Traditional Data Acquisition

Data Acquisition in the Cloud

Sentinel-2

We have provided a grant to a Slovenian company called Sinergise to explore ways to share Sentinel-2 data via Amazon S3.

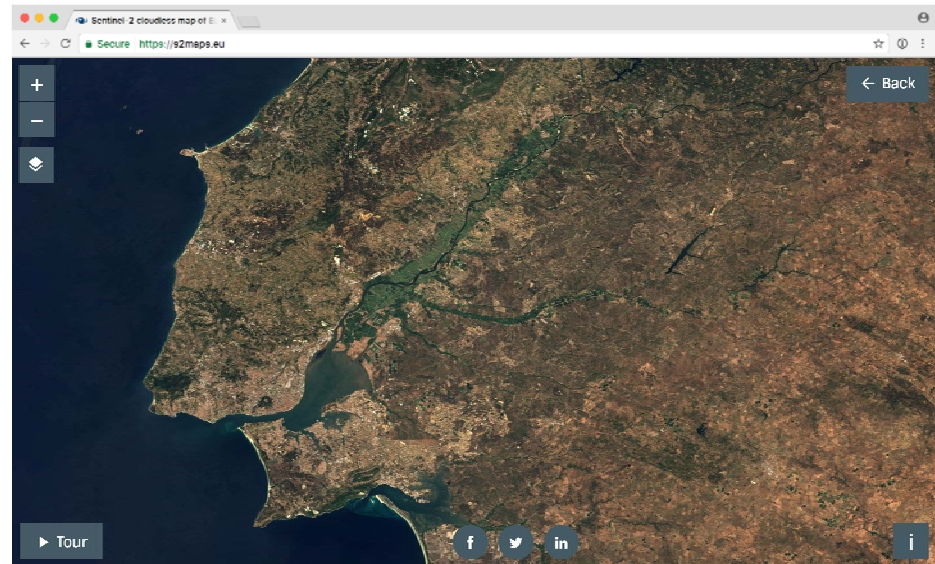

SINERGISE

EOX

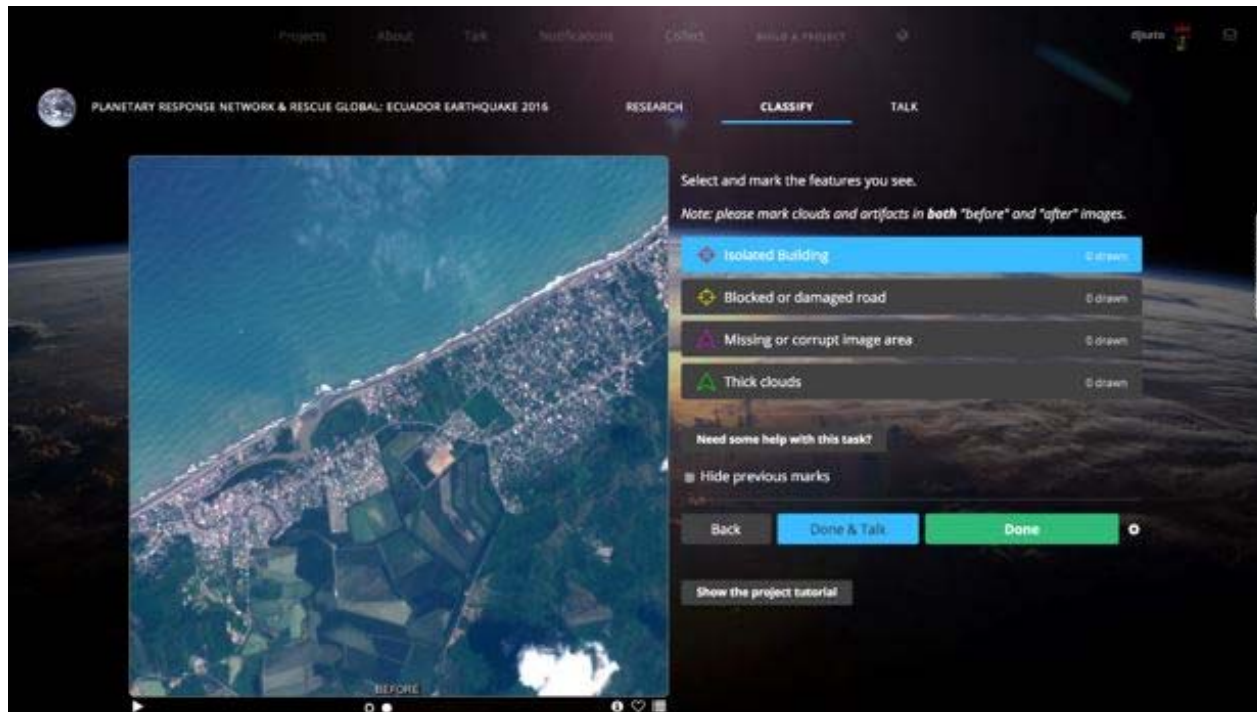

EOX, an Austrian company, used Sentinel on AWS and catalog services from Sinergise to combine over 8 trillion pixels and create a cloudless atlas over the entire world. Tiles are publicly available in S3 at `s3://eox-s2maps`.

Zooniverse Planetary Response Network

Landsat

Landsat 8 satellite

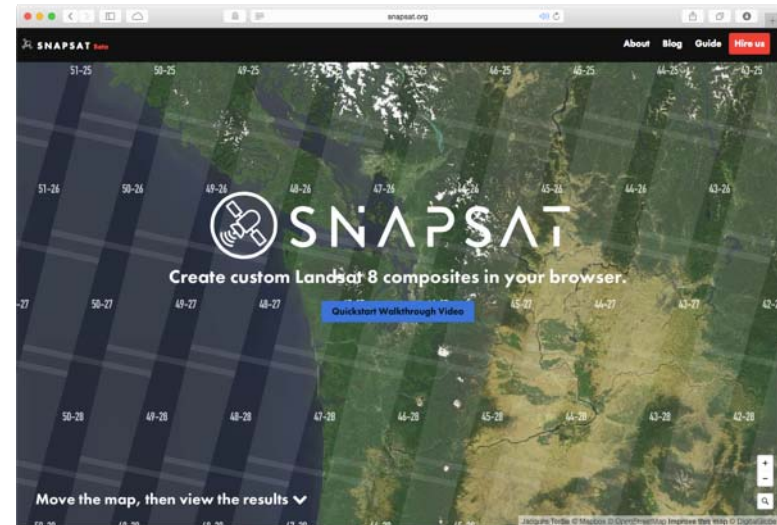

Raster data

Snapsat

A team of five novice programmers used Landsat on AWS to build a web app called Snapsat that creates Landsat data visualizations in seconds.

Snapsat was built during the team's 8-week training program at Code Fellows. They launched it just months after learning to write code.
