

Comprehensive list of inputs from agencies and entities on indicator proposals and metadata for the first IAEG-SDGs meeting (as of 15 June 2015)

This document provides a comprehensive list of all inputs received by the United Nations Statistics Division as of 15 June 2015 (noon) from agencies and other entities in response to the request for indicator proposals and metadata in preparation of the first meeting of the Inter-Agency and Expert Group on Sustainable Development Goal Indicators (IAEG-SDGs). The request was based on the wish of national statistical offices for detailed metadata and an improved description of the indicators when assessing a list of preliminary and indicative indicators in February/March 2015 and the objective to provide a solid basis for discussion at the first meeting of the IAEG-SDGs.

The submitted inputs are separated by goal, by whether they are the indicator template or metadata, and also by the type of organization that provided the input. In addition, there is a folder for additional inputs that do not fall into one of these two subject areas. There are three groupings of organizations: United Nations Agencies and International Organizations, Regional Agencies, and other United Nations entities and mechanisms. The information indexed here can be found on the IAEG-SDGs website with a zip folder for each goal.

Should any of the submitted inputs to be found missing, the concerned agency/entity should contact the Statistics Division.
