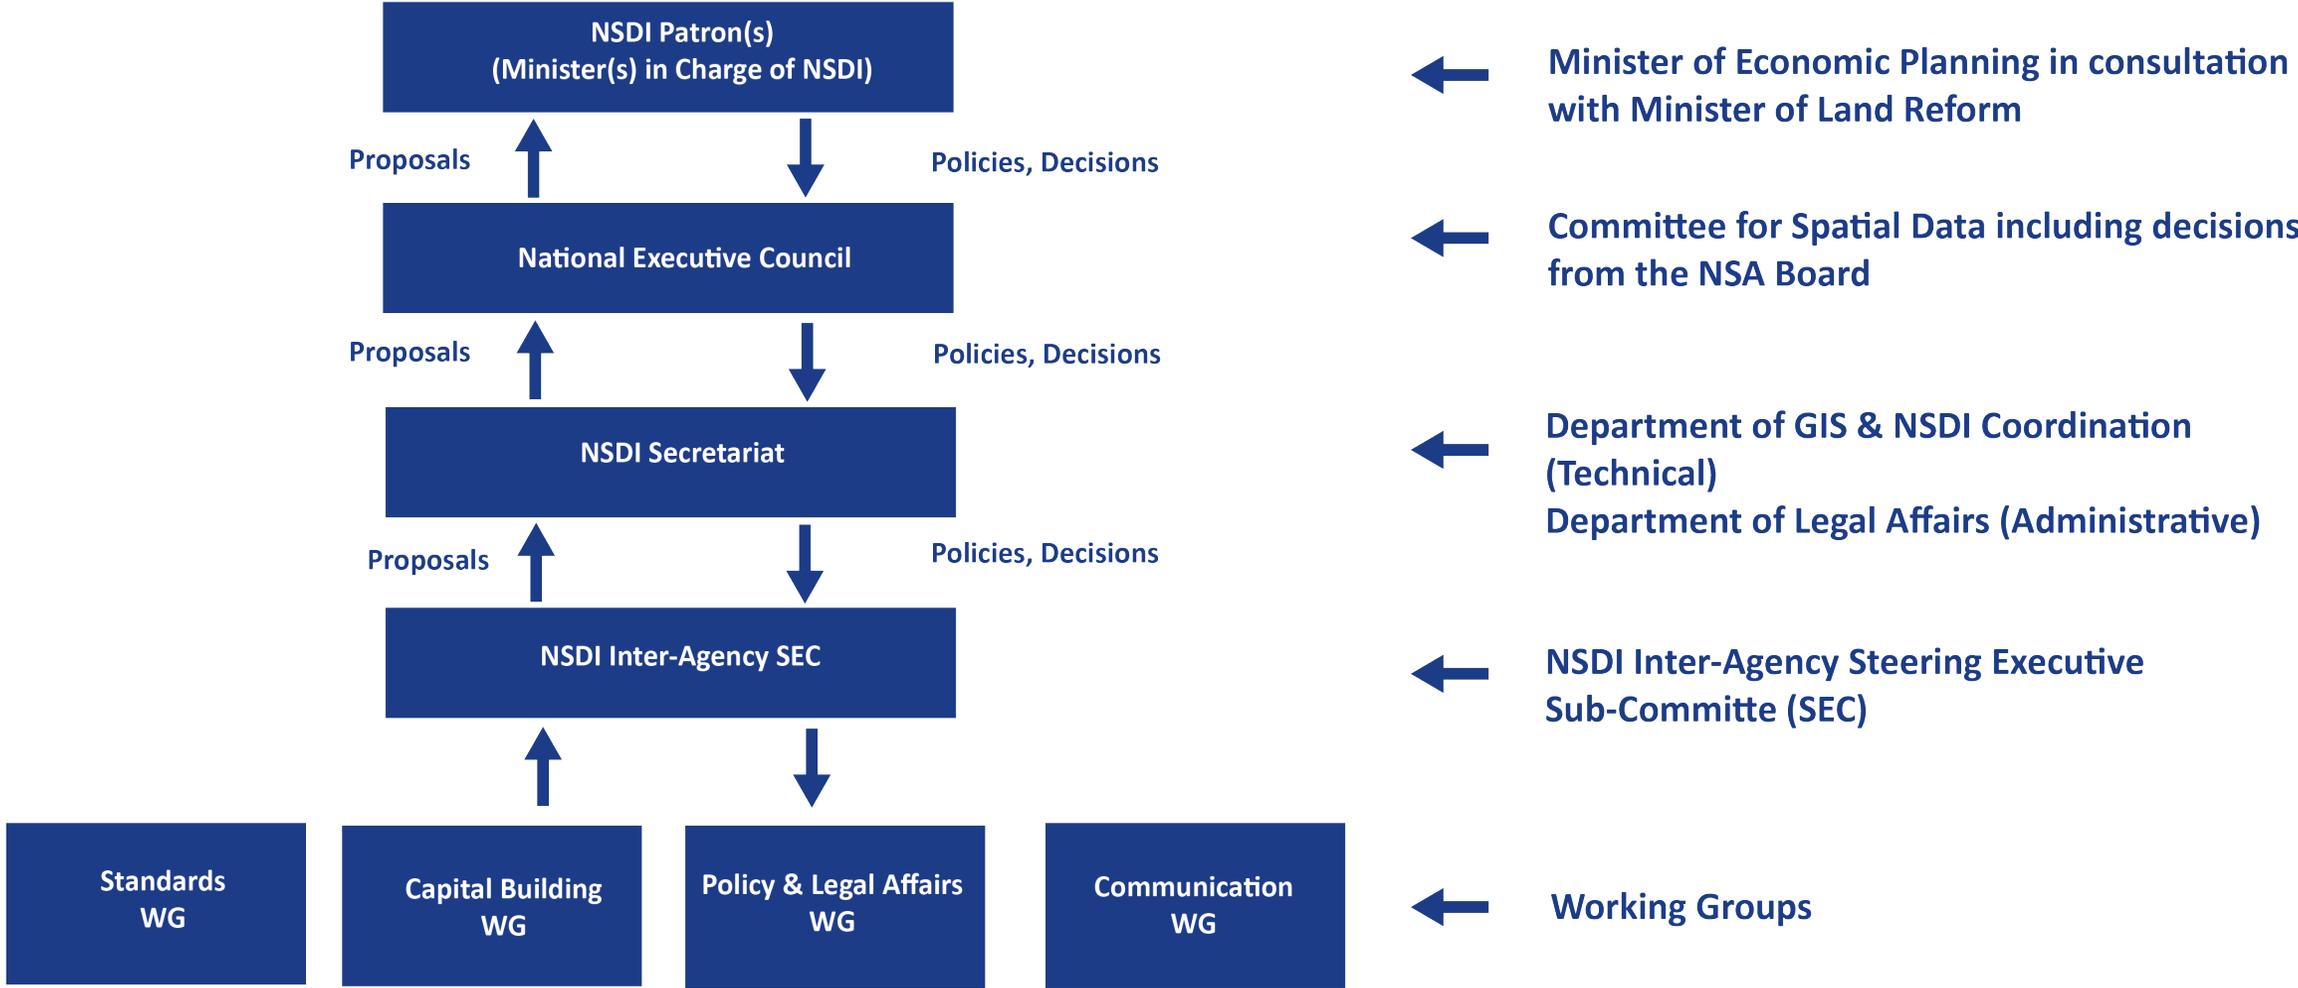

Many parties, individuals and organisations, are involved in the production and use of spatial data in Namibia. The main producers of spatial data are the various line Ministries in Government. Their activities related to spatial data include data collection, processing, integration, storage, exchange, access and dissemination. The private sector and Non-Government Organisations also produce spatial data. The main users of spatial data and related services are Government, utility companies, public services, private sector commercial and professional users, research institutions, international organisations, the donor community and the general public. An important characteristic of spatial data is that many serve a variety of purposes and the same datasets are therefore useful for many data users.

NSDI INSTITUTIONAL FRAMEWORK CONT....

NSDI GOVERNANCE STRUCTURE

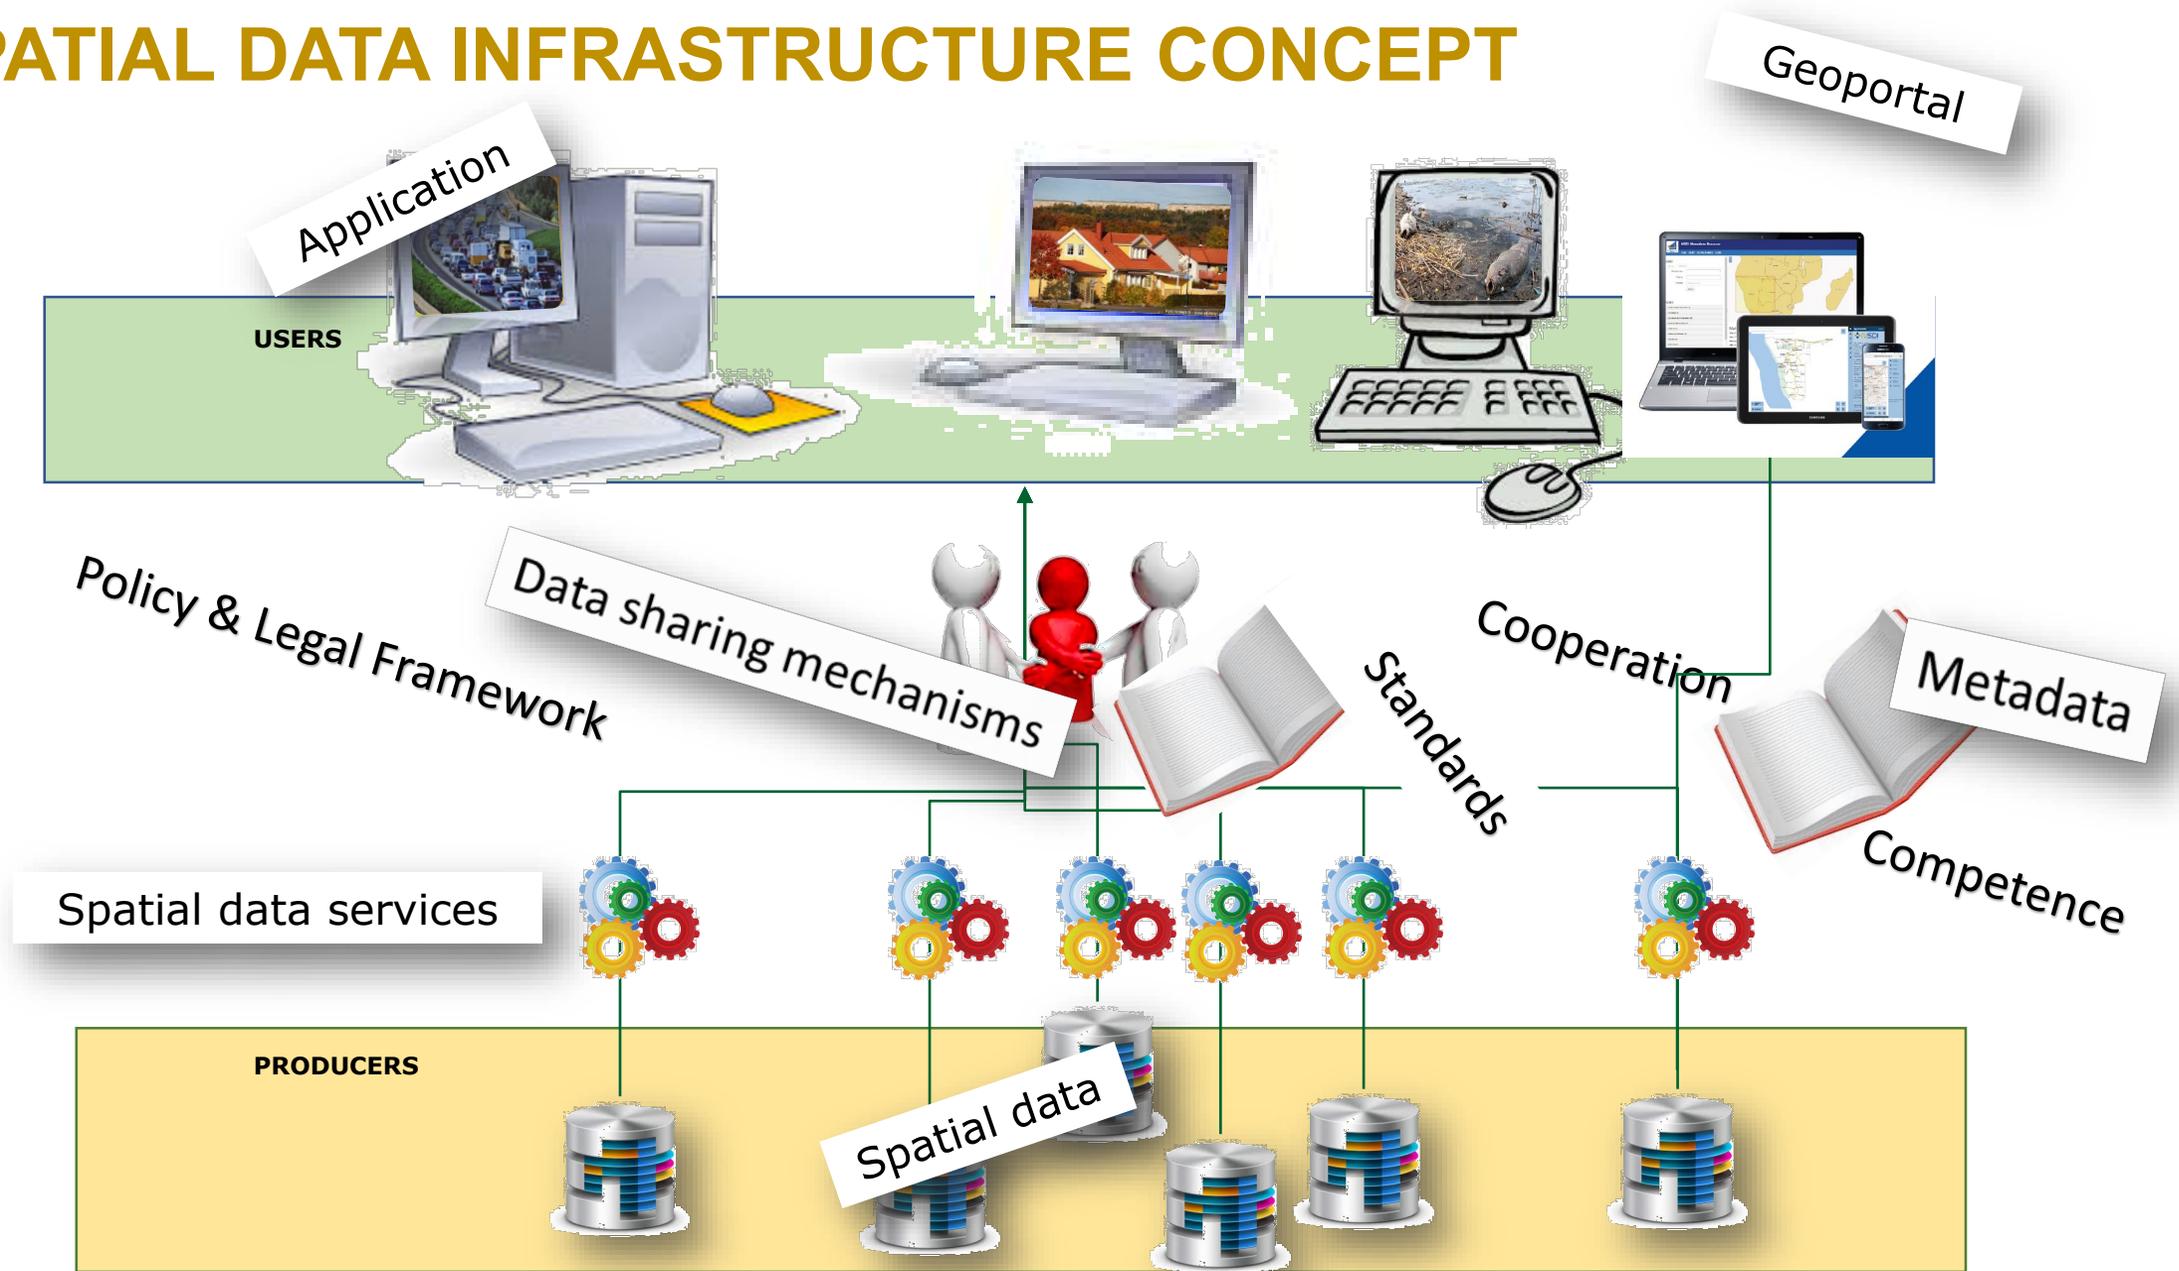

NSDI SIGNED PARTNERSHIP AGREEMENTS

1. Ministry of Mines and Energy
2. Ministry of Land Reform
3. Ministry of Urban and Rural Development
4. Ministry of Environment and Tourism
5. Ministry of Agriculture, Water and Forestry
6. Ministry of Industrialization, Trade and SME Development
7. Ministry of Education, Art and Culture
8. Nampower
9. Namwater
10. Telecom
11. Roads Authority
12. MTC
13. Erongo Red
14. Cenored
15. NSA
16. NPC
17. NUST, UNAM (by Virtue of Mandate)

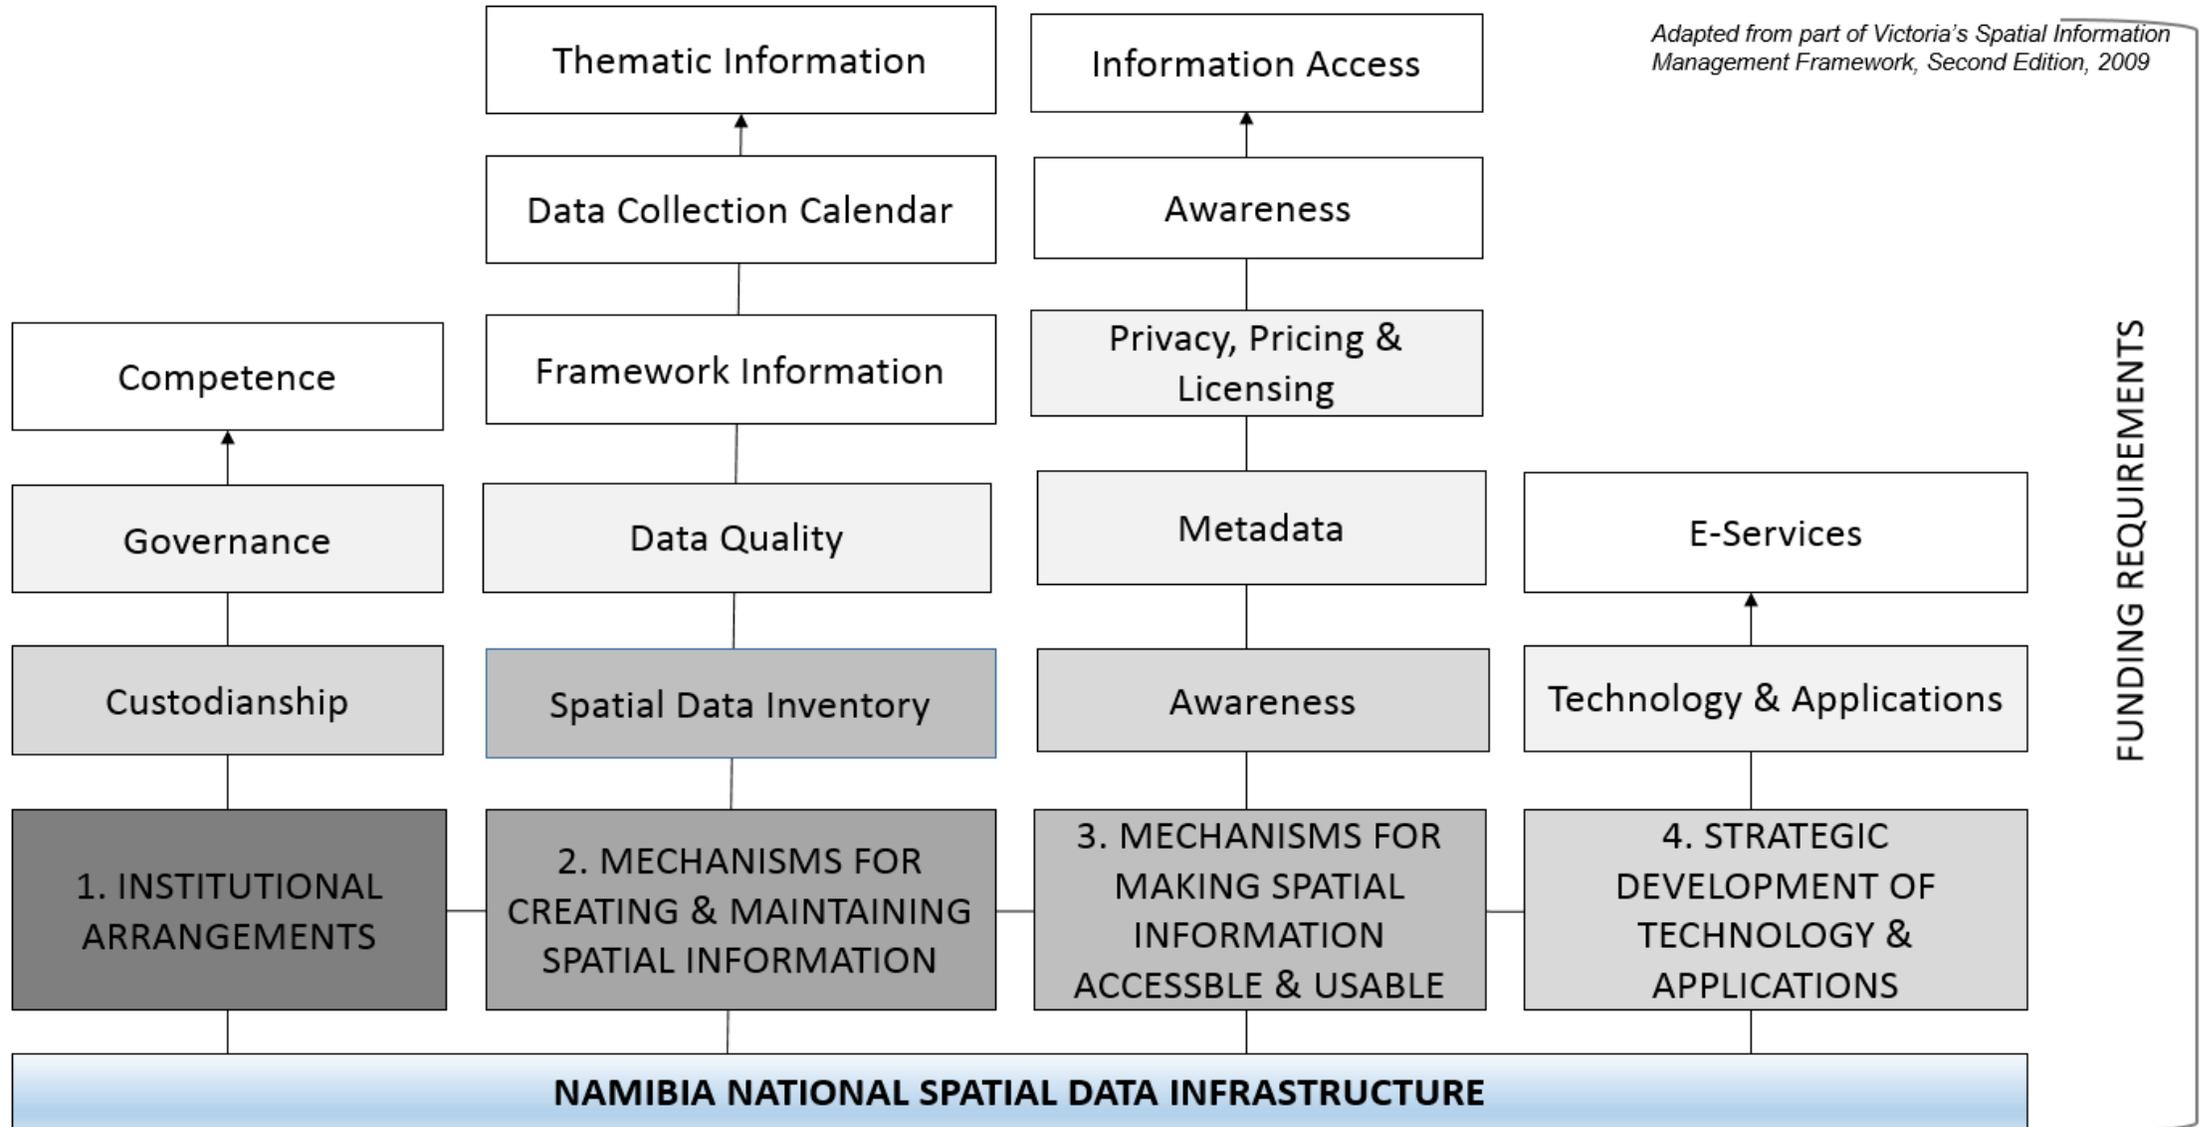

NSDI PARTNERSHIPS STILL TO BE ENGAGED

1. Office of the Prime Minister (OPM) - reviewing MoU
2. Ministry of Health and Social Services - reviewing MoU
3. Ministry of Defense
4. Ministry of Safety and Security
5. Ministry of Works and Transport
6. Namibia Civil Aviation Authority
7. ALAN, NALAO
8. 14 x Regional Councils
9. Nored
10. Ministry of Fisheries and Marine Resources

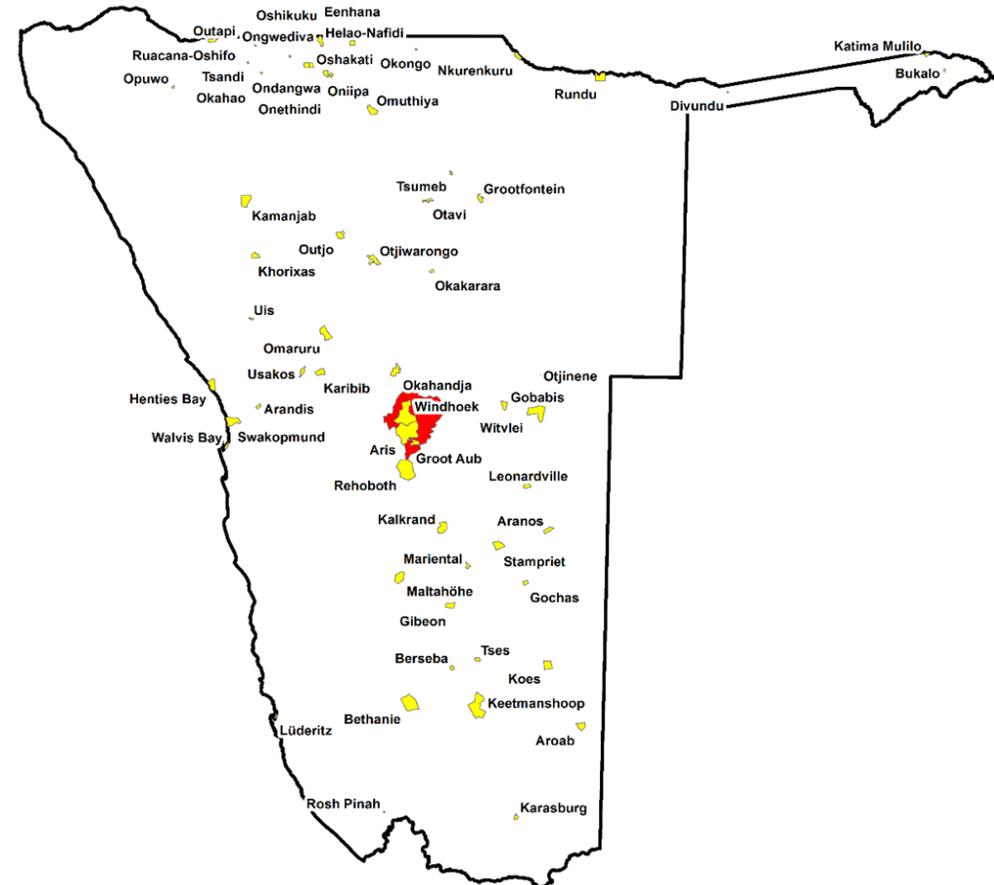

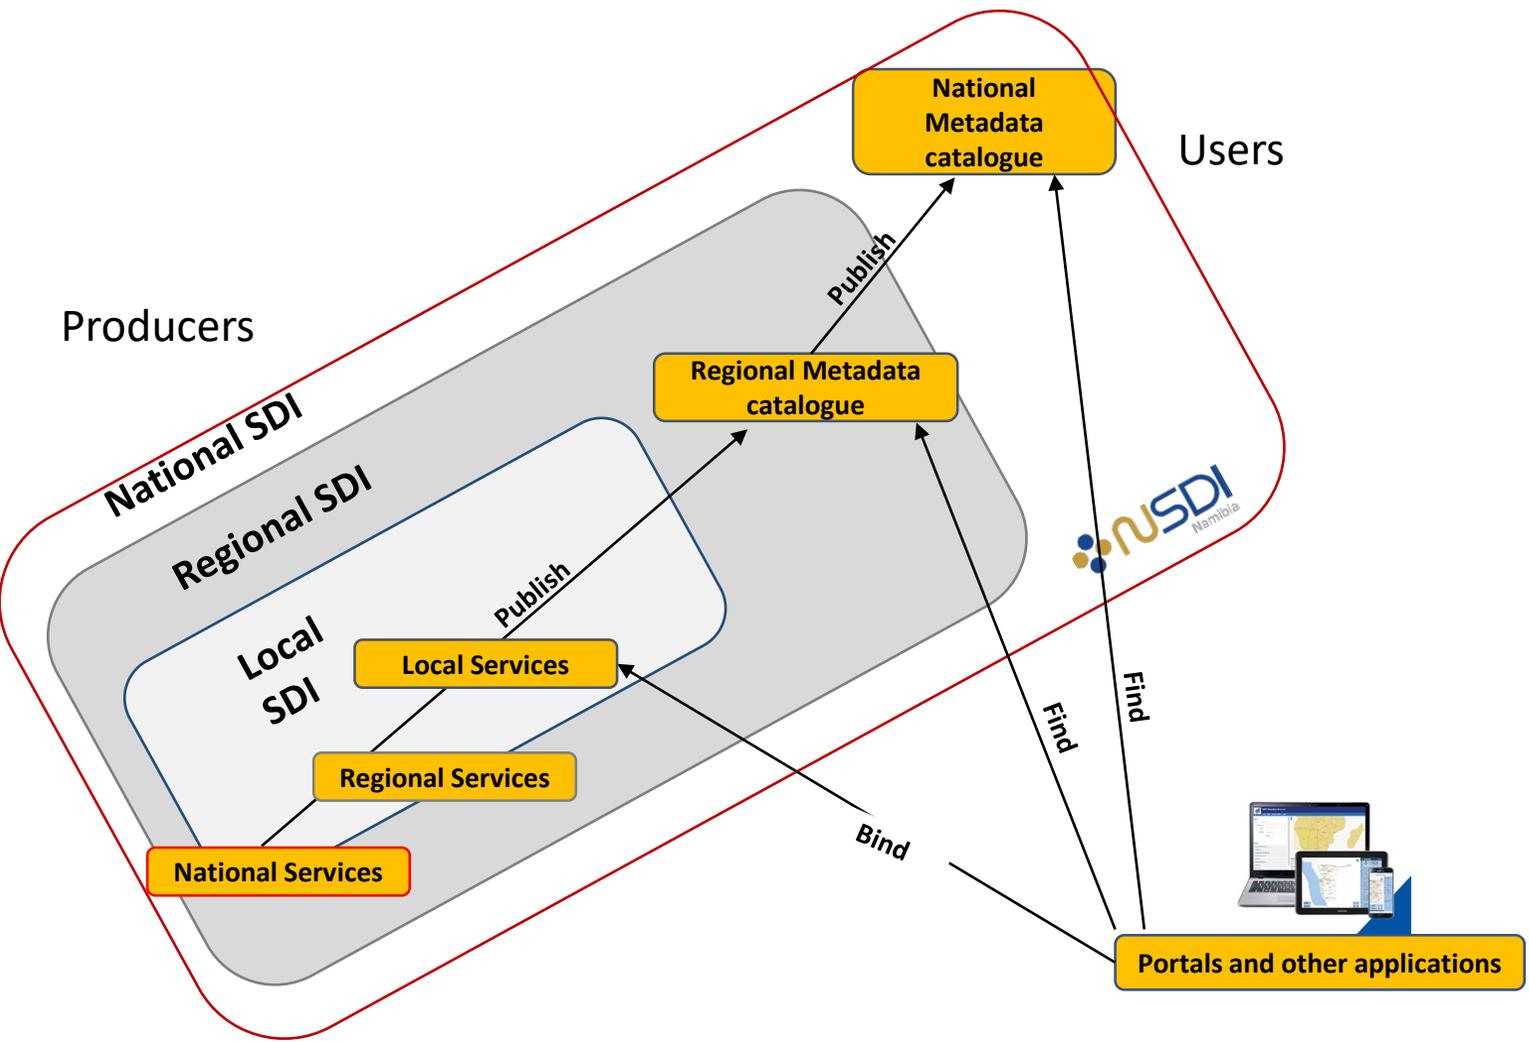

SPATIAL DATA INFRASTRUCTURE CONCEPT

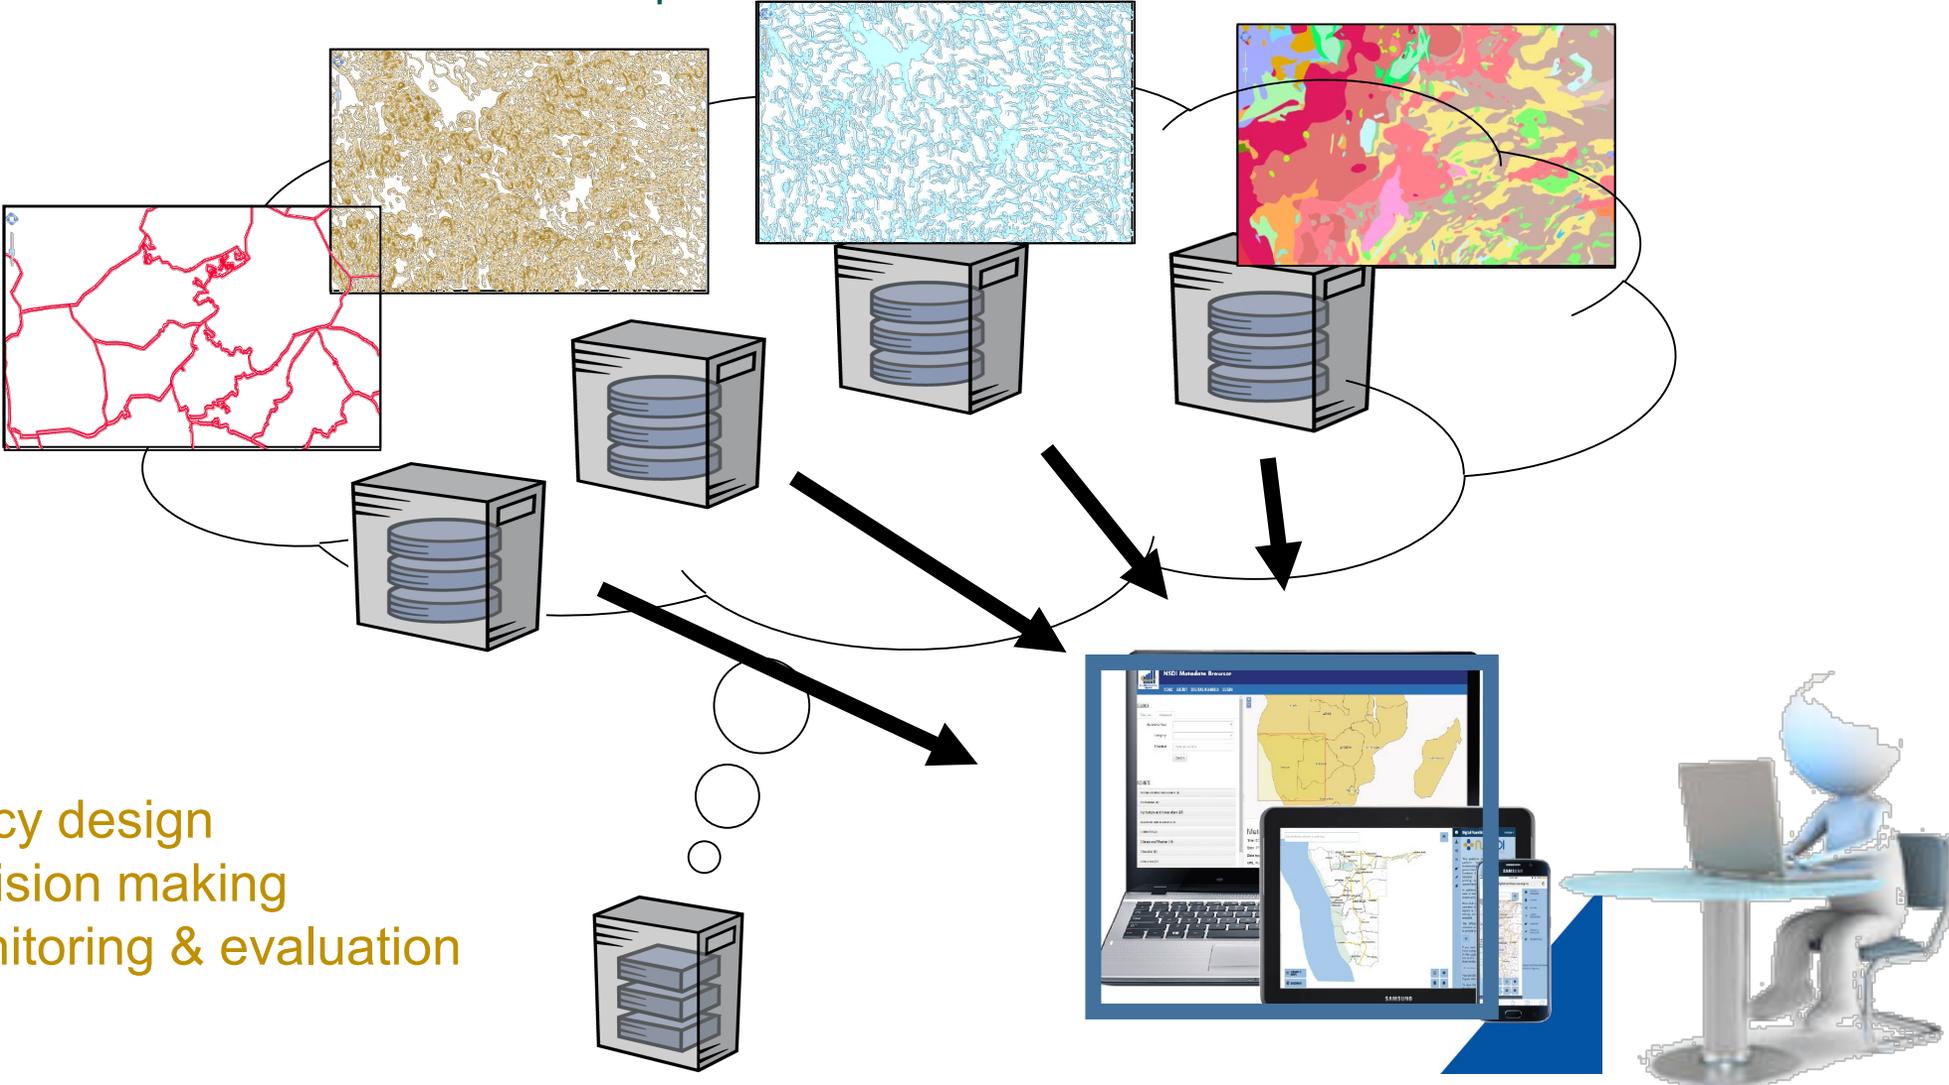

What strategy is Namibia implementing NSDI?

NSDI TECHNICAL IMPLEMENTATION ARCHITECTURE

Medium to long term : E-Governance enabled access to National Development Information

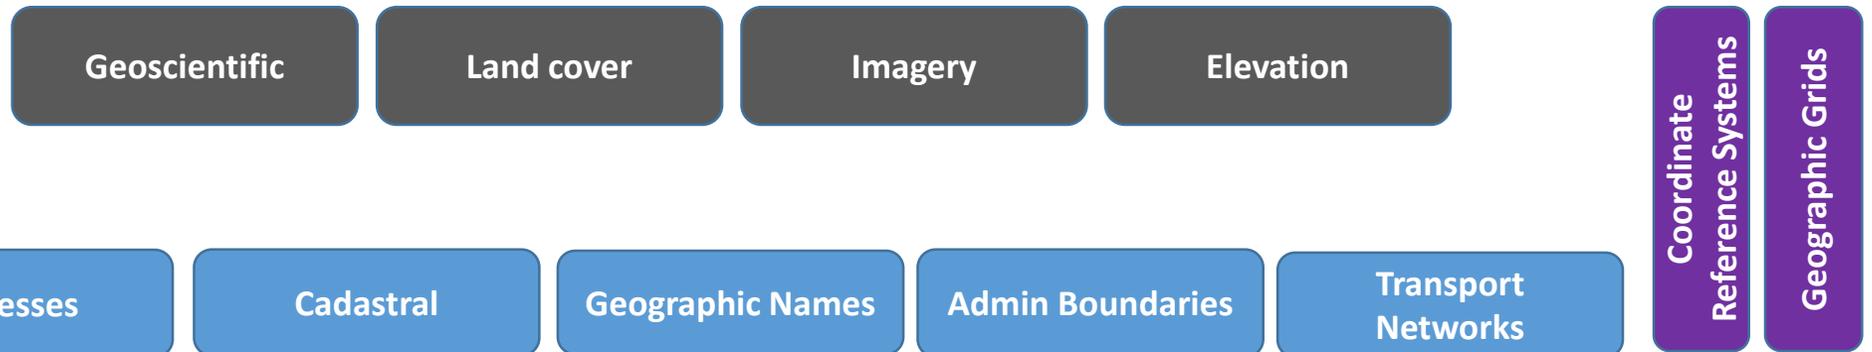

- ✓ Better policy design
- ✓ Better decision making
- ✓ Better monitoring & evaluation

GAZETTED NATIONAL FUNDAMENTAL GEOSPATIAL DATA THEMES

Level III (13)

Level II(4)

Level I(5)

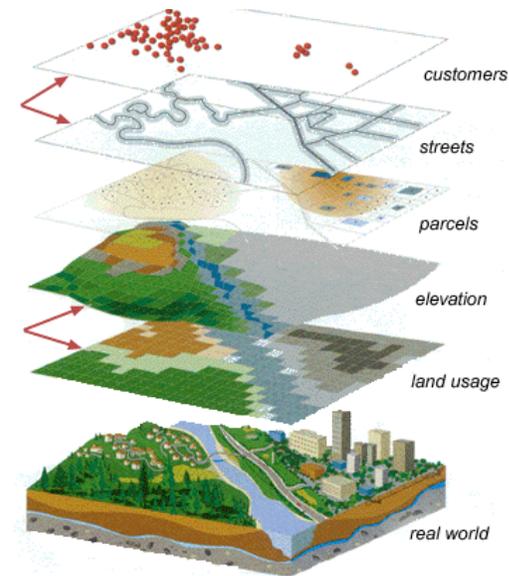

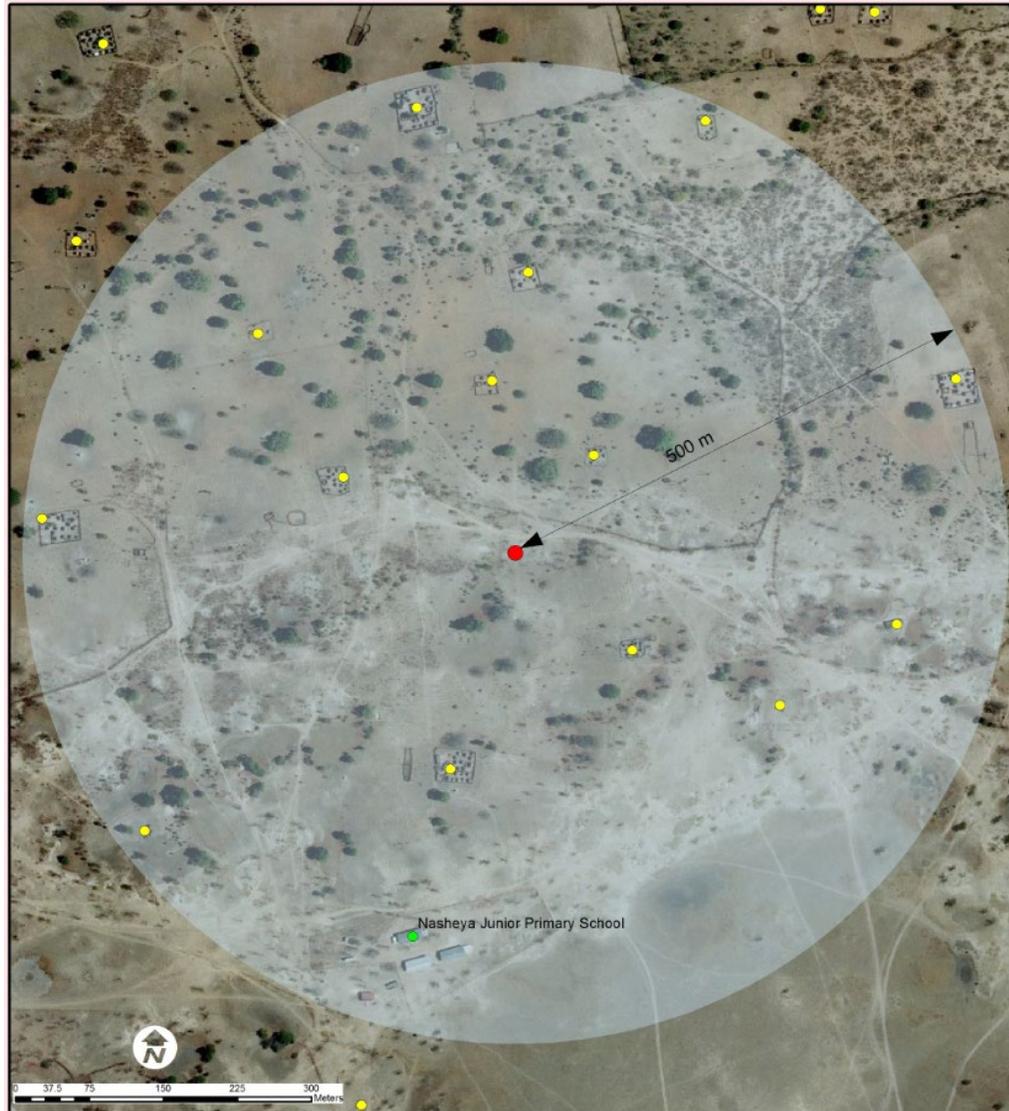

22 x Main Fundamental Data Themes

NATIONAL AND GLOBAL DATA INTEGRATION STRATEGY

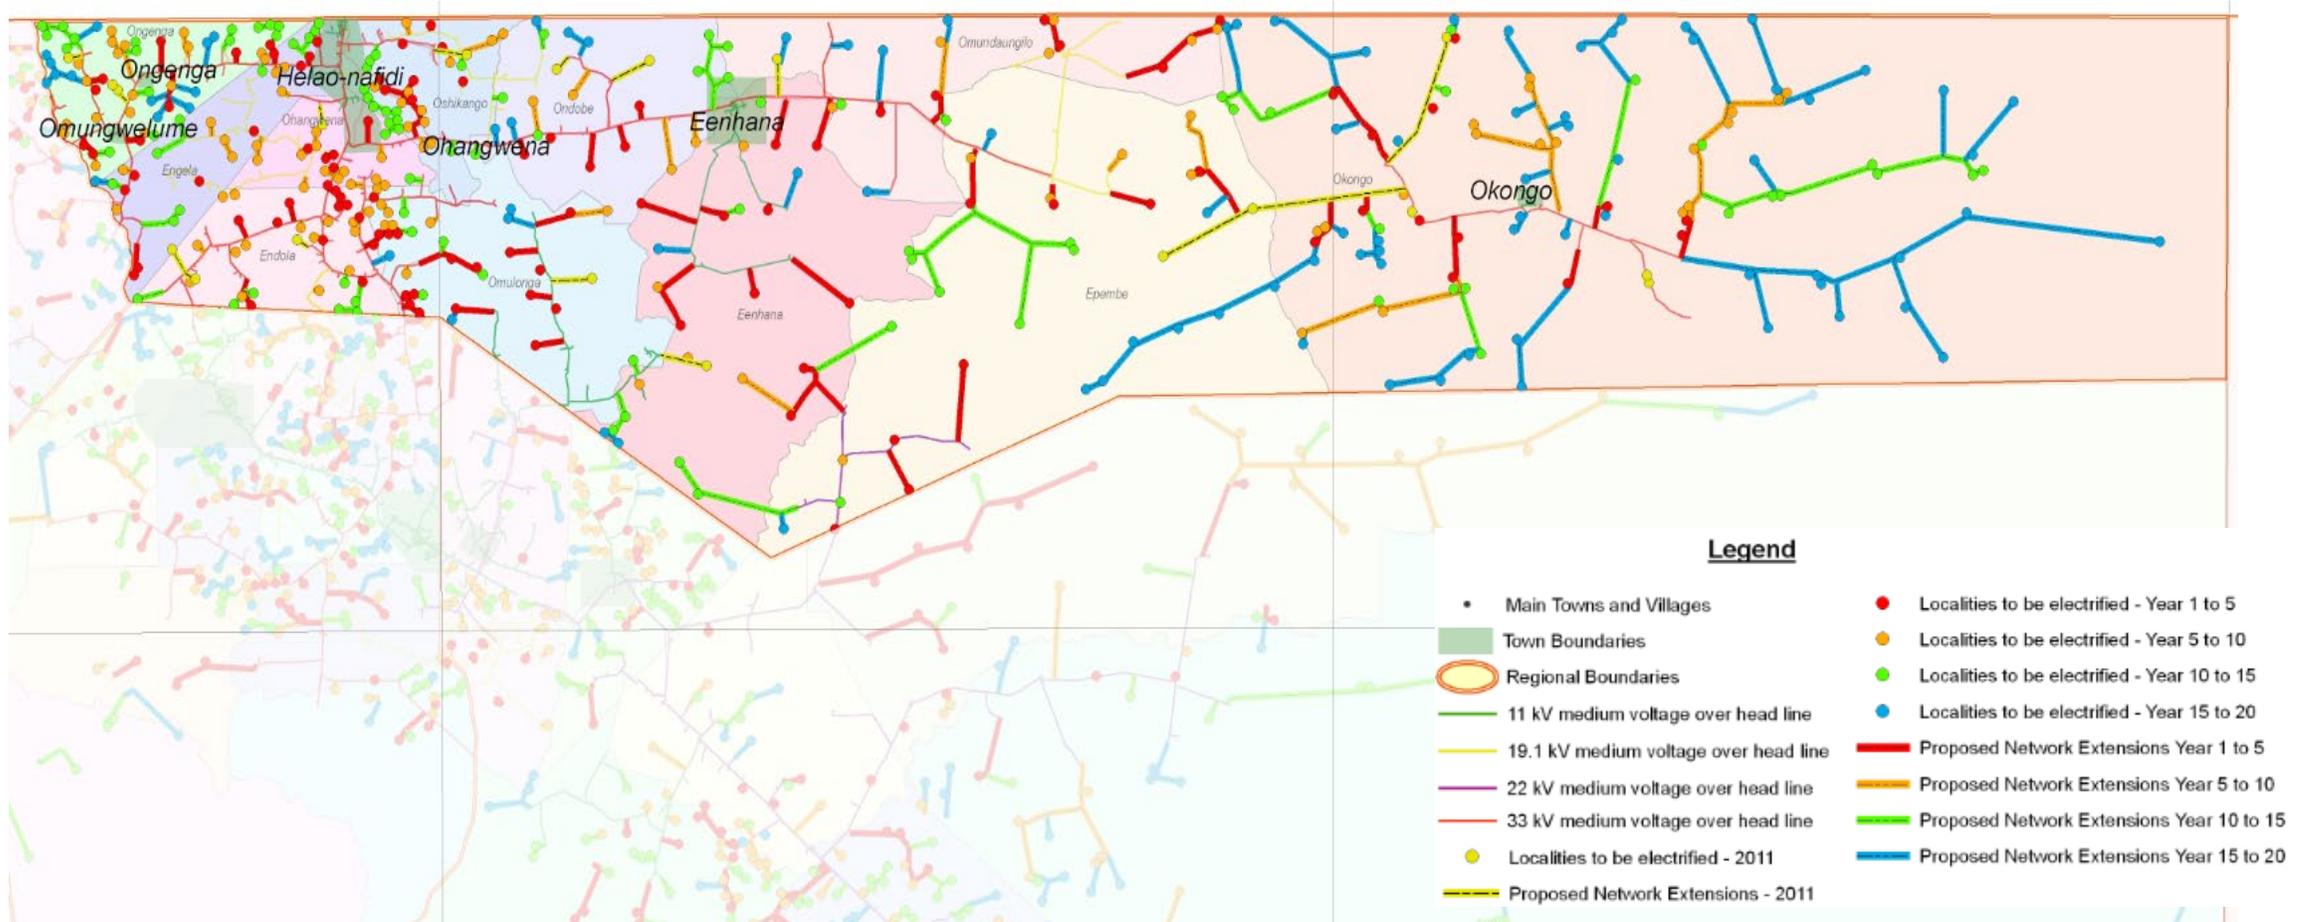

Towards a National Development Information Infrastructure...

NAMIBIAN EXAMPLE : THE POWER OF KNOWING THE “WHERE”...

- MME'S 2010 Rural Electrification Master Plan is based on identifying communities without **access to the national power grid**.
- To determine which communities are assigned a higher priority, consider all structures within a 500m radius of a planned transformer point.
- Communities with **schools** or **other government structures** are assigned higher priority ratings than those containing only homesteads.

PROPOSED ELECTRICITY NETWORK EXTENSION – YEAR 1 TO 20

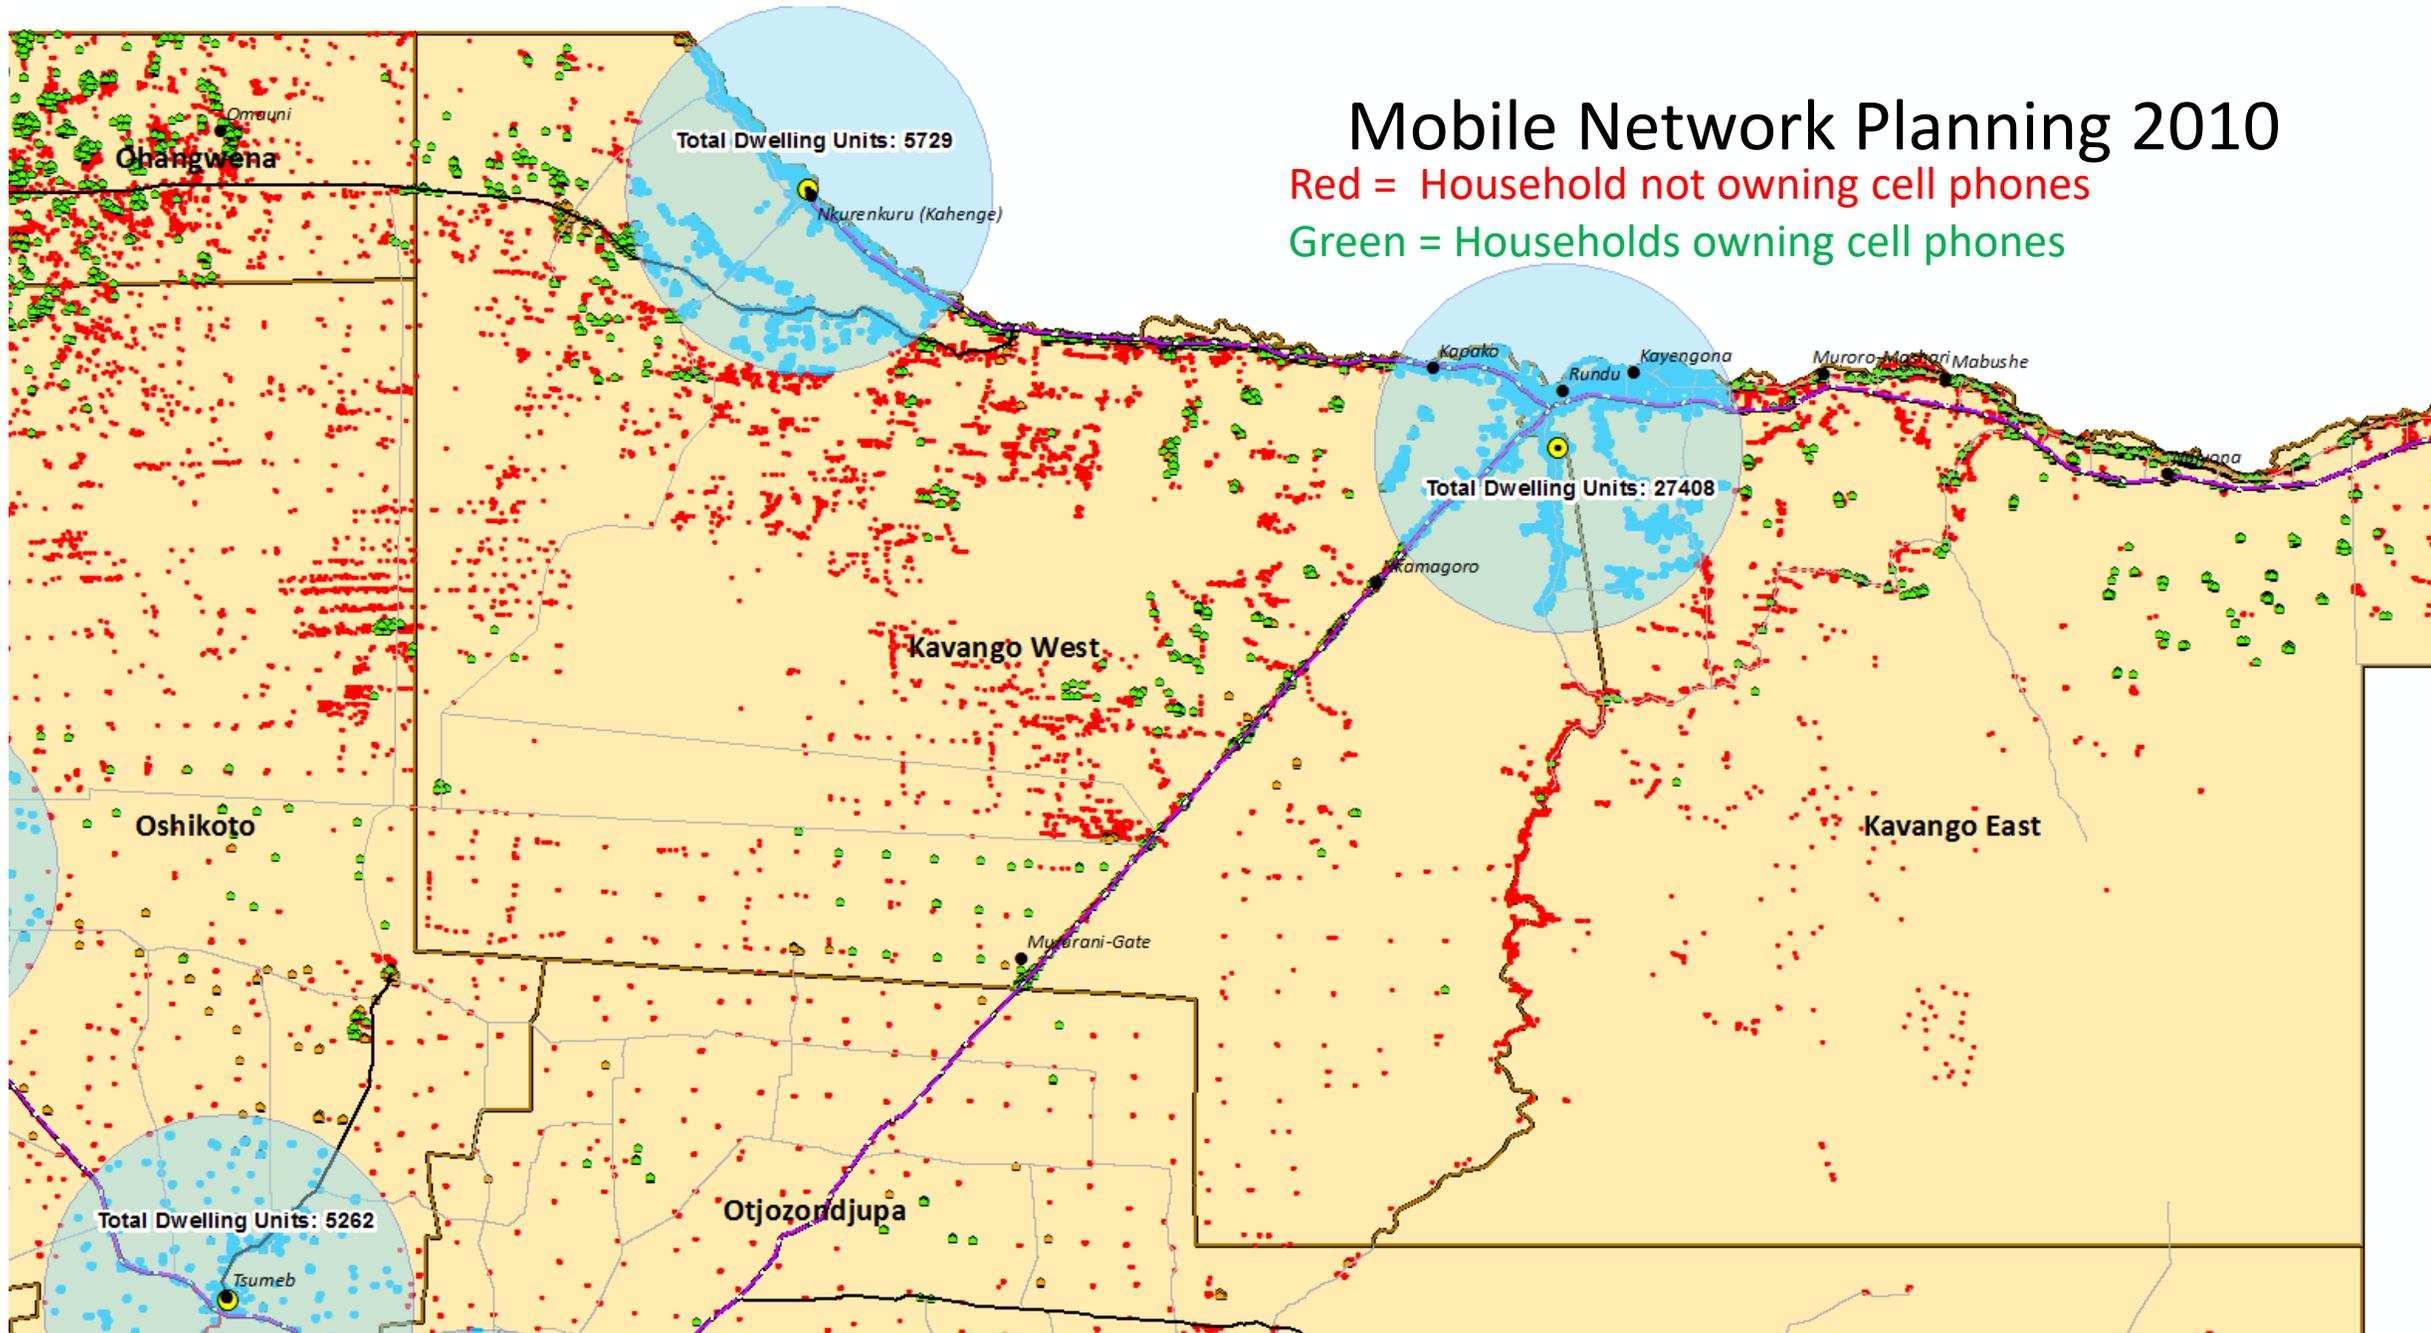

Source: Ministry of Mines & Energy - Rural Electricity Distribution Master Plan 2010 Update

Mobile Network Planning 2010

Red = Household not owning cell phones

Green = Households owning cell phones

Development Statistics - Road Network Growth

PROMOTING REAL TO NEAR REAL-TIME DATA

Flooding in Eastern Kavango in 2012, the dots represent homesteads

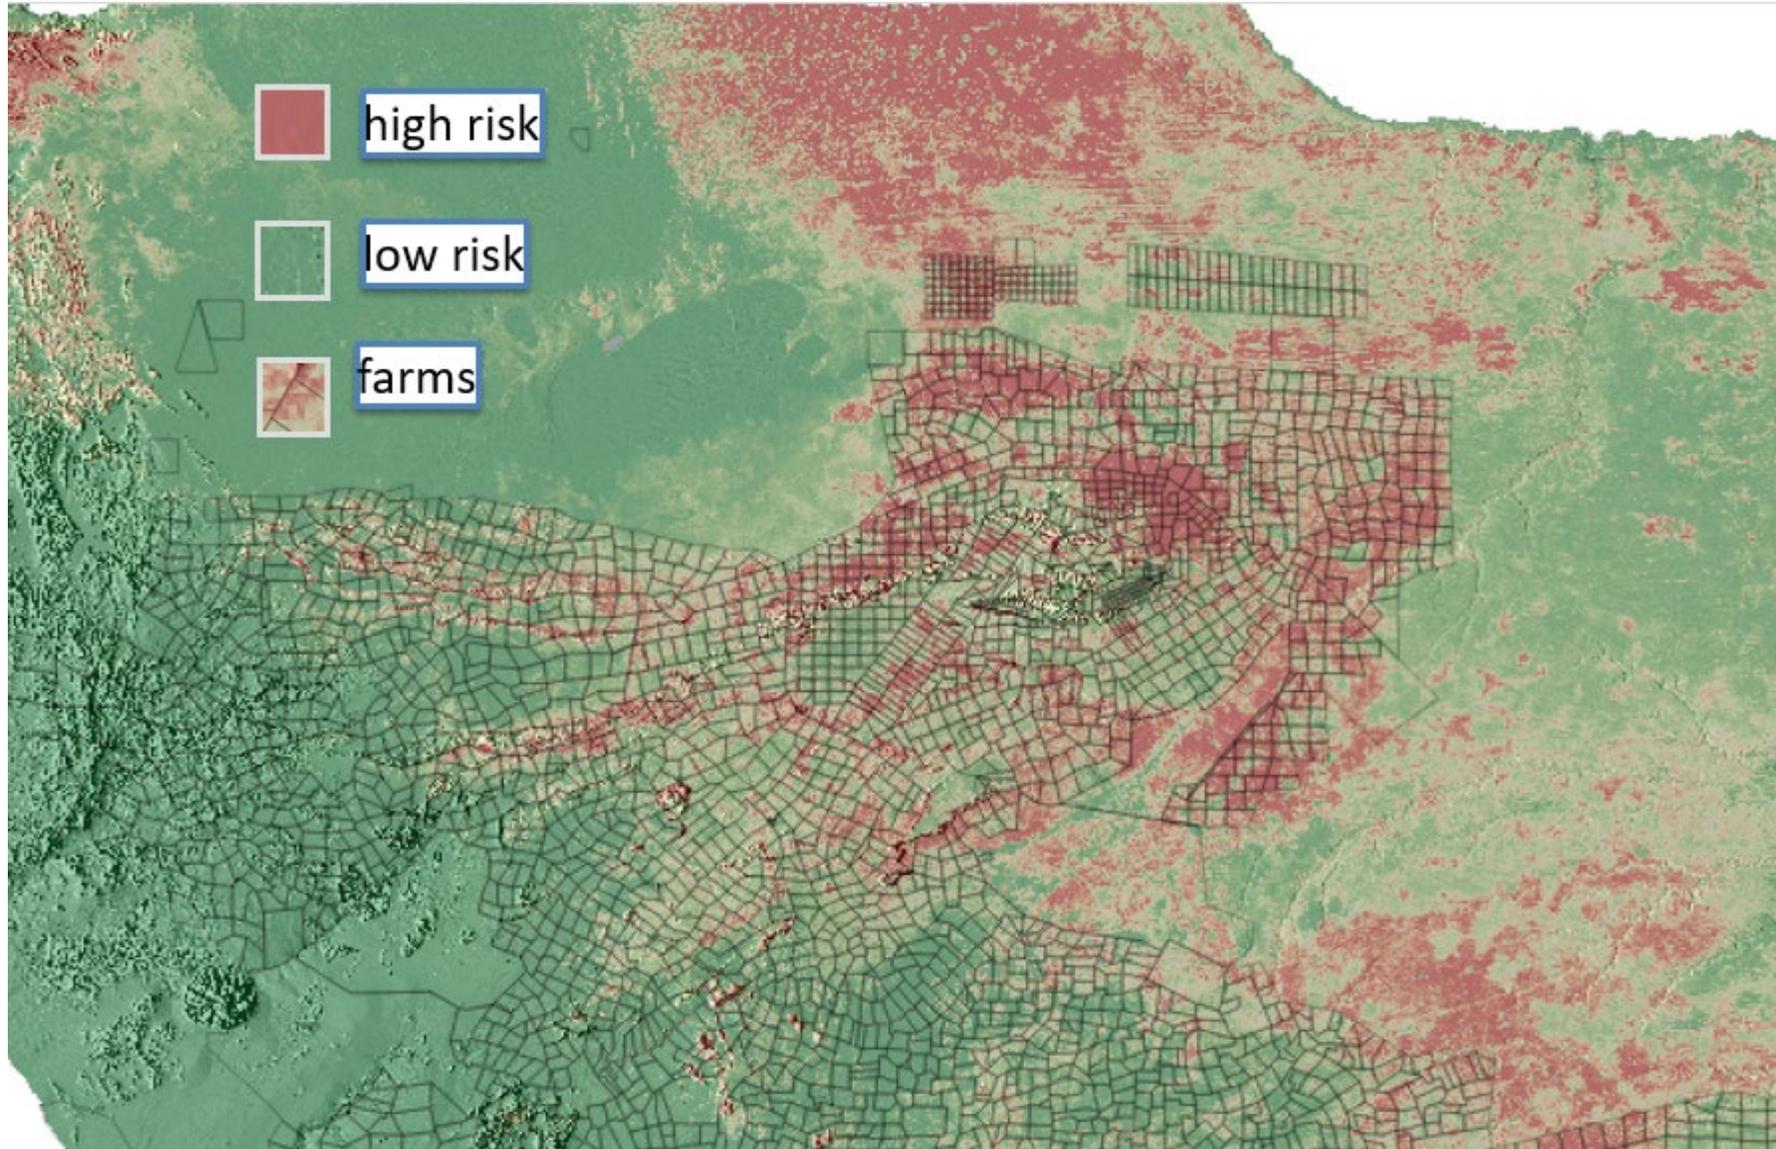

- Flood Vulnerability Assessment

Water Flow	1030 m ³ /s	596.866 km ²
Water Flow	600 m ³ /s	459.836 km ²
Water Flow	100 m ³ /s	196.748 km ²

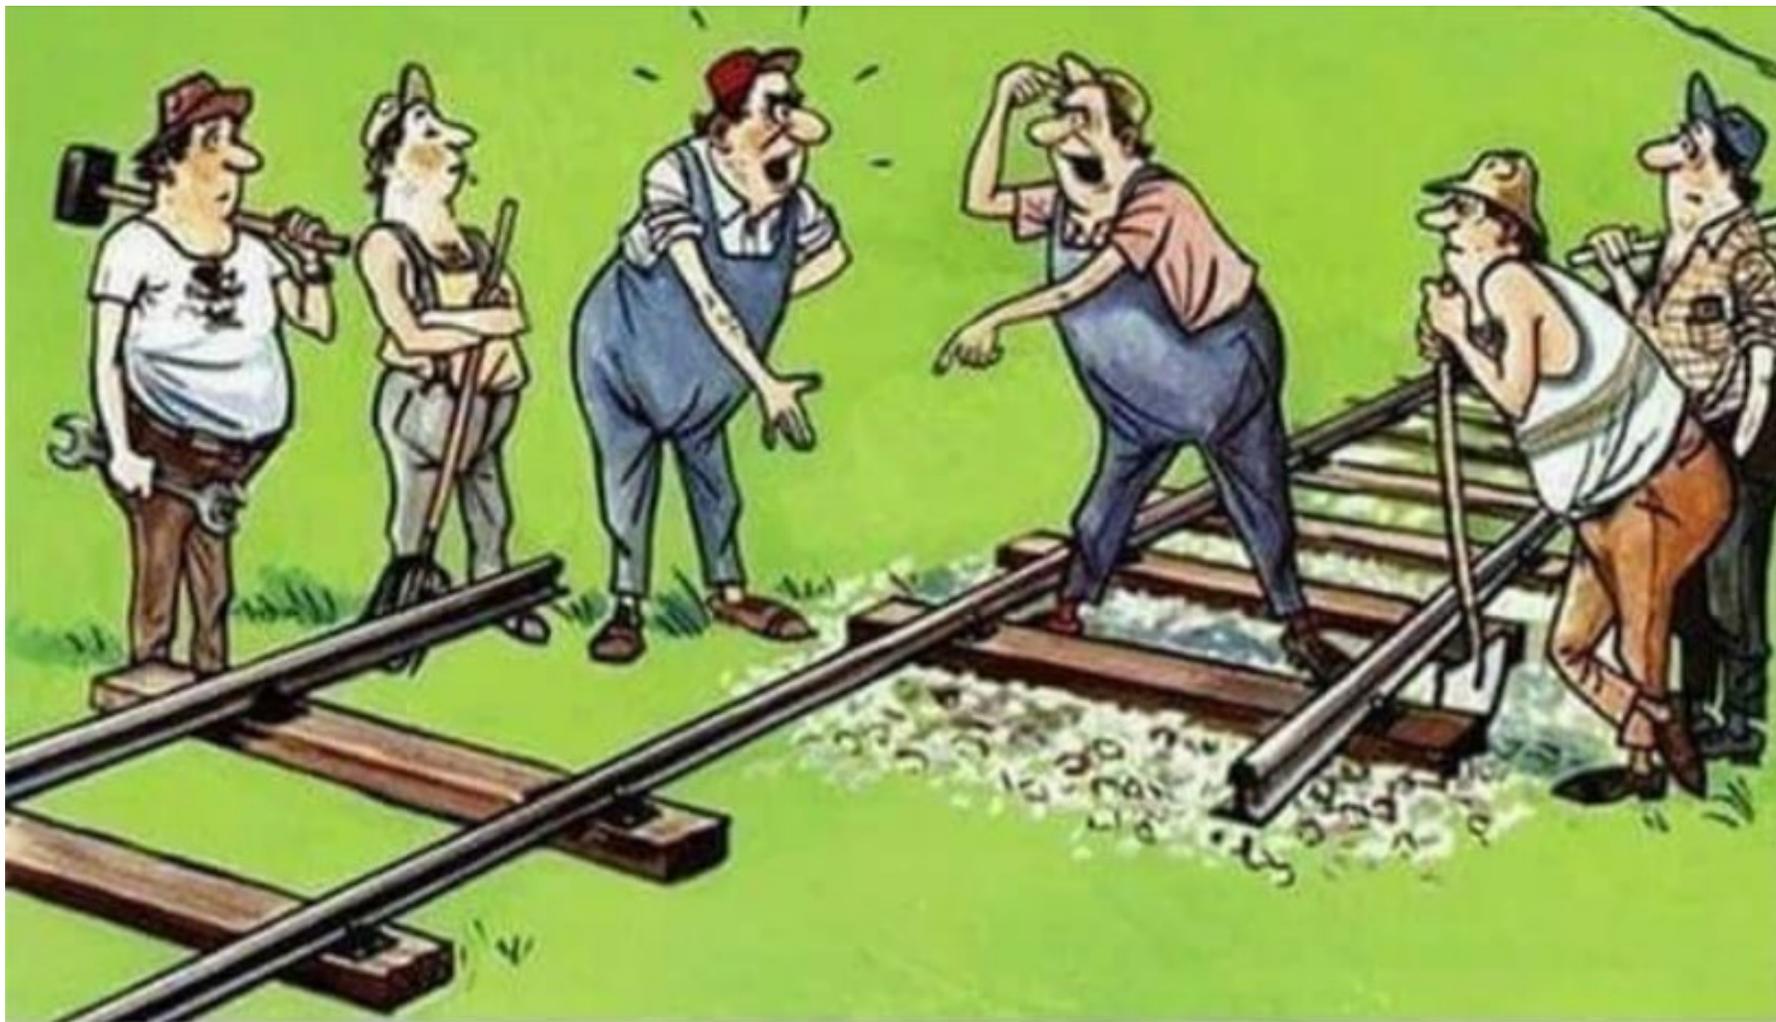

Risks of livestock production loss due to bush encroachment in 2015

High bush cover reduces grass growth and decreases livestock production

UNCOORDINATED DEVELOPMENT PLANNING

CENSUS UNDERTAKINGS IN NAMIBIA

1. NSA tasked by the **Statistics Act, 2011** to conduct a **PHC every 10 years** & UN Recommendations
2. Census undertaken: 1991, 2001, 2011 (next PHC in 2021)
3. Provide demographic and socio-economic statistical information on population and its living quarters
4. Provide data for small geographic areas & population groups for each and every citizen

CENSUS METHODOLOGY & OUTPUTS

1. 1st PHC to be **paperless** in Namibia
2. Use of CAPI technology to collect data
3. Use of **modern satellite imagery** to conduct the pre-enumeration census mapping and location demarcation.
4. Statistics will be linked to **spatial locations** good for development planning at all levels
5. Outputs: Master Sampling & Dwelling Unit Frames; Population Projections; Business Register; Data for M&E of NDPS, HHP, SDGs, Agenda 2063

HIGH RESOLUTION SATELLITE IMAGES

- Images from Digital Globe
- Contribution
 - NSA
 - MURD
 - UNFPA
- Government wide license

NATIONAL LAND CONFERENCE RESOLUTIONS: URBAN LAND REFORM

THEMATIC AREA => URBAN LAND DELIVERY

Goreagab

Input – Generic

Satellite Imagery

- Open Source Landsat, Sentinel, etc. – Spectral bands
- High Resolution Optical Imagery

Use Case: Housing Detection

- Optical High- Resolution Satellite Imagery from DigitalGlobe in WMS format/download possible
- Optical Aerial Photographs
- ArcGIS, QGIS

Application – Generic

- Add-on / Script / GUI to ArcGIS or QGIS for machine learning on Spectral Bands and/ or RGB
- Input parameters: Shape, Patterns, Size, Colours, spectrum, etc.
- Sample Area to teach classes and patterns

Use Case: Housing Detection

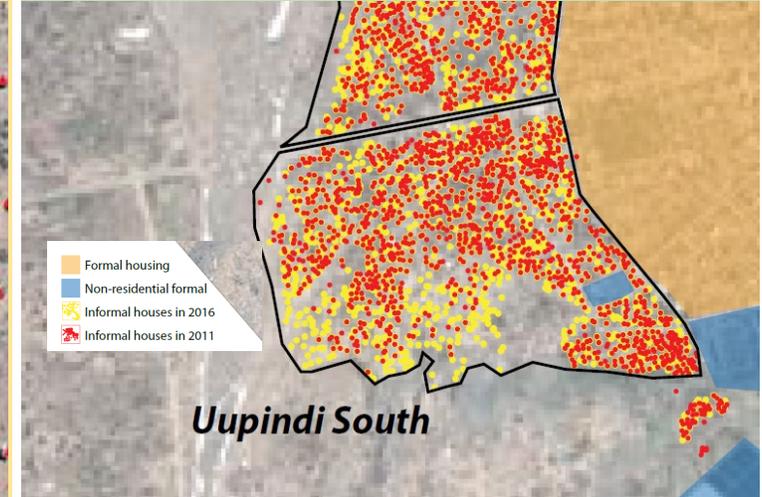

- Teaching of Formal/ permanent structures,
- Teaching of informal structures (zinc roof, thatching (grass) roof and tents)
- Teaching of other Built Up Structures
- Methodology with proof of concept and given accuracy/ confidence in other use cases

Output – Generic

- Classes (shapefiles) based on defined parameters. (e.g land cover maps)
- Object Database for detected units

Use Case: Housing Detection

- Countrywide Database of Housing Units (Attributes & Location)
- Countrywide Classes of Built Up Structures
- **Countrywide Change Detection (future)**

EXAMPLE OF WHAT WILL BE CAPTURED AND CREATED DURING CENSUS MAPPING

MAIN

Id	Name
0	Unknown
1	Vacant
4	Dwelling Unit
5	Special Dwelling Unit
6	Commercial Structure
7	Educational Facility (excluding Hostel)
8	Health Facility (excluding overnight stay)
9	Recreational Facility (excluding overnight stay)
10	Heritage Site
11	Public Structure
12	Religious Place
13	Transport Node
14	Industrial Structure
15	Agricultural Facility
17	Observation Structure
18	Power Station
19	Waste Site
20	Water Supply Point
21	Treatment Plant
22	Telecommunications Tower
23	Reservoir
24	Headmen/Traditional Leader/Chief's House
99	Other, specify

DWELLING UNIT VARIABLES

1 Detached House	4 N	A formal, permanent dwelling typically for one family that does not form part of a block of flats
2 Semi-detached house/Town house	4 N	a Semi-detached House, a Duet, a Townhouse, a Cluster Home
3 Apartment/flat	4 N	A set of rooms used as a residence.
4 Guest Flat	4 N	NULL
5 Part commercial/Industrial	4 N	NULL
6 Mobile home (caravan, tent)	4 N	A vehicle or vessel equipped for living in. The dwelling is either self-powered or towed. This includes a Caravan, a Trailer Home, a Portable Hut, a Tent, and a Houseboat.
7 Single quarters	4 N	NULL
8 Traditional Dwelling	4 N	A typically rural dwelling constructed by plastering a wooden framework with a mixture of mud and manure.
9 Impoverished Unit (shack)	4 N	An informal dwelling constructed from metal sheeting, boards, zinc and other material.
10 Holiday home	4 N	NULL
11 Under construction	4 N	NULL
12 Other Dwelling, specify	4 N	NULL

EXAMPLE OF WHAT WILL BE CAPTURED AND CREATED DURING CENSUS MAPPING

MAIN

- Id Name
- 0 Unknown
 - 1 Vacant
 - 4 Dwelling Unit
 - 5 Special Dwelling Unit
 - 6 Commercial Structure
 - 7 Educational Facility (excluding Hostel)
 - 8 Health Facility (excluding overnight stay)
 - 9 Recreational Facility (excluding overnight stay)
 - 10 Heritage Site
 - 11 Public Structure
 - 12 Religious Place
 - 13 Transport Node
 - 14 Industrial Structure
 - 15 Agricultural Facility
 - 17 Observation Structure
 - 18 Power Station
 - 19 Waste Site
 - 20 Water Supply Point
 - 21 Treatment Plant
 - 22 Telecommunications Tower
 - 23 Reservoir
 - 24 Headmen/Traditional Leader/Chief's House
 - 99 Other, specify

COMMERCIAL STRUCTURE VARIABLES

Office Block	A large building containing business offices.
Office	A room or building used as a place of business.
Shopping Centre	An area or complex of shops, with associated facilities. This includes a Shopping Complex and a Shopping Mall.
Market	A venue where people can gather to buy and sell goods. This includes a Flea Market, a Craft Market and an Agricultural Market.
Retail Outlet	A room or building used for retailing goods and services. This includes a Shop, a Supermarket, a Hypermarket, a Spaza Shop, Greengrocer, Butcher and Café.
Food and beverage outlet	A retail outlet selling food and beverage largely for consumption on the premises or for immediate consumption elsewhere. This includes a Restaurant, a Food Court, a Coffee Shop, a Shebeen, a Beer hall, a Pub and a Bar.

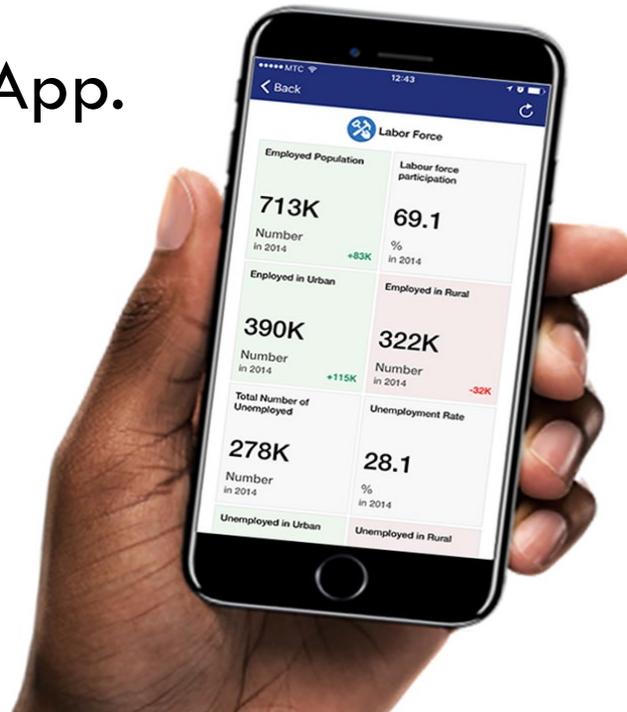

IMPLEMENTATION CHALLENGES

1. Concluding NSDI memoranda of understanding taking too long
2. More discussions regarding the linkages of the NSDI Policy, Statistics Act and other laws relating to spatial data
3. Geospatialist Job Level not recognised on the government post structure
4. National Capacity – the capacity to properly formalize the NSDI is lacking countrywide
5. Poor data management practices in OMAs (high risk of data loss/corruption, poor land statistics)
6. Ongoing duplication in data collection, wastage of government resources despite established coordination framework
7. Inadequate ICT Infrastructure
8. Staffing at the NSDI Secretariat (NSA)
9. Lack of Funding
