

# Group Discussion Facilitation Questions

**EDGE Project**

Social and Housing Statistics Section - UNSD

# Group Discussion Questions

## Defining Entrepreneurship:

1. Should only those business owners working for their own enterprise as their main occupation be considered entrepreneurs?
2. Should all self-employed be considered entrepreneurs (broad definition) but self-employed not in their main occupation identified separately, and base the indicators on those working for their own enterprise as their main occupation?
3. Should 'dependent self-employed' and 'pure own-account workers' be excluded from the definition of entrepreneurs?

## Group Discussion Questions (cont'd.)

### Ownership size threshold

4. Should an upper bound for the ownership size threshold be specified for defining the 'gender' of enterprises?

### EDGE conceptual framework

5. Is the proposed EDGE conceptual framework adequate?
6. What changes would you suggest, if any?

# Group Discussion Questions – contd.

## Proposed entrepreneurship indicators

7. From the country perspective, are the proposed indicators:
  - Theoretically relevant?
  - Feasible to compile?
8. Should EDGE propose other indicators in addition to, or in place of, the current list of proposed ones? If so, what?

## Data collection strategies

9. Do you agree with the approach and options suggested for the data collection for compilation of the proposed EDGE entrepreneurship indicators?
