This standard corresponds partly with ISO-standard 3166:1988 and DIN
(German Industrial Standard) 3166, March, 1983.

For the purpose of short presentation of countries, that are states,
dependend territories and territories of special interest - covering
the whole surface of earth - are related to them two-letter-codes,
three-letter-codes, three-digit numerical codes and the codes of the
UDC (International Decimal Classification).

The names of the units are given in German. The list comprises the
official form of the names of states and their short form according
to the spelling of the Austrian Ministry for Foreign Affairs, for
dependend territories and territories of special interest according
to the spelling of DIN 3166, March, 1983. Units that are not acknow-
ledged as states by the Republic of Austria (= dependend territories
and territories of special interest) are additionally characterized
by "+".
