

## India: National Accounts Statistics: Sources and Methods – 2007

This is the most authentic publication relating to the compilation of Indian National Accounts Statistics. The publication describes the data sources and methods of estimation followed in India in the preparation of macro-economic aggregates, domestic product, consumption, saving, capital formation, capital stock, accounts of the public sector and consolidated accounts of the nation.

It also covers the methodology of compiling Input-Output transaction tables, Quarterly and Advance estimates of GDP, estimation of rural-urban income etc.

There is also a detailed bibliography of all publications relating to National income and other reports.

Custodian: Statistics India
