Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Target 8.b: By 2020, develop and operationalize a global strategy for youth employment and implement the Global Jobs Pact of the International Labour Organization

Indicator 8.b.1: Existence of a developed and operationalized national strategy for youth employment, as a distinct strategy or as part of a national employment strategy

Institutional information

Organization(s):
International Labour Organization (ILO)

Concepts and definitions

The proposed methodology draws on:

a. Global policy instruments, notably:
   - Resolution on *The youth employment crisis: A call for action*\(^1\), adopted at the 101st session of the International Labour Conference (ILC) in June 2012. In calling for vigorous, collective action to address an aggravated youth employment crisis, this resolution advocates for a multi-pronged approach with policy measures that are context-specific and integrated, entailing strategies which bring together in a coherent manner a variety of instruments to increase the demand, enhance the supply and improve matching in youth labour markets.
   - *Recovering from the crisis: A Global Jobs Pact*\(^2\) adopted by the ILC at its June 2009 session. Based on the ILO’s Decent Work Agenda, the Global Jobs Pact presents an integrated portfolio of policies that puts employment and social protection at the centre of crisis response, recognising the critical role of participation and social dialogue.

b. ILO databases:
   - International monitoring of youth employment policies was carried out over the period 2010-2012 by the Youth Employment Network (YEN) – a partnership between the ILO, United Nations and World Bank – utilising a questionnaire sent to national authorities. This evolved into YouthPOL\(^3\), an inventory of youth employment policies and programmes maintained by the ILO (65 countries covered to date).
   - The ILO also maintains EmPol, a dataset of broader national employment policies (143 countries covered).

c. ILO expertise and experience:
   - The Department of Statistics (STATISTICS) works to provide relevant, timely and reliable labour statistics, to develop international standards for better measurement of labour issues and enhanced international comparability, and to help member States develop and improve their labour statistics.

The Employment Policy Department (EMPLOYMENT) is responsible for promoting full and productive employment by developing integrated employment, development and skills policies (ILO, 2012) that are inclusive, gender sensitive and sustainable. The department is mandated to coordinate ILO efforts to promote decent job opportunities for young women and men; over the years, it has supported the formulation, implementation and review of national youth employment strategies and action plans in different countries and regions (ILO, 2008; ILO, 2015). This type of targeted action and related achievements have been included in the ILO programming framework and performance system.

The ILO supports its constituents and other development stakeholders through knowledge and capacity building as well as through policy advocacy and advice. The list of references at the end of this note offers examples of recent major ILO contributions to knowledge building on youth employment and youth employment policy (ILO, 2017).

**Methodology**

**Computation Method:**
The information and documents provided by national authorities will be analysed by the ILO by making use of the grid hereafter.

<table>
<thead>
<tr>
<th>Value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Missing value</td>
<td>No information available to assess the existence of a national strategy for youth employment.</td>
</tr>
<tr>
<td>0</td>
<td>The country has not developed any national strategy for youth employment or taken steps to develop or adopt one.</td>
</tr>
<tr>
<td>1</td>
<td>The country is in the process of developing a national strategy for youth employment.</td>
</tr>
<tr>
<td>2</td>
<td>The country has developed and adopted a national strategy for youth employment.</td>
</tr>
<tr>
<td>3</td>
<td>The country has operationalised a national strategy for youth employment.</td>
</tr>
</tbody>
</table>

In all cases, the grid refers to a national strategy for youth employment as a distinct strategy or as part of a national employment strategy.

Missing values (i.e. no response/unknown) should be noted as such. They should be omitted from the final global and regional breakdown: proportions should only be calculated on the basis of received responses. However, the global and regional response rates will be indicated.

The possible development of metadata notes complementing the grid is being considered. Among other aspects, these notes may refer to the measures and provisions in place, and would also consider the involvement of national constituents in the development and operationalization of the strategies.

The ILO may also envisage to conduct a more detailed analysis of selected country documents for purposes which go beyond the scope of SDG monitoring, in order to gather insights on institutional and operational matters in national efforts for youth employment.
The following steps are followed in developing the indicator methodology:

1. Examination of relevant policy instruments, including the above-mentioned Call for action and Global Jobs Pact. Adopted by ILO tripartite constituents, these documents provide a sound framework for defining SDG indicator 8.b.1.

2. Review of ILO databases on employment and youth employment policies (EmPOL and YouthPOL), maintained by the Employment Policy Department.

3. A methodology for defining, measuring and validating this indicator (the present document).

4. Development of a survey instrument (questionnaire) to collect national-level information on youth employment policies from national entities. The information will be used to determine if countries have developed and operationalized a national strategy for youth employment as a stand-alone strategy or as part of a national employment or sectoral strategy, in line with the above-mentioned ILC resolutions.

5. Technical guidelines for data providers and compilers, along with the above-mentioned questionnaire and detailed notes.

6. Pilot the methodology in selected countries.

Consultations with pertinent ministries and social partners’ representatives will take place throughout the process.

The purpose of SDG indicator 8.b.1 is to provide an indication of the progress of countries in addressing youth employment issues. In this respect, it is assumed that having officially adopted what can be recognised as a structured strategy for youth employment would mean larger attention given by a country to youth labour market challenges, compared to countries with no strategy. In fact, the development of such a strategy usually entails broad participation of and consultation/coordination among different stakeholders.

It should also be considered that governments may have de facto national strategies for youth employment, but lack an officially adopted de jure document. For SDG 8.b.1 monitoring purposes we’ll only consider what emerges from de jure documents.

**Data Sources**

a. *Global survey for data collection:* Requesting responsible national entities to provide relevant information and support documents; a survey questionnaire is developed and administered by the ILO with biennial frequency to assess progress. This will be complemented by regular information and updates from ILO country offices on development, adoption and implementation of youth employment policies in countries covered by these offices, every year.

b. *Data compilation:* by the ILO; disseminated through ILOSTAT, a new repository dedicated to Indicator 8.b.1 and the active use of YouthPOL, EmPOL and other databases (e.g. NATLEX – the ILO database of national labour, social security and related human rights legislation), as appropriate.
Data validation: Regular quality checks will be conducted on all data, in particular when: (i) an already available document has not been directly provided by the government itself; (ii) it is unclear if the strategy and related action plan have been officially adopted; or (iii) there are doubts regarding the implementation of the strategy.

The information will be released annually through the appropriate reporting channels.

Data Availability

Description:

The methodology is mostly based on a well-tested methodology (see attached) used for the ILO youth employment policies database (YouthPOL) that covers 65 countries in 5 regions, including: Colombia, Mexico, Jordan, Australia, Cambodia, China, Republic of Korea, Philippines, Germany, Kazakhstan, Russian Federation, Italy, Spain, and Ukraine. The data can be accessed in this link. The proposed methodology now tap on this pilot test and through a simplified version of the questionnaires used in this data based, it will apply the refined version to all ILO member states.

The latest available figure for each country will be reported annually.

Calendar

- Proposed methodology to the ICLS: October 2018
- Refinement of survey questionnaire and technical guidelines: October – November 2018
- Final testing: November 2018 - February 2019
- Regular administration of the survey: as of early 2019

Data providers

National entities (ministries or other government agencies) responsible for development, employment and youth policies. The ILO will maintain a roster of national actors to be involved in the monitoring process.

Data compilers

The ILO will be responsible for compiling the information made available by national entities.
