Ankara, Turkiye

Outline

- I. The Interest in CGD
- II. CGD Journey in Kenya
- III. Framework for Validating CGD
- IV. Technical Working Committee on CGD
- V. Outcome of the process
- VI. Lessons Learnt
- VII. Benefits of the CGD Criteria
- VIII. Challenges

The interest in CGD

Primarily produced by Civil Society Organisation to monitor, demand or drive change on issues affecting citizens or their communities

CGD Journey in Kenya

- Building of partnerships
- Inventory of producers of CGD
- Development of a criteria for validating CGD
- Set up of a technical working committee on CGD

Framework for Validating CGD in Kenya

The criteria uses *8 quality dimensions* to assign scores to the data

1

Gateway Entry~
Pass/Fail

- i. Need*
- ii. Interpretability and clarity*
- iii. Credibility*

2

Scoring Matrix

- i. Relevance*
- ii. Timeliness*
- iii. Accessibility*
- iv. Methodological soundness*
- v. Accuracy*

- A *score* is given using the score allocation matrix
 - 3-High*
 - 2- Medium*
 - 1-Low*
 - 0-Not acceptable*
- An *average score* is then assigned by summing up the total scores divided by the 5 quality dimensions.
- *3 Minimum threshold* requirements for validation

Technical Working Committee on CGD

- Identify and prioritize Data gaps
- Develop strategies to strengthen, improve and support the quality of CGD data;
- Conduct and update inventory of CGD producers
- Continuously Review the criteria for Validating

Outcome of the process

Performance Monitoring for Action (a project implemented by ICHRK–Kenya)-13 datasets

Uwezo/Usawa Agenda- 2 datasets Validated

4.1.1 Proportion of children and young people achieving at least a minimum proficiency level

Lessons Learnt

- ✓ Establish a working relationship with civil society organization, to allow *partnerships*
- ✓ For accountability purposes, it is best to *align the validation criteria* to the Statistical code of practice or Quality Assurance Framework
- ✓ Make the process of development of the criteria and validation of CGD data as *inclusive* as possible.
- ✓ Each country should walk its *own journey* on CGD operationalization.

Benefits of the CGD Criteria

- ✓ Self-assessment : **Rate own performance**
- ✓ Reviews/ Assessments: **Validate the data**
- ✓ Assessment by data users : **Brings trust in data**
- ✓ Continued improvement in the quality of Data

Challenges

- i. Relationship between Government and Civil Society Organizations.
- ii. Development of the Criteria.
 - ✓ *Assigning weights to the different dimensions*
 - ✓ *Assigning a minimum threshold*
 - ✓ *Balance between quality and fitness for purpose of the data*
- iii. Criteria not designed to score qualitative data.
