International Seminar on Sea Names, 2013[†]

SUMMARY

The 19th International Seminar on Sea Names was held in Istanbul in August 2013. Over forty participants discussed issues of geographical naming, especially of maritime features, in paper presentations and panel discussions. Launched in 1995, this annual seminar currently intends to broaden its scope to serve as a general forum where principles and practices of naming maritime features are discussed with complementing perspectives of international studies. The total number of papers presented so far has reached 290, all of which can be downloaded at: <http://www.eastsea1994.org/seminars>.

The 19th International Seminar on Sea Names took place in Istanbul, Turkey on 22-24 August 2013. Over forty participants discussed issues of geographical naming, especially of maritime features, in the presentations of sixteen papers and panel discussions. The seminar was co-organized by The Society for the East Sea and the Northeast Asian History Foundation and joined by The Institute for History of Ataturk's Reform and Principles, Istanbul University, as the local organizer. All papers presented as well as discussion points were edited and published as a book, titled "Sea, Sea Names and Mediterranean Peace."

Launched in 1995, the seminar was initially motivated to search for a resolution to the chronic disputes between the Republic of Korea and Japan concerning the name of the sea between the two states. It has, however, now broadened its scope to serve as a general forum where principles and practices of naming geographical features, especially maritime features, as well as issues of international standardization and documentation of geographical names are discussed. Recently, the topic of discussion has expanded to include the fields of international politics and relations and international law.

The total number of papers presented from the 1st to 19th seminars has reached to 290, all of which can be downloaded at: <http://www.eastsea1994.org/seminars>. The 20th International Seminar on Sea Names is scheduled to be held in Gyeongju, Republic of Korea, in October 2014. Any experts interested in participating are welcome to contact Professor Yeon-Taek Ryu at: ytryu@chungbuk.ac.kr.
