Capacity development activities in Africa for the 2030 Agenda

Tinfissi Joseph ILBOUDO
Chief Statistical Development, Data Innovation and Outreach Section
African Centre for Statistics
Economic Commission for Africa

05 November 2020
Addis Ababa, Ethiopia
Number of indicators with available data by country

Data availability ranges from 103 to 177 indicators in African countries
- 52 indicators without any data for African countries (22%)

As of October 2020
SDG Data reporting

- OIBC -1: Strengthened integrated data & statistical systems for sustainable development

Current Status and challenges

- Insufficient funding and dependence on external resources
- Lack of harmonization of data
- Weak system for data management
- Limited uptake of new technologies
- Underutilized role of research and development
- Weak demand and capacity to use data

Weak GOVERNANCE STRUCTURE & COORDINATION

Opportunities

- National SDG data dissemination platforms
- Transformation and modernization of African NSS - amidst the COVID19
  - Digital Census in Kenya, planned in Ghana, Sierra Leone, etc.
  - African Statistics Day 2020, CRVS Day
- This will also improve data availability for the AU Agenda 2063 – The Africa we want
Inform policy makers on progress made by Africa towards achieving the Agenda 2030 and the likelihood to meet the objectives of the promises by 2030 based on the current pace.

To be rolled out to NSOs for their national SDG Progress assessment (Started with Egypt)
THANK YOU!
