Interim Concise Gazetteer of the World

(Submitted by E. Meynen (FRG), Chairman  
of the special Study Group on the Interim  
Concise Gazetteer of the World)

Interim  
Concise Gazetteer of the World  
- Preliminary edition -

The gazetteer includes the names of geographical entities of the World. Names of populated places are given according to size and administrative function, under consideration of economic and traffic importance or of historical interest, but without any fixed linking to the total population. Names of mountains, rivers and lakes and the names of certain regions are added. The individual country, its size and configuration determines the amount of the selection of the names. For each country the total number of the objects is chosen in accordance with the other countries.

The form of names

The names are given in their national official forms, respectively in the form of the national standardization adopted by the UN-Conferences of Standardization of Geographical Names where this is the case. In the case of a non-Roman language the names are given according to the national transcription adopted by the UN-Conferences of Standardization of Geographical Names. Where such one doesn't exist the names are given in accordance with the ISO - transliteration.

Thailand: Transcription list of Thai adopted by UN-Conference on Standardization of Geographical Names

Tunisia: ISO R 233. In the case, that a national Arabic transliteration will be approved by the United Nations, this has to replace ISO R 233.

Languages

The national language of the states is as follows:

- (1) Argentina: Spanish
- (2) Thailand: Thai in standardized transliteration
- (3) Tunisia: according to ISO - transliteration
- (4) Upper Volta: French

3 (b) STANDARD METHOD OF transliteration OF THAI GEOGRAPHIC NAMES INTO ROMAN

1. Transliteration of Thai into Roman constituting a transcription of pronunciation will be used according to the notification of the Royal Institute as proclaimed in the *Royal Gazette* vol. 56, section 85, but for cartographic purposes consonant markings could be omitted and combined vowels separated.

2. After omission of markings and separation of vowels mentioned above, corresponding Roman and Thai characters will be as shown in the appendices.

3. Geographical names will be transliterated into Roman individually according to their pronunciation, except those which would be meaningless, or have a different meaning, unless combined, for example:

"Chorakhe" (crocodile) must not be divided into "Cho Ra Khe", which is meaningless;

"Samphao" (junk) must not be divided into "Sam Phao", which is meaningless;

"Khangkhao" (bat) must not be divided into "Khang Khao", which has a different meaning.

4. Names which are combinations of words and the last consonants of words pronounced should be transliterated as single words to retain their original pronunciations and forms, for example: "Rat-chakhrum" is transcribed from the Thai words which, without the above notation, would be "rat khram"; "Aranyaprathet" is transcribed instead of "Aran Prathet".

5. Names comprising many syllables, of which the last and the first character of the first and second syllable respectively are vowels should be separated by a hyphen, for example, "Saing" is written "Sa-ing".

6. Foreign names in Thai territory, such as the Malayan words for island ("pulo") or point ("tanyong"), should be changed into Thai. The Ministry of the Interior will issue a notice to this effect, but exceptions will be made for well-known names by also writing these names in parentheses. Common nouns of foreign names outside Thai territory will be translated into Thai prior to the writing of those names in Thai, but Romanization will follow English usage.

7. The words "changwat", "amphoe" and "tambon" may be omitted.

8. Proper nouns in other languages which appear in the list of communities of the Ministry of the Interior shall be accepted without translation into Thai, because they are proper names.

9. All kinds of water courses, either artificial or natural, shall be called "khlong".

10. The following rules shall be observed in the transliteration of geographical names:

Thai names pertaining to geographical features such as mountain ("Khao"), island ("Ko"), river ("Mae Nam") shall be transliterated into Roman without translation into English; for example, "Khao Bo Thong" (Bo Thong Mountain), "Ko Yung" (Yung Island);

Thai names which are clearly identified, such as road ("Thanon"), monastery ("Wat"), shall be transliterated without translation into English; for example, "Thanon Maha Rat" (Maha Rat Road), "Wat Maha That" (Maha That Monastery);

Only proper nouns of Thai names not pertaining to geographical features and not self-explanatory shall be transliterated into Roman, but the common nouns shall be translated into English; for example, "Hua Lamphong Station". Exception shall be made for names of governmental organizations, which will be translated into English directly, such as, "Customs House", "Post Office", "Hydrographic Department" etc.

Names of private organizations or geographical names shall be adopted without any modification, e.g. "East Asiatic Co. Ltd.", "Hin Loftus" etc.
