## What is Positium?

Private company developing methodology and technology for processing mobile phone data for human mobility analyses and statistical indicators

A spin-off company of University of Tartu (Estonia) as of 2004

# What is the Evidence Mobile Data can be Used for Statistics and Planning?

# Validation of home detection

Positium and University of Tartu have developed home anchor point models that reach 99% accuracy for county level\*

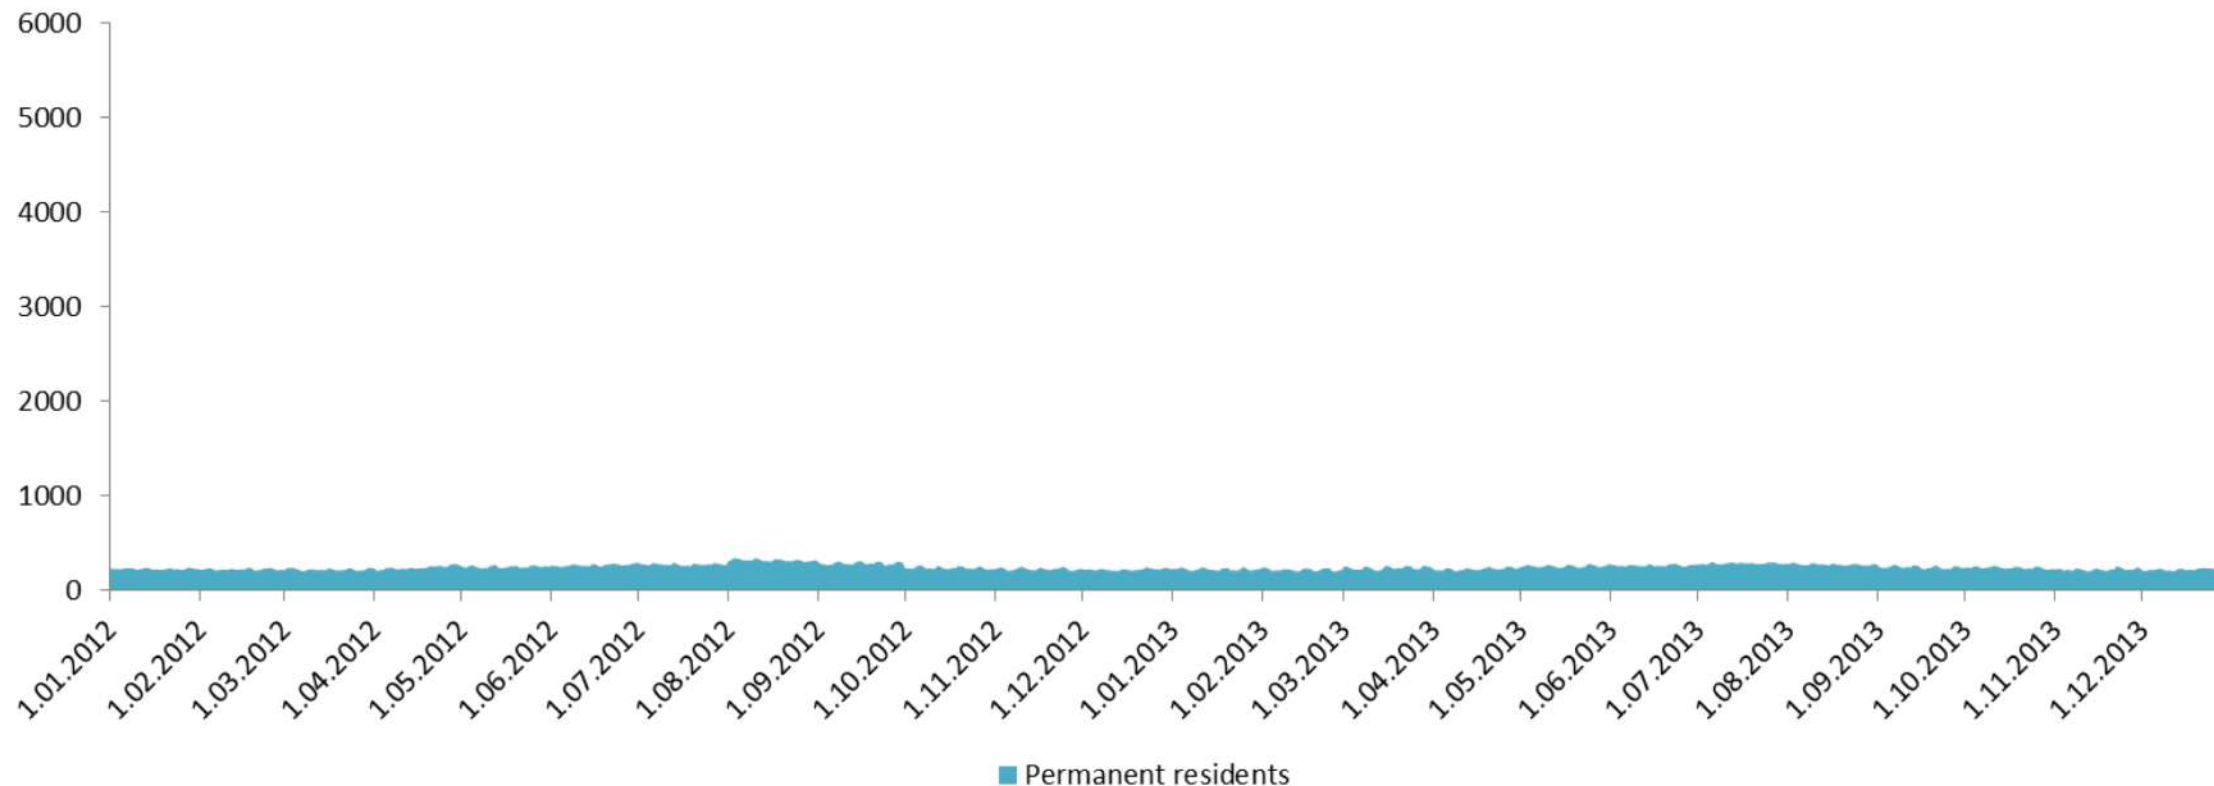

\* Based on validation study done with Statistics Estonia, where comparison was done between the MPD anchors calculated by Positium, population registry data and people's true home address

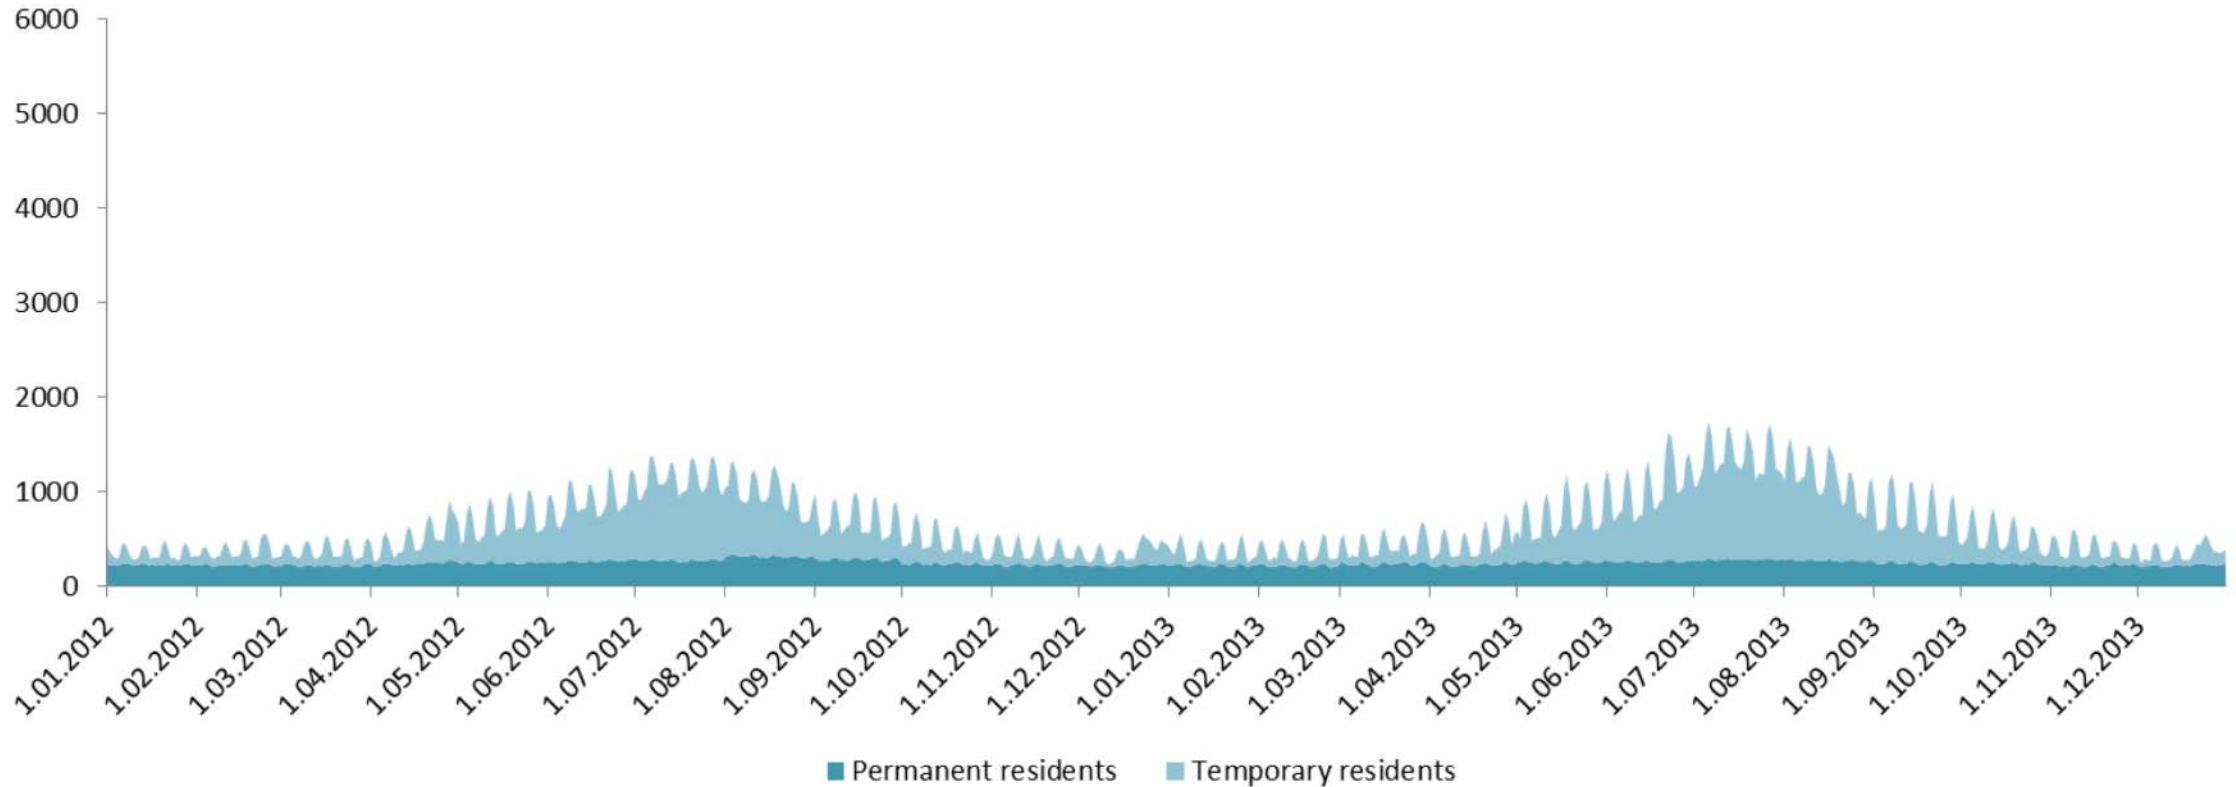

# Daily population

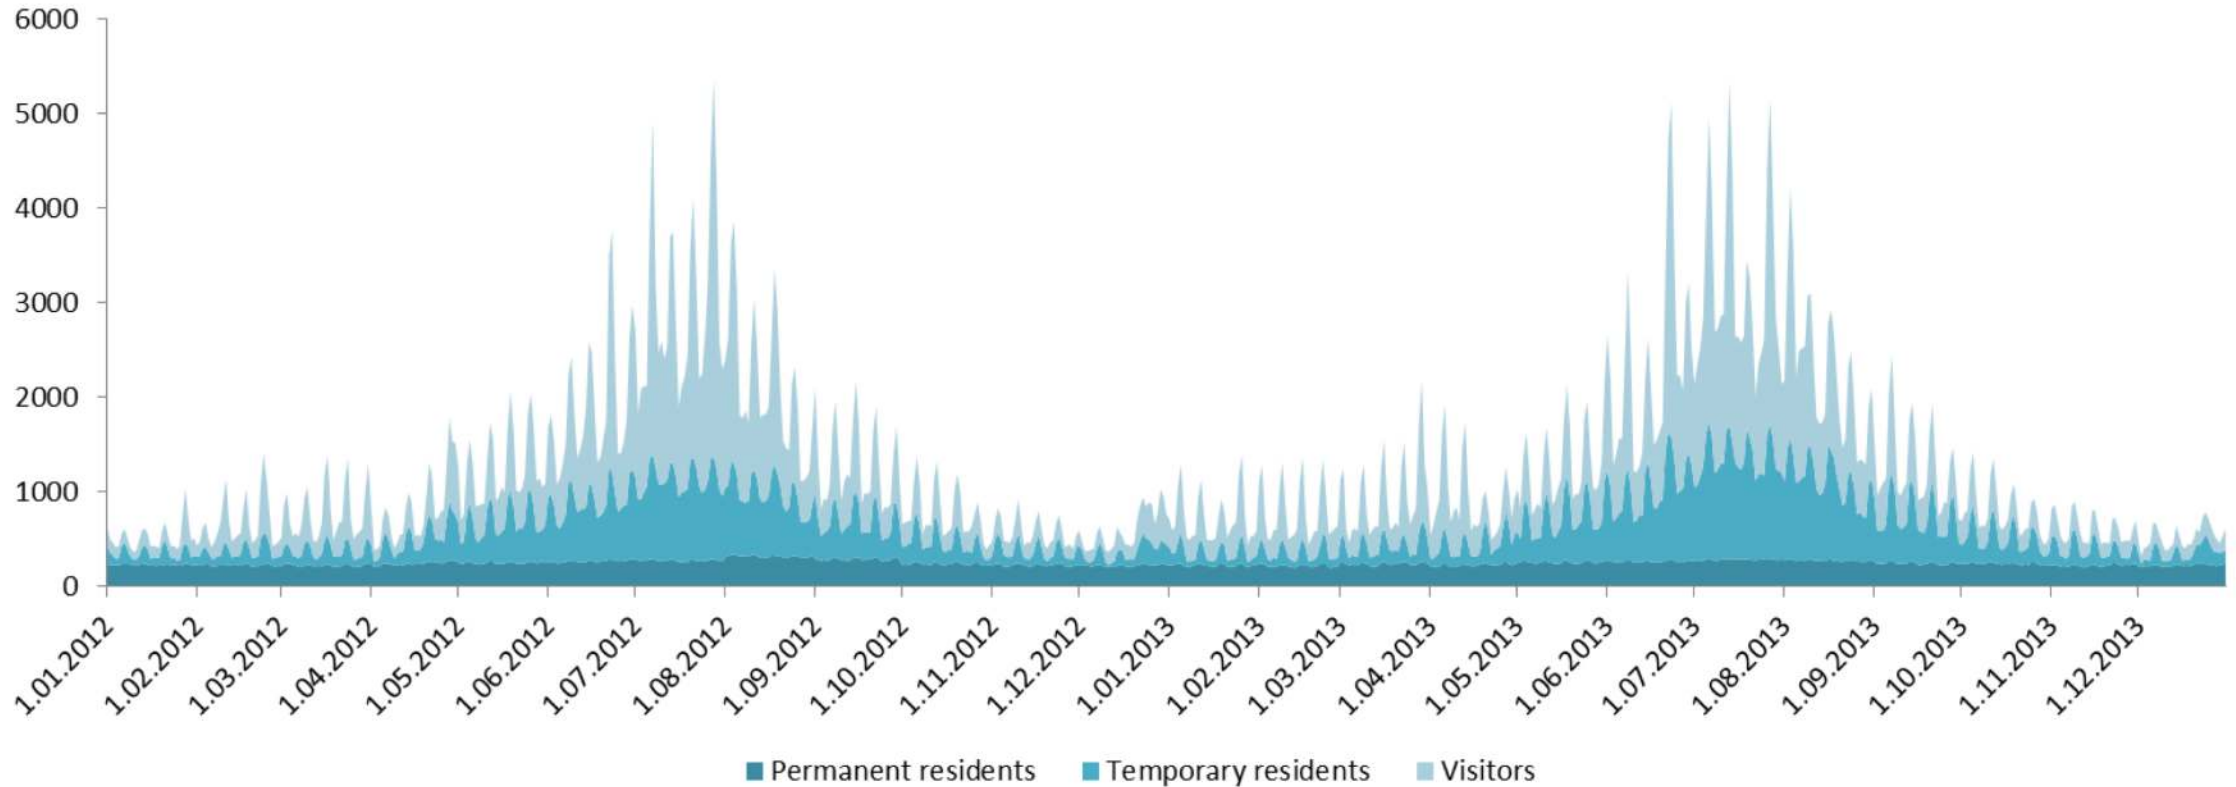

# Daily population + temporary residents

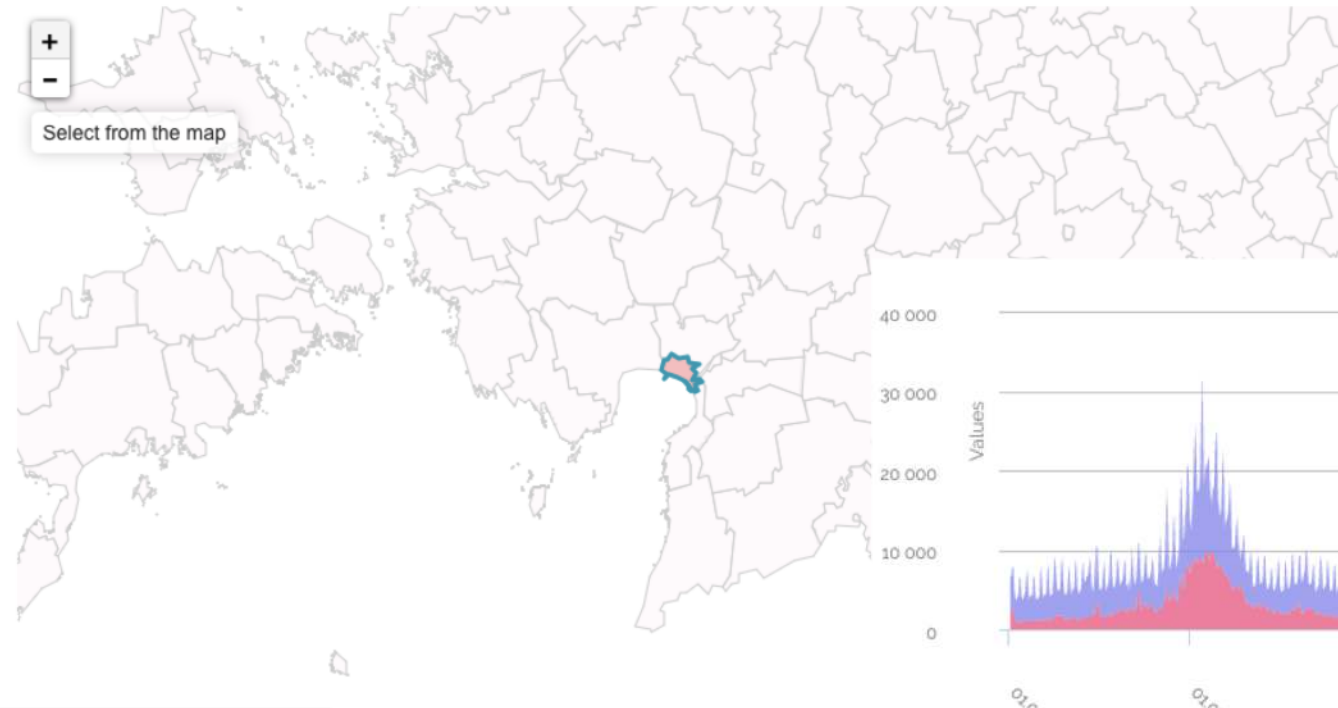

# Daily population + temp residents + visitors

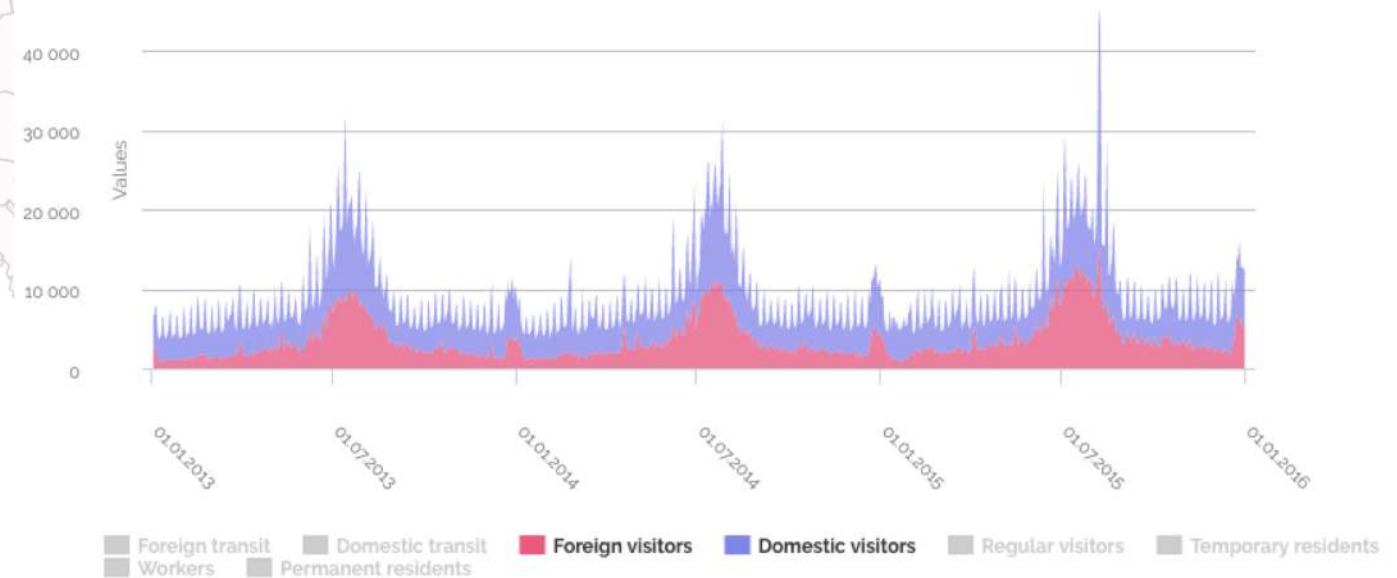

# Domestic Tourism Statistics in Estonia

Pärnu linn

Positium calculates the number of domestic tourists for all >200 municipalities in Estonia

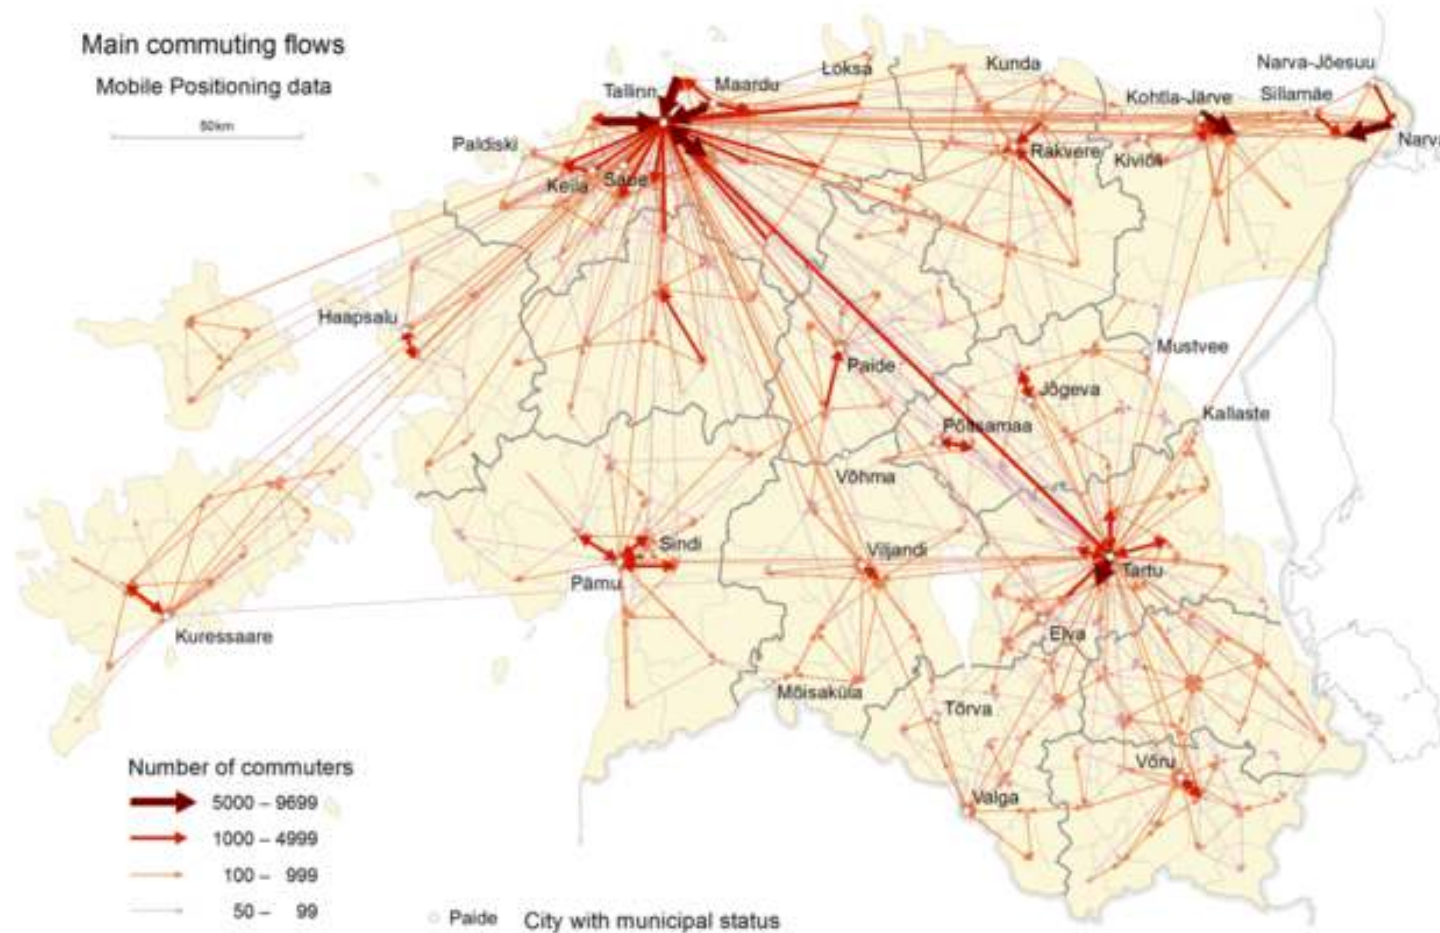

And produces data that can be output daily

Used by various government offices and municipalities in Estonia

# Commuting - Census compared to MPD

Correlation:  
Pearson  $r = 0.89$

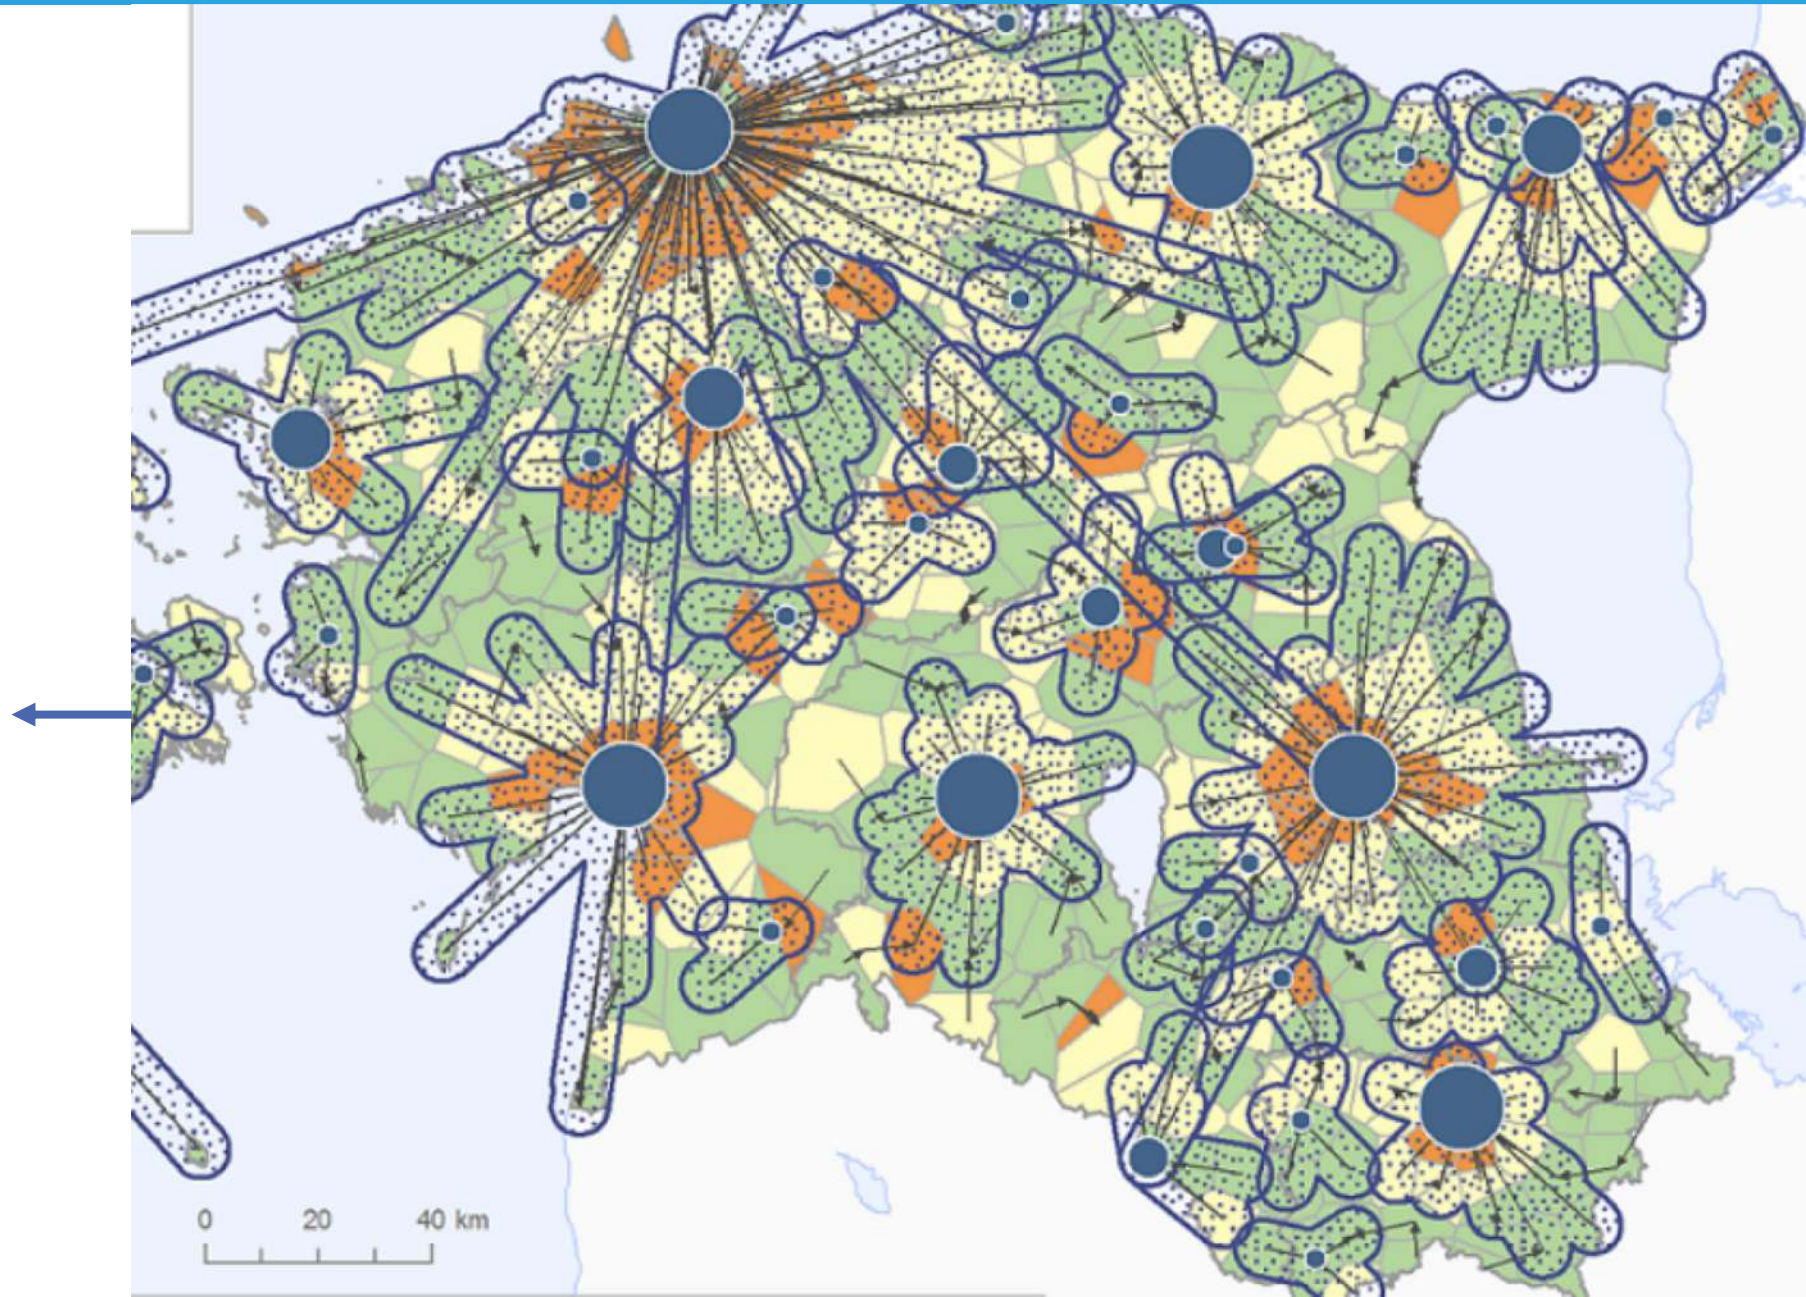

# Regional Planning

Estonia used to have  
>200 local  
municipalities

2017: Administrative  
reform prepared with  
MPD – detecting  
functionally  
connected regions

2018: 79  
municipalities

\* MPD study ordered by Estonian  
Ministry of Regional Development

# Case: Official Travel Statistics, Estonia (2009-...)

Client: Central Bank of Estonia  
(the official travel statistics provider in Estonia)

- Since 2009
- The **longest running official statistics** time series based on big data in the world
- The **only** recurring official statistics based on big data in the world
- Quality checks done by statisticians at the Bank
- Results compared to survey method:

**4x**

faster

**200x**

sample size

**12x**

countries  
breakdown

**2.5x**

more cost-  
efficient

**100%**

less burden  
on tourists

# MPD Projects

Dynamic population data for security, Estonia

Mobility studies, Rio de Janeiro, Brazil

Improved Response to Disasters, India

Statistical production system, Oman

ICT Statistics (ITU project), Kenya

Cross-border tourism statistics, Indonesia

# Eurostat Study for Tourism Statistics

Established feasibility to implement mobile data based tourism statistics in Europe

[mobfs.positium.com](http://mobfs.positium.com)

A manual for country statistical systems

\* European Commission (Eurostat) commissioned a study on how to implement in Europe the concept of tourism statistics based on MPD. The study produced recommendations for data access, methodology and business model.

## Feasibility Study on the Use of Mobile Positioning Data for Tourism Statistics

Consolidated Report  
Eurostat Contract No  
30501.2012.001-  
2012.452

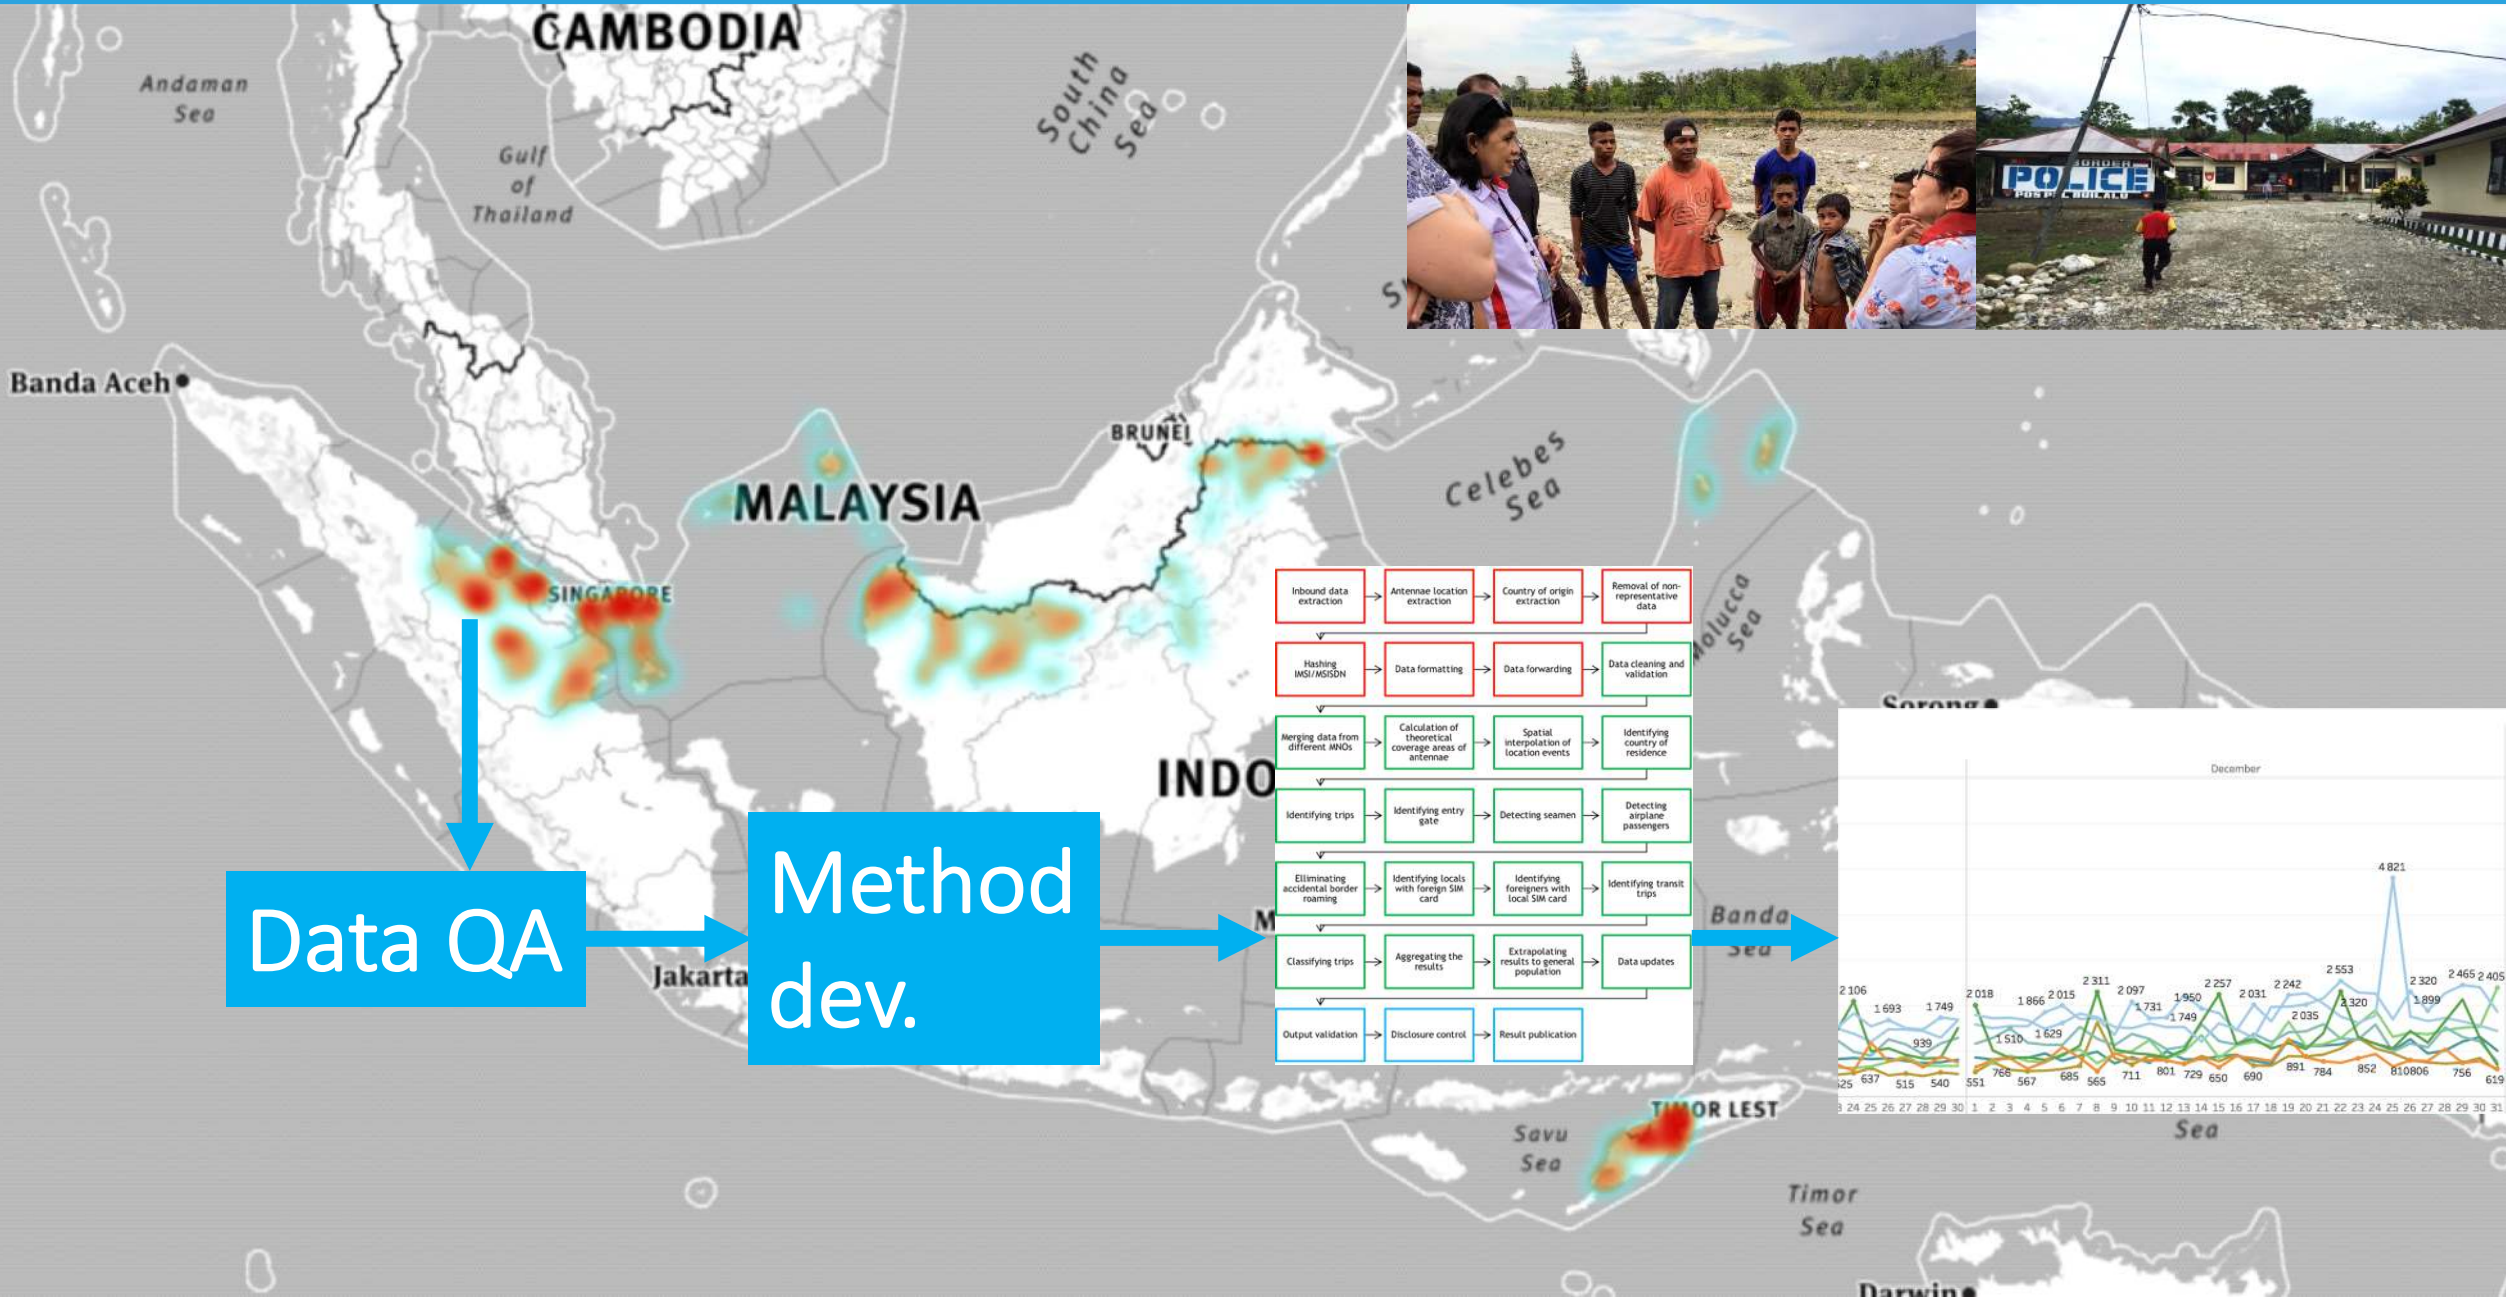

30 June 2014

eurostat

# Interactive dissemination possibilities

# Summary

- Mobile phone data is a proven data source for measuring the movement of people
- Universal method that can be scaled for statistics globally, lead by the Statistical Office

Positium delivers software and services to analyse mobile positioning data for official statistics
