

Agenda item 2:

The Sustainable Development Report 2023: Special Edition and the SDG Progress Chart 2023

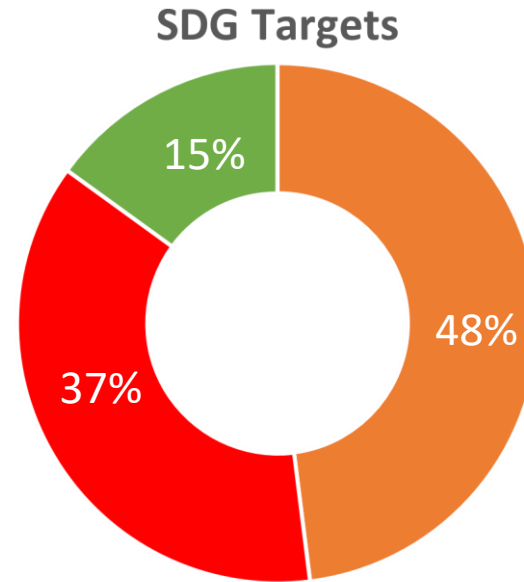

14th Meeting of the IAEG-SDGs
Plenary Session
24 October 2023
Copenhagen, Denmark

 SUSTAINABLE DEVELOPMENT GOALS

The latest assessment of the SDGs targets paints a concerning picture:

- About **half of the targets** are moderately or severely **off track**
- Over **one-third** have either seen **no movement or regressed** below the 2015 baseline

The world continues to grapple with lingering COVID-19 effects

1 in 3 people worldwide struggle with moderate to **severe food security**

25 million children missed out on routine **immunizations** in 2021—**6 million more** than in 2019

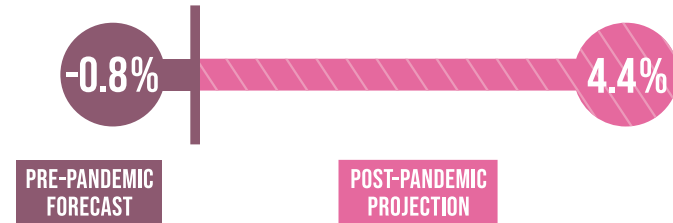

And...

The pandemic caused **learning losses in 4 out of 5** of the countries studied

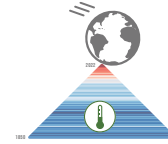

COVID-19 has also triggered **the largest increase in between-country inequality** in three decades

CHANGE OF BETWEEN-COUNTRY INEQUALITY (2019-2020)

The Earth is at a tipping point,
perilously close to a **climate calamity**

WHERE WE ARE

A green globe with white grid lines, sitting on a blue base that looks like melting ice. A red arrow points upwards from the base.

THE WORLD WILL EXCEED 1.5°C BY 2035 AND FACES A 2.5°C WARMING BY 2100

A simple icon of a thermometer with a red liquid level.

Heat waves, droughts, flooding, and wildfires have become far too frequent

The rate of **sea-level rise** has doubled in the last decade

We are **at war** with nature

A recent walkout in early 2023 in South Africa saw around **5 tons of endangered lobster escaping**

THE WORLD IS CURRENTLY FACING THE **LARGEST SPECIES EXTINCTION EVENT SINCE THE DINOSAUR AGE**

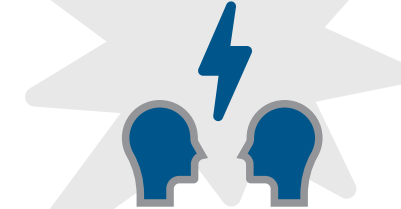

The **Red List Index** has deteriorated by about **11%** since 1993, with an **accelerating decline** each decade

War and conflict are inflicting a devastating toll on the SDGs

As of December 2022, **over 108 million people worldwide** had been forcibly displaced from their homes -- **2.5 times** the number a decade ago

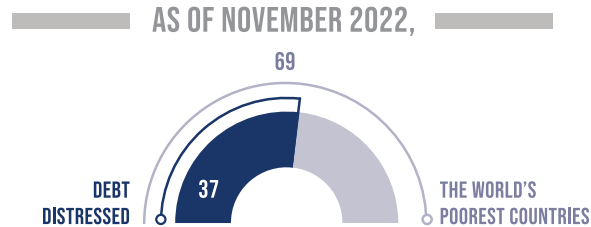

STEEP RISE IN
**CONFLICT-RELATED
CIVILIAN DEATHS**

WITH AN OVER **50% SURGE** IN 2022,
FUELED BY THE **WAR IN UKRAINE**

Developing countries and the world's **poorest** and **most vulnerable** are bearing the brunt

MANY DEVELOPING COUNTRIES ARE FACING A **DEBT CRISIS**

37 OUT OF **69**
OF THE WORLD'S POOREST COUNTRIES
WERE IN **DEBT DISTRESS OR AT HIGH RISK OF IT**

The world could face **big misses** across the Goals by 2030

If current trends continue, **by 2030:**

575 MILLION

PEOPLE WILL STILL BE
LIVING IN EXTREME POVERTY

ONLY ONE THIRD

OF COUNTRIES WILL HAVE
HALVED THEIR NATIONAL
POVERTY LEVELS

84 MILLION

CHILDREN AND YOUTH
WILL BE **OUT OF SCHOOL**

300 MILLION

STUDENTS WILL LACK
BASIC NUMERACY/LITERACY
SKILLS

And gender equality is still 300 years away

..... AT THE CURRENT RATE, IT WILL TAKE

300 YEARS
TO END CHILD
MARRIAGE

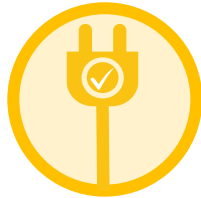

286 YEARS TO CLOSE GAPS
IN LEGAL PROTECTION AND
REMOVE DISCRIMINATORY LAWS

140 YEARS TO ACHIEVE
EQUAL REPRESENTATION IN
LEADERSHIP IN THE WORKPLACE

However, progress in some areas illustrates **promising potential** for further advancements

800 million people connected to electricity between 2015 and 2021

146 countries have already met or are on track to meet the **under-5 mortality target**

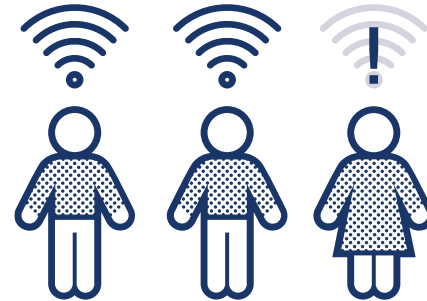

Effective HIV treatment **has cut** global **AIDS-related** deaths by **52%** since 2010

Harnessing **innovation and technologies** can drive SDG progress

Medium-high- and high-technology industries demonstrated robust growth

95% of the world has mobile broadband access, and 2 in 3 people use the Internet

We must make the next seven years count

We can and must **turn**
things around

But the clock is **ticking**
