Comparable statistics cross domains?

- Statistics on National Accounts, Business, Employment, Environment, Research, Occupational injuries, Sick leave, etc. used
- Same Business entity definition used?
- Breakdown by type of industry (ISIC)?
- Breakdown by ownership (private/public).
- Same coverage of activity?
- Only results for enterprises over a threshold?

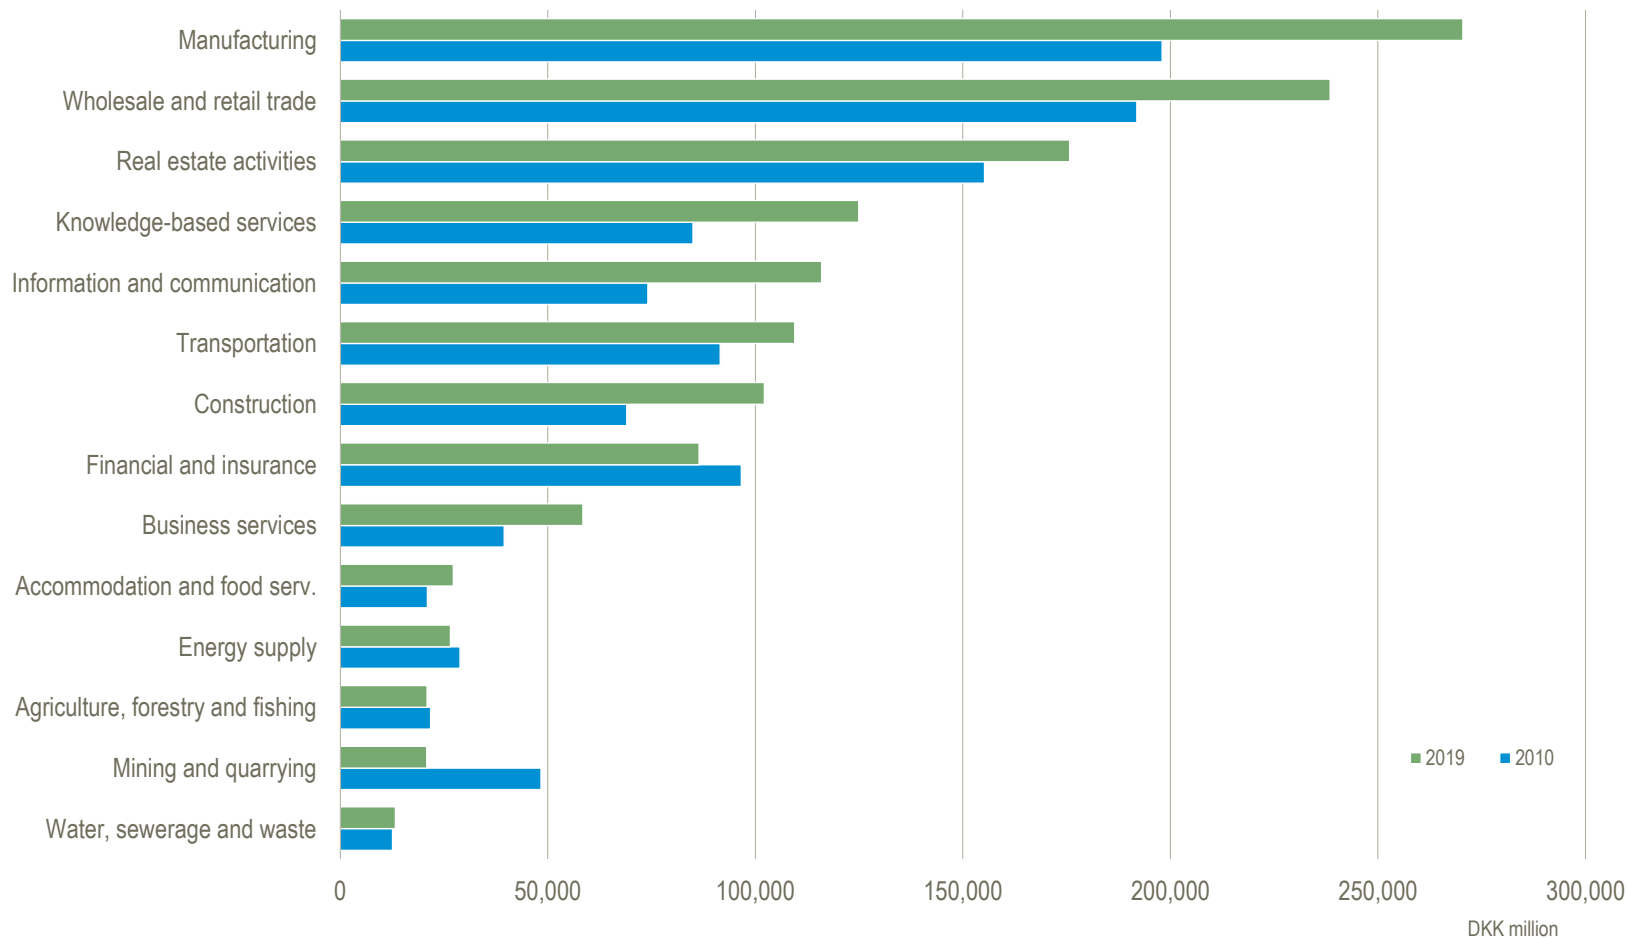

The study regarding Denmark

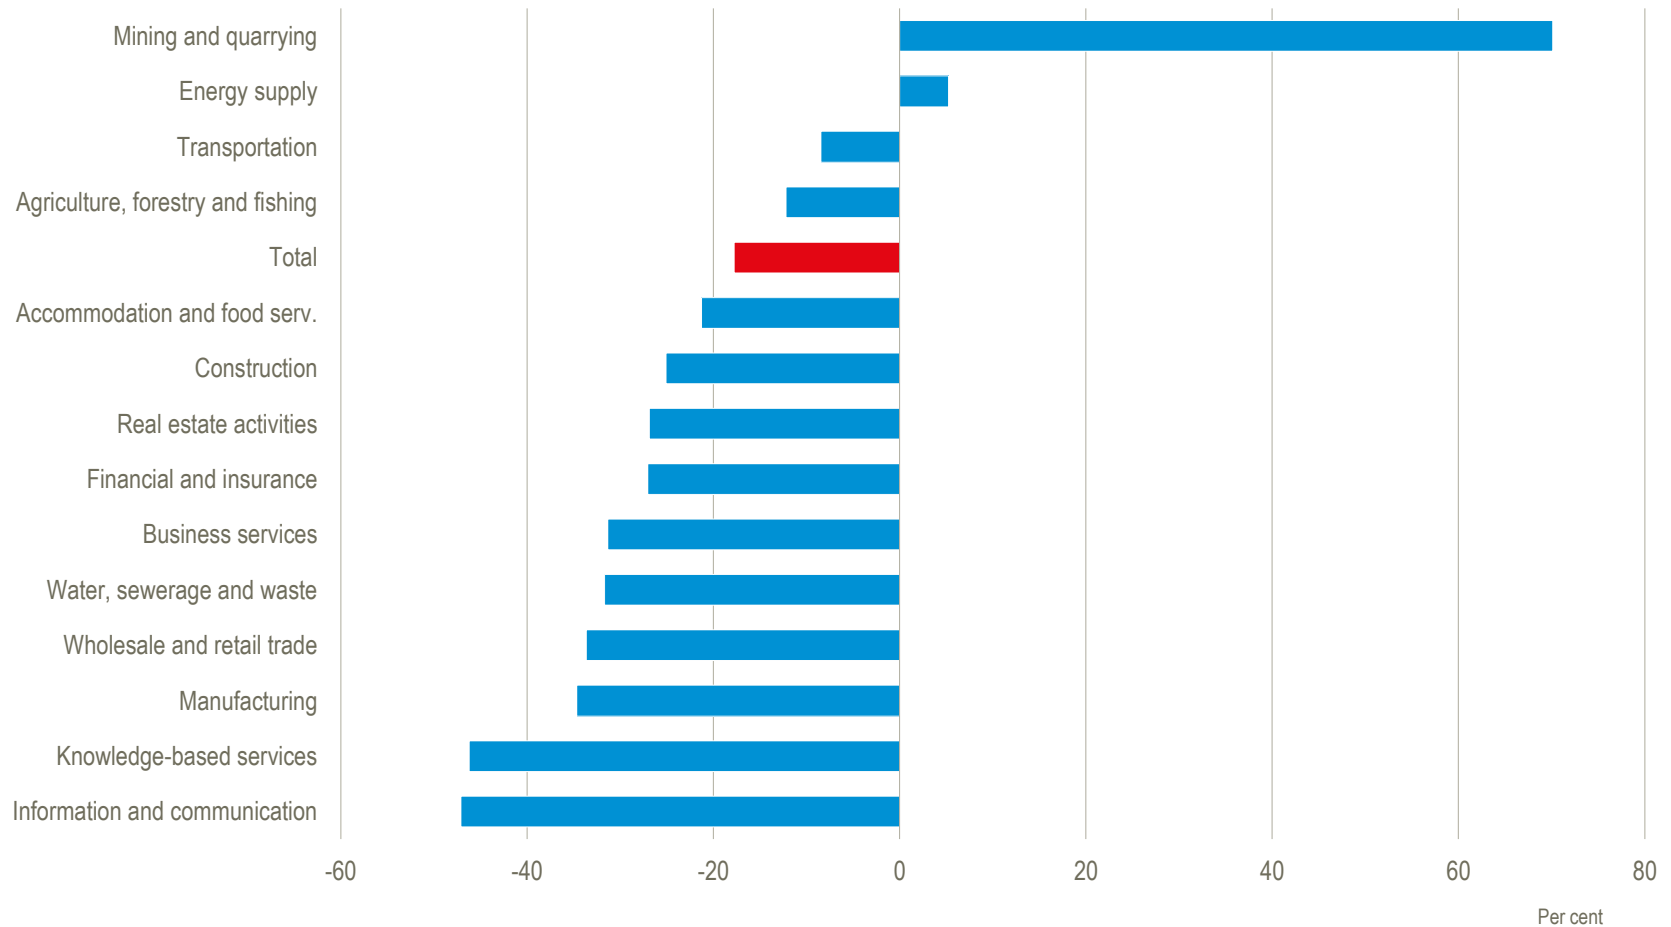

- Focus at 14 types of industry A-N, (mainly market activities, mainly private owned enterprises)
- 13 indicators selected (mainly based on UNCTAD core indicators)
- Existing statistics in Statistics Denmark
- Development since 2010 monitored
- See publication at:
<https://www.dst.dk/en/Statistik/nyheder-analyser-publ/Publikationer/VisPub?cid=44794>

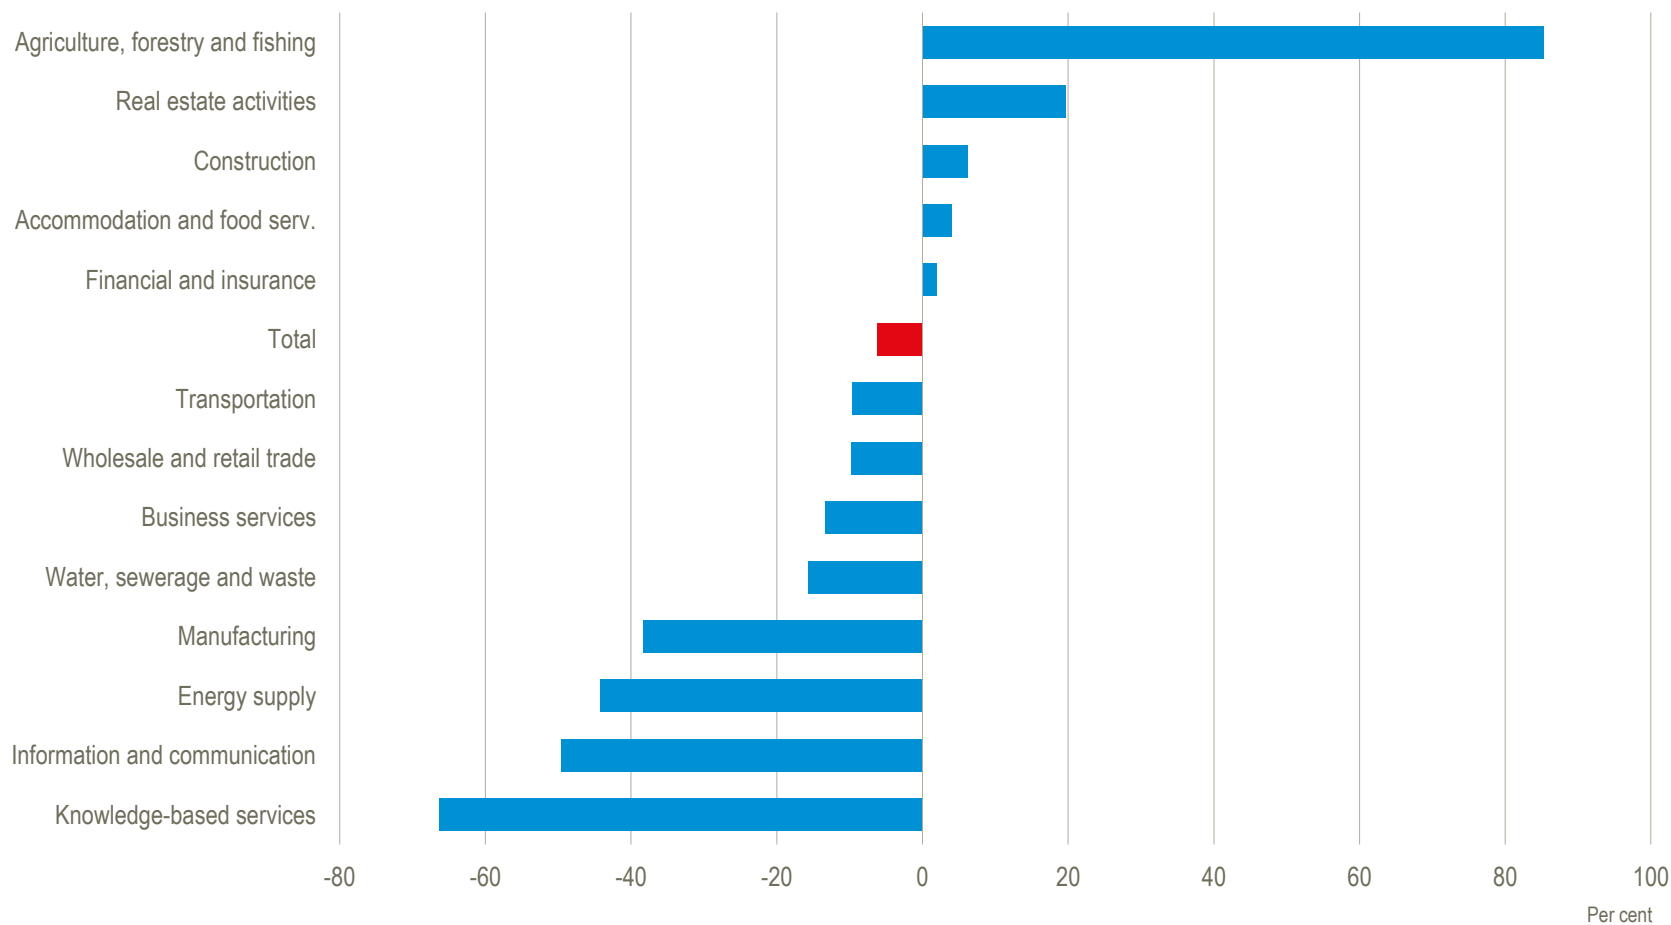

Value added at constant prices by industry (SDG-target 8.1)

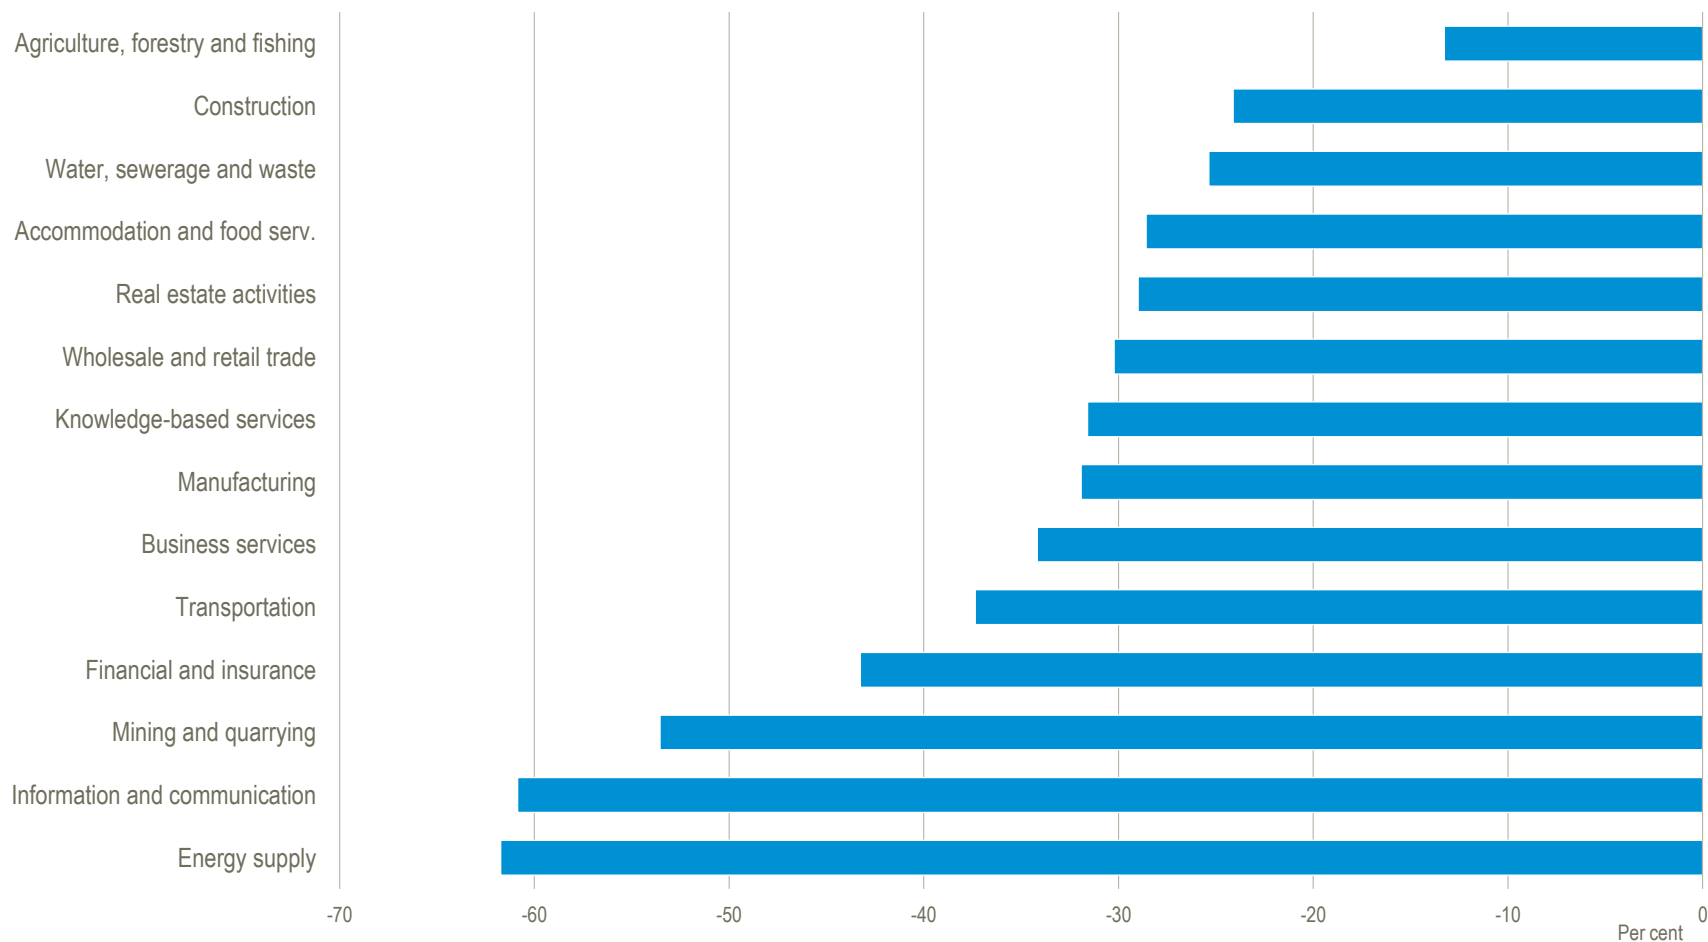

Development in gross energy consumption over value added, 2019/2010 (SDG-target 7.3.1)

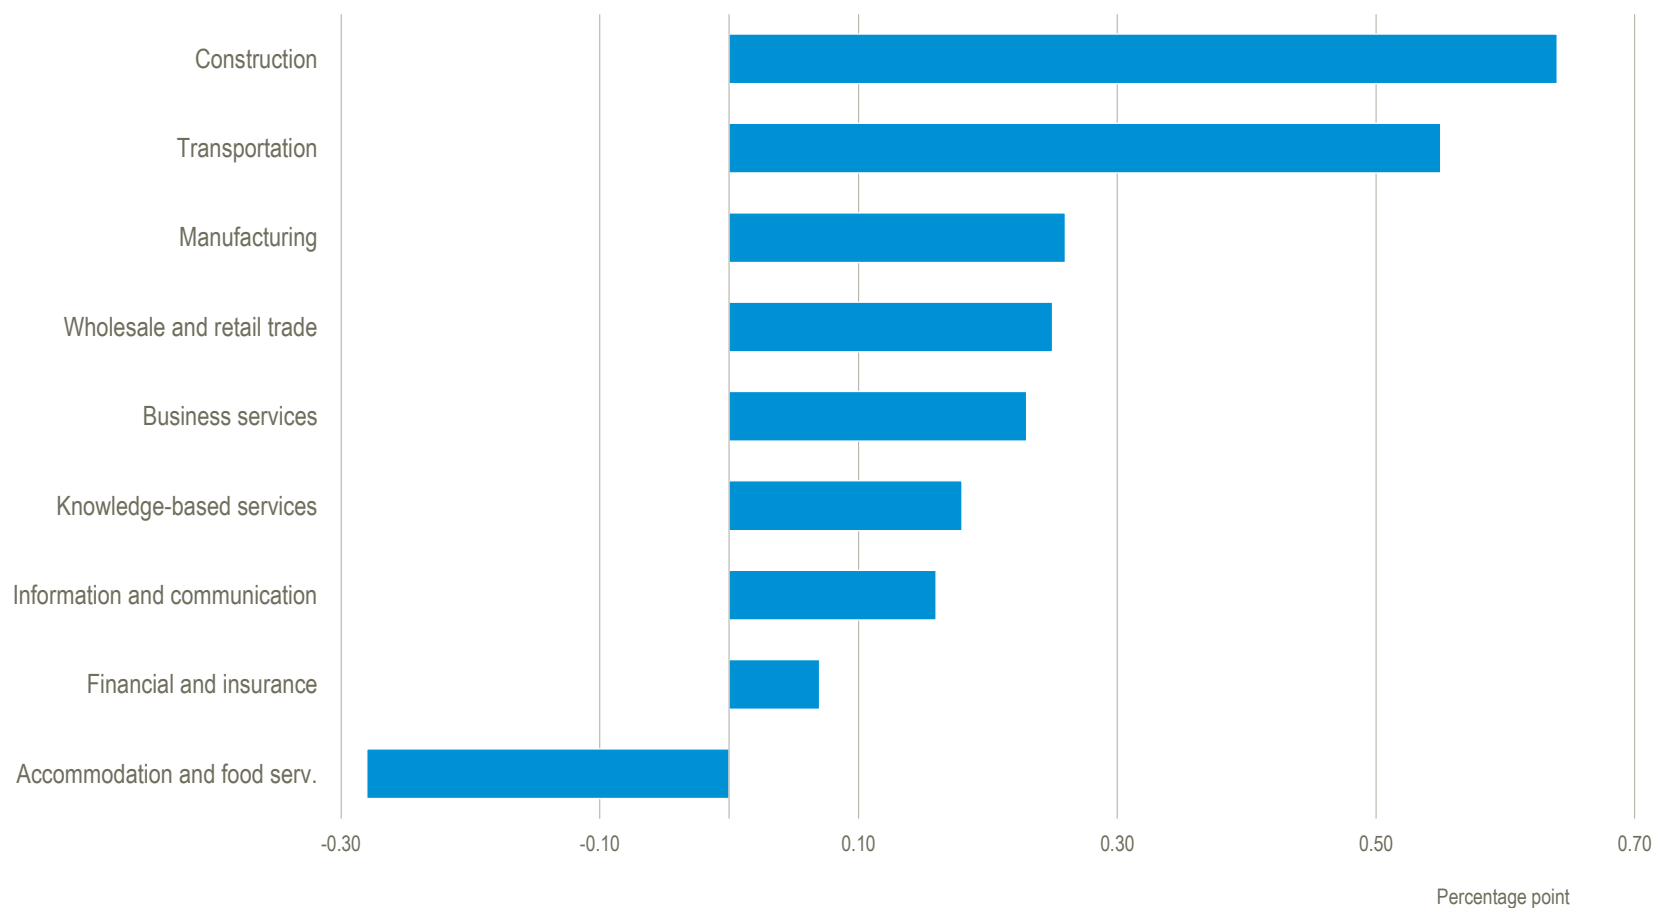

Development in waste volume in relation to value added, 2017/2010 by industry (SDG-goal 12)

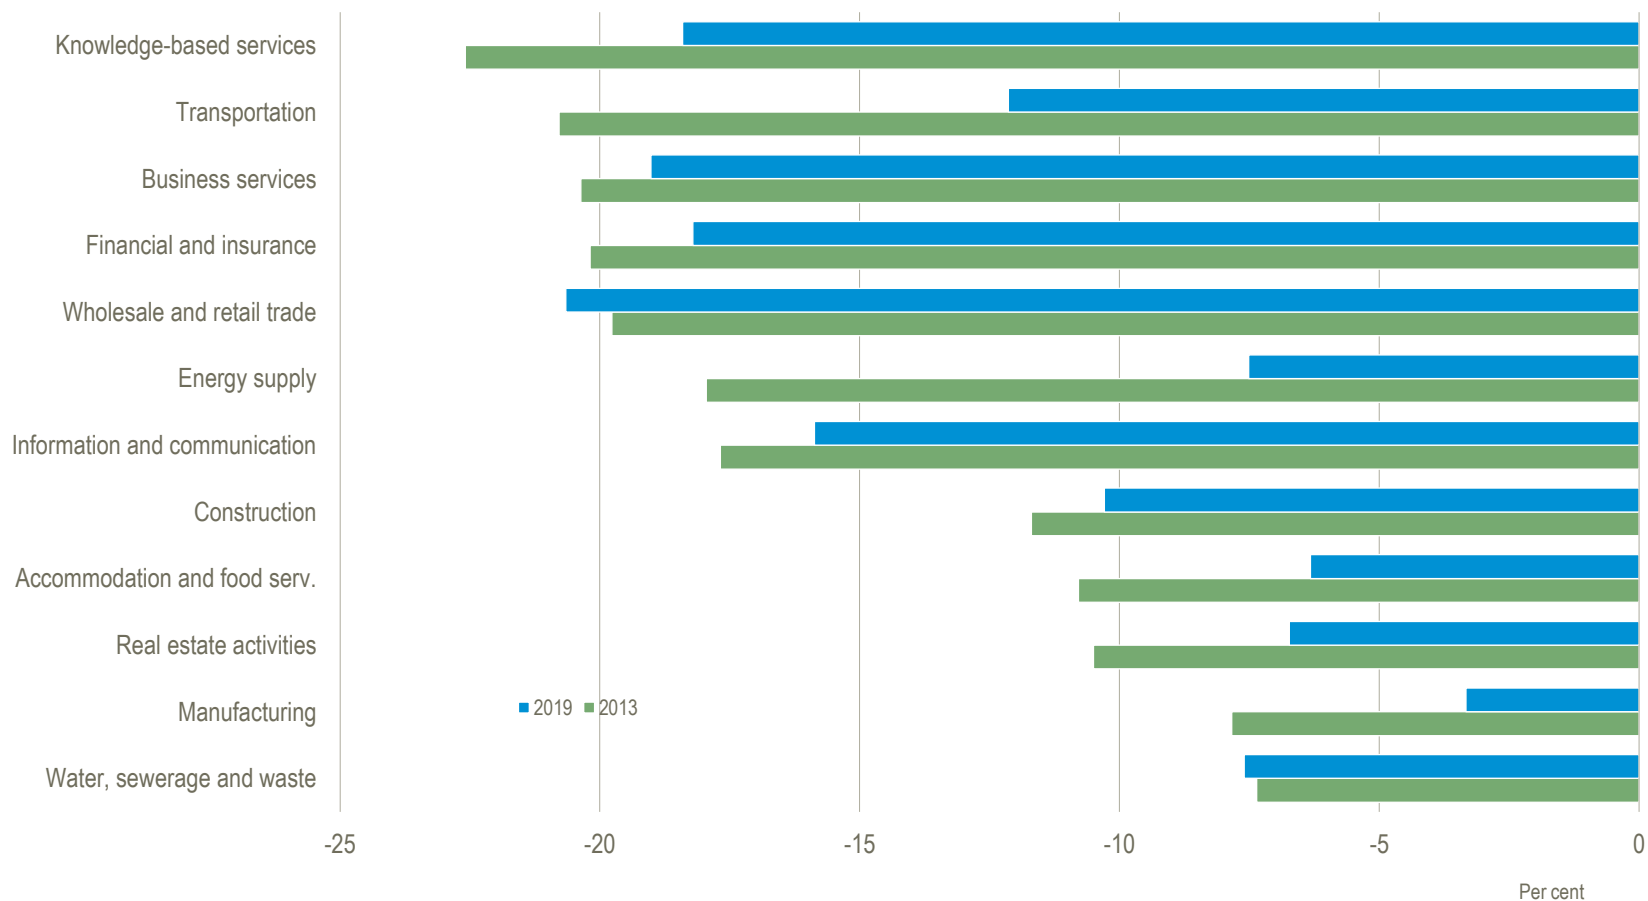

Development in accidents at work per 100,000 employees, 2017 compared to 2010 by industry (SDG-target 8.8.1)

Development in men's absence, own sickness, 2018 compared with 2013 by industry (SDG-target 8.8)
