Development and testing of a survey module on SDG 16 indicators for inclusion in on-going household surveys

Progress as of February 2020

- Developing the draft module and accompanying relevant survey guidelines: completed

- Cognitive testing: four countries have been identified and engaged - Cabo Verde, El Salvador, Kenya and Tanzania – with the research beginning imminently. Discussion is ongoing with one further country who has also expressed interest in being part of the cognitive testing.

- Pilot testing of the draft questionnaire module: six countries have confirmed to take part and implement the survey (Cabo Verde, El Salvador, Kazakhstan, Kenya, Tanzania and Uganda). Other countries are being reached out for their interest, with the potential that more countries can be covered by the initiative. We expect that fieldwork for the pilot testing will begin in the second quarter of 2020 after the draft questionnaire has been revised following the feedback from the cognitive testing.
