1. This document contains a list of indicators that were reviewed and discussed at the second meeting of the IAEG-SDGs, held in Bangkok from 26-28 October 2015.

Following a consultation among IAEG members (where they reviewed the "Summary of Comments" from the two rounds of open consultations held during the summer) all proposals were assigned a colour code as follows:
• GREEN: Indicators for which there is general agreement (or small modifications proposed), based on the fact that less than 25% of respondents have strong concerns/expressed need to discuss on priority basis; no strong opposing views by members; furthermore, some of these indicators are already well established;
• YELLOW: Indicators where there are some unresolved issues or different alternative proposals, which could be resolved during the meeting;
• GREY: Indicators where it appears that more in-depth discussion is still needed and/or methodological development needs to be undertaken.

The meeting discussed the indicators coded in yellow with the goal of shifting those indicators to a "Green" classification or a "Grey" classification.

2. At the conclusion of the meeting, 159 indicators had been classified as "Green." This document contains: the original indicator proposals evaluated by the IAEG members in their consultation (Column C); the initial classification of that indicator before the meeting (Column D); any proposed reformulation or modification of the indicator and/or additional indicators that were agreed upon at the meeting (Column E); and the classification of the indicator at the conclusion of the meeting (Column F).

3. Those indicators that are classified as "Green" are tentatively agreed upon by the IAEG members, subject to the modifications and comments that are included in the spreadsheet within Column E. The IAEG-SDGs is currently working on developing a work plan to discuss and agree upon those indicators that are currently classified as "Grey."
