## Important data gathered will be used for statistical purposes only!

Преброятелната карта съдържа три части, които се попълват в следната последователност: "Сграда", "Жилище" и "Население"

- В частта "Сграда" се попълват данни за жилищната сграда. В случаите, когато в една сграда има повече от едно жилище, тази част се попълва само в картата, в която се вписват сведенията за първото жилище.
- В частта "Жилище" се описват някои основни характеристики на жилището. За подвижни/примитивни жилища се попълва само въпрос 1 от частта за жилище, а частта за сграда се зачертава с диагонална черта.
- В частта "Население" е предвидена възможност да се впишат сведения за 5 лица. В случаите, когато в едно жилище живеят повече от 5 лица, се попълва нова преброятелна карта, за която частите "Сграда" и "Жилище" не се попълват, а номерът на лицето продължава номерацията от предната карта, т. е. 06, 07 и т. н. Когато в жилището живеят повече от 10 лица преброятелят попълва и трета карта – част "Население", като номерът на лицето следва номерацията от предходната, т.е. 11, 12 и т. н.

- За всеки въпрос в част "Сграда" и част "Жилище" преброятелят загражда цифрата пред съответния верен отговор и същата цифра изнася в клетката.

- За някои от въпросите в част "Население" преброятелят спазва указания начен на отбелязване на отговорите, посочен в Инструкцията.

Знакът  многоточие указва, че на тези въпроси отговорът се изписва с думи или с цифри. Много важно е изписването на текстовете (цифрите) да бъде четливо.

- Знакът  указва, че на отговорилите на дадената разновидност се задава въпросът, посочен в скобите пред него.

- Знакът \* указва, че на тези въпроси лицата отговарят доброволно.
