

The Sustainable Development Goals Reports 2018 | *3. Review of gaps from inputs for SG's Progress report*

Inter-agency Meeting on Preparation
for the 2018 SDG Reports

28 February - 1 March 2018

UN | Conference Room 5

Inputs requested from agencies

- **For Goals 1-5, 8-10, 13-14 and 16** (not under HLPF review), agencies were requested to provide the following:

- 1. Short summary description of the indicator describing overall global trend and additional context (include additional sources/documents links) = S**
- 2. Data: national data, regional and global aggregates = D**

Sample storyline submission

1) Ind. Number/Name

Goal 7/Indicator 7.1.2: Proportion of population with primary reliance on clean fuels and technology

2) 2-3 sentences or short paragraph describing the overall global trend and additional context

Progress in every area of sustainable energy falls short of what is needed to achieve energy access for all and to meet targets for renewable energy and energy efficiency. Meaningful improvements will require higher levels of financing and bolder policy commitments, together with the willingness of countries to embrace new technologies on a much wider scale.

Access to clean fuels and technologies for cooking climbed to 57.4 per cent in 2014, up slightly from 56.5 per cent in 2012. About 3 billion people, the majority of them in Asia and sub-Saharan Africa, are still cooking without clean fuels and more efficient technologies.
