Goal 13: Take urgent action to combat climate change and its impacts

Target: 13.b Promote mechanisms for raising capacity for effective climate change-related planning and management in least developed countries and small island developing States, including focusing on women, youth and local and marginalized communities

Indicator: 13.b.1 Number of least developed countries and small island developing States with nationally determined contributions, long-term strategies, national adaptation plans, strategies as reported in adaptation communications and national communications

Institutional information

Organization(s):
UN Climate Change (UNFCCC Secretariat)

Concepts and definitions

LDCs: http://unohrls.org/about-ldc

NDCs
The Paris Agreement requires each Party to prepare, communicate and maintain successive nationally determined contributions (NDCs) including mitigation, adaptation and support measures. The Paris Agreement (Article 4, paragraph 2) requires each Party to prepare, communicate and maintain successive nationally determined contributions (NDCs) that it intends to achieve. Parties shall pursue domestic mitigation measures, with the aim of achieving the objectives of such contributions.

Starting in 2023 and then every five years, governments will take stock of the implementation of the Agreement to assess the collective progress towards achieving the purpose of the Agreement and its long-term goals. The outcome of the global stocktake (GST) will inform the preparation of subsequent NDCs, in order to allow for increased ambition and climate action to achieve the

---

1 Acknowledging that the United Nations Framework Convention on Climate Change is the primary international, intergovernmental forum for negotiating the global response to climate change.
2 Consistent with the slight modification for accuracy, to be consistent with indicator 13.2.1, suggest re-formulation of this indicator, as explained in my intervention at the last IAEG-SDGs meeting – ‘Number of least developed countries and small island developing states with nationally determined contributions (NDCs), national adaptation plans (NAPs), long-term strategies, and adaptation communications, as reported to the UNFCCC secretariat’.
purpose of the Paris Agreement and its long-term goals. [https://unfccc.int/process-and-meetings/the-paris-agreement/nationally-determined-contributions-ndcs](https://unfccc.int/process-and-meetings/the-paris-agreement/nationally-determined-contributions-ndcs)

NDC interim registry [https://www4.unfccc.int/sites/ndcstaging/Pages/Home.aspx](https://www4.unfccc.int/sites/ndcstaging/Pages/Home.aspx)

**NAPs**

The *national adaptation plan* (NAP) process was established under the [Cancun Adaptation Framework](https://unfccc.int/process-and-meetings/the-paris-agreement/nationally-determined-contributions-ndcs) (CAF). It enables Parties to formulate and implement *national adaptation plans* (NAPs) as a means of identifying medium- and long-term adaptation needs and developing and implementing strategies and programmes to address those needs. It is a continuous, progressive and iterative process which follows a country-driven, gender-sensitive, participatory and fully transparent approach supported by technical guidelines and up to USD 3 million per developing country through the Green Climate Fund Readiness and Preparatory Support Programme, intended to support the formulation of NAPs. Technical guidelines for the NAP process are available at <[unfccc.int](https://unfccc.int)>; NAPs received by the UNFCCC secretariat are posted at <[unfccc.int](https://unfccc.int)>.

**Long term strategies**

Under the Paris Agreement, all Parties should further strive to formulate and communicate *long-term low greenhouse gas emission development strategies* to provide a context and integrated long-term view to their NDCs.

In accordance with Article 4, paragraph 19, of the Paris Agreement, all Parties should strive to formulate and communicate long-term low greenhouse gas emission development strategies, mindful of Article 2 taking into account their common but differentiated responsibilities and respective capabilities, in the light of different national circumstances.

The COP, by its decision 1/CP 21, paragraph 35, invited Parties to communicate, by 2020, to the secretariat mid-century, long-term low greenhouse gas emission development strategies in accordance with Article 4, paragraph 19, of the Agreement. Further information is available at <[unfccc.int](https://unfccc.int)>.

**Adaptation communications**

Also, each Party should, as appropriate, submit and update periodically an adaptation communication, which may include its priorities, implementation and support needs, plans and actions. The adaptation communications will be recorded in a public registry maintained by the secretariat, available at <[unfccc.int](https://unfccc.int)>.

**National communications**

The Convention established several processes to foster transparency and accountability of countries’ actions to address climate change. Under Article 12, all Parties are asked to submit national inventories and national communications (NCs) to report on the implementation of the Convention. This reporting is required at different levels of stringency and with varying frequency for different Parties. National Communications received by the UNFCCC secretariat are available at <[unfccc.int](https://unfccc.int)>.

**Rationale and concepts, comments and limitations:**

Under the United Nations Framework Convention on Climate Change (UNFCCC), all Parties shall formulate, implement, publish and regularly update national/regional programmes containing measures to mitigate climate change and to facilitate adequate adaptation, while taking into
account their common but differentiated responsibilities and their specific national and regional development priorities, objectives and circumstances. These policies and measures should be appropriate for the specific conditions of each Party and should be integrated with national development programmes.

The Convention established several processes to foster transparency and accountability of countries’ actions to address climate change.

The Paris Agreement builds upon the Convention and brings all nations into a common cause to undertake ambitious efforts to combat climate change and adapt to its effects, with enhanced support to assist developing countries to do so, charting a new course in the global climate effort. The Paris Agreement’s central aim is to strengthen the global response to the threat of climate change by keeping a global temperature rise this century well below 2 degrees Celsius above pre-industrial levels and to pursue efforts to limit the temperature increase even further to 1.5 degrees Celsius. Additionally, the agreement aims to strengthen the ability of countries to deal with the impacts of climate change.

Materials are received from Parties on an ongoing basis.

Methodology

**Computation Method:**
Count/status of plans annually in advance of preparation of SDG progress reports, based on most recent data for SIDS and LDCs.

**Disaggregation:**
n/a. Some analysis on linkages across other SDGs may be undertaken in collaboration with other UN organisations, as relevant, to show how countries are utilising these tools for implementation of climate action and SDGs more broadly.

**Treatment of missing values:**
- At country level
  n/a
- At regional and global levels
  n/a

**Regional aggregates:**
n/a

**Sources of discrepancies:**
n/a

---

3 The Paris Agreement entered into force on 4 November 2016. Further information about the Paris Agreement may be found at <http://unfccc.int/paris_agreement/items/9485.php>
Methods and guidance available to countries for the compilation of the data at the national level:

- Data is compiled globally

Quality assurance

- Data reported is based on official information as documented and reported on at <unfccc.int>.

Data Sources

Description:
Official documents and registries, as reported by Parties to the UNFCCC and the Paris Agreement, and published on <unfccc.int>.

NDC interim registry available at <unfccc.int>

Long term strategies received by the UNFCCC secretariat are available at <unfccc.int>. 

NAPs received by the UNFCCC secretariat are available at <unfccc.int>. 

Adaptation communications will be recorded in a public registry maintained by the secretariat, available at <unfccc.int>. 

Collection process:
Submission of documents to the UNFCCC Secretariat from Parties to the UNFCCC and Paris Agreement.

- NAP Central and Adaptation Registries under the UNFCCC: https://www4.unfccc.int/sites/napc/Pages/Home.aspx; https://unfccc.int/topics/adaptation-and-resilience/workstreams/adaptation-registry
- Least Developed Countries Expert Group yearly reports https://unfccc.int/process/bodies/constituted-bodies/least-developed-countries-expert-group-leg;

Data Availability

Description:
Number of SIDS and LDCs; Number of Parties to the UNFCCC and Paris Agreement

To this date, 187 Parties have ratified the Paris Agreement, of 197 Parties to the Convention. https://unfccc.int/process/the-paris-agreement/status-of-ratification
Time series:
Ongoing as Parties submit reports. Will be compiled annually in advance of preparation of annual SDG progress reports; NDCs are submitted in advance of the global stocktake, (starting in 2023) every five years, with the next round of NDCs (new or updated) being submitted by 2020.

https://unfccc.int/topics/science/workstreams/global-stocktake-referred-to-in-article-14-of-the-paris-agreement

Calendar

Data collection:
Ongoing as Parties submit reports. Will be compiled annually in advance of preparation of annual SDG progress reports; in advance of the global stocktake.

Data release:
Ongoing as Parties submit reports. Will be compiled annually in advance of preparation of annual SDG progress reports; in advance of the global stocktake.

Data providers

Parties to the UNFCCC and Paris Agreement, aggregate, UN Climate Change (UNFCCC Secretariat); Further analysis on linkages across other SDGs may be undertaken in collaboration with other UN organisations, as relevant, to show how countries are utilising these tools for implementation of climate action and SDGs more broadly.

Data compilers

UN Climate Change (UNFCCC Secretariat).

ADAPTATION COMMUNICATION

Recommended content (X/CMA.1):
- National circumstances, institutions, laws
- Impacts, risks, vulnerabilities
- Adaptation priorities, strategies, policies, plans, goals, actions
- Needs of and provision of support to developing countries
- Implementation (progress, cooperation, barriers, lessons learned, monitoring and evaluation)
- Adaptation/economic diversification resulting in mitigation co-benefits
- Links with other international frameworks
- Gender, traditional knowledge, indigenous knowledge

NDC

National communication

NAP-related documents

Adaptation-related content of BTRs (X/CMA.1):
- National circumstances, institutions, laws
- Impacts, risks, vulnerabilities
- Adaptation priorities and barriers
- Adaptation strategies, policies, plans, goals and actions to integrate adaptation into policies
- Progress on implementation
- Monitoring and evaluation
- Information related to loss and damage
- Cooperation, good practices, experiences, lessons learned

Adaptation-related content:
- For developed countries (FCCC/CP/1999/7):
  - Expected impacts
  - Results of scientific research on e.g. impacts, response options, and technologies
  - Integrated plans for coasts, water, agriculture
  - Outline of action taken on adaptation
  - Support provided to vulnerable countries
- For developing countries (17/CP.8, annex):
  - National circumstances
  - Vulnerabilities and methodologies used
  - Use of policy frameworks
  - Programmes containing adaptation measures (steps taken or envisaged), strategies, measures, priority areas, pilot projects
  - Activities taken to integrate adaptation into planning
  - Barriers to implementation of adaptation
  - How support programmes of annex II Parties meet adaptation needs
  - Evaluation of adaptation strategies and measures

Country can choose a communication vehicle...

Submit information/initially of adaptation communication on guidance

2. Technical assessment (2-3 sessions before COP-26, in November 2023):
- Parties invited to provide, in NCS, information on:
  - Measures taken
  - Support provided or received
  - LDCs encouraged to provide information on their NAP process through NCs and other channels
  - UN and other organizations to provide information on their support to the NAP process
- Parties should monitor and review their efforts, and provide information in their national communication on progress made and effectiveness of the NAP process
**ADAPTATION COMMUNICATION**
- Submit in time to inform each stocktake
- Include common vs. additional types of information
- Focus: forward-looking information
- Possible to “tailor” information depending on communication vehicle

**Registry**

**GLOBAL STOCKTAKE (2021-2023)**
   - Secretariat synthesizes state of adaptation efforts, experience and priorities based on latest documents
   - UNFCCC institutions synthesize information in their areas of expertise based on latest documents

2. Technical assessment (2-3 sessions before CMA 6 = June/Nov 2022)

3. Consideration of outputs (CMA 6, 2023):
   - Identify opportunities for enhancing efforts, challenges, good practices, and political messages
