

The Global Initiative on Unique Identifiers for Businesses and the LEI

UNSD GLEIF webinar series

11 October 2023

Ricco Dun, Business Operations GLEIF

Agenda

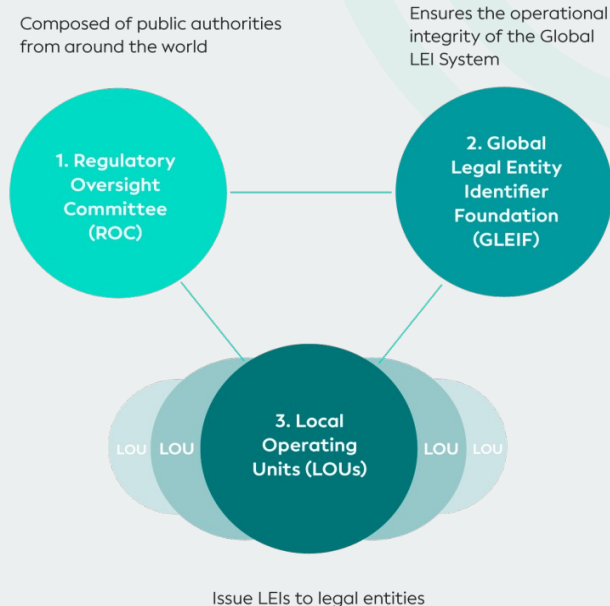

1. The LEI and GLEIF
2. Recent developments; endorsements of the LEI
3. The Global Initiative on Unique Identifiers for Businesses and the LEI

The LEI governance system and the Global Legal Entity Identifier Foundation (GLEIF)

- In 2011, the G-20 leaders supported "the creation of a global legal entity identifier (LEI) which uniquely identifies parties to financial transactions."
- GLEIF is the not-for-profit foundation which manages the LEI. It was founded by the Financial Stability Board (FSB).
- GLEIF is overseen by the [Regulatory Oversight Committee \(ROC\)](#) with:
 - 71 regulators and
 - 19 observers
 - from 50 countries.
- GLEIF Board has 18 independent directors.
- 37 accredited Partners for LEI issuing.

The Financial Stability Board (FSB) and the Group of Twenty (G20) have endorsed the LEI, Global LEI System and GLEIF.

What is the Legal Entity Identifier (LEI)?

- A machine-readable 20-character alpha-numeric code.
- An open global ISO standard (17442).
- A life-long identifier owned by the respective legal entity.
- It points to the associated reference data, which answers 'who is who' and 'who owns who' on a global basis.
- A public good with comparable governance framework.
- There are more than 2.400.000 LEIs issued globally.

Global Regulatory Framework for the LEI – over 80 Regulations in the EU

<https://www.gleif.org/en/lei-solutions/regulatory-use-of-the-lei>

Ways to access and use the LEI reference data

- LEI Search: <https://search.gleif.org/#/search/simpleSearch=>

LEI Search 2.0

Search LEI Records Expert Mode

FIND LEIS Search in LEI, Names, BIC, Addresses

Apply filters: Country General Category Status Clear filters

- GLEIF API: <https://www.gleif.org/en/lei-data/gleif-api>

The GLEIF API gives developers access to the full LEI Data search engine functionality, including filters, full-text and single-field searches of legal entity and ownership data, and “fuzzy” matching of relevant data fields such as names and addresses.

European Systemic Risk Board's (ESRB) Support for the LEI

- ESRB is the macro-prudential oversight body of the EU
- ESRB acknowledged that the adoption of the LEI by non-financial sector entities is limited.
- For preventing market fragmentation and maximizing the benefits arising from the use of the LEI, ESRB identifies **the need for establishing a legal framework regulating the use of LEI** in the EU.
- Recommendation A: Introduction of a Union framework on the use of the LEI – by June 2023
- Recommendation B - Use of the legal entity identifier until the possible introduction of Union legislation – by December 2021

Committee on Monetary, Financial and Balance of Payments Statistics (CMFB) Support for the LEI

- Advisory committee for Eurostat and ECB
- May 2023 Opinion on the LEI
- Recommendations ('Opinion'):
 - the CMFB encourages all initiatives which help broaden the coverage and use cases of the LEI, minimizing or even eliminating the cost of issuance and renewals for European companies;
 - the CMFB asks the Commission to take into account the statistical usefulness of a broader LEI coverage when reporting on whether or not to make the LEI mandatory for a wider range of legal entities across the EU;
 - the CMFB encourages a global use of LEI through various international fora, in the attempt to extend the benefits of the LEI implementation for statistical purposes beyond the EU boundaries.

Bank for International Settlements – Project Aurora

What are policy tools to advance the fight against financial crime?

Solutions

- FATF has identified that data-sharing, advanced analytics and data standardization are critical for effective AML and CFT efforts.
- Technology and collaboration could support financial institutions, central banks, supervisory and other public authorities to address AML challenges through collaborative analytics and learning.
- Data quality and standardization of data identifiers and fields are important factors.

Role of the LEI

- The LEI could help identify a greater range of money laundering activities involving legal entities.
- The LEI could connect a greater range of data sets and capture different relationships which could be useful in AML efforts.
- It could also address the challenges faced by monitoring systems from inconsistencies in how entities are identified.

Project Aurora – the power of data, technology and collaboration to combat money laundering across institutions and borders, June 2023

<https://www.bis.org/about/bisih/topics/fmis/aurora.htm>

Main objectives UNSD – GLEIF project proposal

UN Committee of Experts on Business and Trade Statistics

Sixth Meeting of the UN Committee of Experts on Business and Trade Statistics

- Strengthen the transparency on businesses in countries by improving their registration;
- Improve the availability of unique business identifiers in administrative data sources in countries;
- Promote access to and sharing of administrative data for statistical business registers.

Initial focus UNSD – GLEIF project proposal

- Host series of webinars / sprints Oct-Dec 2023
- Outreach to relevant international/regional organizations
- Coordination of technical cooperation activities aimed at strengthening the administrative registration of businesses in countries and the relevant legislation
- Development of guidelines and case studies on the importance of a well-functioning registration system in countries for SBRs
- Demonstrate the importance and benefit of linking national identifiers with a global identifier, the LEI

Potential use cases

- The LEI is available (for free) for any use case
- Available via search, API, download (also data from a date in the past)
- Bulk issuing of LEIs to all entities in a country is possible; first 2 pilots about to start
- Any business register under development can use the LEI as the single identifier, both for domestic and international purposes
- Any party, including SBRs, can use the LEI as the overarching unique identifier for data coming from different sources
- Any party, including SBRs, can use the data on parents and children from the LEI database to enrich their data

Thank you!
