Plenary Session

7th Meeting of the Inter-agency and Expert Group on Sustainable Development Goal Indicators (IAEG-SDGs)

Agenda Items 9. Measuring progress on targets with a 2020 deadline

10-12 April 2018
Vienna, Austria
Targets with a 2020 deadline

• There are 22 targets with a 2020 deadline and a total of 28 indicators that measure these targets

• Of these 28 indicators:
  ➢ 17 are Tier I
  ➢ 5 are Tier II
  ➢ 6 are Tier III

• Different actions must be taken depending on the tier classification of the indicators monitoring the target
Targets with a 2020 deadline that have Tier I indicators

• **Target 2.5** – By 2020, maintain the genetic diversity of seeds, cultivated plants and farmed and domesticated animals and their related wild species, including through soundly managed and diversified seed and plant banks at the national, regional and international levels, and promote access to and fair and equitable sharing of benefits arising from the utilization of genetic resources and associated traditional knowledge, as internationally agreed

• **Target 3.6** – By 2020, halve the number of global deaths and injuries from road traffic accidents

• **Target 4.b** – By 2020, substantially expand globally the number of scholarships available to developing countries, in particular least developed countries, small island developing States and African countries, for enrolment in higher education, including vocational training and information and communications technology, technical, engineering and scientific programmes, in developed countries and other developing countries

• **Target 8.6** – By 2020, substantially reduce the proportion of youth not in employment, education or training

• **Target 9.c** – Significantly increase access to information and communications technology and strive to provide universal and affordable access to the Internet in least developed countries by 2020
Targets with a 2020 deadline that have Tier I indicators (continued)

- **Target 11.b** – By 2020, substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigation and adaptation to climate change, resilience to disasters, and develop and implement, in line with the Sendai Framework for Disaster Risk Reduction 2015-2030, holistic disaster risk management at all levels

- **Target 12.4** – By 2020, achieve the environmentally sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimize their adverse impacts on human health and the environment

- **Target 14.5** – By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information

- **Target 15.1** – By 2020, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains and drylands, in line with obligations under international agreements
Targets with a 2020 deadline that have Tier I indicators (continued)

- **Target 15.2** – By 2020, promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally
- **Target 15.5** – Take urgent and significant action to reduce the degradation of natural habitats, halt the loss of biodiversity and, by 2020, protect and prevent the extinction of threatened species
- **Target 17.8** – Fully operationalize the technology bank and science, technology and innovation capacity-building mechanism for least developed countries by 2017 and enhance the use of enabling technology, in particular information and communications technology
- **Target 17.11** – Significantly increase the exports of developing countries, in particular with a view to doubling the least developed countries’ share of global exports by 2020
- **Target 17.18** – By 2020, enhance capacity-building support to developing countries, including for least developed countries and small island developing States, to increase significantly the availability of high-quality, timely and reliable data disaggregated by income, gender, age, race, ethnicity, migratory status, disability, geographic location and other characteristics relevant in national contexts
Targets with a 2020 deadline that have Tier II indicators

- **Target 6.6** – By 2020, protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and lakes
- **Target 11.b** – By 2020, substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigation and adaptation to climate change, resilience to disasters, and develop and implement, in line with the Sendai Framework for Disaster Risk Reduction 2015-2030, holistic disaster risk management at all levels
- **Target 14.6** – By 2020, prohibit certain forms of fisheries subsidies which contribute to overcapacity and overfishing, eliminate subsidies that contribute to illegal, unreported and unregulated fishing and refrain from introducing new such subsidies, recognizing that appropriate and effective special and differential treatment for developing and least developed countries should be an integral part of the World Trade Organization fisheries subsidies negotiation
Targets with a 2020 deadline that have Tier II indicators

- **Target 15.8** – By 2020, introduce measures to prevent the introduction and significantly reduce the impact of invasive alien species on land and water ecosystems and control or eradicate the priority species

- **Target 17.18** – By 2020, enhance capacity-building support to developing countries, including for least developed countries and small island developing States, to increase significantly the availability of high-quality, timely and reliable data disaggregated by income, gender, age, race, ethnicity, migratory status, disability, geographic location and other characteristics relevant in national contexts
Targets with a 2020 deadline that have Tier III indicators

• **Target 8.b** – By 2020, develop and operationalize a global strategy for youth employment and implement the Global Jobs Pact of the International Labour Organization

• **Target 12.4** – By 2020, achieve the environmentally sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimize their adverse impacts on human health and the environment

• **Target 13.a** – Implement the commitment undertaken by developed-country parties to the United Nations Framework Convention on Climate Change to a goal of mobilizing jointly $100 billion annually by 2020 from all sources to address the needs of developing countries in the context of meaningful mitigation actions and transparency on implementation and fully operationalize the Green Climate Fund through its capitalization as soon as possible

• **Target 14.2** – By 2020, sustainably manage and protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their resilience, and take action for their restoration in order to achieve healthy and productive ocean
Targets with a 2020 deadline that have Tier III indicators (continued)

• **Target 15.9** – By 2020, integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and accounts

• **Target 17.18** – By 2020, enhance capacity-building support to developing countries, including for least developed countries and small island developing States, to increase significantly the availability of high-quality, timely and reliable data disaggregated by income, gender, age, race, ethnicity, migratory status, disability, geographic location and other characteristics relevant in national contexts
Key points to consider and next steps

• How should progress be measured and how should indicators be used to determine if a target was achieved?
• What to do with these indicators after 2020?
• What to do about the targets that have Tier III indicators?
  • How can progress be measured if there is no indicator to monitor progress on target?
