Instructions for self-completion

The questionnaires have to be filled in by using a ball-pen in readable way. The responses to the questions should be given according to the choices by ticking an X-mark in a box, writing numerals in constrained boxes or writing text in framed boxes. However, you must not write in the boxes framed by broken lines!

Only those questions are discussed here for which, in our opinion, you may need more explanation to answer them, and it's not been included on the questionnaire itself. The questions are referred by their respective numbers. Should any questions occur that you are uncertain to answer please consult with the enumerator.

Completion of the Dwelling Questionnaire

2. In the case of buildings used without usage permit the year of construction is considered to be the date when the first occupant moved into the house. You have to mark the year or period of reconstruction if the main construction elements of the building have been changed (e.g. replacement of ceiling occurred, main walls of the building were opened).
7. A room is considered as a place bigger than 4 m² with door and window, and used for daily residence or sleeping. Consulting rooms, offices, workshops, etc., as well as a hall and a dining-room with a window are also considered as rooms. Places joining rooms through a hatch without door (e.g. alcove, dining-box) must not be considered as a separate room, it should be counted in together with a room or kitchen instead.
11. The response is *PB-gas from container* if a system serves one or more dwellings or houses through a local pipeline by using this container.
12. The heating is *individual* if the places of the dwelling are heated separately by oven, gas-heater, etc.
