On the Population Census

The Population Census is to be taken throughout Japan as of October 1, 1995.

The Population Census has been conducted every five years since 1920 in accord with Japan's Statistics Law, and it is one of the most important statistical surveys in this country.

The Population Census enumerates all residents, and obtains statistical data on their demographic and socio-economic characteristics. Statistics to be compiled from the census returns will be used by the central and the local governments in policy-making and by a variety of other users.

You are requested to report in this questionnaire on all persons who live in your household. Please fill in the questionnaire before the enumerator visits you again to collect it early in October.

Under the Statistics Law, your answers are kept strictly confidential, and it is prohibited to use them for anything except statistical purposes.

We request your cooperation in the Population Census.
