## SDG indicator metadata

(Harmonized metadata template - format version 1.0)

### 0. Indicator information

#### 0.a. Goal

Goal 2: End hunger, achieve food security and improved nutrition and promote sustainable agriculture

#### 0.b. Target

Target 2.a: Increase investment, including through enhanced international cooperation, in rural infrastructure, agricultural research and extension services, technology development and plant and livestock gene banks in order to enhance agricultural productive capacity in developing countries, in particular least developed countries

#### 0.c. Indicator

Indicator 2.a.2: Total official flows (official development assistance plus other official flows) to the agriculture sector

#### 0.d. Series

#### 0.e. Metadata update

2017-07-09

#### 0.f. Related indicators

Other ODA indicators

#### 0.g. International organisations(s) responsible for global monitoring

Organisation for Economic Co-operation and Development (OECD)

### 1. Data reporter

#### 1.a. Organisation

Organisation for Economic Co-operation and Development (OECD)

### 2. Definition, concepts, and classifications

#### 2.a. Definition and concepts

**Definition:**

Gross disbursements of total ODA and other official flows from all donors to the agriculture sector.

**Concepts:**

ODA: The DAC defines ODA as “those flows to countries and territories on the DAC List of ODA Recipients and to multilateral institutions which are

i) provided by official agencies, including state and local governments, or by their executive agencies; and

ii) each transaction is administered with the promotion of the economic development and welfare of developing countries as its main objective; and
is concessional in character and conveys a grant element of at least 25 per cent (calculated at a rate of discount of 10 per cent). (See http://www.oecd.org/dac/stats/officialdevelopmentassistancedefinitionandcoverage.htm)

Other official flows (OOF): Other official flows (excluding officially supported export credits) are defined as transactions by the official sector which do not meet the conditions for eligibility as ODA, either because they are not primarily aimed at development, or because they are not sufficiently concessional. (See http://www.oecd.org/dac/stats/documentupload/DCDDAC(2016)3FINAL.pdf, Para 24).

The agriculture sector is as defined by the DAC and comprises all CRS sector codes in the 311 series (see here: http://www.oecd.org/dac/stats/purposecodessectorclassification.htm)

2.b. Unit of measure

2.c. Classifications

3. Data source type and data collection method
3.a. Data sources

The OECD/DAC has been collecting data on official and private resource flows from 1960 at an aggregate level and 1973 at an activity level through the Creditor Reporting System (CRS data are considered complete from 1995 for commitments at an activity level and 2002 for disbursements).

The data are reported by donors according to the same standards and methodologies (see here: http://www.oecd.org/dac/stats/methodology.htm).

Data are reported on an annual calendar year basis by statistical reporters in national administrations (aid agencies, Ministries of Foreign Affairs or Finance, etc.

3.b. Data collection method

A statistical reporter is responsible for the collection of DAC statistics in each providing country/agency. This reporter is usually located in the national aid agency, Ministry of Foreign Affairs or Finance etc.

3.c. Data collection calendar

Data are published on an annual basis in December for flows in the previous year. Detailed 2015 flows will be published in December 2016.

3.d. Data release calendar

December 2016.
3.e. Data providers

Data are reported on an annual calendar year basis by statistical reporters in national administrations (aid agencies, Ministries of Foreign Affairs or Finance, etc.

3.f. Data compilers

OECD

3.g. Institutional mandate

4. Other methodological considerations

4.a. Rationale

Total ODA and OOF flows to developing countries quantify the public effort (excluding export credits) that donors provide to developing countries for agriculture.

4.b. Comment and limitations

Data in the Creditor Reporting System are available from 1973. However, the data coverage is considered complete since 1995 for commitments at an activity level and 2002 for disbursements.

4.c. Method of computation

The sum of ODA and OOF flows from all donors to developing countries in the agriculture sector.

4.d. Validation

4.e. Adjustments

4.f. Treatment of missing values (i) at country level and (ii) at regional level

- **At country level**
  
  Due to high quality of reporting, no estimates are produced for missing data.

- **At regional and global levels**
  
  Not applicable

4.g. Regional aggregations

Global and regional figures are based on the sum of ODA and OOF flows to the agriculture sector.
4.h. Methods and guidance available to countries for the compilation of the data at the national level

4.i. Quality management

4.j Quality assurance

4.k Quality assessment

5. Data availability and disaggregation

Data availability:
On a recipient basis for all developing countries eligible for ODA.

Time series:
Data available since 1973 on an annual (calendar) basis

Disaggregation:
This indicator can be disaggregated by type of flow (ODA or OOF), by donor, recipient country, type of finance, type of aid (project agriculture sub-sector) etc.

6. Comparability / deviation from international standards

Sources of discrepancies:
DAC statistics are standardized on a calendar year basis for all donors and may differ from fiscal year data available in budget documents for some countries.
