

**Innovative directions of activity of
the State Statistical Committee of
the Republic of Azerbaijan**

Innovative directions:

- ▶ Expanding the use of administrative data
- ▶ Using big data
- ▶ Development of quality management system
- ▶ Improvement of e-services
- ▶ Transfer of information systems to “Government Cloud”
- ▶ Agricultural census: tablets and CAPI
- ▶ Statistical Olympiad

Reducing the statistical burden on respondents by integrating administrative databases of state organizations into the statistical database

Reducing the administrative and reporting burden on respondents

Reducing the cost of conducting statistical surveys

Improving the quality and reliability of data

Improving the timeliness of the data produced by improving the relevance of statistical registers

Preliminary results of integration of administrative databases....

Revision of official statistical reporting towards reducing the number of indicators collected from respondents

Obtaining statistical indicators from administrative sources in online mode

Administrative Data Management System - ADIS

Using big data in official statistics

ICT development and new partnerships with respondents in the field of statistics

The development of ICT in official statistics and the establishment of partnerships with large trade networks have facilitated the improvement of the price registration process, the use of electronic databases of trade networks for statistical purposes has commenced. In this regard:

- ▶ Trade networks with over 300 supermarkets were selected, constituting approximately 26.0 percent of the retail turnover in Baku city;
- ▶ In January 2018, agreements were reached with trade networks, and cooperation agreements in the field of providing information on retail prices to the SSC in the form of electronic databases were signed;
- ▶ After the completion of preparatory work in 2018, starting from January 2019, the data provided are being integrated into the SSC database through software specially developed for this purpose;
- ▶ Since mid-2019, the new method has been applied in 10 more cities, along with Baku city.

Advantages

- ▶ saving costs and time on data collection;
- ▶ significant increase in the number of price observations (from 40,000 to 500,000);
- ▶ improving the accuracy of calculations, eliminating errors caused by human factor;
- ▶ the possibility of involving vacated registrars in other statistical surveys;
- ▶ minimizing physical contact when collecting primary data;
- ▶ relevance of this method during the Covid-19 pandemic.

Quality management system

Achievements in the field of quality management

- ▶ In 2017, 13 local statistical bodies (district, city statistical offices), and in 2020, 17 have already been awarded international certificates of conformity according to ISO 9001:2015.
- ▶ In 2023, 45 local statistical bodies (district, city statistical offices) were awarded an international certificate of conformity according to ISO 9001:2015.

Quality control tables

Improvement of e-services and transfer of information systems to the “Government Cloud”

- ▶ **Presentation of statistical questionnaires by respondents**
- ▶ **Presentation of the calendar for the release of statistical information and the calendar for the publication of press releases**
- ▶ **Providing statistical data to users**
- ▶ **Online sale of statistical publications (yearbooks)**
- ▶ **Payment of administrative fines for violation of the rules for providing statistical information via the Internet**
- ▶ **Providing a business entity with electronic information about the category to which it belongs, depending on its size**

Оценка оказанных электронных услуг

- ▶ Online sale of statistical publications (yearbooks) - 5 stars (83.21%)
- ▶ Presentation of the calendar for the release of statistical information and the calendar for the publication of press releases - 4 stars (82.39%)
- ▶ Payment of administrative fines for violation of the rules for providing statistical information via the Internet - 4 stars (77.41%)
- ▶ Presentation of statistical questionnaires by respondents - 4 stars (76.37%)
- ▶ Providing statistical data to users - 4 stars (71.86%)

Transfer of information systems to “Government Cloud”

E-census

**Agricultural census 2025
– using tablet computers,
CAPI method for the first
time**

Statistical Olympiad
